The proposed rule change also makes technical amendments to the NASD's transaction reporting rules. The proposed rule change amends Schedule D to delete references to the Transaction Reporting System which has been replaced by the NASD's ACT system.[9] The proposed rule change also amends the transaction reporting rules to replace certain terms with terms more commonly used. For example, the proposal adds the term "Market" Operations Department to replace "NASDAQ" Operations Department.[10]

Under Schedule G, the proposed rule change replaces the term "designated" reporting member with the term "registered" reporting member.[11] The proposal also clarifies that an NASD member is a "registered" reporting market maker in only those eligible securities for which it has registered as a CQS market maker and that the member shall cease being a registered reporting market maker when it has withdrawn or voluntarily terminated its quotations in that security or when its quotations have been suspended or terminated by action of the NASD. The proposal also amends Schedule G to clarify that ACT is the service that, among other things, accommodates reporting and dissemination of last sale reports in eligible securities.

II. Discussion

The Commission believes that the proposed rule change is consistent with the requirements of the Act, and in particular, with sections 15A(b)(6) and 11A(a) (1) (C) of the Act. Section 15A(b) (6) of the Act requires that the NASD's rules be designed to prevent fradulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system. Section 11A(a)(1)(C) sets forth the objective of ensuring the availability to brokers, dealers and investors of information with respect to quotations for and tansactions in securities.[12]

Real-time transaction reporting is essential to the efficient and fair operation of the securities markets and to the establishment of an NMS. It is critical for those who trade to have access to accurate, up-to-the second information as to the prices at which transactions in particular securities are taking place.[13] Benefits of real-time transaction reporting include efficient pricing of securities, effective monitoring of the quality of executions, and enhanced liquidity of the market for securities.[14] Real-time transaction

---

[2] On November 2, 1992, the NASD amended the proposal to require real-time trade reporting of NASDAQ/National Market System ("NASDAQ/NMS") and NASDAQ Small-Cap securities for trades executed between 9:00 a.m. and 9:30 a.m. Letter from Richard G. Ketchum, Executive Vice President, NASD, to Elizabeth H. MacGregor, Branch Chief, Division of Market Regulation ("Division"), Commission, dated November 2, 1992.

The NASD subsequently withdrew the amendment and will file it as a separate proposed rule change pursuant to section 19(b)(2) of the Act. Letter from Robert E. Aber, Vice President and Deputy General Council, NASD, to Anthony R. Bosch, Attorney, Division, Commission, dated November 30, 1992.

[3] The proposed rule change amends parts XII and XIII of Schedule D, and amends Schedule G to the NASD By-Laws. See Securities Exchange Act Release No. 31241 (September 25, 1992), 57 FR 45646.

[4] NASD rules that require "real-time transaction reporting, required NASD members to report trades within 90 seconds of execution. NASD Rules, Schedule D, Part XII, Section 2, and Part XIII, section 2; and Schedule G, Section 2.

[5] The NASD rules defines normal market hours as 9:30 a.m. through 4 p.m. See NASD Rules, Schedule D, Part VI, Section 6, and Part VII, Section 3.

The proposal does not extend real-time transaction reporting for exchange-listed securities. NASD rules currently require members to submit real-time last sale reports of exchange-listed securities executed between 9:30 a.m. and 5:15 p.m. (the Consolidated Tape currently operates between 9:30 a.m. and 5:15 p.m.). For transactions in exchange-listed securities executed outside the hours of 9:30 a.m. and 5:15 p.m., NASD members are required to submit last sale reports weekly on Form T. NASD rules, Schedule G. Section 2.

[6] All times referred to are Eastern Time, unless otherwise noted.

[7] Currently, NASD rules requires real-time trade reporting in NASDAQ/NMS and NASDAQ Small-Cap securities through 5 p.m.

[8] Currently, transactions in NASDAQ Small-Cap securities reported between 4:10 p.m. and 5:00 p.m. are designated by the .T indicator. The .T indicator currently is not used for NASDAQ/NMS securities.

[9] ACT is the NASD's post-trade comparison system that among other things, accommodates reporting and dissemination of last sale reports in NASDAQ/NMS, NASDAQ Small-Cap, and exchange-listed securities. The instant rule change will not affect the member's rights and responsibilities under ACT.

[10] Among other things, NASD members report weekly on Form T to the Market Operations Department last sale reports executed after 5:15 p.m.

[11] A "registered reporting member" is an NASD member that is registered as a CQS market maker in a particular eligible security pursuant to NASD Rules, Schedule D, Part VII.

[12] The proposed rule change amends Schedule D, Part XII, which the Commission approved as a National Market System ("NMS") plan pursuant to section 11A of the Act and Rule 11Aa3-2 thereunder.

[13] See Senate Comm. on Banking, Housing, and Urb. Affairs, Report to Accompany S. 249; Securites Acts Amendments of 1975, S. rep. No. 75, 94th Cong., 1st Sess. 7-9 [Comm. Print 1975], reprinted in [1975] U.S. Code Cong. & Ad. News 179, 187.

[14] See Securities Exchange Act Release No. 30569 (April 10, 1992), 57 FR 13398.

reporting also captures an audit trail that provides regulatory information for market surveillance and for investigating questionable conduct, such as insider trading and manipulative activity.

The proposed rule change will extend real-time reporting of NASDAQ/NMS and NASDAQ Small-Cap securities to 5:15 p.m. and will make the NASD's real-time trade reporting rules for NASDAQ/NMS, NASDAQ Small-Cap, and exchange-listed securities more consistent. The proposed rule change also will increase real-time trade reporting of non-registered market markers and thus, will reduce the usage of Form T as a reporting vehicle for transactions in NASDAQ/NMS, NASDAQ Small-Cap, and exhange-listed securities effected between 9:30 a.m. and 5:15 p.m.

Thus, the proposed rule change will enhance real-time trade reporting of NASDAQ/NMS, NASDAQ Small-Cap, and exchange-listed securities. Real-time trade reports submitted to the NASD pursuant to the proposed rule change will be disseminated through the NASD's NASDAQ system and securities information vendors for NASDAQ/NMS and NASDAQ Small-Cap securities, and through the Consolidated Tape and securities information vendors for exchange-listed securities. This will provide broker-dealers and investors information necessary to make informed judgments about the securities offered for purchase or sale.

III. Conclusion

For the foregoing reasons, the Commission finds that the proposed rule change in consistent with the Act and the rules and regulations thereunder applicable to the NASD and, in particular, sections 15A(b)(6) and 11A(a)(1)(C) of the Act.

It Is Therefore Ordered, Pursuant to section 19(b)(2) of the Act, that the proposed rule change described above be, and thereby is, proposed.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Release No. 34–31596; File No. SR–NYSE–92–14]

December 14, 1992.

Self-Regulatory Organizations; the New York Stock Exchange, Inc.; Order Approving a Proposed Rule Change Relating to Amendments to the Specialist Performance Evaluation Questionnaire

I. Introduction

On June 18, 1992, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend its Specialist Performance Evaluation Questionnaire. Notice of the proposal appeared in the **Federal Register** on August 20, 1992.[3] No comments were received. This order approves the proposed rule change.

II. Description of the Proposal

The Specialist Performance Evaluation Questionnaire ("SPEQ") is an important tool in the Exchange's continuing effort to improve specialist performance and the stock allocation process.[4] Exemplary specialist performance may be rewarded with an improved chance to receive a stock allocation. The Exchange reviews the SPEQ process periodically in order to ensure that the instrument maintains its vitality and effectiveness.[5] The proposed amendments, described below, are the result of the Exchange's latest study of the SPEQ process.[6]

The amendments will restructure the SPEQ so that each of the five functions considered—dealer, service, competitiveness, communications, and administrative functions—will be weighted equally. Currently, the first three functions are weighted at 30% each and the last two functions are weighted at 5% each. The NYSE believes that an equal distribution of weight would be more appropriate to the importance of the functions and would lead to more objective evaluations of specialists as the weight given to a particular question or function would not be considered by brokers when evaluating a unit's performance.

The NYSE will use two versions of the questionnaire during each quarter's evaluation process and continue the practice of dispersing positively and negatively worded questions throughout the instrument.

In order to avoid any conflict of interest, the NYSE will preclude brokers from rating specialist units which maintain Exchange Rule 325(e) financial responsibility guarantees for them or have lease agreements with them.

The SPEQ will also be amended to provide space for voluntary signing by rating brokers. Specialists would not be informed which brokers signed the questionnaires. The signing would indicate a broker's willingness to discuss an evaluation with a Floor Governor. As a result of this proposal, the NYSE will use Floor Governors as liaisons to facilities communication between specialists and the brokers who rate them. In addition, under the proposal, specialists would be provided with an alphabetized list of brokers that rated their unit.[7]

The questionnaire would also be amended to permit a rating broker to indicate the percentage of the business he conducts (*e.g.*, retail or institutional) in the unit's stock. This information would not be used in connection with the calculation of a unit's score, but would accompany the broker's comments to assist specialists in their performance improvement efforts.

---

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b–4 (1991).

[3] Securities Exchange Act Release No. 31032 (August 13, 1992), 57 FR 37859.

[4] The SPEQ is a quarterly survey on specialist performance completed by eligible floor brokers. The SPEQ consists of 21 questions and requires floor brokers to rate, and provide written comments on, the performance of specialist units with whom they deal frequently.

NYSE Rule 103A contains standards for evaluating specialist performance and authorizes an Exchange committee to reallocate stocks assigned to a specialist unit whose performance is found to be substandard as determined by the Rule. Under Rule 103A, a specialist's performance is measured by a combination of SPEQ scores and objective standards of performance. Specialist performance, as measured by the SPEQ or the other objective criteria, is also he primary factor in allocating new stocks to specialists. See NYSE Allocation Policy and Procedures.

[5] The Exchange last revised the SPEQ in February, 1990 Securities Exchange Act Release No. 27675 (February 5, 1990), 55 FR 4922 (File No. SR–NYSE–89–32), among other things, by adopting a new scoring methodology for the SPEQ that provides specialists with their overall rank among all specialist units as well as a range of ranks, which shows their comparability to other units. Rule 103A, which sets forth performance standards for specialists, was last amended in February, 1991, when the new scoring methodology for the SPEQ was incorporated into the Rule so that specialists who are regularly among the lowest ranked units on a relative basis would be subject to performance improvement actions. Securities Exchange Act Release No. 28923 (February 27, 1991), 56 FR 9993 (File No. SR–NYSE–90–44).

[6] This proposed rule change does not amend the rating scale used on the SPEQ or the performance standards applicable to the SPEQ specified in Rule 103A.

[7] The NYSE indicated that typically thirty to thirty-five brokers rate each specialist unit.

In order to ensure that each specialist unit's pool of selected evaluators is roughly comparable and that the most qualified brokers, in terms of activity (*i.e.*, trades, share volume and days), are assigned to evaluate each unit, the NYSE will implement a guideline which would enable eligible brokers from order-generating firms to rate the same unit(s) in consecutive quarters and eligible two-dollar brokers to rate the same unit(s) in three out of every four quarters. The NYSE will require that at least 40% of every unit's assigned evaluators must be brokers from order-generating firms and, if necessary to meet the 40% minimum, assign such brokers as many as four units to evaluate each quarter.

Finally, the SPEQ would be amended to provide a space for comments on specialist performance by the head of a member organization's upstairs trading desk. These individual's input may be useful as a communications tool and as n additional perspective on specialist performance.

III. Discussion

After careful consideration of the applicable statutory provisions, the Commission believes the NYSE's proposal to amend the SPEQ is consistent with the Act and the rules and regulations thereunder applicable to a national securities exchange. The Commission therefore is approving the proposed rule change.

The Commission agrees that the SPEQ is an important tool in evaluating the quality of, and improving, specialists' performance, and aids the Exchange in its decisions to allocate stocks to specialists. The Commission appreciates the Exchange's efforts continually to refine the questionnaire and to change it periodically so that floor brokers who respond to the questionnaire four times a year do not become so accustomed to the document that their responses are stale.

The Commission believes that some of the changes approved today are designed to ensure that floor traders will give appropriate attention to answering the questions on the questionnaire. For example, the decision to issue two versions of the questionnaire, one with questions positively worded and the other with questions negatively worded, will force floor brokers to treat each questionnaire as unique. In addition, the questionnaire now gives floor brokers the choice to sign the questionnaires, indicating the broker's willingness to discuss the evaluation with a Floor Governor. Providing a space for comments by the member's upstairs trading desk also is designed to elicit additional views on a specialist's performance.[8]

The Commission supports those amendments that are designed to avoid a conflict of interest by precluding brokers from rating specialist units which maintain Exchange Rule 325(e) financial responsibility guarantees for them or who have lease agreements with them. Avoiding even the appearance of a conflict of interest can strengthen the specialist system and the Exchange and instill confidence in the Exchange's SPEQ process.

The Commission believes that other changes to the SPEQ are reasonably designed to enhance the value of the questionnaire. For example, there is a new guideline that would enable eligible brokers from order-generating firms to rate the same specialist unit(s) in consecutive quarters, and a requirement that at least 40% of every unit's assigned evaluators must be brokers from order-generating firms. This would ensure input by brokers having the most relevant history with the specialist unit being evaluated. Moreover, based on recent experience, the Exchange has determined to give equal weight to the five functions evaluated in the questionnaire. The Commission believes it is reasonable for the NYSE to determine that the equal weighting of each category will more accurately reflect a specialist's performance.[9]

For the foregoing reasons, the Commission is approving the proposed rule change. The Commission believes that the proposed rule change is consistent with section 6(b)(5) of the Act[10] because it promotes just and equitable principles of trade, and removes impediments to and perfects the mechanism of a free and open market and a national market system. The Commission believes that the proposed rule change can result in enhancing the Exchange's specialist evaluation process and that the proposal is likely to encourage improved specialist performance consistent with the protection of investors and the public interest. In this regard, the changes should help ensure the integrity of the specialist evaluation process, in addition to providing an opportunity for brokers in firms to provide more information on the evaluations which may be useful for both specialists and the Exchange in evaluating their performance. Further, the Commission finds that the proposal is consistent with section 11(b)[11] of the Act and Rule 11b–1[12] thereunder, which allow exchanges to promulgate rules relating to specialists in order to maintain fair and orderly markets and to remove impediments to and protect the mechanism of a national market system.

IV. Conclusion

For the foregoing reasons, the Commission has determined to approve the proposed rule change.

It is therefore ordered, Pursuant to section 19(b)(1) of the Act, that the proposed rule change (NYSE–92–14) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[13]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[8] As noted above, specialists will also, under the proposal being approved herein, be provided with an alphabetized list of floor brokers that rated their unit, but would not be provided with the actual ratings from each broker. Because usually thirty to thirty-five brokers rate each unit, we do not believe providing this limited information to specialists should unduly inhibit brokers from honestly evaluating specialist.

[9] In Release No. 34–27675 (note 5, *supra*), the Commission first approved the current differential weighing scale for the five functions. Based on several review periods experience, the Exchange now believes that two of the functions were underweighted, and has determined to revert to equal weights. [Investment Company Act Release No. 19153; 811–5048]

National Global Allocation Fund; Application for Deregistration

December 14, 1992.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 (the "Act").

APPLICANT: National Global Allocation Fund.

RELEVANT ACT SECTIONS: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company.

FILING DATE: The application on Form N–8F was filed on November 6, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a

copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on January 11, 1993, and should be accompanied by proof of service on applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, D.C. 20549. Applicant, Two Pickwick Plaza, Greenwich, Connecticut 06830.

FOR FURTHER INFORMATION CONTACT: James J. Dwyer, Staff Attorney, at (202) 504–2920, or Elizabeth G. Osterman, Branch Chief, at (202) 272–3016 (Office of Investment Company Regulation, Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is an open-end non-diversified management investment company registered under the Act. Until October 12, 1992, when it filed a dissolution of trust with the Massachusetts Secretary of State, applicant was a Massachusetts business trust.

2. On March 5, 1987, applicant filed a registration statement on form N-1A under the Securities Act of 1933 and section 8(b) of the Act to register an unlimited number of shares. The registration statement became effective on June 15, 1987, and the initial public offering commenced immediately thereafter.

3. On March 13, 1992 and June 12, 1992, applicant's board of trustees authorized an agreement and plan of reorganization (the "Plan") whereby applicant would transfer all of its assets and liabilities to National Worldwide Opportunities Fund ("Worldwide"), a registered investment company (File No. 811–945) organized under the laws of the Commonwealth of Massachusetts. On that same date, applicant's board of trustees also approved the proxy materials pursuant to which shareholder approval of the Plan was solicited.

4. Applicant had 3,542,154.491 shares outstanding, with each share having a net asset value of $11.69 as of July 31, 1992. On or about August 24, 1992, applicant distributed to its shareholders proxy materials relating to the proposed reorganization. At a special meeting held on September 25, 1992, a majority of applicant's shareholders approved the Plan.

5. Pursuant to the Plan and in compliance with rule 17a-8, at the end of the business day on September 25, 1992, applicant transferred to Worldwide all of its existing assets and liabilities in exchange for Worldwide shares, both full and fractional, having an aggregate net asset value equal to applicant's aggregate net asset value. Applicant then distributed pro rata the Worldwide shares to applicant's record shareholders in complete liquidation and termination of applicant.

6. Applicant and Worldwide respectively assumed the expenses applicable to the Plan. Such expenses consisted of legal fees, registration fees, transfer taxes (if any), the fees of banks and the transfer agent, the cost of preparing, printing, copying, and mailing proxy solicitation materials, and the cost of the proxy solicitor. No brokerage commissions were paid in connection with the Plan.

7. At the time of the application, applicant had no shareholders, assets, or liabilities. Applicant is not a party to any litigation or administrative proceeding. Applicant is not presently engaged in, nor does it propose to engage in, any business activities other than those necessary for the winding up of its affairs.

For the SEC, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[Release No. 35–25707]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

December 14, 1992.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. all interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by January 7, 1993, to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Hope Gas, Inc.

[70–8091]

Hope Gas, Inc. ("Hope Gas"), 600 Union National Center West, Clarksburg, West Virginia 26302, a wholly owned gas public-utility subsidiary company of Consolidated Natural Gas Company, a registered holding company, has filed an application under section 9(c)(3) of the Act.

Hope Gas proposes to acquire before December 31, 1993, a limited partner interest in Vandalia Capital Limited Partnership (the "Partnership"), a West Virginia limited partnership, by acquiring 10 Class B Units of the Partnership for an aggregate purchase price of $1 million. The Partnership, which will have a ten-year term, will be qualified as a West Virginia Capital Company under the West Virginia Capital Company Act, part of a program to encourage private venture capital investments in West Virginia businesses by providing certain state tax credits equal to 50% of their venture capital investment. The Partnership also intends to form and seek federal approval for a Small Business Investment Corporation as the primary investment vehicle for the Partnership. The Partnership may also participate jointly in pooled investments with other capital companies.

Hope Gas will be the sole owner of the Class B Units, holding 25% of the equity of the Partnership. The Class B Units entitle Hope Gas to certain tax credits, which it estimates will result in net tax savings of $650,000.

The general partner of the Partnership will be responsible for the management and investment decisions of the Partnership. Hope Gas' voting power will be limited to dissolving the Partnership and amending certain Partnership provisions; Hope Gas, however, will have no power to remove the general partner, or elect a new general partner.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

Issuer Delisting; Notice of Application To Withdraw From Listing and Registration; (Terra Industries, Inc., Common Shares, No Par Value) File No. 1-8520

December 15, 1992.

Terra Industries, Inc. ("Company") has filed an application with the Securities and Exchange Commission ("Commission"), pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2-2(d) promulgated thereunder, to withdraw the above specified security from listing and registration on the Pacific Stock Exchange, Inc. ("PSE").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

According to the Company, it decided to withdraw the above-specified security from listing on the PSE because the Company believes that its trading volume of the Shares on the Exchange is limited. The Company's major stockholders see no advantage in retaining such listing. Also, according to the Company, it has adequate liquidity in the Shares as a result of the listing of the Shares on the New York Stock Exchange, Inc. ("NYSE") and Toronto Stock Exchange, Inc. ("TSE"). The Company believes that continued listing of the Shares on the Exchange would involve unnecessary expense.

Any interested person may, on or before January 7, 1993, submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the exchanges and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF STATE

Office of the Acting Secretary of State

[Public Notice 1744]

Cross Border Transportation Facilities

AGENCY: Department of State.

ACTION: Notice of application.

SUMMARY: Notice is hereby given that the Department of State has received as application for a Presidential permit to build and operate a railway tunnel connecting the United States and Canada between Sarina, Ontario and Port Huron, Michigan.

DATES: Interested parties are invited to submit, in duplicate, comments relative to the proposal on or before January 21, 1993.

ADDRESSES: For mailing public comments: Office of Maritime and Land Transport (EB/TRA/MA), room 5828, Department of State, Washington, DC 20520-5816.

FOR FURTHER INFORMATION CONTACT: Stephen Miller, Office of Maritime and Land Transport, Department of State, Washington, DC 20520-5820 (202) 647-6961.

SUPPLEMENTARY INFORMATION: The Department of State has received an application from the Canadian National Railway Company ("CN"), a Canadian corporation, and three of its wholly owned U.S. subsidiaries, Grand Trunk Corporation, St. Clair Tunnel Company and the St. Clair Tunnel Construction Company, for a Presidential permit to construct and operate a railway tunnel which will connect the United States and Canada under the St. Clair River between Sarnia, Ontario and Port Huron, Michigan.

The new tunnel would be built approximately 80 feet to the north of an existing tunnel currently operated by CN. It would be used to transport railcars containing freight and passengers. The existing tunnel is not large enough to accommodate modern railroad cars such as bi- and tri-level cars used extensively by the automotive industry and double-stacked intermodal container cars. The applicants propose to take the existing tunnel out of service and fill it in once the new tunnel is in service.

Dated: December 14, 1992.

Arnold Kanter,

Acting Secretary of State.

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended December 11, 1992

The following Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits were filed under subpart Q of the Department of Transportation's Procedural Regulations (see 14 CFR 302.1701 et. seq.). The due date for Answers, Conforming Applications, or Motions to Modify Scope are set forth below for each application. Following the Answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: 48547
Date filed: December 11, 1992
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: January 8, 1992
Description: Application of American Airlines, Inc., pursuant to section 401 of the Act and subpart Q of the Regulations, applies for renewal and amendment of its certificate of public convenience and necessity for Route 543 to authorize foreign air transportation of persons, property and mail between any point in the United States and any point in Venezuela.

Docket Number: 48548
Date filed: December 11, 1992
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: January 8, 1992
Description: Application of American Airlines, Inc., pursuant to section 401 of the Act and subpart Q of the Regulations, applies for renewal of its certificate of public convenience and necessity for Route 542 (Puerto Rico-Caracas).

Docket Number: 48550
Date filed: December 11, 1992
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: January 8, 1993
Description: Application of Air Ukraine, pursuant to section 402 of the Act and subpart Q of the Regulations requests a foreign air carrier permit authorizing it to engage in foreign scheduled air transportation of persons, property and mail as follows: From a point or points in Ukraine to New York, New York, Chicago, Illinois, and Washington, DC, United States of America.

Federal Aviation Administration

Control of Parts Shipped Prior to Type Certificate Issuance

AGENCY: Federal Aviation Administration, DOT.
ACTION: Notice of availability.

SUMMARY: This notice announces the availability of an Advisory Circular (AC) concerning the Control of Parts Shipped Prior to Type Certificate Issuance. This Advisory Circular provides information and guidance to the general public and the aviation industry concerning compliance with the Federal Aviation Regulation concerning certification procedures for products and parts.

ADDRESSES: Copies of AC 21–32 can be obtained from the following: Federal Aviation Administration, Department of Transportation, Utilization and Storage Section, M443.2, 400 Seventh Street SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: Federal Aviation Administration, Aircraft Manufacturing Division, Production Certification Branch, AIR–220, room 333, 800 Independence Avenue SW., Washington, DC 20591, phone: (202) 267–8361.

SUPPLEMENTARY INFORMATION: This AC provides information and guidance concerning the control of parts proposed to be shipped by manufacturers with an approved production inspection system (APIS) or production certificate (PC) (production approval holders) in advance of type certification of a new aircraft, aircraft engine, or propeller (product).

Issued in Washington, DC on October 16, 1992.

Janice W. Elrod,
Acting Assistant Manager, Aircraft Manufacturing Division.

[Summary Notice No. PE–92–37]

Petitions for Exemption; Summary of Petitions Received, Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.
ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR part 11), this notice contains a summary of certain petitions seeking relief from specified

requirements of the Federal Aviation Regulations (14 CFR chapter I), dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and must be received on or before January 11, 1993.

ADDRESSES: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rule Docket (AGC–10), Petition Docket No. _____, 800 Independence Avenue SW., Washington, DC 20591.

The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC–10), room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267–3132.

FOR FURTHER INFORMATION CONTACT: Mrs. Jeanne Trapani, Office of Rulemaking (ARM–1), Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267–7624.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of part 11 of the Federal Aviation Regulations (14 CFR part 11).

Issued in Washington, DC, on December 14, 1992.

Donald P. Byrne,

Assistant Chief Counsel for Regulations.

Petitions for Exemption

Docket No.: 26440.
Petitioner: Falcon Jet Corporation.
Sections of the FAR Affected: 14 CFR 47.65 and 47.69(b).
Description of Relief Sought: To allow the extension of the termination date of Exemption No. 5315, which expires on May 30, 1993, and which permits Falcon Jet Corporation to obtain a Dealer's Aircraft Registration Certificate without meeting the United States citizenship requirements, and to conduct limited flights outside of the United States under the certificate, subject to conditions and limitations.

Docket No.: 110CE
Petitioner: Beech Aircraft Corporation.
Sections of the FAR Affected: 14 CFR 23.53(c)(1).
Description of Relief Sought: To allow Beech Aircraft Corporation to use the ground minimum control speed to determine the takeoff decision speed for its Beech Models B300 and B300C.

Docket No.: 110CE.
Petitioner: Advanced Aerodynamics and Structures, Inc.
Sections of the FAR Affected: 14 CFR 23.903(e)(2).
Description of Relief Sought: To allow the Advanced Aerodynamics and Structures, Inc.'s Jetcruzer 450 to operate with a PT6A–27 Turboprop engine without complying with the stop rotation requirement of the rule.

Dispositions of Petitions

Docket No.: 25636.
Petitioner: International Aero Engines AG.
Sections of the Far Affected. 14 CFR 21.325(b)(1) and (3).
Description of Relief Sought/ Disposition: To allow export airworthiness approvals to be issued for Class I products (engines) assembled and tested in the United Kingdom, and for Class II and III products manufactured in the International Aero Engines consortium countries of Italy, West Germany, Japan, and the United Kingdom.
Grant, December 7, 1992, Exemption No. 4991B

Docket No.: 25743.
Petitioner: Mr. Ted Rutherford.
Sections of the FAR Affected: 14 CFR 121.383(c).
Description of Relief Sought/ Disposition: To allow Mr. Rutherford to serve as a pilot on an airplane engaged in operations under this part after his 60th birthday.
Denial, November 30, 1992, Exemption No. 5564

Docket No.: 26548.
Petitioner Mr. Joseph S. Davis, Jr.
Sections of the FAR Affected: 14 CFR 121.383(c).
Description of Relief Sought: To allow Mr. Joseph S. Davis, Jr. to serve as a pilot on an airplane engaged in part 121 operations after his 60th birthday.
Denial, December 3, 1992, Exemption No. 5571

Docket No: 26593.
Petitioner: Mr. Robert M. Orr.
Sections of the FAR Affected: 14 CFR 121.383 (c).
Description of Relief Sought/ Disposition: To allow Mr. Orr to serve as a pilot after his 60th birthday on an airplane engaged in operations under this part during the en route cruise portion of flight, pursuant to the duties and limitations of 14 CFR 121.543(b) of the FAR, entitled "Flight Crewmember at Controls".
Denial, November 30, 1992, Exemption No. 5563

Docket No: 26686.
Petitioner: Evergreen International Airlines, Inc.
Sections of the FAR Affected: 14 CFR 121.583(a)(2).
Description of Relief Sought/ Disposition: To allow Evergreen International Airlines, Inc., to transport persons who are not company employees in its airplanes without complying with certain passenger-carrying airplane requirements, operation requirements, and certain passenger requirements.
Denial, November 30, 1992, Exemption No. 5565

Docket No: 27015.
Petitioner: Air Transport Association of America.
Sections of the FAR Affected: 14 CFR 121.311(b) and (c).
Description of Relief Sought/ Disposition: To allow member airlines of the Air Transport Association of America and other similarly situated part 121 operators to extend the effective date by which they must comply with the portions of this section that address the use of child restraint systems on aircraft.
Denial, November 30, 1992, Exemption No. 5566

[Summary Notice No. PE–92–38]

Petitions for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitioners.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR chapter I), dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and must be received on or before January 11, 1993.

ADDRESSES: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rule Docket (AGC–10), Petition Docket No. _____, 800 Independence Avenue, SW., Washington, DC 20591.

The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC–10), room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–3132.

FOR FURTHER INFORMATION CONTACT: Mrs. Jeanne Trapani, Office of Rulemaking (ARM–1), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–7624.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of part 11 of the Federal Aviation Regulations (14 CFR part 11).

Issued in Washington, DC, on December 14, 1992.

Donald P. Byrne,

Assistant Chief Counsel for Regulations.

Petitions for Exemption

Docket No.: 27039.
Petitioner: William A. McCullough.
Sections of the FAR Affected: 14 CFR 61.103(a).
Description of Relief Sought: To allow Mr. McCullough an exemption from the regulation that requires a person to be at least 17 years of age to be eligible for a private pilot certificate, and to allow him to accrue Pilot-in-Command flight time in cross-country flights in a powered aircraft with other than a student pilot certificate in order to apply for an instrument rating. Mr. McCullough is a 16-year-old student pilot who currently meets the knowledge, proficiency, and experience requirements to apply for a private pilot certificate.

BILLING CODE 4910–13–M

Aviation Rulemaking Advisory Committee; Transport Airplane and Engine Subcommittee; Systems Design and Analysis Harmonization Working Group

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of establishment of Systems Design and Analysis Harmonization Working Group.

SUMMARY: Notice is given of the establishment of the Systems Design and Analysis Harmonization Working Group of the Transport Airplane and Engine Subcommittee. This notice informs the public of the activities of the Transport Airplane and Engine Subcommittee of the Aviation Rulemaking Advisory Committee.

FOR FURTHER INFORMATION CONTACT: Mr. William J. (Joe) Sullivan, Executive Director, Transport Airplane and Engine Subcommittee, Aircraft Certification Service (AIR–3), 800 Independence Avenue, SW., Washington, DC 20591, Telephone: (202) 267–9554; FAX: (202) 267–5364.

SUPPLEMENTARY INFORMATION: The Federal Aviation Administration (FAA) established an Aviation Rulemaking Advisory Committee (56 FR 2190, January 22, 1991) which held its first meeting on May 23, 1991 (56 FR 20492, May 3, 1991). The Transport Airplane and Engine Subcommittee was established at that meeting to provide advice and recommendations to the Director, Aircraft Certification Service, FAA, regarding the airworthiness standards for transport airplanes, engines and propellers in parts 25, 33 and 35 of the Federal Aviation Regulations (14 CFR parts 25, 33 and 35).

The FAA announced at the Joint Aviation Authorities (JAA)–Federal Aviation Administration (FAA) Harmonization Conference in Toronto, Ontario, Canada, (June 2–5, 1992) that it would consolidate within the Aviation Rulemaking Advisory Committee structure an ongoing objective to "harmonize" the Joint Aviation Requirements (JAR) and the Federal Aviation Regulations (FAR). Coincident with that announcement, the FAA assigned to the Transport Airplane and Engine Subcommittee those projects related to JAR/FAR 25, 33 and 35 harmonization which were then in the process of being coordinated between the JAA and the FAA. The harmonization process included the intention to present the results of JAA/FAA coordination to the public in the form of either a Notice of Proposed Rulemaking or an advisory circular—an objective comparable to and compatible with that assigned to the Aviation Rulemaking Advisory Committee. The Transport Airplane and Engine Subcommittee, consequently, established the Systems Design and Analysis Harmonization Working Group.

Specifically, the Working Group's task is the following: The Systems Design and Analysis Harmonization Working Group is charged with making recommendations to the Transport Airplane and Engine Subcommittee concerning the FAA disposition of the following subject recently coordinated between the JAA and the FAA:

Equipment, Systems and Installations: Develop guidance material concerning the evaluation and control of certification maintenance requirements created to satisfy the requirements of FAR 25.1309 for newly certificated transport category airplanes (AC 25.1309–1A; ref. FAR 25.1309).

Reports: A. Recommend time line(s) for completion of each task, including rationale, for Subcommittee consideration at the meeting of the subcommittee held following publication of this notice.

B. Give a detailed conceptual presentation on each task to the Subcommittee before proceeding with the work stated under items C, below.

C. Draft a change to Advisory Circular 25.1309–1A providing appropriate guidance material.

D. Give a status report on each task at each meeting of the Subcommittee.

The Systems Design and Analysis Harmonization Working Group will be comprised of experts from those organizations having an interest in the tasks assigned. A Working Group member need not necessarily be a representative of one of the organizations of the parent Transport Airplane and Engine Subcommittee or of the full Aviation Rulemaking Advisory Committee. An individual who has expertise in the subject matter and wishes to become a member of the Working Group should write the person listed under the caption **FOR FURTHER INFORMATION CONTACT** expressing that desire, describing his or her interest in the task, and the expertise he or she would bring to the Working Group. The request will be reviewed with the Subcommittee and Working Group Chairs and the individual will be advised whether or not the request can be accommodated.

The Secretary of Transportation has determined that the information and use of the Aviation Rulemaking Advisory Committee and its subcommittees are necessary in the public interest in connection with the performance of duties of the FAA by law. Meetings of the full Committee and any subcommittees will be open to the public except as authorized by section 10(d) of the Federal Advisory

Committee Act. Meetings of the Systems Design and Analysis Harmonization Working Group will not be open to the public except to the extent that individuals with an interest and expertise are selected to participate. No public announcement of Working Group meetings will be made.

Issued in Washington, DC, on December 11, 1992.

William J. Sullivan,

Executive Director, Transport Airplane and Engine Subcommittee, Aviation Rulemaking Advisory Committee.

[FR Doc. 92-30884 Filed 12-18-92; 8:45 am]

BILLING CODE 4910-13-M

Aviation Rulemaking Advisory Committee; Aircraft Certification Procedures Subcommittee: International Certification Procedures Harmonization Working Group

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of establishment of the International Certification Procedures Working Group.

SUMMARY: Notice is given of the establishment of the International Certification Procedures Working Group by the Aircraft Certification Procedures Subcommittee. This notice informs the public of the activities of the Aircraft Certification Procedures Subcommittee of the Aviation Rulemaking Advisory Committee.

FOR FURTHER INFORMATION CONTACT: Mr. William J. (Joe) Sullivan, Executive Director, Aircraft Certification Procedures Subcommittee, Aircraft Certification Service (AIR-3), 800 Independence Avenue, SW., Washington, DC 20591, Telephone: (202) 267-9554; FAX: (202) 267-9562.

SUPPLEMENTARY INFORMATION: The Federal Aviation Administration (FAA) established an Aviation Rulemaking Advisory Committee (56 FR 2190, January 22, 1991) which held its first meeting on May 23, 1991 (56 FR 20492, May 3, 1991). The Aircraft Certification Procedures Subcommittee was established subsequently meeting to provide advice and recommendations to the Director, Aircraft Certification Service, FAA, regarding the aircraft certification procedures in part 21 of the Federal Aviation Regulations (57 FR 39267; August 28, 1992).

The FAA announced at the Joint Aviation Authorities (JAA)–Federal Aviation Administration (FAA) Harmonization Conference in Toronto, Ontario, Canada, (June 2-5, 1992) that it would consolidate within the Aviation Rulemaking Advisory Committee structure an ongoing objective to "harmonize" the Joint Aviation Requirements (JAR) and the Federal Aviation Regulations (FAR). Coincident with that announcement, the FAA assigned to the Aircraft Certification Procedures Subcommittee those rulemaking projects related to international certification procedures for type certification of new and derivative aircraft which were then in the process of being coordinated between the JAA and the FAA. The Harmonization process included the intention to present the results of JAA/FAA coordination to the public in the form of either a Notice of Proposed Rulemaking or an advisory circular—an objective comparable to and compatible with that assigned to the Aviation Rulemaking Advisory Committee. The Aircraft Certification Procedures Subcommittee, consequently, established the International Certification Procedures Working Group.

Specifically, the Working Group's tasks are the following: The International Certification Procedures Working Group is charged with making recommendations to the Aircraft Certification Procedures Subcommittee concerning the FAA disposition of the following rulemaking subject recently coordinated between the JAA and the FAA:

The International Certification Procedures Working Group is charged with making recommendations to the Aircraft Certification Procedures Subcommittee concerning the FAA disposition of rulemaking subjects recently coordinated between the JAA and the FAA concerning the type certification procedures for changes to aeronautical products. Specifically, considering factors such as safety benefits, resources, and service experience, the working group should address the following issues:

1. Can later revisions of the airworthiness standards be used for the certification basis of changes to aeronautical products?

2. Can later revisions of the airworthiness standards be incorporated into the existing fleet?

3. Can new revisions of the airworthiness standards be incorporated into aeronautical products in production and in operation, as well as in new designs?

Reports: A. Recommend time line(s) for completion of the task, including rationale, for Subcommittee consideration at the meeting of the subcommittee held following publication of this notice.

B. Give a detailed conceptual presentation on the task to the Subcommittee before proceeding with the work stated under item C through E, below.

C. Draft a Notice of Proposed Rulemaking for the tasks proposing new or revised requirements, a supporting economic analysis, and other required analysis.

D. Draft an advisory circular to provide guidance complementing the rules proposed in the Notice of Proposed Rulemaking, and any other collateral documents the working group determines to be needed.

E. Recommend a training syllabus for FAA employees charged with administering the rule, including videotapes and other training support.

F. Give a status report on the task at each meeting of the Subcommittee.

The International Certification Procedures Working Group will be comprised of experts from those organizations having an interest in the task assigned to it. A working group member need not necessarily be a representative of one of the organizations of the parent Aircraft Certification Procedures Subcommittee or of the full Aviation Rulemaking Advisory Committee. An individual who has expertise in the subject matter and wishes to become a member of the working group should *write* the person listed under the caption **FOR FURTHER INFORMATION CONTACT** expressing that desire, describing his or her interest in the task, and the expertise he or she would bring to the working group. The request will be reviewed with the subcommittee chair and working group leader, and the individual advised whether or not the request can be accommodated.

The Secretary of Transportation has determined that the information and use of the Aviation Rulemaking Advisory Committee and its subcommittees are necessary in the public interest in connection with the performance of duties imposed on the FAA by law. Meetings of the full committee and any subcommittees will be open to the public, except as authorized by section 10(d) of the Federal Advisory Committee Act. Meetings of the International Certification Procedures Working Group will not be open to the public, except to the extent that individuals with an interest and expertise are selected to participate. No public announcement of working group meetings will be made.

Issued in Washington, DC, on December 11, 1992.

William J. Sullivan,

Executive Director, Aircraft Certification Procedures Subcommittee, Aviation Rulemaking Advisory Committee.

[FR Doc. 92–30887 Filed 12–18–92; 8:45 am]

BILLING CODE 4910–13–M

Aircraft Certification Procedures Subcommittee of the Aviation Rulemaking Advisory Committee; Meeting

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Meeting.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of the Federal Aviation Administration Aircraft Certification Procedures Subcommittee of the Aviation Rulemaking Advisory Committee.

DATES: The meeting will be held on January 14, 1993, at 9 a.m. Arrange for oral presentations by December 29, 1992.

ADDRESSES: The meeting will be held at the General Aviation Manufacturers Association, Suite 801, 1400 K Street, NW., Washington, DC 20005.

FOR FURTHER INFORMATION CONTACT: Ms. Kathy Ball, Aircraft Certification Service (AIR–1 , 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267–8235.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. II), notice is hereby given of a meeting of the Aircraft Certification Procedures Subcommittee to be held on January 14, 1993, at the General Aviation Manufacturers Association, Suite 801, 1400 K Street, NW., Washington, DC 20005. The agenda will include:

- Organization of the subcommittee.
- Report from the International Certification Procedures Harmonization Working Group.
- Report from other working groups established before the meeting.
- A discussion of future meeting dates, activities and plans.

Attendance is open to the interested public, but will be limited to the space available. The public must make arrangements by December 29, 1992, to present oral statements at the meeting. The public may present written statements to the committee at any time by providing 25 copies to the Executive Director, or by bringing the copies to him at the meeting. Arrangements may be made by contacting the person listed under the heading **FOR FURTHER INFORMATION CONTACT.**

Issued in Washington, DC, on December 11, 1992.

William J. Sullivan,

Executive Director, Aircraft Certification Procedures Subcommittee, Aviation Rulemaking Advisory Committee.

Rotorcraft Subcommittee of the Aviation Rulemaking Advisory Committee; Meeting

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of meeting.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of the Federal Aviation Administration Rotorcraft Subcommittee of the Aviation Rulemaking Advisory Committee.

DATES: The meeting will be held on January 12, 1993, at 9 a.m. Arrange for oral presentations by December 29, 1992.

ADDRESSES: The meeting will be held at the Holiday Inn, 1600 South Country Club Drive, Mesa, AZ 85210.

FOR FURTHER INFORMATION CONTACT: Ms. Kathy Ball, Aircraft Certification Service (AIR–1), 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267–8235.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. II), notice is hereby given of a meeting of the Rotorcraft Subcommittee to be held on January 12, 1993, at the Holiday Inn, 1600 South Country Club Drive, Mesa, AZ 85210. The agenda will include:

- Report from the External Load Working Group.
- Report from the JAR/FAR 27 and 29 Harmonization Working Group.
- Report from the Occupant Restraint Working Group.
- Review of planned FAA rulemaking and advisory circular projects.
- Discussion of subcommittee procedures.
- A discussion of activities and future plans.

Attendance is open to the interested public, but will be limited to the space available. The public must make arrangements by December 29, 1992, to present oral statements at the meeting. The public may present written statements to the committee at any time by providing 16 copies to the Executive Director, or by bringing the copies to him at the meeting. Arrangements may be made by contacting the person listed under the heading "**FOR FURTHER INFORMATION CONTACT.**"

Issued in Washington, DC, on December 11, 1992.

Emergency Evacuation Subcommittee of the Aviation Rulemaking Advisory Committee; Meeting

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of meeting.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of the Federal Aviation Administration Emergency Evacuation Subcommittee of the Aviation Rulemaking Advisory Committee.

DATES: The meeting will be held on January 28, 1993, at 9 a.m. Arrange for oral presentations by January 14, 1993.

ADDRESSES: The meeting will be held in the Boardroom, Air Transport Association of America, suite 1100, 1301 Pennsylvania Avenue, NW., Washington, DC 20046–1707.

FOR FURTHER INFORMATION CONTACT: Ms. Kathy Ball, Aircraft Certification Service (AIR–1), 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267–8235.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. II). notice is hereby given of a meeting of the Emergency Evacuation Subcommittee to be held on January 28, 1993, in the Boardroom, Air Transport Association of America, suite 1100, 1301 Pennsylvania Avenue, NW., Washington, DC 20004–1707. The agenda for this meeting will include:

- A status report by the Performance Standards Working Group.
- A report by the Special Task Group recommending approaches to take in developing performance standards.
- A discussion of future activities and plans.

Attendance is open to the interested public, but will be limited to the space available. The public must make arrangements by January 14, 1993, to present oral statement at the meeting. The public may present written statements to the committee at any time by providing 25 copies to the Executive Director, or by bringing the copies to him at the meeting. Arrangements may be made by contacting the person listed

under the heading "FOR FURTHER INFORMATION CONTACT."

Issued in Washington, DC, on December 11, 1992.

William J. Sullivan,

Executive Director, Emergency Evacuation Subcommittee, Aviation Rulemaking Advisory Committee.

[FR Doc. 92-30883 Filed 12-18-92; 8:45 am]

BILLING CODE 4910-13-M

Passenger Facility Charge (PFC) Approvals and Disapprovals

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Monthly notice of PFC approvals and disapprovals. In November 1992, there were 11 applications approved.

SUMMARY: The FAA publishes a monthly notice, as appropriate, of PFC approvals and disapprovals under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101-508) and part 158 of the Federal Aviation Regulations (14 CFR part 158). This notice is published pursuant to paragraph d of § 158.29.

PFC Applications Approved

Public Agency: County of Westchester, White Plains, New York.

PFC Level: $3.00.

Total Approved Net PFC Revenue: $27,883,000.

Earliest Permissible Charge Effective Date: February 1, 1993.

Duration of Authority to Impose: June 1, 2022.

Class of Air Carriers Not Required to Collect PFC'S: Air charter operators.

Determination: Approved. The FAA has determined that the proposed class accounts for less than 1 percent of the airport's total annual enplanements.

Brief Description of Projects Approved to Impose and Use:

Construct peripheral safety road,
Construct parallel taxiways and taxiway system,
Heated snow removal equipment and materials storage building,
Construct general aviation infrastructure,
Land acquisition.

Brief Description of Project Disapproved: Construct new aircraft and firefighting (ARFF) training facility.

Determination: The new ARFF training facility project has been reviewed under AIP criteria (paragraph 301b and 500 of FAA Order 5100.38A), which, respectively, permit projects to be reviewed on a case-by-case basis and preclude AIP eligiblity for any development which exceeds standards or requirements established by the Secretary of Transportation. Such standards and requirements as are applicable to ARFF training facilities were established in guidance distributed by the FAA on June 4, 1991. Pursuant to that guidance, the FAA has implemented criteria under which only regional ARFF training facilities are eligible under the AIP. Inasmuch as two regional ARFF training facilities are located within 50 miles of Westchester County Airport (HPN), the proposed facility at HPN would exceed standards and is not eligible for either AIP or PFC funding. In addition, the FAA has determined that this project does not enhance safety, security, or capacity, mitigate noise impacts or furnish opportunities for enhanced competition between or among carriers. Therefore, this project is not PFC eligible.

Decision Date: November 9, 1992.

FOR FURTHER INFORMATION CONTACT: Philip Brito, New York Airports District Office, (718) 917-1882.

Public Agency: Yakima Air Terminal Board, Yakima, Washington.

Application Type: Impose and Use PFC Revenue.

PFC Level: $3.00.

Total Approved Net PFC Revenue: $416,256.

Earliest Permissible Charge Effective Date: February 1, 1993.

Duration of Authority to Impose: April 1, 1995.

Class of Air Carriers Not Required to Collect PFC'S:

Part 135 air taxi/commercial operators who conduct operations in air commerce carrying persons for compensation or hire, except air taxi/commercial operators operating public or private charters in aircraft with a seating capacity of 60 or more.

Determination: Approved. The FAA has determined that the proposed class accounts for less than 1 percent of the airport's total annual enplanements.

Brief Description of Projects Approved to Impose and Use:

Master plan update,
Rehabilitate runway 9-27 high intensity runway light system,
Update airport electrical system,
Purchase snow removal equipment, snow blower,
Taxiway guidance sign modifications,
Air cargo apron, design phase,
Construct air cargo ramp,
Security improvements, automatic gates, fence, and signs,
Airport access road, Circle Drive renovation,
Purchase of passenger access lift for mobility-impaired passengers,
Install elevator for handicapped access, terminal building, second floor,
Heating, ventilation, and air conditioning, terminal building, lobby and concourses,
Renovation of baggage claim area,
Purchase of a runway vacuum sweeper,
Consultant services for environmental assessment, project formulation, scope of work, and cost estimates for runway 9-27 rehabilitation.

Brief Description of Projects Disapproved: Snow removal equipment, ramp plow/loader.

Determination: Section 158.33(a)(1) requires the public agency to begin implementation of a project no later than 2 years after receiving approval to use PFC revenue on that project. Therefore, all projects approved in this application must begin implementation by no later than November 1994. The schedule submitted with the application shows an implementation date of October 1995 for this project.

Radio Equipment.

Determination: This type of equipment is included as a nonallowable item in Appendix 2 of FAA Order 5100.38A, AIP Handbook. The project does not meet the criteria included in section 158.15(b); therefore, it is not PFC eligible.

Decision Date: November 10, 1992.

FOR FURTHER INFORMATION CONTACT: Paul F. Johnson, Seattle Airports District Office, (206) 227-2655.

Public Agency: Guam Airport Authority, Tamuning, Guam.

Application Type: Impose and Use PFC Revenue.

PFC Level: $3.00.

Total Approved Net PFC Revenue: $5,632,000.

Earliest Permissible Charge Effective Date: February 1, 1993.

Duration of Authority to Impose: June 1, 1994.

Class of Air Carriers not Required to Collect PFC's: Part 135 air taxi/commercial operators.

Determination: Approved. The FAA has determined that the proposed class accounts for less than 1 percent of the airport's total annual enplanements.

Brief Description of Projects Approved to Impose and Use:

Conduct environmental assessment,
Runway improvements, 1992,
Environmental assessment for Navy land acquisition,
Apron 1 through 9 rehabilitation,
Apron 11 through 13 construction reimbursement (sponsor share).

Decision Date: November 10, 1992.

FOR FURTHER INFORMATION CONTACT: Henry A. Sumida, Honolulu Airports District Office, (808) 541-1230.

Public Agency: City of Tallahassee, Tallahassee, Florida.

Application Type: Impose and Use PFC Revenue.

PFC Level: $3.00.

Total Approved Net PFC Revenue: $8,617,154.

Earliest Permissible Charge Effective Date: February 1, 1993.

Duration of Authority to Impose: December 1, 1998.

Class of Air Carriers not Required to Collect PFC's:

Part 135 air taxi/commercial operators.

Determination: Approved. The FAA has determined that the proposed class accounts for less than 1 percent of the airport's total annual enplanements.

Brief Description of Projects Approved to Impose and Use:

Overlay runway 9/27 and taxiway, upgrade taxiway lighting,
Construct perimeter security fence and security access system,
Update airport master plan and noise study,
Construct covered walkway and handicap ramp, other terminal improvements for Americans with Disabilities Act compliance,
Overlay south apron,
Overlay runway 18/36 and taxiways, associated projects,
Construct service road west of runway 9/27 and construct perimeter road east and south of runway 9/27,
Overlay old terminal ramp for general aviation,
Purchase quick response aircraft rescue and firefighting (ARFF) vehicle,
Purchase a 3,000 gallon ARFF vehicle,
Construct taxiway for T-hanger access.

Brief Description of Project Approved in Part for Collection: Construct 10,000 square foot ARFF building.

Determination: The amount of approved PFC revenue reflects a decrease from the requested amount of $950,000. This reduction limits the approved PFC amount to a three bay facility rather than the four bay facility requested. The reduction is based on the current and projected ARFF index for the airport. As such, only a three bay facility is AIP eligible and, accordingly, the PFC approved amount is limited to this level.

Brief Description of Projects Disapproved for Collection: Acquire property (6.85 acres).

Determination: The public agency did not provide information to show that the project meets the project eligibility criteria of section 158.15(a). As such, the FAA is unable to determine that the project would preserve or enhance safety, security, or capacity at Tallahassee Regional Airport (TLH); reduce noise or mitigate noise impacts; or furnish opportunities for enhanced competition between or among air carriers.

Relocate airport surveillance radar (ASR) site.

Determination: The relocation of air traffic facilities, including ASR facilities, are eligible under the definition of airport development contained in the Airport and Airway Improvement Act of 1982 (503(a)(2)), provided that the relocation is necessitated by AIP-eligible development. However, the public agency did not demonstrate that the relocation is necessitated by AIP-eligible development, therefore, this project is not PFC eligible under section 158.15(b).

Construct new ARFF training facility.

Determination: The FAA has determined that this project does not enhance safety, security, or capacity, mitigate noise impacts, or furnish opportunities for enhanced competition between or among carriers. The FAA is currently implementing a policy of funding only regional ARFF training facilities. TLH is located within reasonable proximity to a previously designated regional ARFF facility at Ocala, Florida.

Decision Date: November 13, 1992.

FOR FURTHER INFORMATION CONTACT: Carlos Maeda, Orlando Airports District Office, (407) 648–6583.

Public Agency: Grand Forks Regional Airport Authority, Grand Forks, North Dakota.

Application Type: Impose and Use PFC Revenue.

PFC Level: $3.00.

Total Approved Net PFC Revenue: $1,016,509.

Earliest Permissible Charge Effective Date: February 1, 1993.

Duration of Authority to Impose: February 1, 1997.

Class of Air Carriers not Required to Collect PFC'S: Part 135 operators providing unscheduled passenger/charter services operating aircraft with a passenger capacity of less than 30 seats.

Determination: Approved. The FAA has determined that the proposed class accounts for less than 1 percent of the airport's total annual enplanements.

Brief Description of Projects Approved to Impose and Use:

Terminal building expansion,
Reconstruction of runway 8–26 and taxiway B,
Rejuvenation of runway 35L–17R porous friction course,
Purchase of self-propelled broom,
T-hanger taxiway,
Construction of general aviation ramp for aircraft maintenance facility.

Brief Description of Projects Approved to Impose Only:

Reconstruct/widen taxiway A,
Snow plow replacement,
Expansion of general aviation ramp,
Expand air cargo ramp,
Construction of high-speed exists on runway 17L–35R and runway 8–26.

Decision Date: November 16, 1992.

FOR FURTHER INFORMATION CONTACT: Irene Porter, Bismarck Airports District Office, (701) 250–4385.

Public Agency: County of Delta, Escanaba, Michigan.

Application Type: Impose PFC.

PFC Level: $3.00.

Total Approval Net PFC Revenue: $158,325.

Earliest Permissible Charge Effective Date: February 1, 1993.

Duration of Authority to Impose: August 1, 1996.

Class of Air Carriers not Required to Collect PFC's: Air taxi and charter operators.

Determination: Approved. The FAA has determined that the proposed class accounts for less than 1 percent of the airport's total annual enplanements.

Brief Description of Project Approved to Impose Only:

Acquire land (26.5 acres) including relocation assistance,
Professional engineering services for rehabilitation, widening extension, and installation of porous friction course of runway 18/36 including medium intensity runway lights (MIRL), and new parallel taxiway including medium intensity lights (MITL),
Rehabilitate, widen, and extend runway 18/36, construct runway 18/36 porous friction, course, rehabilitate MIRL, construct north/south parallel taxiway and MITL.

Decision Date: November 17, 1992.

FOR FURTHER INFORMATION CONTACT: Dean Nitz, Detroit Airports District Office, (313) 487–7300.

Public Agency: Telluride Regional Airport Authority, Telluride, Colorado.

Application Type: Impose and Use PFC Revenue.

PFC Level: $3.00.

Total Approved Net PFC Revenue: $200,000.

Earliest Permissible Charge Effective Date: February 1, 1993.

Duration of Authority to Impose: November 1, 1997.

Class of Air Carriers not Required to Collect PFC's: None.

Brief Description of Project Approved to Impose and Use: Construct terminal building.

Decision Date: November 23, 1992.

FOR FURTHER INFORMATION CONTACT: Dakota L. Chamberlain, Denver Airport District Office, (303) 286–5537.

Public Agency: City of Pensacola, Pensacola, Florida.

Application Type: Impose and Use PFC Revenue.

PFC Level: $3.00.

Total Approved Net PFC Revenue: $4,715,000.

Earliest Permissible Charge Effective Date: February 1, 1993.

Duration of Authority to Impose: April 1, 1996.

Class of Air Carriers not Required to Collect PFC's: Part 135 air taxi/commercial operators.

Determination: Approved. The FAA has determined that the proposed class accounts for less than 1 percent of the airport's total annual enplanements.

Brief Description of Project Approved to Impose and Use: Land acquisition.

Brief Description of Projects Approved to Impose Only:

Extend passenger terminal,
Provide a vegetation barrier,
Purchase navigation easements.

Brief Description of Project Approved in Part to Impose and Use: Construct a midfield service road.

Determination: A portion of this road, from the perimeter road to the ARFF facility, is AIP eligible and will preserve safety at Pensacola Regional Airport (PNS). The remainder of the road, from the ARFF facility to the air traffic control tower is not AIP eligible; therefore, that portion of the road is not PFC eligible and the approved amount has been reduced from the requested amount accordingly.

Brief Description of Project Disapproved: Conduct a master plan drainage study.

Determination: The state has asked the city of Pensacola to conduct a drainage study to obtain "conceptual permits"; however, the state has not been specific as to what is required. The city of Pensacola has not provided sufficient information in the application to permit an FAA determination that this project is AIP eligible as a stand-alone project.

Decision Date: November 23, 1992.

FOR FURTHER INFORMATION CONTACT: Carlos Maeda, Orlando Airports District Office, (407) 648–6583.

Public Agency: Humboldt County, Arcata, California.

Application Type: Impose and Use PFC Revenue.

PFC Level: $3.00.

Total Approved Net PFC Revenue: $188,500.

Earliest Permissible Charge Effective Date: February 1, 1993.

Duration of Authority to Impose: May 1, 1994.

Class of Air Carriers Not Required to Collect PFC's. None.

Brief Description of Projects Approved to Impose and Use:

Overlay and groove runway 14/32,
Rehabilitate aircraft rescue and firefighting vehicle, Runway, taxiway, and ramp area seal coat; reconstruct transient apron; construct tiedown apron and access area (including hangar demolition); replace wind sock; and replace perimeter fence.

Decision Date: November 24, 1992.

FOR FURTHER INFORMATION CONTACT: Joe Rodriquez, San Francisco Airports District Office, (415) 876–2805.

Public Agency: County of San Luis Obispo, San Luis Obispo, California.

Application Type: Impose and Use PFC Revenue.

PFC Level: $3.00.

Total Approved Net PFC Revenue: $502,437.

Earliest Permissible Charge Effective Date: February 1, 1993.

Duration of Authority to Impose: February 1, 1995.

Class of Air Carriers Not Required to Collect PFC's. Part 135 air taxi/commercial operators.

Determination: Approved. The FAA has determined that the proposed class accounts for less than 1 percent of the airport's total annual employments.

Brief Description of Projects Approved to Impose and Use:

Acquire runway protection zone and approach protection land,
Extend perimeter fencing and gates; improve fire station apron; replace segmented circle; improve and replace rotating beacon,
Acquire approach protection land; update airport master plan; grade runway safety area; acquire wheelchair lift device,
Expand air carrier apron,
Expand air carrier terminal building—phase I (professional services).

Decision Date: November 24, 1992.

FOR FURTHER INFORMATION CONTACT: Joe Rodriquez, San Francisco Airports District Office, (415) 876–2805.

Public Agency: Greater Orlando Aviation Authority, Orlando, Florida.

Application Type: Impose and Use PFC Revenue.

PFC Level: $3.00.

Total Approved Net PFC Revenue: $167,574,527.

Earliest Permissible Charge Effective Date: February 1, 1993.

Duration of Authority to Impose: February 1, 1998.

Class of Air Carriers Not Required to Collect PFC's: None.

Brief Description of Projects Approved to Impose and Use:

Roadway to southern connector,
International passenger terminal,
Airside 1 expansion and rehabilitation,
West ramp rehabilitation,
Runway 18L/36R rehabilitation.

Brief Description of Project Approved in Part to Impose and Use:
Environmental planning and approvals for the north crossfield taxiway.

Determination: The scope of this project includes preliminary design work which is beyond what is required for the environmental planning and is disapproved. The remainder of the project is AIP eligible and development which may be undertaken following completion of the environmental process would enhance capacity at MCO. The approved amount has been reduced from the requested amount to only those costs related to the approved portion of the project.

Decision Date: November 27, 1992.

FOR FURTHER INFORMATION CONTACT: Pablo Affant, Orlando Airport District Office, (407) 648–6583.

Issued in Washington, D.C. on December 14, 1992.

[FR Doc. 92-30890 Filed 12-18-92; 8:45 am]
BILLING CODE 4910-13-M

Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with title 49, Code of Federal Regulations, §§ 211.9 and 211.41, (49 CFR) notice is hereby given that the Federal Railroad Administration (FRA) has received from Southeastern Pennsylvania Transportation Authority (SEPTA) a request for exemptions from or waivers of compliance with a requirement of Federal rail safety standards. The petition is described below, including the regulatory provisions involved, and the nature of the relief being requested.

Southeastern Pennsylvania Transportation Authority

Waiver Petition, Docket Number LI-92-9

SEPTA is seeking a waiver of compliance from § 229.29(a) of the Railroad Locomotive Safety Standards, 49 CFR part 229. SEPTA is requesting that it be permitted to extend the clean, oil, test and stencil (COT&S) period from 736 days (24 months) to 1104 days

(36 months) on 304 electric multiple unit cars equipped with 26–R and PS–68 air brake equipments. This equipment utilizes the same control and relay valves as the 26–L locomotive system for which a waiver was granted in January 29, 1985.

SEPTA states that the air supply system on the subject cars is equipped with a desiccant dryer with a coalescer filter which will be maintained on an annual basis. This will ensure a clean, dry air supply to all valves. The railroad states the change will utilize manpower more efficiently, and conserve scarce resources while maintaining a safe operation.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (e.g., Waiver Petition Docket Number LI–92–9) and must be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street SW., Washington, DC 20590. Communications received before January 19, 1993, will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.–5 p.m.) in room 8201, Nassif Building, 400 Seventh Street SW., Washington, DC 20590.

Issued in Washington, DC on December 14, 1992.

Phil Olekszyk,

Deputy Associate Administrator for Safety.

BILLING CODE 4910–06–M

National Highway Traffic Safety Administration

Docket No. 92–50; Notice 2

Autokraft Limited; Grant of Petition for Temporary Exemption From Federal Motor Vehicle Safety Standard No. 208

This notice grants the petition by Autokraft Limited of Weybridge, Surrey, England, for a temporary exemption from paragraph S4.1.4 of Federal Motor Vehicle Safety Standard No. 208, *Occupant Crash Protection*. The basis of the petition was that compliance would cause it substantial economic hardship.

Notice of receipt of the petition was published on October 1, 1992, and an opportunity afforded for comment (57 FR 45416).

Petitioner sought a two-year exemption for its A.C. Mark IV ("MkIV" herein) passenger car. The basis for the petition was that immediate compliance with the automatic restraint requirements of Standard No. 208 would cause the petitioner substantial economic hardship, within the meaning of 49 CFR 555.6(a). Petitioner's total motor vehicle production in the 12 months preceding the filing of the petition was 45 units. It projected sales of 50 vehicles per year.

The Autokraft A.C. MkIV, according to petitioner, "is the only Cobra-like vehicle which is produced from original Cobra tooling. The original A.C. Cobras, both 289 and 427 versions, manufactured by A.C. Cars in Thames Ditton, Surrey, England, are no longer in production." Further, "Because of public interest, the A.C. Cobra is reported to be the most duplicated vehicle of all time." In August 1991, the petitioner decided to introduce the MkIV into the American market. In the year preceding the filing of its petition, it expended approximately 1,200 man hours and 64,000 Pounds Sterling on the project. It examined both automatic belt systems and air bags in its review of Standard No. 208, and was unable to identify any automatic belt system that it could install in the MkIV that would allow it to conform to the automatic restraint requirements. It also examined available air bag systems because designing a proprietary system is cost and time prohibitive.

The modifications required to adapt an existing air bag system to the MkIV were estimated to total in cost $790,000. The components of this cost are modifications to the steering column ($50,000), modifications to the underhood packaging, etc. ($40,000), design and development of a knee bolster system and tooling, and dashboard modifications ($200,000), and all relevant testing costs ($500,000). In order not to duplicate its costs, the petitioner wished to develop a passenger-side air bag system at the same time, at an estimated additional cost of $300,000. These costs were said to be prohibitive without the sale of vehicles to fund the development program. The two-year period requested would provide time for Autokraft to develop and implement its fully-complying air bag systems, and to generate sufficient income to fund the project. In the interim, the MkIV will be equipped "with a four point belt system on the driver and passenger side of the vehicle." In substantiation of its hardship argument, petitioner submitted its balance sheets and income statements for the past three fiscal years, plus the first six months of 1992. It reported a net loss of 186,318 Pounds Sterling in the first half of 1992 (or $348,415 at a rate of $1.87 to 1 Pound), a net profit of 604,487 Pounds Sterling in 1991 (or $1,130,391 at the same rate), and a cumulative net profit as of June 30, 1992, of 1,073,752 Pounds Sterling (or $2,007,916).

According to the petitioner, a temporary exemption would be in the public interest because it would allow sale of a vehicle that is "the only true alternative" to the original Cobra vehicles, and result "in the establishment of dealer and service networks which would increase stateside employment and generate tax revenues." An exemption would be consistent with the objectives of the National Traffic and Motor Vehicle Safety Act "since they meet all FMVSS and NHTSA standards, except for the passive restraint portion of standard 208 and are equipped with a superior four point seat belt system which ensures the safety of the driver and passenger."

NHTSA observed that Standard No. 208, through its incorporation by reference of Standard No. 209, specifies requirements for two and three point non-automatic occupant restraint systems, but does not include the four point system that the petitioner installs in the MkIV. Thus, any exemption would be from Standard No. 208 in its entirety, not just paragraph S4.1.4. NHTSA invited the petitioner to comment on the extent to which its four point system and its installation may otherwise conform to the requirements of Standard No. 208 and Standard No. 209.

No comments were received on the petition.

In granting a petition of this nature, the Administrator must find that the petitioner has made a good faith effort to conform to the standard, that immediate compliance with it would cause the petitioner substantial economic hardship, and that an exemption would be in the public interest and consistent with the objectives of the National Traffic and Motor Vehicle Safety Act ("the Act").

The petition indicates that, in the year preceding its filing, the petitioner spent 1,200 man hours and $119,680 on researching the means to comply with

the automatic restraint requirements, and reaching an understanding of the costs involved in achieving compliance. Therefore, NHTSA find that Autokraft has made the requisite good faith effort.

Reasonably, Autokraft seeks to achieve air bag protection for both driver and passenger at the same time. The total costs estimated for compliance are $1,090,000. This is almost equal to the company's net income for 1991 of $1,130,391.

Although the company had a reasonably comfortable cumulative net profit as of June 30, 1992, Autokraft suffered a net loss for the first six months of this year. This could indicate continuing losses without the availability of the American market. To implement an automatic restraint development program on a crash basis might affect the company's reserves while a phased-in program over the next two years would allow more flexibility in budgetary planning and allocations. NHTSA therefore finds that immediate compliance would cause Autokraft substantial economic hardship.

The sales and service facilities, and tax revenues, that might result form an exemption would appear to be small, but real nonetheless. Further, in enacting the act, Congress intended that the public be afforded a continuing wide choice of vehicles. Finally, the petitioner has informed NHTSA that the Mk IV vehicles to be sold in the U.S. will be equipped with a three-point restraint system for both driver and passenger that complies with the requirements of Standards Nos. 208 and 209. Therefore, NHTSA finds that a temporary exemption would be in the public interest and consistent with the objectives of the Act.

In consideration of the foregoing, Autokraft Ltd. is hereby granted NHTSA Temporary Exemption No. 92–6, expiring January 1, 1995, from paragraph S4.1.4 of 49 CFR 571.208 Motor Vehicle Safety Standard No. 208 *Occupant Crash Protection*.

(15 U.S.C. 1410; delegation of authority at 49 CFR 1.50).

Issued on December 14, 1992.

Marion C. Blakey,

Administrator.

BILLING CODE 4910-59-M

Docket No. 92–55; Notice 2

Isis Imports Ltd.; Grant of Petition for Temporary Exemption From Federal Motor Vehicle Standard No. 208

This notice grants the petition by Isis Imports Ltd. of San Francisco, California, for a temporary exemption from the automatic restraint requirements of Motor Vehicle Safety Standard No. 208 *Occupant Crash Protection*. The basis of the petition was that compliance would cause substantial economic hardship, and that the petitioner has, in good faith, attempted to meet the requirements of the standard.

Notice of receipt of the petition was published on October 13, 1992, and an opportunity afforded for comment (57 FR 46896).

Petitioner was previously granted a 3-year exemption from paragraphs S4.1.2.1 and S4.1.2.2 of Standard No. 208, which expired October 1, 1992 (54 FR 43647).

The make and type of passenger car for which exemption was requested is the Morgan convertible. The British manufacturer of the Morgan has not offered its vehicle for sale in the United States since the early days of the Federal motor vehicle safety standards. In recent years, however, Isis has bought a small number of disassembled vehicles from Morgan, imported the parts, assembled the vehicles, and sold them in the United States. They differ from their British counterparts, not only in equipment items and modifications necessary for compliance with the Federal motor vehicle safety standards, but also in their engines, which are propane fueled. As the assembler of the vehicle, Isis certifies conformance to all applicable Federal motor vehicle safety, bumper, and theft prevention standards. The vehicle assembled by Isis in the U.S. is deemed sufficiently different from the one produced by Morgan in England that Isis may be regarded as its manufacturer, not its converter, even though the brand names are the same.

Isis assembled 11 Morgans for sale in the U.S. in the 12-month period preceding the filing of its petition. It asked for a further 3-year exemption from the automatic restraint requirements of Standard No. 208, during which time it would continue to provide protection through its current three-point lap-shoulder belt system. However, before the end of that time, it hopes to be able to offer an air bag system.

In arguing that compliance would cause it substantial economic hardship and that it had in good faith attempted to meet the requirements of the standard, Isis related its efforts to conform while the previous exemption was in effect. Initially, it had continued to pursue research on automatic belt systems, obtaining seat belt hardware and motor drive assemblies, and created a mock-up. However, both petitioner and Morgan's engineering staff concluded that this system was not feasible because, over time, the seat belt track would deform, rendering it unusable. Further, modelling of the path of belt travel over the legs of the driver and passenger indicated an unacceptable degree of contract between the belt and occupant legs. It also noted simultaneously a growing level of consumer resistance to the use of automatic belt systems. Consequently, in the Spring of 1991, it once again began to seek out air bag suppliers. The petition recounts in considerable detail the unsuccessful efforts of Isis to obtain air bag systems from Jaguar, Rover, Rolls-Royce and Lotus. The proposals that it received from Lotus and Breed to develop a vehicle-specific air bag system were prohibitive in cost.

However, according to Isis, two possible sources are awaiting development. The petitioner hopes to obtain eventual access to a system that Range Rover is developing for its vehicles. It has heard from the British Department of Transport that some retrofit components will be coming on the market over the next 2 years. Until these developments materialize, it will be unable to offer an air bag system, and will require an exemption.

The petitioner's net income in 1991 was $10,698. For the 4-year period 1988–91, it had a cumulative net loss of $4,414. The company states that it will have to cease business if its petition is denied. Sales of spare parts and service would be inadequate to fund development of an automatic restraint system without new car sales.

Petitioner argued that an exemption would be in the public interest and consistent with the objectives of The National Traffic and Motor Vehicle Safety Act because it would allow it to continue to support existing owners of Morgan cars (it has been the major supplier of Morgans in the U.S. since 1975, and supplies parts for older cars). An exemption would also allow it to contribute toward the diversity of vehicles for sale in the U.S. The small number of vehicles likely to be produced during the time that the exemption is in effect will not materially affect safety. Finally, the petitioner enclosed photographs showing the effect on a Morgan of a collision at an estimated closing speed of 90 mph, after which the Morgan's driver, restrained by the 3-point belt system, walked away from the accident with only a cracked rib caused by the seat belt crushing a ball point pen in his shirt pocket.

No comments were received on the petition.

It is apparent from the Isis petition that the slender volume of vehicles it imports and sells afford it only a marginal existence under the best of circumstances, and have over the past four years resulted in a slight cumulative net loss. Its petition indicates that, in the three years since its original exemption was granted, it has explored avenues of conformance with the automatic restraint requirements. Isis has decided that an airbag system is most feasible for the design of its car, and that an automatic belt system will not be practicable for it. Thus it is manifest that to require immediate compliance with the automatic restraint requirements would cause it substantial economic hardship, and that it has, in good faith, attempted to comply with the standard.

NHTSA is also able to find that an exemption is in the public interest. The use of a propane-fueled power source is consistent with the national effort to promote alternate fuels, even if the volume is not significant.

An exemption is also consistent with the objectives of the Vehicle Safety Act. If the present rate of importation is maintained, less than three dozen vehicles will be manufactured under the exemption. Further, they will be equipped with a restraint system that complied with Standard No. 208 before September 1, 1989.

In consideration of the foregoing, it is hereby found that the petitioner has met its burden of persuasion that compliance would cause it substantial economic hardship, and that it has, in good faith, attempted to comply with Standard No. 208. It is further found that an exemption would be in the public interest and consistent with the objectives of the Vehicle Safety Act. Accordingly, Isis Imports is granted NHTSA Temporary Exemption 92–7, expiring November 1, 1995, from sections S4.1.2.1 and S4.1.2.2 of 49 CFR 571.208 Motor Vehicle Safety Standard No. 208 *Occupant Crash Protection.*

Authority: 15 U.S.C. 1410; delegation of authority at 49 CFR 1.50.

Issued on December 14, 1992.

Marion C. Blakey,

Administrator.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Dated: December 16, 1992.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Bureau of Alcohol, Tobacco and Firearms

OBM Number: 1512–0192.
Form Number: ATF REC 5110/02 and ATF F 5110.11.
Type of Review: Extension.
Title: Distilled Spirits Plants Warehousing Records and Reports
Description: The information collected is used to account for proprietor's tax liability, adequacy of bond coverage and protection of the revenue. The information also provides date to analyze trends in audit plant operations, monitor industry activities and compliance to provide for efficient allocation of field personnel plus provide for economic analysis.
Respondents: Businesses or other for-profit, Small businesses or organizations
Estimated Number of Respondents/ Recordkeepers: 224
Estimated Burden Hours Per Respondent/Recordkeeper: 2 hours
Frequency of Response: Monthly
Estimated Total Reporting/ Recordkeeping Burden: 5,376 hours

OMB Number: 1512–0205
Form Number: ATF REC 5110/01 and ATF F 5110.40
Type of Review: Extension
Title: Distilled Spirits Records (ATF REC 5110/01) and Month Report of Production Operations (ATF F 5110.40)
Description: The information collected is used to account for proprietor's tax liability, adequacy of bond coverage and protection of the revenue. The information also provides data to analyze trends in industry, and plan efficient allocation of field resources, audit plant operations and compilation of statistics for government economic analysis.
Respondents: Businesses or other for-profit
Estimated Number of Respondents: 145
Estimated Burden Hours Per Respondent: 2 hours
Frequency of Response: Monthly
Estimated Total Reporting Burden: 3,480 hours

Clearance Officer: Robert N. Hogarth (202) 927–8930, Bureau of Alcohol, Tobacco and Firearms, room 3200, 650 Massachusetts Avenue NW., Washington, DC 20226

BILLING CODE 4810–31–M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Trade Policy Staff Committee; Generalized System of Preferences; Notice Regarding Review of Thailand's Eligibility Under the GSP

AGENCY: Office of the United States Trade Representative.

ACTION: Notice regarding review of Thailand's eligibility under the Generalized System of Preferences.

SUMMARY: The purpose of this notice is to announce the continuation of the review of the worker rights practices of Thailand for the purpose of determining Thailand's eligibility under the Generalized System of Preferences (GSP) until the conclusion of the 1992 GSP Annual Review.

FOR FURTHER INFORMATION CONTACT: GSP Subcommittee, Office of the United States Trade Representative, 600 17th Street NW., room 517, Washington, DC 20506. The telephone number is (202) 395–6971.

SUPPLEMENTARY INFORMATION: During the 1991 Annual Review of the GSP program, a petition regarding the beneficiary status of Thailand based on its practices in the area of internationally recognized worker rights practices in the area of internationally recognized worker rights was accepted for review. 56 FR 42080 (August 26, 1991). On July 8, 1992, the Trade Policy Staff Committee (TPSC) announced that the review of Thai worker rights was being continued until December 15, 1992. 57 FR 30286 (July 8, 1992). One of the reasons for this extension was to provide a newly-elected Thai government with an opportunity to address the issues of particular concern to the TPSC, *i.e.* Thailand's practices regarding state enterprise workers and child labor.

Because the TPSC continues to have concerns about the worker rights

situation in key areas cited in the 1991 petition, *e.g.*, restrictions on the right of association for state enterprise workers, it was unable to recommend that Thailand is "taking steps" to afford internationally recognized worker rights as required by the GSP statute. However, the TPSC noted that the new government of Thailand has initiated actions to address these key issues. To allow time to determine what the outcome of these actions might be, the TPSC has decided to extend the review until the conclusion of the 1992 GSP Annual Review, *i.e.*, on or about April 1, 1993.

The GSP Subcommittee of the TPSC will publish a more detailed explanation of the current status of this review shortly.

Frederick L. Montgomery,

Chairman, Trade Policy Staff Committee.

Implementation of the Accelerated Tariff Elimination Provision of the United States—Canada Free-Trade Agreement

AGENCY: Office of the United States Trade Representative.

ACTION: Notice of and request for comments concerning additional articles under consideration for negotiations with the Canadian Government for accelerated tariff elimination.

SUMMARY: Section 201(b) of the United States-Canada Free-Trade Agreement Implementation Act of 1988 ("FTA Implementation Act") grants the President, subject to consultation and layover requirements of section 103 of that act, the authority to proclaim any accelerated schedule for duty elimination that may be agreed to by the United States and Canada under FTA Article 401(5). This notice is intended to inform the public of additional articles that may be the subject of negotiations between the United States and Canada for accelerated tariff elimination.

DATES: Public comments are due by December 31, 1992.

ADDITIONAL INFORMATION: Further information on this subject may be found in the Federal Register notice of September 4, 1992, Volume 57, Number 173, at page 40720 through 40727, which listed articles that may be the subject of the third round of negotiations between the United States and Canada for accelerated tariff elimination. Inquiries regarding aspects of this notice or relating to the implementation of accelerated tariff elimination under the FTA should be directed to Mr. P. Claude Burcky, Office of North American Affairs, Office of the United States Trade Representative, Room 502, 600 17th Street, NW, Washington, DC 20506, telephone (202) 395-3412.

Additional Articles That May Be Considered in Negotiations

In addition to the articles listed in the notice of September 4, 1992, as amended by the notice of October 23, 1992, (F.R. Vol. 57, No. 206, 48407), articles in the subheadings of the Harmonized Tariff Schedule of the United States listed below may again be subject to negotiations with Canada for reciprocal accelerated duty elimination. All of the articles listed below were considered during a previous round of negotiations with Canada, at which time the President received advice from the United States International Trade Commission regarding the probable economic effect of accelerated elimination of United States duties on industries producing like or directly competitive articles and on consumers. Advice also was received from the appropriate private sector advisory committees.

SECURITIES AND EXCHANGE COMMISSION
Agency Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meeting during the week of December 21, 1992.

A closed meeting will be held on Tuesday, December 22, 1992, at 2:30 p.m.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Roberts, as duty officer, voted to consider the items listed for the closed meeting in a closed session.

The subject matter of the closed meeting scheduled for Tuesday, December 22, 1992, at 2:30 p.m., will be:

Institution of injunctive actions.
Institution of administrative proceeding of an enforcement nature.
Settlement of administrative proceeding of an enforcement nature.
Opinions.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Brian Lane at (202) 272–2400.

Dated: December 16, 1992.

Jonathan G. Katz,
Secretary.

[Federal Acquisition Circular 90–16]

Federal Acquisition Regulation; Introduction of Miscellaneous Amendments

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Summary presentation of interim and final rules with request for comment.

SUMMARY: This document introduces the documents set forth below which comprise Federal Acquisition Circular (FAC) 90–16. The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council are issuing FAC 90–16 to amend the Federal Acquisition Regulation (FAR) to implement changes in the following subject areas:

Item	Subject	FAR case	DAR case	Analyst
I	Contractor Establishment Code	91–81	91–72	Scott.
II	Technical Changes to FAR Part 4, Administrative Matters	91–89	90–38	McGuire.
III	Publicizing Subcontract Opportunities	91–90	91–13	Scott.
IV	Metrics	92–611	90–301	O'Neill.
V	Contractor versus Government Performance, FAR Subpart 7.3 and Part 52	91–26	90–414	O'Neill.
VI	Change in Government Specified Source for Strategic and Critical Materials from Excess GSA Inventories.	91–76	91–049	Klein.
VII	List of Parties Excluded from Procurement Programs	91–65	91–77	Loeb.
VIII	Use of Small Purchase Procedures for Personal Services	91–80	91–24	O'Neill.
IX	OMB Circular A–133, Audits of Institutions of Higher Learning and Other Non-Profit Institutions	91–38	91–11	Olson.
X	Clarify Increased Cost or Pricing Data Threshold (Interim)	91–96	91–309	Olson.
XI	Nonmanufacturer Rule (Interim)	91–50	90–335	O'Neill.
XII	Bundling of Requirements	91–49	90–334	Scott.
XIII	Part 22 Threshold, Compensation Plans for Professional Employees	90–68	89–410	O'Neill.
XIV	Determination and Finding of Nonavailability	92–3		Loeb.
XV	Part 25, Thresholds	91–64	89–412	Loeb.
XVI	Severance Pay, Foreign Nationals	90–30	89–302	Olson.
XVII	GAO Bid Protest Regulations	91–86	91–6	O'Neill.
XVIII	Use of Indicia Mail	91–88	91–23	Klein.
XIX	Thresholds, Part 45	90–12	89–426	Klein.
XX	Government Property	90–41	90–454	Klein.
XXI	Inventory Schedules	91–74	90–503	Klein.
XXII	Threshold Change to FAR 51.106(b)	91–55	90–461	Klein.
XXIII	Standard Forms 254 and 255, Architect-Engineer Questionnaire	91–69	91–45	O'Neill.
XXIV	Technical Amendments.			

DATES: For effective dates, see separate documents which follow. Please cite FAC 90–16 and the appropriate FAR case number(s) in all correspondence related to this and the following documents.

FOR FURTHER INFORMATION CONTACT: The analyst whose name appears in relation to each FAR case or subject area. For general information, contact the FAR Secretariat, room 4041, GS Building, Washington, DC 20405, (202) 501–4755. Please cite FAC 90–16 and FAR case number(s).

SUPPLEMENTARY INFORMATION: Federal Acquisition Circular 90–16 amends the Federal Acquisition Regulation (FAR) as specified below:

Item I—Contractor Establishment Code (FAR Case 91–81)

FAR 4.602 is amended by revising paragraph (d) to reflect the new Contractor Establishment Code (CEC) numbering system; FAR 4.603 and the solicitation provision at 52.204–4, Contractor Establishment Code, are removed.

Item II—Technical Changes to FAR Part 4, Administrative Matters (FAR Case 91–89)

FAR 4.805 (b) and (e) are revised to clarify retention periods for contracts.

Item III—Publicizing Subcontract Opportunities (FAR Case 91–90)

FAR 5.206 is revised to stress the importance of prime contractors using the Commerce Business Daily to seek additional small, small disadvantaged, and women-owned business subcontracting sources, and to meet subcontracting goals.

Item IV—Metrics (FAR Case 92–611)

FAR 7.103, Agency-head responsibilities, is amended to encourage the use of the metric system of measurement in Government procurements.

Item V—Contractor Versus Government Performance (FAR Case 91–26)

Changes are made to FAR 7.302(d) to alert the contracting officer to the possibility of performing a cost comparison for the specific reason that commercial prices were believed to be unreasonable; and to make more general the language that pertains to when a cost comparison study must be made, so that future changes to statutes or regulations concerning cost comparisons will not require a change to the FAR. Minor editorial changes are made to the solicitation provisions at FAR 52.207–1 and 52.207–2.

Item VI—Change in Government Specified Source for Strategic and Critical Materials From Excess GSA Inventories (FAR Case 91–76)

FAR 8.002(f) is revised to change the Government specified source for excess strategic and critical materials from GSA to DOD.

Item VII—List of Parties Excluded From Procurement Programs (FAR Case 91–65)

FAR 9.404(d) is revised to provide additional guidance on accessing the List of Parties Excluded from Procurement Programs.

Item VIII—Use of Small Purchase Procedures for Personal Services (FAR Case 91–80)

The word "nonpersonal" is deleted from FAR 13.000, and from the definitions of "purchase order" and "small purchase" in FAR 13.101. A new paragraph (c) is also added to FAR 13.103 to emphasize that specific statutory authority is required to purchase personal services. A reference to FAR 37.104 is included.

Item IX—OMB Circular A–133, Audits of Institutions of Higher Learning and Other Nonprofit Institutions (FAR Case 91–38)

Guidance to contracting officers and a contract clause are added to implement the requirements of OMB Circular A–133, "Audits of Institutions of Higher Learning and Other Nonprofit Institutions".

The threshold is increased to the level of the small purchase threshold from $10,000 for application of the Examination of Records by Comptroller General clause and for application of the Audit-Negotiation clause to subcontracts.

Item X—Clarify Increased Cost or Pricing Data Threshold (FAR Case 91–96)

This interim rule amends FAR 15.804–2 to clarify application of the $500,000 threshold for submission of certified cost or pricing data for contracts awarded by the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard. This rule implements section 804 of the FY 92 Defense Authorization Act, Public Law 102–190.

Item XI—Nonmanufacturer Rule (FAR Case 91–50) (Interim Rule)

This interim rule revises FAR 19.001 and 19.102 to add a definition for the term "nonmanufacturer rule", to address Small Business Administration waiver of the nonmanufacturer rule for specific items, and to remove the partial listing of classes for which a waiver has been granted.

Item XII—Bundling of Requirements (FAR Case 91–49)

This converts the interim rule on Bundling of Requirements, published in the **Federal Register** at 56 FR 67132 on December 27, 1991, as Item VI of FAC 90–9, to a final rule with one minor revision, which is the addition of the word "realistic" at FAR 19.202–1(e)(2)(ii). FAR 19.202–1 was revised to require contracting officers to forward proposed acquisitions meeting specified criteria to the SBA's procurement center representatives for review. FAR 19.402 was revised to require that procurement center representatives recommend alternative contracting methods for acquisitions which have increased or consolidated requirements that make it unlikely that small businesses can compete.

XIII—Part 22 Threshold, Compensation Plans for Professional Employees (FAR Case 90–68)

FAR 22.1101 and 22.1103 are amended to raise the threshold from $250,000 to $500,000 for imposition of the requirement for offerors on acquisitions for negotiated service contracts to submit total compensation plans for professional employees. The provision at FAR 52.222–45 is removed and its language is combined with the provision at FAR 52.222–46 for purposes of simplification.

Item XIV—Determination and Finding of Nonavailability (FAR Case 92–3)

FAR 25.108(d)(1) is amended by adding "wire glass" to the list of items that one or more Federal agencies have determined are not mined, produced, or manufactured in the United States in sufficient and reasonably available commercial quantities of a satisfactory quality.

Item XV—Part 25 Thresholds (FAR Case 91–64)

The FAR is revised to remove the threshold in FAR 25.202(b) and change the approval level to allow contracting officers, unless agency regulations prescribes otherwise, to make nonavailability determinations in accordance with FAR 25.202(a)(3), if the acquisition is made under full and open competition, is synopsized in accordance with FAR 5.302, and offers for domestic construction materials are not received.

XVI—Severance Pay, Foreign Nationals (FAR Case 90–30)

This final rule removes restrictions on allowability of certain severance payments to foreign nationals, in anticipation of promulgation of the restrictions in the DFARS for DOD use only. This case supersedes FAR case 89–13, which was published in the **Federal Register** at 54 FR 13022 on March 29, 1989.

XVII—GAO Bid Protest Regulations (FAR Case 91–86)

FAR 33.104 is revised to implement the General Accounting Office's revised bid protest procedures which went into effect on April 1, 1991.

Item XVIII—Use of Indicia Mail (FAR Case 91–88)

The text at FAR 42.1404–1, Parcel post eligible shipments, and the clause at FAR 52.242–11, F.o.b. Origin—Government Bills of Lading or Indicia Mail, are revised to clarify the procedure agencies use to obtain authority for contractors to use indicia mail and requires contracting officers to furnish a completed Postal Service Form 3601, Application to Mail Without Affixing Postage Stamps, to contractors. This will make the FAR language consistent with current U.S. Postal Service regulations.

Item XIX—Thresholds, FAR Part 45 (FAR Case 90–12)

FAR 45.105, 45.106, 45.302–3, 45.307–2, and 45.506 are revised, and the clause at FAR 52.245–18 is amended to raise or delete outdated dollar thresholds and to clarify existing policy.

Item XX—Government Property (FAR Case 90–41)

FAR 45.301 and 45.302–3(c) are amended to clarify the Government's policy regarding fee or profit in the acquisition of general purpose components of special tooling and special test equipment. The policy states that the prohibition on profit or fee on the cost of facilities when purchased under other than a facilities contract does not apply to general purpose components of special tooling and special test equipment.

Item XXI—Inventory Schedules, Authority of Contractor's Representative; Withdrawal of FAR Coverage (FAR Case 91–74)

FAR 45.606–1(b) is revised to remove language requiring that the contractor's inventory schedule certificate be signed by a representative having the authority to commit the contractor in contractual matters. This change is a result of adverse industry comments in response to implementation of the language in FAC 90–4. Development of a new Plant Clearance Automated Reutilization Screening System at the Defense Contract Management Command (DCMC), which eliminated hard-copy inventory schedules for contractors under DOD cognizance, will minimize problems the language was intended to address.

Item XXII—Threshold Change to 51.106(b) (FAR Case 91–55)

FAR 51.106(b), Title, is revised by raising the threshold listed therein from $1,000 to $5,000, in order to be consistent with the threshold listed in FAR 52.245–2, Alternate II, and FAR 52.245–5, Alternate I, to which FAR 51.106(b) refers.

Item XXIII—Standard Forms 254 and 255, Architect-Engineer Questionnaires

Standard Form 254, Architect-Engineer and Related Services Questionnaire, and Standard Form 255, Architect-Engineer and Related Services Questionnaire for Specific Project have been revised to delete the obsolete definition of Architect-Engineer services on the forms and will reference the definition in FAR part 36. Corresponding changes are made to the prescriptive language for the forms at FAR 53.236–2 (b) and (c).

Item XXIV—Technical Corrections

Technical revisions have been made to FAR parts 15, 19, 31, 33, and 52 for clarification and to correct references and terms.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Federal Acquisition Circular

Unless otherwise specified, all Federal Acquisition Regulation (FAR) and other directive material contained in FAC 90–16 is effective February 19, 1993, except for the following items:

Item I, which is effective October 1, 1992;

Items X and XI, which are effective December 21, 1992; and

Item XVII, which is effective April 1, 1993.

Dated: December 3, 1992.

Eleanor R. Spector,

Director, Defense Procurement, DOD.

Richard H. Hopf, III,

Associate Administrator for Acquisition Policy, GSA.

Dated: November 13, 1992.

Don G. Bush,

Assistant Administrator for Procurement, NASA.

BILLING CODE 6820–34–M

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Parts 4 and 52

[FAC 90–16; FAR Case 91–81; Item I]

Federal Acquisition Regulation; Contractor Establishment Code

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed to amend FAR 4.602, Federal Procurement Data System (FPDS), and to remove the solicitation provision at 52.204–4, Contractor Establishment Code, and its prescriptive language at 4.603. These revisions implement the new Government-owned, contractor-operated contractor establishment code (CEC) numbering system to identify Federal contractors. This system replaces the Dun and Bradstreet Data Universal Numbering System which is currently being phased out.

EFFECTIVE DATE: October 1, 1992.

FOR FURTHER INFORMATION CONTACT: Ms. Shirley Scott at (202) 501–0168 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–16/FAR case 91–81.

SUPPLEMENTARY INFORMATION:

A. Background

On September 5, 1991, the General Services Administration awarded a contract for contractor identification services in the Federal Procurement Data System. The contract requires the establishment of a Government-owned, contractor-operated contractor establishment code (CEC) numbering system to identify Federal contractors. This new system (a nine-position alpha-numeric numbering system) replaces the Dun and Bradstreet Data Universal Numbering System (DUNS) that is currently being used in the data system.

B. Regulatory Flexibility Act

The final rule does not constitute a significant FAR revision within the meaning of FAR 1.501 and Public Law 98–577, and publication for public comments is not required. Therefore, the Regulatory Flexibility Act does not apply. However, comments from small entities concerning the affected subpart will be considered in accordance with 5 U.S.C 610. Such comments must be submitted separately and cite 5 U.S.C 610, *et seq.* (FAC 90–16, FAR case 91–81), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Parts 4 and 52

Government Procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR parts 4 and 52 are amended as set forth below:

1. The authority citation for 48 CFR parts 4 and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 4—ADMINISTRATIVE MATTERS

2. Section 4.602 is amended by revising paragraph (d) to read as follows:

4.602 Federal Procurement Data System.

* * * * *

(d) The contracting officer shall obtain and report a Contractor Establishment Code for each awardee from information on file or available to the contracting office. The contracting office or other designated agency office shall request a code using the procedures in the FPDS Reporting Manual or in accordance with agency procedures. Requests for codes shall be made by Government offices and only for the apparent awardees.

4.603 [Removed]

4. Section 4.603 is removed.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

52.204–4 [Removed]

5. Section 52.204–4 is removed.

[FR Doc. 92–30562 Filed 12–18–92; 8:45 am]

BILLING CODE 6820–34–M

48 CFR Part 4

[FAC 90–16; FAR Case 91–89; Item II]

Federal Acquisition Regulation; Technical Changes to FAR Part 4, Administrative Matters

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed on a final rule to clarify FAR 4.805, Disposal of contract files, with respect to the retention period for certain contracts.

EFFECTIVE DATE: February 19, 1993.

FOR FURTHER INFORMATION CONTACT: Ms. Alicia McGuire at (202) 501–4787 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405, (202) 501–4755. Please cite FAC 90–16, FAR case 91–89.

SUPPLEMENTARY INFORMATION:

A. Background

The two Councils agreed that the existing language at FAR 4.805 (b) and (e) does not accurately reflect the files disposition instructions contained in the National Archives and Records Administration's General Records Schedule (GRS) 3 dated June 1988. This change will bring FAR language in line with the GRS.

B. Regulatory Flexibility Act

The final rule does not constitute a significant FAR revision within the meaning of FAR 1.501 and Public Law 98–577, and publication for public comments is not required. Therefore, the Regulatory Flexibility Act does not apply. However, comments from small entities concerning the affected subpart will be considered in accordance with 5 U.S.C. 610. Such comments must be submitted separately and cite 5 U.S.C. 601, *et seq.* (FAC 90–16, FAR case 91–89), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 4

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR part 4 is amended as set forth below:

PART 4—ADMINISTRATIVE MATTERS

1. The authority citation for 48 CFR part 4 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

2. Section 4.805 is amended by revising the introductory paragraph and paragraphs (b) and (e) of the "Document" column to read as follows:

4.805 Disposal of contract files.

Agencies shall prescribe procedures for the handling, storing, and disposing of contract files. However, such procedures shall include provisions that the documents specified below shall not be destroyed before the times indicated. If administrative records are mixed with program records and cannot be economically segregated, the entire file should be kept for the period of time approved for the program records. Similarly, if documents covered by these schedules are part of a subject or case file which documents activities different from those covered by the schedules, they should be treated in the same manner as the files of which they are a part.

Document	Retention period
(a) • • •	• • •
(b) Signed originals of construction contracts over $2,000 and all other contracts over $25,000.	• • •
• • • • •	•
(e) Signed originals of construction contracts of $2,000 or less and all other contracts of $25,000 or less.	• • •
• • • • •	•

Federal Acquisition Regulation; Publicizing Subcontract Opportunities

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed on a final rule to revise FAR 5.206 to stress the importance of prime contractors using the Commerce Business Daily to seek additional small, small disadvantaged, and women-owned business subcontracting sources, and to meet subcontracting goals.

EFFECTIVE DATE: February 19, 1993.

FOR FURTHER INFORMATION CONTACT: Ms. Shirley Scott at (202) 501–0168 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–16, FAR case 91–90.

SUPPLEMENTARY INFORMATION:

A. Regulatory Flexibility Act

The final rule does not constitute a significant FAR revision within the meaning of FAR 1.501 and Public Law 98–577 and publication for public comments is not required. Therefore, the Regulatory Flexibility Act does not apply. However, comments from small entities concerning the affected subpart will be considered in accordance with 5 U.S.C. 610. Such comments must be submitted separately and cite 5 U.S.C. 601, *et seq.* (FAC 90–16, FAR case 91–90), in correspondence.

B. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

List of Subject in 48 CFR Part 5

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR part 5 is amended as set forth below:

PART 5—PUBLICIZING CONTRACT ACTIONS

1. The authority citation for 48 CFR part 5 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

2. Section 5.206 is revised to read as follows:

5.206 Publicizing subcontract opportunities.

Prime contractors may use the CBD to publicize subcontracting opportunities stemming from receipt of a Government contract. The CBD can be used to seek competition for subcontracts, to increase participation by small, small disadvantaged, and women-owned business firms, and to meet established subcontracting plan goals. Synopses of subcontract opportunities should be prepared and submitted in accordance with 5.207.

48 CFR Part 7

[FAC 90-16; FAR Case 92-611; Item IV]

Federal Acquisition Regulation; Metrics

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed on a final rule amending FAR 7.103, Agency-head responsibilities, to encourage the use of the metric system of measurement in Government procurements.

EFFECTIVE DATE: February 19, 1993.

FOR FURTHER INFORMATION CONTACT: Mr. Jack O'Neill at (202) 501-3856 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501-4755. Please cite FAC 90-16, FAR Case 92-611.

SUPPLEMENTARY INFORMATION:

A. Background

15 U.S.C. 205b and Executive Order 12770 require all Federal agencies to use the metric system of measurement in their procurements. This revision to FAR 7.103 supplements the existing metric guidance at FAR 10.002(c) by requiring agencies to establish procedures for addressing metrics at the start of the acquisition process.

B. Regulatory Flexibility Act

The final rule does not constitute a significant FAR revision within the meaning of FAR 1.501 and Public Law 98-577, and publication for public comments is not required. Therefore, the Regulatory Flexibility Act does not apply. However, comments from small entities concerning the affected subpart will be considered in accordance with 5 U.S.C. 610. Such comments must be submitted separately and cite 5 U.S.C. 601, *et seq.* (FAC 90-16, FAR case 92-611), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 7

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR part 7 is amended as set forth below:

PART 7—ACQUISITION PLANNING

1. The authority citation for 48 CFR part 7 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

2. Section 7.103 is amended by adding paragraph (l) to read as follows:

7.103 Agency-head responsibilities.

* * * * *

(l) Ensuring that agency planners include use of the metric system of measurement in proposed acquisitions in accordance with 15 U.S.C. 205b (see 10.002(c)) and agency metric plans and guidelines.

[FR Doc. 92-30564 Filed 12-18-92; 8:45 am]

BILLING CODE 6820-34-M

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Parts 7 and 52

[FAC 90-16; FAR Case 91-26; Item V]

Federal Acquisition Regulation; Contractor Versus Government Performance

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed to this final rule which (a) alerts the contracting officer to the possibility of performing a cost comparison for the specific reason that commercial prices were believed to be unreasonable; and (b) makes more general the language that pertains to when a cost comparison study must be made, so that future changes to statutes or regulations concerning cost comparisons will not require a change to FAR language. The proposed rule was published for public comment in the **Federal Register** at 55 FR 29556 on June 27, 1991.

EFFECTIVE DATE: February 19, 1993.

FOR FURTHER INFORMATION CONTACT: Mr. Jack O'Neill at (202) 501-3856 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4041, GS Building, Washington, DC 20405 (202) 501-4755. Please cite FAC 90-16, FAR Case 91-26.

SUPPLEMENTARY INFORMATION:

A. Background

This change was generated as part of the Department of Defense effort to streamline its acquisition regulations, and is made to correct inconsistencies between FAR Subpart 7.3 and Office of Management and Budget OMB Circular A-76.

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final

rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the changes merely remove inconsistencies between the FAR and OMB Circular A–76.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping information collection requirements, or collections of information from offerors, contractors, or members of the public which require OMB approval under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Parts 7 and 52

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR parts 7 and 52 are amended as set forth below:

1. The authority citation for 48 CFR parts 7 and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 7—ACQUISITION PLANNING

2. Section 7.300 is revised to read as follows:

7.300 Scope of subpart.

This subpart prescribes policies and procedures for use in acquisitions of commercial or industrial products and services subject to (a) OMB Circular No. A–76 (Revised) (the Circular), Performance of Commercial Activities, and (b) the Supplement to the Circular.

3. Section 7.302 is amended by revising paragraph (d) to read as follows:

7.302 General.

* * * * *

(d) Provide that, ordinarily, agencies should not incur the delay and expense of conducting cost comparison studies when the full-time equivalent Government employees involved are fewer than those specified by law, the Circular, and implementing agency guidance. Cost comparisons may be conducted in these instances if there is reason to believe that commercial prices are unreasonable.

4. Section 7.303 is amended in paragraph (b)(1) by revising the second sentence and removing the third sentence; and by adding paragraph (b)(3) to read as follows:

7.303 Determining availability of private commercial sources.

* * * * *

(b) * * *

(1) * * * If necessary, synopsis shall be submitted up to three times in a 90-day period with a minimum of 30 days between notices (but, when necessary to meet an urgent requirement, this notification may be limited to a total of two notices in a 30-day period with a minimum of 15 days between them).

(2) * * *

(3) If sufficient sources are not identified through synopses or from subparagraph (b)(2) of this section, a finding that no commercial source is available may be made and the cost comparison canceled.

5. Section 7.304 is amended in paragraph (b)(1) by removing the hyphen from the words "cost-comparison"; and in paragraph (c)(1) by revising the first sentence to read as follows:

7.304 Procedures.

* * * * *

(c) *Solicitation.* (1) The contracting officer shall issue a solicitation based on the performance work statement prepared in accordance with paragraph (a) of this section.

* * *

* * * * *

7.306 [Amended]

6a. Section 7.306 is amended by removing the hyphen from the words "cost-comparison" in the following places: (a)(1)(i) through (a)(1)(iii); (a)(1)(v); (a)(2); (a)(4); (b) introductory text; (b)(1)(ii); (b)(2)(ii); and (b)(3).

7.306 [Amended]

6b. In addition to the amendments set forth above, section 7.306 is amended in paragraph (b)(3) in the last sentence by removing the words "subparagraph (1) above" and "subparagraph (2) above" and inserting "subparagraph (b)(1) of this section" and "subparagraph (b)(2) of this section" in their places, respectively.

7. Section 7.307 is amended by revising paragraph (a) to read as follows:

7.307 Appeals.

(a) The Circular provides that each agency shall establish an appeals procedure for informal administrative review of the initial cost comparison result. The appeals procedure shall provide for an independent, objective review of the initial result by an official at a higher level than the official who approved that result. The purpose is to protect the rights of affected parties and to ensure that final agency determinations are fair, equitable, and in accordance with established policy.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

8a. Section 52.207–1 is amended by removing in the clause heading the date "(JUL 1990)" and inserting "(FEB 1993)" in its place; removing the last sentence in paragraph (b) of the clause; and revising the first sentence of paragraph (c) of the clause to read as follows:

52.207–1 Notice of Cost Comparison (Sealed-Bid).

* * * * *

(c) The abstract of bids, completed cost comparison form, and detailed data supporting the cost estimate for Government performance will be made available to interested parties for review for a period of _____[*insert a number from 15 to 30, depending on the complexity of the matter (see 7.306(a)(1)(iv)*] working days, beginning with the date the documents are available to interested parties.

* * * * *

8b. Section 52.207–2 is amended in the clause heading by revising the date; in paragraph (c) by removing the hyphen in the words "cost-estimate"; and revising paragraph (d) to read as follows:

52.207–2 Notice of Cost Comparison (Negotiated).

* * * * *

Notice of Cost Comparison (Negotiated) (Feb. 1993)

* * * * *

(d) During the public review period, directly affected parties may file with the Contracting Officer written requests, based on specific objections, for administrative review of the cost comparison result under the agency appeals procedure. The appeals procedure shall be used only to resolve questions concerning the calculation of the cost comparison and will not apply to questions concerning award to one offeror in preference to another. Agency determinations under the appeals procedure shall be final.

* * * * *

(End of provision)

52.207–1 and 52.207–2 [Amended]

8c. In addition to the amendments set forth above in FAR part 52, remove the hyphen from the words "cost-comparison" in the following places: (a) 52.207–1(b); (b) 52.207–2(c) introductory text, (c)(1), and (c)(2); and (c) 52.207–2(d).

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 8

[FAC 90–16; FAR Case 91–76; Item VI]

Federal Acquisition Regulation; Change in Government Specified Source for Strategic and Critical Materials from Excess GSA Inventories

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed on a final rule to revise FAR 8.002(f) to change the Government specified source for excess strategic and critical materials from the General Services Administration to the Department of Defense.

EFFECTIVE DATE: February 19, 1993.

FOR FURTHER INFORMATION CONTACT: Ms. Linda Klein at (202) 501–3775 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4041, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–16, FAR Case 91–76.

SUPPLEMENTARY INFORMATION:

A. Background

FAR 8.002(f) is revised to change the specified Government source for excess strategic and critical materials from the General Services Administration to the Department of Defense. Executive Order 12626, dated February 25, 1988, transferred management of the stockpile from GSA to DOD and designated the Secretary of Defense as National Defense Stockpile Manager. In May 1988, the authority to manage the Stockpile under Executive Order 12626 was delegated to the Assistant Secretary of Defense (Production and Logistics). Authority to operate the Stockpile was further delegated to the National Defense Stockpile Center, Defense Logistics Agency.

B. Regulatory Flexibility Act

The final rule does not constitute a significant FAR revision within the meaning of FAR 1.501 and Public Law 98–577 and publication for public comments is not required. Therefore, the Regulatory Flexibility Act does not apply. However, comments from small entities concerning the affected subpart will be considered in accordance with section 5 U.S.C. 610. Such comments must be submitted separately and cite 5 U.S.C. 601, *et seq.* (FAC 90–16, FAR case 91–76), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 8

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR part 8 is amended as set forth below:

PART 8—REQUIRED SOURCES OF SUPPLIES AND SERVICES

1. The authority citation for 48 CFR part 8 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

2. Section 8.002 is amended by revising paragraph (f) to read as follows:

8.002 Use of other Government supply sources.

* * * * *

(f) Strategic and critical materials (e.g., metals and ores) from inventories exceeding National Defense Stockpile requirements (detailed information is available from the Defense National Stockpile Center, 1745 Jefferson Davis Highway, Crystal Square Building #4, Suite 100, Arlington, VA 22202); and

[FAC 90–16; FAR Case 91–65; Item VII]

Federal Acquisition Regulation; List of Parties Excluded from Procurement Programs

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed to revise section 9.404(d) to include additional guidance on accessing the list of Parties Excluded from Procurement Programs. The purpose of such guidance is to inform contracting officers and other users of the list of Parties Excluded from Procurement Programs of the means of obtaining information from the list.

EFFECTIVE DATE: February 19, 1993.

FOR FURTHER INFORMATION CONTACT: Mr. Edward Loeb at (202) 501–4547 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–16, FAR case 91–65.

SUPPLEMENTARY INFORMATION:

A. Background

Information concerning parties on the list of Parties Excluded from Procurement Programs is available electronically, in hard copy form, and by telephone. The FAR is being revised to provide guidance on the means of accessing the list.

B. Regulatory Flexibility Act

The final rule does not constitute a significant FAR revision within the meaning of FAR 1.501 and Public Law 98–577 and publication for public comment is not required. Therefore, the Regulatory Flexibility Act does not apply. However, comments from small entities concerning the affected subpart will be considered in accordance with 5 U.S.C. 610. Such comments must be submitted separately and cite 5 U.S.C. 601, *et seq.* (FAC 90–16, FAR case 91–65), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the change to the FAR does not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 9

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR part 9 is amended as set forth below:

PART 9—CONTRACTOR QUALIFICATIONS

1. The authority citation for 48 CFR part 9 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

2. Section 9.404 is amended by revising paragraph (d) to read as follows:

9.404 Parties excluded from procurement programs.

* * * * *

(d) Information on the list of Parties Excluded from Procurement Programs is available as follows:

(1) The printed version is published monthly. Copies may be obtained by purchasing a yearly subscription.

(i) Federal agencies may subscribe to the list through their organization's printing and distribution office.

(ii) The public may subscribe by writing the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or by calling the Government Printing Office Inquiry and Order Desk at (202) 783–3238.

(2) The electronic version is updated daily and provides access to the names of firms and individuals on the list by using an asynchronous ASCII terminal (e.g., a word processor or microcomputer). Users can access the system 24 hours a day, 7 days a week using FTS 2000, or commercial telephone lines and the equipment described in the user's manual. Aside from the normal costs of local or long-distance telephone calls, access is free of charge to the user. To obtain a copy of the user's manual for accessing the system, contact GSA at (202) 501–4740.

(3) A telephone inquiry service to answer general questions about entries on the list of Parties Excluded from Procurement Programs is also available by calling GSA at (202) 501–0688. The inquiry will be answered within one working day.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 13

[FAC 90–16; FAR Case 91–80; Item VIII]

Federal Acquisition Regulation; Use of Small Purchase Procedures for Personal Services

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed on a final rule to remove the word "nonpersonal" from Federal Acquisition Regulation (FAR) 13.000, and from the definitions of "purchase order" and "small purchase" in section 13.101 to permit the use of small purchase procedures for the acquisition of personal services.

EFFECTIVE DATE: February 19, 1993.

FOR FURTHER INFORMATION CONTACT: Mr. Jack O'Neill at (202) 501–3856 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–16, FAR case 91–80.

SUPPLEMENTARY INFORMATION:

A. Background

The Department of Defense has granted deviations to FAR part 13 to defense agencies that regularly contract for professional health care personal services to permit them to use simplified purchase procedures when the total amount of the contract is less than the small purchase limitation in FAR 13.000. The statutes which govern the acquisition of personal services do not restrict the contracting method, which can be used to acquire services, and the Civilian Agency Acquisition Council agree there is no reason to impose a restriction in the FAR.

B. Regulatory Flexibility Act

The final rule does not constitute a significant FAR revision within the meaning of FAR 1.501 and Public Law 98–577 and publication for public comment is not required. Therefore, the Regulatory Flexibility Act does not apply. However, comments from small entities concerning the affected subpart will be considered in accordance with 5 U.S.C. 610. Such comments must be submitted separately and cite 5 U.S.C. 601, *et seq.* (FAC 90–16, FAR case 91–80), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 13

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR part 13 is amended as set forth below:

PART 13—SMALL PURCHASE AND OTHER SIMPLIFIED PURCHASE PROCEDURES

1. The authority citation for 48 CFR part 13 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

13.000 [Amended]

2. Section 13.000 is amended by removing the word "nonpersonal".

13.101 [Amended]

3. Section 13.101 is amended in the definitions of "purchase order" and "small purchase" by removing the word "nonpersonal".

4. Section 13.103 is amended by adding paragraph (c) to read as follows:

13.103 Policy.

* * * * *

(c) Small purchase procedures may be used to acquire personal services if the agency has specific statutory authority to acquire personal services by contract (see 37.104).

48 CFR Parts 15 and 52

[FAC 90–16; FAR Case 91–38; Item IX]

Federal Acquisition Regulation; OMB Circular A–133, Audits of Institutions of Higher Learning and Other Nonprofit Organizations

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed on a final rule amending the Federal Acquisition Regulation to add guidance and a contract clause to implement the requirements of OMB Circular A–133, "Audits of Institutions of Higher Learning and Other Nonprofit Institutions" and to increase the $10,000 threshold for application of access to records clauses to the small purchase threshold.

EFFECTIVE DATE: February 19, 1993.

FOR FURTHER INFORMATION CONTACT: Mr. Jeremy F. Olson at (202) 501–3221 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–16, FAR Case 91–38.

SUPPLEMENTARY INFORMATION:

A. Background

OMB Circular A–133, "Audits of Institutions of Higher Learning and Other Nonprofit Institutions" establishes a policy for efficient and effective use of audit services for awards made to certain institutions. The final rule provides that the circular will apply to cost-reimbursement contracts with those institutions.

The Examination of Records by Comptroller General clause 52.215–1, previously applied to negotiated contracts and subcontracts exceeding $10,000 and the Audit-Negotiation clause, 52.215–2, applied to subcontracts over $10,000. The final rule raises those amounts to the level of the small purchase threshold (currently $25,000).

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the rule implementing OMB Circular A–133 does not create or change any responsibilities. It facilitates implementation of the already existing requirements of the OMB Circular. The portions of the rule which increase the threshold for applications of the Examination of Records by Comptroller General clause and Audit-Negotiation clause do not have a significant impact on a substantial number of small businesses because most contracts awarded to small businesses are awarded on the basis of sealed bids and the clauses do not apply. No small entities commented on the proposed rule.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96–511) applies because the final rule contains information collection requirements. Accordingly, a request for approval of a revision to an information collection requirement concerning OMB Control No. 9000–0034, Examination of Records by Comptroller General and Audit–Negotiation, was submitted to the Office of Management and Budget under 44 U.S.C. 3501, *et seq.* Approval of the reduced burden was granted on October 10, 1991, by the Office of Information and Regulatory Affairs, Office of Management and Budget. Public comments concerning this request were invited through a subsequent **Federal Register** notice at 56 FR 33272 on July 19, 1991.

List of Subjects in 48 CFR Parts 15 and 52

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR parts 15 and 52 are amended as set forth below:

1. The authority citation for 48 CFR parts 15 and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 15—CONTRACTING BY NEGOTIATION

2. Section 15.106–2 is amended by revising paragraph (a) and adding a third sentence to paragraph (b) to read as follows:

15.106–2 Audit—Negotiation clause.

(a) This subsection implements 10 U.S.C. 2313(a), 41 U.S.C. 254(b), 10 U.S.C. 2306(f), and OMB Circular No. A–133.

(b) * * * In cost-reimbursement contracts with educational institutions and other nonprofit organizations, the contracting officer shall use the clause with its Alternate II.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

52.215–1 [Amended]

3. Section 52.215–1 is amended in the clause heading by removing the date "(APR 1984)" and inserting "(FEB 1993)" in its place; in paragraph (a) by removing the dollar amount "$10,000" and inserting the words "the small purchase limitation in Part 13 of the Federal Acquisition Regulation (FAR)" in its place; in paragraph (b) by removing the words "Federal Acquisition Regulation (FAR)" and inserting "FAR" in their place; and in paragraph (c)(1) by removing the dollar amount "$10,000" and inserting the words "the FAR Part 13 small purchase limitation" in its place.

4. Section 52.215–2 is amended in the clause heading by removing the date "(DEC 1989)" and inserting "(FEB 1993)" in its place; in paragraph (d) by adding the acronym "(FAR)" after the words "Federal Acquisition Regulation"; by revising paragraph (f); by removing the derivation lines "(R 7–104.41(b) 1978 AUG)", "(R 7–702.48)", "(R 7–703.41)" and "(R 7–704.33)" appearing at the end of the Alternate I; and by adding Alternate II to read as follows:

52.215–2 Audit—Negotiation.

* * * * *

(f) The Contractor shall insert a clause containing all the terms of this clause, including this paragraph (f), in all subcontracts under this contract that are over the small purchase limitation in FAR Part 13, altering the clause only as necessary to identify properly the contracting parties and the Contracting Officer under the Government prime contract.
(End of clause)

Alternate I * * *

Alternate II (FEB 1993). In cost-reimbursement contracts with educational and other nonprofit institutions, add the following paragraph (g) to the basic clause:

(g) The provisions of OMC Circular No. A–133, "Audits of Institutions of Higher

Learning and Other Nonprofit Institutions," apply to this contract.

48 CFR Part 15

[FAC 90-16; FAR Case 91-96; Item X]

Federal Acquisition Regulation; Clarify Increased Cost or Pricing Data Threshold

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Interim rule with request for comment.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed to an interim rule revising FAR 15.804-2 to clarify application of the $500,000 threshold for submission of certified cost or pricing data.

DATES: Effective Date: December 21, 1992.

Comment Date: Comments should be submitted to the FAR Secretariat at the address shown below on or before February 19, 1993 to be considered in the formulation of a final rule.

ADDRESSES: Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), 18th & F Streets, NW., room 4037, Attn: Ms. Deloris Baker, Washington, DC 20405.

Please cite FAC 90-16, FAR case 91-96 in all correspondence related to this case.

FOR FURTHER INFORMATION CONTACT: Mr. Jeremy Olson at (202) 501-3221 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501-4755. Please cite FAC 90-16, FAR case 91-96.

SUPPLEMENTARY INFORMATION:

A. Background

FAC 90-10 increased the threshold for submission of cost or pricing data to $500,000 for DOD, NASA, and the Coast Guard. This interim rule implements section 804 of the FY 92 Defense Authorization Act, which amends 10 U.S.C. 2306a(a)(1), to specify that the $500,000 threshold for DOD, Coast Guard, and NASA, also applies to subcontracts entered into after December 5, 1991, under prime contracts entered into on or before December 5, 1990, if the prime contract is modified to incorporate the $500,000 threshold. It also specifies that the $500,000 threshold applies to changes or modifications made after December 5, 1991, when the prime contract is modified to incorporate the $500,000 threshold.

B. Regulatory Flexibility Act

The interim rule is not expected to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because most contracts awarded to small entities are awarded on a competitive, fixed-price basis and the requirements for certified cost or pricing data do not apply. An Initial Regulatory Flexibility Analysis has, therefore, not been performed. Comments from small entities concerning the affected FAR subpart will also be considered in accordance with 5 U.S.C. 610. Such comments must be submitted separately and cite 5 U.S.C. 601 *et seq.* (FAC 90-16, FAR Case 91-96), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96-511) applies. This rule clarifies a rule previously promulgated under FAR Case 91-53, Increase in Cost or Pricing Data Threshold. A request for approval of a revision to reduce the burden of a currently approved information collection requirement concerning Increase in Cost or Pricing Data Threshold was submitted to the Office of Management and Budget (OMB) and approved under OMB control number 9000-0013.

D. Determination to Issue an Interim Rule

A determination has been made under the authority of the Secretary of Defense, the Administrator of General Services, and the Administrator of the National Aeronautics and Space Administration that compelling reasons exist to promulgate this interim rule without prior opportunity for public comment. This action is necessary because section 804 of Public Law 102-190 amended section 2306a(a)(1) of title 10, United States Code, to clarify revised thresholds for contractor certification of cost or pricing data. However, pursuant to Public Law 98-577 and FAR 1.501, public comments received in response to this interim rule will be considered in formulating the final rule.

List of Subjects in 48 CFR Part 15

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR part 15 is amended as set forth below:

PART 15—CONTRACTING BY NEGOTIATION

1. The authority citation for 48 CFR part 15 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

2. Section 15.804-2 is amended in paragraph (a)(1)(ii) by removing the first sentence and adding in its place two sentences as set forth below; revising paragraphs (a)(1)(iii) and (a)(1)(iv); and redesignating paragraphs (a)(2) through (a)(4) as paragraphs (a)(3) through (a)(5) and adding a new paragraph (a)(2) to read as follows:

15.804-2 Requiring certified cost or pricing data.

(a)(1) * * *

(ii) The modification of any sealed bid or negotiated contract (whether or not cost or pricing data were initially required) when the modification involves a price adjustment expected to exceed $100,000, or for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, for modifications involving a price adjustment expected to exceed $500,000, if the contract includes or has been modified in accordance with 15.804-2(a)(2) to include the $500,000 threshold. Price adjustment amounts shall consider both increases and decreases * * *.

(iii) The award of a subcontract at any tier, if the contractor and each higher tier subcontractor have been required to furnish certified cost or pricing data, when the subcontract is expected to exceed $100,000, or for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, for subcontracts expected to exceed $500,000 if the contract includes, or has been modified to include, the $500,000 threshold per 15.804-2(a)(2). (But see 15.804-3(i).)

(iv) The modification of any subcontract covered by subdivision (a)(1)(iii) of this subsection, when the price adjustment (see subdivision (a)(1)(ii) of this subsection) is expected to exceed $100,000, or for the Department of Defense, the National

Aeronautics and Space Administration, and the Coast Guard, for subcontracts when the modification involves a price adjustment expected to exceed $500,000 if the contract includes or has been modified to include the $500,000 threshold per 15.804–2(a)(2).

(2) Department of Defense, National Aeronautics and Space Administration, and Coast Guard contracting officers shall, if requested by the contractor, modify contracts entered into on or before December 5, 1990, to incorporate the $500,000 threshold without requiring consideration. Contracting officers shall comply with contractors' requests for the threshold increase unless a contracting officer determines in accordance with the criteria at 15.804–2(a)(3) that a change in the threshold is not in the best interests of the Government. The requirement to submit certified cost or pricing data shall be determined by the threshold in the contract at the time of agreement on price regardless of when an undefinitized modification, change order or subcontract is issued.

BILLING CODE 6820–34–M

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 19

[FAC 90–16; FAR Case 91–50; Item XI]

Federal Acquisition Regulation; Nonmanufacturer Rule

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Interim rule with request for comment.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council are amending FAR 19.001 and 19.102 to add a definition for the term "Nonmanufacturer rule", to address the Small Business Administration (SBA) waiver of the rule, and to remove the partial listing of classes listed in the FAR for which a waiver has been granted.

EFFECTIVE DATE: December 21, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Jack O'Neill at (202) 501–3856 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4041, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–16, FAR case 91–50.

SUPPLEMENTARY INFORMATION:

A. Background

Section 210 of Public Law 101–574 authorizes the SBA to waive the nonmanufacturer rule as it applies to a specific product, as well as to classes of products. Heretofore, SBA waivers were not issued on a contract-by-contract basis but, rather, waivers were issued for classes of products.

B. Regulatory Flexibility Act

The interim rule may have a significant economic impact on a substantial number of small businesses within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because it may mean that more small business set-asides will be possible. An Initial Regulatory Flexibility Analysis (IRFA) has been prepared and is summarized as follows:

Section 210 of Public Law 101–574, the Small Business and Reauthorization and Amendments Act of 1990, amends the Small Business Act as to the Small Business Administration's authority to waive the requirement for offerors under a small-business set-aside or 8(a) award to provide the product of a small business concern. Section 210 provides for waivers of a specific product, as well as a class of products. Accordingly, this rule could have a favorable impact on small businesses.

A copy of the IRFA has been submitted to the Chief Counsel for Advocacy of the SBA. A copy of the analysis may be obtained from the FAR Secretariat. Comments are invited. Comments from small entities concerning the affected FAR subpart will also be considered in accordance with 5 U.S.C. 610 of the Act. Such comments must be submitted separately and cite FAR case 91–50 in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping information collection requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, *et seq.*

D. Determination to Issue an Interim Rule

A determination has been made under the authority of the Secretary of Defense (DOD), the Administrator of General Services (GSA), and the Administrator of the National Aeronautics and Space Administration (NASA) that compelling reasons exist to promulgate this interim rule without prior opportunity for public comment. This action is necessary to implement section 210 of Public Law 101–574, which was effective upon enactment November 15, 1990.

List of Subjects in 48 CFR Part 19

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR part 19 is amended as set forth below:

PART 19—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

1. The authority citation for 48 CFR part 19 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

2. Section 19.001 is amended by adding the definition of "Nonmanufacturer rule" in alphabetical order to read as follows:

19.001 Definitions.

* * * * *

Nonmanufacturer rule means that a contractor under a small business set-aside or 8(a) contract shall be a small business under the applicable size standard and shall provide either its own produce or that of another domestic small business manufacturing or processing concern (see 13 CFR 121.906).

* * * * *

3. Section 19.102 is amended by revising the first sentence in paragraph (f)(1) and revising paragraph (f)(5) to read as follows:

19.102 Size standards.

* * * * *

(f) * * *

(1) Except as provided in subparagraphs (f)(2) through (f)(5) of this section, in the case of Government acquisitions set aside for small businesses, such nonmanufacturer must furnish in the performance of the contract, the product of a small business manufacturer or producer, which end product must be manufactured or produced in the United States. * * *

* * * * *

(5) In the case of acquisitions set aside for small business or awarded under section 8(a) of the Small Business Act, when the acquisition is for a specific

product (or a product in a class of products) for which the SBA has determined that there are no small business manufacturers or processors in the Federal market, then—

(i) In such cases, section 637(a)(17)(A) of the Small Business Act provides that the nonmanufacturer may furnish any domestic product if such nonmanufacturer is primarily engaged in the wholesale or retail trade and is a regular dealer, as defined pursuant to 41 U.S.C. 35(a) (see 22.601), in the product to be offered unless specifically exempted by section 7(j)(13)(C) of the Small Business Act. For the most current listing of classes for which SBA has granted a waiver, contact the regional SBA office.

(ii) Contracting officers may request that the SBA waive the nonmanufacturer rule for a particular class of products.

(iii) For a specific solicitation, a contracting officer may request a waiver of that part of the nonmanufacturer rule which requires that the actual manufacturer or processor be a small business concern if the contracting officer determines that no known domestic small business manufacturers or processors can reasonably be expected to offer a product meeting the requirements of the solicitation.

(iv) Requests for waivers shall be sent to the Chairman of the Size Standards Policy Board, SBA Central Office, 409 Third Street, SW., Washington, DC 20416.

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 19

[FAC 90–16; FAR Case 91–49; Item XII]

Federal Acquisition Regulation; Bundling of Requirements, FAR Part 19

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed on a final rule revising FAR 19.202–1 to require contracting officers to forward proposed acquisitions meeting specified criteria to the Small Business Administration's procurement center representatives for review, and FAR 19.402 to require that procurement center representatives recommend alternative contracting methods for acquisitions which have increased or consolidated requirements that make it unlikely that small businesses can compete.

EFFECTIVE DATE: February 19, 1993.

FOR FURTHER INFORMATION CONTACT: Ms. Shirley Scott at (202) 501–0168 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–16, FAR Case 91–49.

SUPPLEMENTARY INFORMATION:

A. Background

Section 208 of Public Law 101–574 requires, whenever a proposed procurement of supplies or services currently being provided by a small business is of a quantity or estimated dollar value which makes small business prime contracting unlikely or when discrete construction projects are consolidated, that the procurement activity provide a copy of the proposed acquisition to the Small Business Administration's procurement center representative (PCR) for review and that the PCR recommend alternative contracting methods.

An interim rule was published in Federal Acquisition Circular (FAC) 90–9 in the **Federal Register** at 56 FR 67131 on December 27, 1991. This interim rule is hereby adopted as final with one change; the word "realistic" was added in 19.202–1(e)(2)(ii).

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the rule may benefit small business contractors in that it may provide additional opportunities for them to compete for Government contracts. No comments were received on the impact of this rule on small entities during the public comment period.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 19

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Interim Rule Adopted as Final With One Change

Accordingly, the interim rule amending 48 CFR part 19 which was published at 56 FR 67131 on December 27, 1991, is hereby adopted as a final rule with the following change:

PART 19—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

1. The authority citation for 48 CFR part 19 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

19.202–1 [Amended]

2. Section 19.202–1 is amended in paragraph (e)(2)(ii) by inserting the word "realistic" after the word "a".

RIN 9000–AE45

[FAC 90–16; FAR Case 90–68; Item XIII]

Federal Acquisition Regulation; Part 22 Threshold, Compensation Plans for Professional Employees

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed on a final rule amending Federal Acquisition Regulation (FAR) 22.1101 and 22.1103 to raise the threshold from $250,000 to $500,000 for imposition of

a requirement for offerors on acquisitions for negotiated service contracts to submit total compensation plans. The provision at FAR 52.222–45 is removed and reserved and its language is combined with the provision at FAR 52.222–46 for purposes of simplification.

EFFECTIVE DATE: February 19, 1993.

FOR FURTHER INFORMATION CONTACT: Mr. Jack O'Neill at (202) 501–3856 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–16, FAR Case 90–68.

SUPPLEMENTARY INFORMATION:

A. Background

FAR 22.1101 and 22.1103 are amended to raise the threshold from $250,000 to $500,000 for imposition of a requirement for offerors on acquisitions for negotiated service contracts to submit total compensation plans. The provision at FAR 52.222–45 is removed and reserved and its language is combined with the provision at FAR 52.222–46 for simplification. The threshold is raised to reflect inflation.

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the rule reduces the number of instances in which offerors, as part of a cost proposal, will have to submit compensation plans for professional employees.

C. Paperwork Reduction Act

This final rule contains reduced information collection requirements. Accordingly, a revised burden estimate was approved by the Office of Management and Budget (OMB) on February 18, 1992 for OMB Clearance No. 9000–0066 for use through February 28, 1995.

List of Subjects in 48 CFR Parts 22 and 52

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR parts 22 and 52 are amended as set forth below:

1. The authority citation for 48 CFR parts 22 and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 22—APPLICATION OF LABOR LAWS TO GOVERNMENT ACQUISITIONS

22.1101 [Amended]

2. Section 22.1101 is amended in the last sentence by removing the amount "$250,000" and inserting in its place "$500,000".

3. Section 22.1103 is revised to read as follows:

22.1103 Policy, procedures, and solicitation provision.

All professional employees shall be compensated fairly and properly. Accordingly, the contracting officer shall insert the provision at 52.222–46, Evaluation of Compensation for Professional Employees, in solicitations for negotiated service contracts when the contract amount is expected to exceed $500,000 and the service to be provided will require meaningful numbers of professional employees. This provision requires that offerors submit for evaluation a total compensation plan setting forth proposed salaries and fringe benefits for professional employees working on the contract. Supporting information will include data, such as recognized national and regional compensation surveys and studies of professional, public and private organizations, used in establishing the total compensation structure. Plans indicating unrealistically low professional employees compensation may be assessed adversely as one of the factors considered in making an award.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

52.222–45 [Reserved]

4. Section 52.222–45 is removed and reserved.

5. Section 52.222–46 is amended in the introductory text by inserting a colon after the word "provision" and removing the remainder of the sentence; removing the date "(APR 1984)" in the provision title and inserting in its place "(FEB 1993)"; removing the derivation line reading "(R 7–2003.79 1978 JUN)" following "(End of provision)" after paragraph (c); and adding paragraph (d) to read as follows:

52.222–46 Evaluation of compensation for professional employees.

As prescribed in 22.1103, insert the following provision:

EVALUATION OF COMPENSATION FOR PROFESSIONAL EMPLOYEES (FEB 1993)

* * * * *

(d) Failure to comply with these provisions may constitute sufficient cause to justify rejection of a proposal.

(End of provision)

48 CFR Part 25

[FAC 90–16; FAR Case 92–3; Item XIV]

Federal Acquisition Regulation; Determination and Finding of Nonavailability

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed on a final rule amending FAR 25.108(d)(1) to add "wire glass" to the list of items that one or more Federal agencies have determined are not mined, produced, or manufactured in the United States in sufficient and reasonably available commercial quantities of a satisfactory quality.

EFFECTIVE DATE: February 19, 1993.

FOR FURTHER INFORMATION CONTACT: Mr. Edward Loeb at (202) 501–3856 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405, (202) 501–4755. Please cite FAC 90–16, FAR Case 92–3.

SUPPLEMENTARY INFORMATION:

A. Background

The addition of "wire glass" to the list in FAR 25.108(d)(1), of articles, materials, and supplies that are determined not mined, produced, or manufactured in the United States in sufficient and reasonably available commercial quantities of a satisfactory quality, was based on an agency's determination of nonavailability under the Buy American Act.

B. Regulatory Flexibility Act

The final rule does not constitute a significant FAR revision within the meaning of FAR 1.501 and Public Law 98–577, and publication for public comments is not required. Therefore, the Regulatory Flexibility Act does not apply. However, comments from small entities concerning the affected subpart will be considered in accordance with 5 U.S.C. 610. Such comments must be submitted separately and cite 5 U.S.C. 601, *et seq.* (FAC 90–16, FAR case 92–3), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 25

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR part 25 is amended as set forth below:

PART 25—FOREIGN ACQUISITION

1. The authority citation for 48 CFR part 25 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

25.108 [Amended]

2. Section 25.108 is amended in paragraph (d)(1) by adding in alphabetical order "wire glass" to the list of "articles, materials, and supplies".

48 CFR Part 25

[FAC 90–16; FAR Case 91–64; Item XV]

Federal Acquisition Regulation; Part 25 Thresholds

AGENCY: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed on a final rule amending Federal Acquisition Regulation (FAR) 25.202(b) to lower the approval level for determinations of nonavailability on construction materials.

EFFECTIVE DATE: February 19, 1993.

FOR FURTHER INFORMATION CONTACT: Mr. Edward Loeb at (202) 501–4547 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–16, FAR case 91–64.

SUPPLEMENTARY INFORMATION:

A. Background

Dollar thresholds in FAR part 25 were reviewed for currency, clarity, and necessity. The $100,000 threshold in FAR 25.202(b) has been removed and the language revised to permit delegation of authority below the level of head of the contracting activity for determinations of nonavailability of construction materials.

B. Regulatory Flexibility Act

The final rule does not constitute a significant FAR revision within the meaning of FAR 1.501 and Public Law 98–577 and publication for public comment is not required. Therefore, the Regulatory Flexibility Act does not apply. However, comments from small entities concerning the affected subpart will be considered in accordance with 5 U.S.C. 610. Such comments must be submitted separately and cite 5 U.S.C. 601, *et seq.* (FAC 90–16, FAR case 91–64) in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 25

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR part 25 is amended as set forth below:

PART 25—FOREIGN ACQUISITION

1. The authority citation for 48 CFR part 25 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

25.202 [Amended]

2. Section 25.202 is amended in paragraph (a)(3) by adding after the word "The" the words "head of the contracting activity or designee determines the"; removing paragraph (b); and redesignating paragraph (c) as paragraph (b).

48 CFR Parts 31, 37, and 52

[FAC 90–16; FAR Case 90–30; Item XVI]

Federal Acquisition Regulation; Severance Pay, Foreign Nationals

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed on a final rule that supersedes two interim rules. Restrictions on allowability of certain severance payments to foreign national contractor employees have been removed.

EFFECTIVE DATE: February 19, 1993.

FOR FURTHER INFORMATION CONTACT: Mr. Jeremy Olson at (202) 501–3856 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–16, FAR Case 90–30.

SUPPLEMENTARY INFORMATION:

A. Background

The first interim rule under FAR case 89–13 was published in the **Federal Register** at 54 FR 13022 on March 29, 1989, as Federal Acquisition Circular (FAC) 84–44 and included restrictions on allowability of severance pay for foreign nationals pursuant to statutory requirements under Section 322 of Public Law 100–456. Use of those restrictions was mandatory on DOD

contracts and optional on civilian agency contracts. The second interim rule under FAR case 90–30 amended the first interim rule (FAR Case 89–13) to incorporate additional statutory requirements of section 311(a) of Public Law 101–189, regarding base closures. FAR Case 90–30 (the second interim rule) was published in the Federal Register at 55 FR 52782 on December 21, 1990, as FAC 90–3. Use of the revised restrictions was made mandatory for covered contracts for all agencies. This final rule removes both restrictions on severance pay from the Governmentwide FAR in anticipation of promulgation of the restrictions in the DOD supplement, the DFARS. This final rule also supersedes FAR Case 89–13 in the Federal Register at 54 FR 13022 on March 29, 1989, and FAR cases 90–30 in the Federal Register at 55 FR 52782 on December 21, 1990.

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because most contracts awarded to small entities are awarded on a competitive, fixed-price basis and the cost principles do not apply.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S. 3501, *et seq.*

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed on a final rule revising FAR 33.104 to implement the General Accounting Office's revised bid protest procedures which went into effect on April 1, 1991.

EFFECTIVE DATE: April 1, 1991.

FOR FURTHER INFORMATION CONTACT: Mr. Jack O'Neill at (202) 501–3856 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–16, FAR case 91–86.

SUPPLEMENTARY INFORMATION:

A. Background

This rule is being published as a final rule without prior publication as a proposed rule because it is not a significant revision within the meaning of FAR 1.501 and involves only internal agency operating procedures.

The General Accounting Office (GAO) revised its bid protest rules (4 CFR part 21) effective April 1, 1991. This FAR final rule implements only those changes in GAO's rules which are essential to the contracting officer. The most significant of these address the information an agency is required to provide to GAO, protective orders issued by GAO, and formal fact-finding hearings. FAR 33.104 has been substantially rewritten to implement GAO's revised rules and to revise the coverage to present a more logical order and make other editorial improvements.

"All evaluation documents" are added to the list of documents an agency report must now include (33.104(a)(3)(ii)(D)); in addition to the documents contained in the report, agencies must also make available to GAO any relevant document specifically requested by the protestor (33.104(a)(3)(iii)). GAO's new rules provide interested parties with easier access to documents, and FAR 33.104(a)(5) addresses requests for, and GAO issuance of, protective orders to limit the right to use and disclose released documents. FAR 33.104(e) provides notice of the GAO's formal fact-finding hearings, with minimal discussion of GAO's detailed procedures. In addition, in lieu of defining the term "day" in this section of the FAR, the terms "work day" or "calendar day" have been used throughout 33.104, consistent with the usage of those terms in 31 U.S.C. 3551 and 4 CFR part 21.

B. Regulatory Flexibility Act

The final rule does not constitute a significant FAR revision within the meaning of FAR 1.501 and Public Law 98–577 and publication for public comments is not required. Therefore, the Regulatory Flexibility Act does not apply. The rule implements GAO's revised bid protest procedures (4 CFR part 21) by incorporating those revised procedures which are essential to contracting officers; it does not impact the involvement of small entities in the GAO bid protest process. However, comments from small entities concerning the affected subpart will be considered in accordance with 5 U.S.C. 610. Such comments must be submitted separately and cite 5 U.S.C. 610, *et seq.* (FAC 90–16, FAR case 91–86), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office

of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 33

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR part 33 is amended as set forth below:

PART 33—PROTESTS, DISPUTES, AND APPEALS

1. The authority citation for 48 CFR part 33 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

2. Section 33.104 is revised to read as follows:

33.104 Protests to GAO.

This section implements the GAO's Bid Protest Regulations as set forth at 4 CFR part 21.

(a) *General procedures.* (1) A protestor is required to furnish a copy of its complete protest to the official or location designated in the solicitation or, in the absence of such a designation, to the contracting officer, so it is received no later than 1 work day after the protest is filed with the GAO. The GAO may dismiss the protest if the protestor fails to furnish a complete copy of the protest within 1 work day.

(2) Immediately after receipt of the GAO's written notice that a protest has been filed, the agency shall give notice of the protest to the contractor if the award has been made, or, if no award has been made, to all parties who appear to have a substantial and reasonable prospect of receiving award if the protest is denied. The agency shall furnish copies of the protest submissions to such parties with instructions to (i) communicate directly with the GAO, and (ii) provide copies of any such communication to the agency and to other participating parties when they become known.

(3)(i) Upon notice that a protest has been filed with the GAO, the contracting officer shall immediately begin compiling the information necessary for a report to the GAO. The agency shall submit a complete report to the GAO within 25 work days after the GAO notifies the agency by telephone that a protest has been filed, or within 10 work days after receipt from the GAO of a determination to use the express option, unless the GAO—

(A) Advises the agency that the protest has been dismissed; or

(B) Authorizes a longer period in response to an agency's written request for an extension. Any new date shall be documented in the agency's protest file.

(ii) The agency report to the GAO shall include, as appropriate, a copy of—

(A) The protest;

(B) The offer submitted by the protesting offeror;

(C) The offer which is being considered for award or which is being protested;

(D) All evaluation documents;

(E) The solicitation, including the specifications or portions relevant to the protest;

(F) The abstract of offers or relevant portions;

(G) Any other documents that the agency determines are relevant to the protest;

(H) The contracting officer's signed statement setting forth findings, actions, and recommendations and any additional evidence or information deemed necessary in determining the validity of the protest. The statement shall be fully responsive to the allegation of the protest. If the contract action or contract performance continues after receipt of the protest, the report will include the determination(s) prescribed in paragraphs (b) or (c) of this section;

(I) A list identifying the other parties who are being provided copies of the report; and

(J) A list of the documents withheld from the protestor and other interested parties, and the reasons for withholding them. The list shall identify any documents specifically requested by, and withheld from, the protestor.

(iii) In addition to the documents contained in the report, the agency shall make available to the GAO any documents specifically requested by the protestor.

(4)(i) At the same time the agency submits its report to the GAO, the agency shall furnish copies of its report to the protestor and other interested parties who have responded to the notice given under subparagraph (a)(2) of this section. A party shall receive all relevant documents, except—

(A) Those that the agency has decided to withhold from that party for any reason, including those covered by a protective order issued by the GAO. Documents covered by a protective order shall be released only in accordance with the terms of the order. Examples of documents the agency may decide to exclude from a copy of the report include documents previously furnished to or prepared by a party; classified information; and information that would give the party a competitive advantage; and

(B) Protestor's documents which the agency determines, pursuant to law or regulation, to withhold from any interested party.

(ii)(A) If, within 2 work days after receipt of the agency report, the protestor requests additional documents, the agency shall provide the requested documents, if relevant, to the GAO within 5 work days of receipt of the request.

(B) The additional documents shall also be provided to the protestor and other interested parties within this 5-workday period unless the agency has decided to withhold them for any reason (see subdivision (a)(4)(i) of this section). This includes any documents covered by a protective order issued by the GAO. Documents covered by a protective order shall be provided only in accordance with the terms of the order. A request for a protective order to cover the additional documents shall be made in accordance with 33.104(a)(5) within this 5-workday period.

(C) The agency shall notify the GAO of any documents withheld from the protestor and other interested parties and shall state the reasons for withholding them.

(5) The GAO may issue a protective order to limit the release of particular documents to counsel for the protestor and to counsel for the other interested parties entitled to receive the documents if the documents contain information that is privileged, or if their release would create a competitive advantage.

(i) *Requests for protective orders.* Any party seeking issuance of a protective order shall file its request with the GAO as soon as practicable after the protest is filed, but not more than 20 work days after the protest filing date, with copies furnished simultaneously to all parties.

(ii) *Exclusions and rebuttals.* Within 2 work days after receipt of a copy of the protective order request, any party may file with the GAO a request that particular documents be excluded from the coverage of the protective order, or that particular parties or individuals be included in or excluded from the protective order. Copies of the request shall be furnished simultaneously to all parties. Within 1 work day after receipt of a copy of the request, any rebuttal shall be filed with GAO, with copies furnished simultaneously to all parties.

(iii) *Additional documents.* If the existence or relevance of additional documents first becomes evident after a protective order has been issued, any party may request that these additional documents be covered by the protective order. Any party to the protective order also may request that individuals not

already covered by the protective order be included in the order. Request shall be filed with the GAO, with copies furnished simultaneously to all parties. Any rebuttal to such a request must be filed within 1 work day after receipt of a copy of the request.

(iv) *Sanctions and remedies.* The GAO may impose appropriate sanctions for any violation of the terms of the protective order. Improper disclosure of protected information will entitle the aggrieved party to all appropriate remedies under law or equity. The GAO may also take appropriate action against an agency which fails to provide documents designated in a protective order.

(6) The protestor and other interested parties are required to furnish a copy of any comments on the agency report directly to the GAO within 10 work days, 5 work days if express option is used, after receipt of the report, with copies provided to the contracting officer and to other participating interested parties. If a hearing is held, these comments are due within 7 work days after the hearing.

(7) Agencies shall furnish the GAO with the name, title, and telephone number of one or more officials (in both field and headquarters offices, if desired) whom the GAO may contact who are knowledgeable about the subject matter of the protest. Each agency shall be responsible for promptly advising the GAO of any change in the designated officials.

(b) *Protests before award.* (1) When the agency has received notice from the GAO of a protest filed directly with the GAO, a contract may not be awarded unless authorized, in accordance with agency procedures, by the head of the contracting activity, on a nondelegable basis, upon a written finding that—

(i) Urgent and compelling circumstances which significantly affect the interest of the United States will not permit awaiting the decision of the GAO; and

(ii) Award is likely to occur within 30 calendar days of the written finding.

(2) A contract award shall not be authorized until the agency has notified the GAO of the finding in subparagraph (b)(1) of this section.

(3) When a protest against the making of an award is received and award will be withheld pending disposition of the protest, the contracting officer should inform the offerors whose offers might become eligible for award of the protest. If appropriate, those offerors should be requested, before expiration of the time for acceptance of their offer, to extend the time for acceptance to avoid the need for resolicitation. In the event of failure to obtain such extensions of offers, consideration should be given to proceeding under subparagraph (b)(1) of this section.

(c) *Protests after award.* (1) When the agency receives notice of a protest from the GAO after award of a contact, but within 10 calendar days after award, the contracting officer shall immediately suspend performance or terminate the awarded contract, except as provided in subparagraphs (c) (2) and (3) of this section.

(2) In accordance with agency procedures, the head of the contracting activity may, on a nondelegable basis, authorize contract performance, notwithstanding the protest, upon a written finding that—

(i) Contract performance will be in the best interests of the United States; or

(ii) Urgent and compelling circumstances that significantly affect the interests of the United States will not permit waiting for the GAO's decision.

(3) Contract performance shall not be authorized until the agency has notified the GAO of the finding in subparagraph (c)(2) of this section.

(4) When it is decided to suspend performance or terminate the awarded contract, the contracting officer should attempt to negotiate a mutual agreement on a no-cost basis.

(5) When the agency receives notice of a protest filed with the GAO more than 10 calendar days after award of the protested acquisition, the contracting officer need not suspend contract performance or terminate the awarded contract unless the contracting officer believes that an award may be invalidated and a delay in receiving the supplies or services is not prejudicial to the Government's interest.

(d) *Findings and notice.* If the decision is to proceed with contract award, or continue contract performance under paragraphs (b) or (c) of this section, the contracting officer shall include the written findings or other required documentation in the file. The contracting officer also shall give written notice of the decision to the protestor and other interested parties.

(e) *Hearings.* The GAO may hold a hearing at the request of the agency, a protestor, or other interested party who has responded to the notice in 33.104(a)(2). The GAO may designate representatives of the parties to attend the hearing. The attending parties and the hearing official may question representatives of the parties at the hearing. A recording or transcription of the hearing will normally be made, and copies may be obtained from the GAO for a fee. All parties may file comments on the hearing and report within 7 work days of the hearing.

(f) *GAO decision time.* GAO will issue its recommendation on a protest within 90 work days from the date of filing of the protest with the GAO, or within 45 calendar days under the express option, unless GAO establishes a longer period of time.

(g) *Notice to GAO.* The head of the agency or a designee (not below the level of the head of the contracting activity) responsible for the solicitation, proposed award, or award of the contract shall report to the Comptroller General within 60 calendar days of receipt of the GAO's recommendation if the agency has decided not to comply with the recommendation. The report shall explain the reasons why the GAO's recommendation, including any recommendation concerning the award of protest costs (i.e., the costs of filing and pursuing the protest, including reasonable attorneys' fees and bid and proposal preparation), will not be followed by the agency.

(h) *Award of protest costs.* Pending a final, nonappealable judicial determination of the constitutionality of 31 U.S.C. 3554(c), a recommended award of protest costs (as defined under paragraph (g) of this section) may be paid by the agency out of funds available to or for the use of the agency for the acquisition of supplies or services, but such payments may be subject to recoupment by the agency if 31 U.S.C. 3554(c) is judicially determined to be unconstitutional. Before paying a recommended award of protest costs (as defined under paragraph (g) of this section), agency personnel should consult the General Counsel's office of the agency. This paragraph (h) applies to all recommended awards of protest costs (as defined under paragraph (g) of this section) which have not yet been paid.

BILLING CODE 6820–34–M

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Parts 42 and 52

[FAC 90-16; FAR Case 91-88; Item XVIII]

Federal Acquisition Regulation; Use of Indicia Mail

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed to amend FAR 42.1404–1, Parcel post eligible shipments, and the clause at 52.242–11, F.o.b. Origin—Government Bills of Lading or Indicia Mail, to conform the language to the U.S. Postal Service Domestic Mail Manual. The final rule clarifies the procedures agencies use to obtain authority for contractors to use indicia mail.

EFFECTIVE DATE: February 19, 1993.

FOR FURTHER INFORMATION CONTACT: Ms. Linda Klein at (202) 501–3775 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAR case 91–88/FAC 90–16.

SUPPLEMENTARY INFORMATION:

A. Background

A recent review of the text at FAR 42.1404–1 and the clause at 52.242–11 indicated that the citations needed updating to clarify agency procedures and responsibilities in obtaining authorization for contractors to use indicia mail and to conform the FAR to language in the U.S. Postal Service Domestic Mail Manual.

B. Regulatory Flexibility Act

The final rule does not constitute a significant FAR revision within the meaning of FAR 1.501 and Public Law 98–577 and publication for public comments is not required. Therefore, the Regulatory Flexibility Act does not apply. However, comments from small entities concerning the affected subpart will be considered in accordance with 5 U.S.C. 610. Such comments must be submitted separately and cite 5 U.S.C. 601, *et seq.* (FAC 90–16, FAR case 91–88), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Parts 42 and 52

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR parts 42 and 52 are amended as set forth below:

1. The authority citation for 48 CFR parts 42 and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 42—CONTRACT ADMINISTRATION

2. Section 42.1404–1 is amended by revising paragraph (b) to read as follows:

42.1404–1 Parcel post eligible shipments.

* * * * *

(b)(1) Authority for contractors to use indicia mail may be obtained by submitting Postal Service (PS) Form 3601, Application to Mail Without Affixing Postage Stamps, to the U.S. Postal Service for approval, following agency procedures. If approval is granted, the agency shall follow the U.S. Postal Service permit requirements.

(2) When indicia mail is used, the contractor will be provided with a completed PS Form 3601 and official penalty permit imprint mailing labels, envelopes, or cards printed on the top right side in a rectangular box: Postage and Fees Paid (first line); Government Agency Name (second line); and, the proper permit imprint number (G–000) on the third line. These must also bear in the upper left corner in every case the printed return address of the agency concerned above the printed phrases "Official Business" and "Penalty for Private Use, $300." The name and address of a private person or firm shall not be shown.

* * * * *

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

3. Section 52.242–11 is amended by revising the date of the clause to read "(FEB 1993)"; the introductory text and paragraph (a) of the clause; and removing the derivation line reading "(R7–104.85(b) 1973 APR)" following "(End of clause)" to read as follows:

52.242–11 F.o.b. Origin—Government Bills of Lading or Indicia Mail.

As prescribed in 42.1404–2(b), insert the following clause:

F.O.B. Origin—Government Bills of Lading or Indicia Mail (Feb. 1993)

(a) F.o.b. origin shipments shall be made on Government bills of lading, or, if the supplies are mailable, via the U.S. Postal System, using "Penalty Permit Imprint" indicia labels.

BILLING CODE 6820–34–M

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Parts 45 and 52

[FAC 90–16; FAR Case 90–12; Item XIX]

Federal Acquisition Regulation; Thresholds, FAR Part 45

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed on a final rule revising sections in FAR subparts 45.1, 45.3, and 45.5 and amending the clause at 52.245–18 to raise or delete outdated dollar thresholds and to clarify existing policy.

EFFECTIVE DATE: February 19, 1993.

FOR FURTHER INFORMATION CONTACT: Ms. Linda Klein at (202) 501–3775 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4041, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–16, FAR Case 90–12.

SUPPLEMENTARY INFORMATION:

A. Background

Dollar thresholds in FAR part 45 and the clause at FAR 52.245–18 were reviewed for currency, consistency, clarity, and necessity. The approved revisions are intended to balance prudent control and efficient oversight of Government property, while streamlining operations. Giving

consideration to inflation and the resulting increased costs of property, several thresholds were found to be outdated and were raised or removed. The revised thresholds were published in a proposed rule published in the **Federal Register** at 55 FR 32586 on August 9, 1990. The 13 responses received consisted of 10 concurrences with no comment and three comments.

As a result of the comments, FAR 45.506 of the proposed rule has been further revised. The sequence of paragraphs in FAR 45.506 have been revised as follows: Paragraph (a) remains the same, former paragraph (c) becomes the new paragraph (b) with the deletion of the second sentence. Former paragraph (b) is redesignated as paragraph (c). Former paragraph (d) and coverage in former paragraph (c), covering identification of plant equipment and special tooling and special test equipment, respectively, are deleted as the two methods of identification were made uniform under a separate case. Former paragraph (e) is relocated in the new paragraph (c) and a new paragraph (d) is added to describe marking procedures.

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because it applies either to the internal operating procedures of the Government or generally to large contractors. When this was published as a proposed rule in the **Federal Register** at 55 FR 32586 on August 9, 1990, comments were requested and none were received concerning this issue.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96–511) is deemed to apply because the final rule contains information collection requirements. Accordingly, a new information collection requirement concerning OMB Control No. 9000–0075, Thresholds, part 45, is being submitted to the Office of Management and Budget under 44 U.S.C. 3501, *et seq.* for approval. Public comments concerning this request will be invited through a subsequent **Federal Register** notice.

List of Subjects in 48 CFR Parts 45 and 52

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR parts 45 and 52 are amended as set forth below:

1. The authority citation for 48 CFR parts 45 and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 45—GOVERNMENT PROPERTY

2. Section 45.105 is amended by revising paragrapn (b) to read as follows:

45.105 Records of Government property.

(a) * * *

(b) Contracts may provide for the contracting office to maintain the Government's official Government property records when the contracting office retains contract administration and Government property is furnished to a contractor—(1) for repair or servicing and return to the shipping organization, (2) for use on a Government installation, (3) under a local support service contract, (4) under a contract with a short performance period, or (5) when otherwise determined by the contracting officer to be in the Government's interest.

3. Section 45.106 is amended in paragraph (d) by removing the amount "$50,000" and inserting "$100,000" in its place; and by revising paragraph (e) to read as follows:

45.106 Government property clauses.

* * * * *

(e) When the cost of the item to be repaired does not exceed the small purchase limitation in section 13.000, purchase orders for property repair need not include a Government property clause.

* * * * *

4. Section 45.302–3 is amended by revising paragraph (a); and removing in paragraph (b) the words "(a)(3) above" and inserting "subparagraph (a)(5) of this subsection" in their place to read as follows:

45.302–3 Other contracts.

(a) Facilities may be provided to a contractor under a contract other than a facilities contract when one of the following exceptions applies:

(1) The actual or estimated cumulative acquisition cost of the facilities provided by the contracting activity to the contractor at one plant or general location does not exceed $1,000,000;

(2) The number of items of plant equipment provided is ten or fewer;

(3) The contract performance period is twelve months or less;

(4) The contract is for construction;

(5) The contract is for services and the facilities are to be used in connection with the operation of a Government-owned plant or installation; or

(6) The contract is for work within an establishment or installation operated by the Government.

* * * * *

45.307–2 [Amended]

5. Section 45.307–2 is amended in paragraph (a) by removing the amount "$1,000" and inserting "$5,000" in its place.

6. Section 45.506 is revised to read as follows:

45.506 Identification.

(a) Upon receipt of Government property, the contractor shall promptly—

(1) Identify the property in accordance with agency regulations;

(2) Mark the property in accordance with this section; and

(3) Record the property in its property control records.

(b)(1) Except for the following, all Government property shall be marked with an indication of Government ownership:

(i) Items issued to individuals for use in their work (e.g., protective clothing or tool crib tools) where adequate physical control is maintained over the items.

(ii) Property of a bulk type, or where its general nature of packing or handling precludes adequate marking.

(iii) Material that is commingled, as authorized by 45.507.

(iv) Where the property administrator agrees that marking is impractical.

(2) Exempted items shall be entered and described on the accountable property records.

(c)(1) In addition to marking with an indication of Government ownership, the following property shall be marked with a serial number in accordance with procedures approved by the property administrator:

(i) Special tooling.

(ii) Special test equipment.

(iii) Components of special test equipment that have an acquisition cost of $5,000 or more and are incorporated in a manner that makes removal and reutilization feasible and economical.

(iv) Plant equipment.

(v) Accessory or auxiliary equipment associated with a specific item of plant equipment that is recorded on the property records, if necessary to assure return with the associated basic item.

(2) The contractor shall record assigned numbers on all applicable documents pertaining to the property control system.

(3) If the property is located in a standard agency registration system, the contractor may use the property's registration number as the serial number. The contractor should obtain the registration number through the property administrator from the owning agency.

(d) The markings in paragraphs (b) and (c) of this section shall be—(1) securely affixed to the property, (2) legible, and (3) conspicuous. Examples of appropriate markings are bar coding, decals, and stamping. If marking will damage the property or is otherwise impractical, the contractor shall promptly notify the property administrator and ask for the item to be exempted (see paragraph (b) of this section). Markings shall be removed or obliterated when Government property is sold, scrapped, or donated.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

52.245–18 [Amended]

7. Section 52.245–18 is amended by removing in the clause heading the date "(AUG 1988)" and inserting "(FEB 1993)" in its place; and removing in paragraph (b) the amounts "$1,000" every time they appear and inserting "$5,000" in their place.

[FAC 90–16; FAR Case 90–41; Item XX]

Federal Acquisition Regulation; Government Property

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition and Defense Acquisition Regulations Councils have agreed on a final rule amending FAR 45.301 and 45.302–3(c) to clarify the policy regarding fee or profit in the acquisition of general purpose components of special tooling and special test equipment. The prohibition on profit or fee on the cost of facilities when purchased under other than a facilities contract does not apply to general purpose components of special tooling or special test equipment.

EFFECTIVE DATE: February 19, 1993.

FOR FURTHER INFORMATION CONTACT: Ms. Linda Klein at (202) 501–3775 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–16, FAR Case 90–41.

SUPPLEMENTARY INFORMATION:

A. Background

The proposed rule was published for public comment in the **Federal Register** on August 9, 1990 (55 FR 32587). Thirteen comments were received and considered in development of this final rule.

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the rule is a clarification of existing Government policy and does not impose burdens on the small business community. None of the comments received addressed the Regulatory Flexibility Act statement published with the proposed rule.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 45

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR part 45 is amended as set forth below:

PART 45—GOVERNMENT PROPERTY

1. The authority citation for 48 CFR part 45 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

45.301 [Amended]

2. Section 45.301 is amended in the definition "Facilities" by removing the last sentence.

3. Section 45.302–3 is amended in paragraph (c) by adding a second sentence to read as follows:

45.302–3 Other contracts.

* * * * *

(c) * * * General purpose components of special tooling or special test equipment are not facilities.

48 CFR Part 45

[FAC 90–16; FAR Case 91–74; Item XXI]

Federal Acquisition Regulation; Inventory Schedules, Authority of Contractor's Representative

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed on a final rule deleting language at FAR 45.606–1(b) which was published in Federal Acquisition Circular 90–4 in the **Federal Register** at 56 FR 15148 on April 15, 1991. The deleted language required that the contractor's inventory schedule certificate be signed by a representative having the authority to commit the contractor in contractual matters.

EFFECTIVE DATE: February 19, 1993.

FOR FURTHER INFORMATION CONTACT: Ms. Linda Klein at (202) 501–3775 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–16, FAR Case 91–74.

SUPPLEMENTARY INFORMATION:

A. Background

The language at FAR 45.606–1(b), which was added by FAC 90–4, is removed because of objections from Industry that the rule imposed an undue burden on contractors. Further, the

Defense Contract Management Command's implementation of their Plant Clearance Automated Reutilization Screening System (PCARSS) eliminated hard-copy schedules for contractors under DOD cognizance and will eliminate, through procedures established under PCARSS, the need for which the former language was developed.

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the rule revises to make less burdensome a procedure normally associated with large businesses having Government property in their possession.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 45

48 CFR Part 51

[FAC 90–16; FAR Case 91–55; Item XXII]

Federal Acquisition Regulation; Threshold Change to 51.106(b)

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition and Defense Acquisition Regulations Councils have agreed on a final rule amending paragraph (b) of FAR 51.106, Title, which raises the threshold listed therein from $1,000 to $5,000. The revision is consistent with the threshold listed in FAR 52.245–2, Alternate II, and 52.245–5, Alternate I, to which FAR 51.106(b) refers. The revised paragraph will state that if contracts are with educational institutions using the Government Property clause at FAR 52.245–2, Alternate II, or FAR 52.245–5, Alternate I, then title to property having an acquisition cost of less than $5,000 shall vest in the contractor, as provided in the clause. Agencies may provide higher thresholds, if appropriate.

EFFECTIVE DATE: February 19, 1993.

FOR FURTHER INFORMATION CONTACT: Ms. Linda Klein at (202) 501–3775 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–16, FAR Case 91–55.

SUPPLEMENTARY INFORMATION:

A. Background

The Department of Defense requested that the threshold referenced in FAR 51.106(b) be raised from $1,000 to $5,000 to be consistent with the threshold listed in FAR 52.245–2, Alternate II, and 52.245–5, Alternate I, to which it refers.

B. Regulatory Flexibility Act

The final rule does not constitute a significant FAR revision within the meaning of FAR 1.501 and Public Law 98–577 and publication for public comment is not required. The case revises paragraph (b) of 51.106, Title, by raising the dollar threshold from "$1,000" to "$5,000" to be consistent with the threshold specified in FAR 52.245–2, Alternate II, and 52.245–5, Alternate I, which it references. Therefore, the Regulatory Flexibility Act does not apply. However, comments from small entities concerning the affected subpart will be considered in accordance with 5 U.S.C. 610. Such comments must be submitted separately and cite 5 U.S.C. 601, *et seq.* (FAC 90–16, FAR case 91–55), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the change to the FAR does not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 51

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR part 51 is amended as set forth below:

PART 51—USE OF GOVERNMENT SOURCES BY CONTRACTORS

1. The authority citation for 48 CFR part 51 continues to read as foll ows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

51.106 [Amended]

2. Section 51.106 is amended in paragraph (b) by removing the amount "$1,000" and inserting "$5,000" in its place.

[FAC 90–16; FAR Case 91–60; Item XXIII]

Federal Acquisition Regulation; Standard Forms 254 and 255, Architect-Engineer Questionnaires

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed on a final rule to revise Standard Form 254, Architect-Engineer and Related Services Questionnaire, and Standard Form 255, Architect-Engineer and Related Services Questionnaire for Specific Project. The rule deletes the obsolete definition of "Architect-Engineer and related services" on the forms and refers to the definition in FAR part 36. Corresponding changes will be made to the prescriptive language for the forms at FAR 53.236–2(b) and (c).

EFFECTIVE DATE: February 19, 1993.

FOR FURTHER INFORMATION CONTACT: Mr. Jack O'Neill at (202) 501–3856 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–16, FAR Case 91–69.

SUPPLEMENTARY INFORMATION:

A. Background

The changes were determined to be necessary by the two Councils because the definition of "Architect-Engineer and related services" at FAR 36.102 was recently revised and the forms and prescriptive language contain an obsolete definition.

B. Regulatory Flexibility Act

The final rule does not constitute a significant FAR revision within the meaning of FAR 1.501 and Public Law 98–577, and publication for public comments is not required. Therefore, the Regulatory Flexibility Act does not apply. However, comments from small entities concerning the affected subpart will be considered in accordance with 5 U.S.C. 610. Such comments must be submitted separately and cite 5 U.S.C. 601, *et seq.* (FAC 90–16, FAR case 91–69), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 53

Government procurement.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR part 53 is amended as set forth below:

PART 53—FORMS

1. The authority citation for 48 CFR part 53 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

2. Section 53.236–2 is amended by revising paragraphs (b) and (c) to read as follows:

53.236–2 Architect-engineer services (SF's 252, 254, 255, and 1421).

* * * * *

(b) *SF 254 (REV. 11/92), Architect-Engineer and Related Services Questionnaire.* SF 254 is prescribed for use to obtain information for architect-engineer firms regarding their professional qualifications, as specified in 36.702(b)(1).

(c) *SF 255 (REV. 11/92), Architect-Engineer and Related Services Questionnaire for Specific Project.* SF 255 is prescribed for use within approved dollar thresholds and as otherwise specified in 36.702(b)(2), whenever an agency requires information to supplement the SF 254 regarding the prospective firm's qualifications for a particular architect-engineer project.

BILLING CODE 6820–34–M

STANDARD FORM (SF) **254**

Architect-Engineer and Related Services Questionnaire

Form Approved
OMB No. 9000-0004
Expires 7-31-94

Public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the FAR Secretariat (VRS), Office of Federal Acquisition and Regulatory Policy, GSA, Washington, D.C. 20405; and to the Office of Management and Budget, Paperwork Reduction Project (9000-0004), Washington, D.C. 20503.

Purpose:

The policy of the Federal Government in acquiring architectural, engineering, and related professional services is to encourage firms lawfully engaged in the practice of those professions to submit annually a statement of qualifications and performance data. Standard Form 254, "Architect-Engineer and Related Services Questionnaire," is provided for that purpose. Interested A-E firms (including new, small, and/or minority firms) should complete and file SF 254's with each Federal agency and with appropriate regional or district offices for which the A-E is qualified to perform services. The agency head for each proposed project shall evaluate these qualification resumes, together with any other performance data on file or requested by the agency, in relation to the proposed project. The SF 254 may be used as a basis for selecting firms for discussions, or for screening firms preliminary to inviting submission of additional information.

Definitions:

"Architect-Engineer Services" are defined in Part 36 of the Federal Acquisition Regulation.

"Parent Company" is that firm, company, corporation, association or conglomerate which is the major stockholder or highest tier owner of the firm completing this questionnaire; i.e., Firm A is owned by Firm B which is, in turn, a subsidiary of Corporation C. The "parent company" of Firm A is Corporation C.

"Principals" are those individuals in a firm who possess legal responsibility for its management. They may be owners, partners, corporate officers, associates, administrators, etc.

"Discipline," as used in this questionnaire, refers to the primary technological capability of individuals in the responding firm. Possession of an academic degree, professional registration, certification, or extensive experience in a particular field of practice normally reflects an individual's primary technical discipline.

"Joint Venture" is a collaborative undertaking by two or more firms or individuals for which the participants are both jointly and individually responsible.

"Consultant," as used in this questionnaire, is a highly specialized individual or firm having significant input and responsibility for certain aspects of a project and possessing unusual or unique capabilities for assuring success of the finished work.

"Prime" refers to that firm which may be coordinating the concerted and complementary inputs of several firms, individuals or related services to produce a completed study or facility. The "prime" would normally be regarded as having full responsibility and liability for quality of performance by itself as well as by subcontractor professionals under its jurisdiction.

"Branch Office" is a satellite, or subsidiary extension, of a headquarters office of a company, regardless of any differences in name or legal structure of such a branch due to local or state laws. "Branch offices" are normally subject to the management decisions, bookkeeping, and policies of the main office.

Instructions for Filing (Numbers below correspond to numbers contained in form):

1. Type accurate and complete name of submitting firm, its address, and zip code.
   1a. Indicate whether form is being submitted in behalf of a parent firm or a branch office. (Branch office submissions should list only personnel in, and experience of, that office.)
2. Provide date the firm was established under the name shown in question 1.
3. Show date on which form is prepared. All information submitted shall be current and accurate as of this date.
4. Enter type of ownership, or legal structure, of firm (sole proprietor, partnership, corporation, joint venture, etc.).

   Check appropriate boxes indicating if firm is (a) a small business concern; (b) a small business concern owned and operated by socially and economically disadvantaged individuals; and (c) Woman-owned (See 48 CFR 19.101 and 52.219-9).
5. Branches of subsidiaries of large or parent companies, or conglomerates, should insert name and address of highest-tier owner.
   5a. If present firm is the successor to, or outgrowth of, one or more predecessor firms, show name(s) of former entity(ies) and the year(s) of their original establishment.
6. List not more than two principals from submitting firm who may be contacted by the agency receiving this form. (Different principals may be listed on forms going to another agency.) Listed principals must be empowered to speak for the firm on policy and contractual matters.
7. Beginning with the submitting office, list name, location, total number of personnel, and telephone numbers for all associated or branch offices, (including any headquarters or foreign offices) which provide A-E and related services.
   7a. Show total personnel in all offices. (Should be sum of all personnel, all branches.)
8. Show total number of employees, by discipline, in submitting office. (*If form is being submitted by main or headquarters office, firm should list total employees, by discipline, in all offices.) While some personnel may be qualified in several disciplines, each person should be counted only once in accord with his or her primary function. Include clerical personnel as "administrative." Write in any additional disciplines--sociologists, biologists, etc. -- and number of people in each, in blank spaces.

STANDARD FORM (SF) 254

Architect-Engineer and Related Services Questionnaire

9. Using chart (below) insert appropriate index number to indicate range of professional services fees received by submitting firm each calendar year for last five years, most recent year first. Fee summaries should be broken down to reflect the fees received each year for (a) work performed directly for the Federal Government (not including grant and loan projects) or as a sub to other professionals performing work directly for the Federal Government; (b) all other domestic work, U.S. and possessions, including Federally-assisted projects, and (c) all other foreign work.

Ranges of Professional Services Fees

INDEX		INDEX	
1.	Less than $100,000	5.	$1 million to $2 million
2.	$100,000 to $250,000	6	$2 million to $5 million
3.	$250,000 to $500,000	7.	$5 million to $10 million
4.	$500,000 to $1 million	8.	$10 million or greater

10. Select and enter, in numerical sequence, **not more than thirty** (30) "Experience Profile Code" numbers from the listing (next page) which most accurately reflect submitting firm's demonstrated technical capabilities and project experience. **Carefully review list.** (It is recognized some profile codes may be part of other services or projects contained on list; firms are encouraged to select profile codes which best indicate type and scope of services provided on past projects.) For each code number, show total number of projects and gross fees (in thousands) received for profile projects performed by firm during past few years. If firm has one or more capabilities not included on list, insert same in blank spaces at end of list and show numbers in question 10 on the form. In such cases, the filled-in listing **must** accompany the complete SF 254 when submitted to the Federal agencies.

11. Using the "Experience Profile Code" numbers in the same sequence as entered in item 10, give details of at least one recent (within last five years) representative project for each code number, up to a **maximum** of thirty (30) separate projects, or portions of projects, for which firm was responsible. (Project examples may be used more than once to illustrate different services rendered on the same job. Example: a dining hall may be part of an auditorium or educational facility.) Firms which select less than thirty "profile codes" may list two or more project examples (to illustrate specialization) for each code number so long as total of all project examples does not exceed thirty (30). After each code number in question 11, show: (a) whether firm was "P," the prime professional, or "C," a consultant, or "JV," part of a joint venture on that particular project (new firms, in existence less than five (5) years may use the symbol "IE" to indicate "Individual Experience" as opposed to firm experience); (b) provide name and location of the specific project which typifies firm's (or individual's) performance under that code category; (c) give name and address of the owner of that project (if government agency indicate responsible office); (d) show the estimated construction cost (or other applicable cost) for that portion of the project for which the firm was primarily responsible. (Where no construction was involved, show approximate cost of firm's work); and (e) state year work on that particular project was, or will be, completed.

12. The completed SF 254 should be signed by a principal of the firm, preferably the chief executive officer.

13. Additional data, brochures, photos, etc. should not accompany this form unless specifically requested.

NEW FIRMS (not reorganized or recently-amalgamated firms) are eligible and encouraged to seek work from the Federal Government in connection with performance of projects for which they are qualified. Such firms are encouraged to complete and submit Standard Form 254 to appropriate agencies. Questions on the form dealing with personnel or experience may be answered by citing experience and capabilities of individuals in the firm, based on performance and responsibility while in the employee of others. In so doing, notation of this fact should be made on the form. In question 9, write in "N/A" to indicate "not applicable" for those years prior to firm's organization.

STANDARD FORM 254 PAGE 67 (REV. 11-92)

STANDARD FORM (SF) **255**

Architect-Engineer and Related Services Questionnaire for Specific Project

Form Approved
OMB No. 9000-0005
Expires 7-31-94

Public reporting burden for this collection of information is estimated to average 1.2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the FAR Secretariat (VRS), Office of Federal Acquisition and Regulatory Policy, GSA, Washington, D.C. 20405; and to the Office of Management and Budget, Paperwork Reduction Project (9000-0005), Washington, D.C. 20503.

Purpose:

This form is a supplement to the "Architect-Engineer and Related Services Questionnaire" (SF 254). Its purpose is to provide additional information regarding the qualifications of interested firms to undertake a specific Federal A-E project. Firms, or branch offices of firms, submitting this form should enclose (or already have on file with the appropriate office of the agency) a current (within the past year) and accurate copy of the SF 254 for that office.

The procurement official responsible for each proposed project may request submission of the SF 255 "Architect-Engineer and Related Services Questionnaire for Specific Project" in accord with applicable civilian and military procurement regulations and shall evaluate such submissions, as well as related information contained on the Standard Form 254, and any other performance data on file with the agency, and shall select firms for subsequent discussions leading to contract award in conformance with Public Law 92-582. This form should only be filed by an architect-engineer or related services firm when requested to do so by the agency or by a public announcement. Responses should be as complete and accurate as possible, contain data relative to the specific project for which you wish to be considered, and should be provided, by the required due date, to the office specified in the request or public announcement.

This form will be used only for the specified project. Do not refer to this submittal in response to other requests or public announcements.

Definitions:

"Architect-Engineer Services" are defined in Part 36 of the Federal Acquisition Regulation.

"Principals" are those individuals in a firm who possess legal responsibility for its management. They may be owners, partners, corporate officers, associates, administrators, etc.

"Discipline," as used in this questionnaire, refers to the primary technological capability of individuals in the responding firm. Possession of an academic degree, professional registration, certification, or extensive experience in a particular field of practice normally reflects an individual's primary technical discipline.

"Joint Venture" is a collaborative undertaking by two or more firms or individuals for which the participants are both jointly and individually responsible.

"Key Persons, Specialists, and Individual Consultants," as used in this questionnaire, refer to individuals who will have major project responsibility or will provide **unusual or unique** capabilities for the project under consideration.

Instructions for Filing (Numbers below correspond to numbers contained in form):

1. Give name and location of the project for which this form is being submitted.

2. Provide appropriate data from the *Commerce Business Daily* (CBD) identifying the particular project for which this form is being filed.

   2a. Give the date of the *Commerce Business Daily* in which the project announcement appeared, or indicate "not applicable" (N/A) if the source of the announcement is other than the CBD.

   2b. Indicate Agency identification or contract number as provided in the CBD announcement.

3. Show name and address of the individual or firm (or joint venture) which is submitting this form for the project.

   3a. List the name, title, and telephone number of that principal who will serve as the point of contact. Such an individual must be empowered to speak for the firm on policy and contractual matters and should be familiar with the programs and procedures of the agency to which this form is directed.

   3b. Give the address of the specific office which will have responsibility for performing the announced work.

4. Insert the number of consultant personnel by discipline proposed for subject project on line (A). Insert the number of in-house personnel by discipline proposed for subject project on line (B). While some personnel may be qualified in several disciplines, each person should be counted only once in accord with his or her primary function. Include clerical personnel as "administrative." Write in any additional disciplines -- sociologists, biologists, etc. -- and number of people in each, in blank spaces.

5. Answer only if this form is being submitted by a joint venture of two or more collaborating firms. Show the names and addresses of all individuals or organizations expected to be included as part of the joint venture and describe their particular areas of anticipated responsibility (i.e., technical disciplines, administration, financial, sociological, environmental, etc.).

   5a. Indicate, by checking the appropriate box, whether this particular joint venture has worked together on other projects.

Each firm participating in the joint venture should have a Standard Form 254 on file with the contracting office receiving this form. Firms which do not have such forms on file should provide same immediately along with a notation at the top of page 1 of the form regarding their association with this joint venture submittal.

STANDARD FORM (SF) 255

Architect-Engineer and Related Services Questionnaire for Specific Project

Standard Form 255
General Services Administration
Washington, D.C. 20405

6. If respondent is not a joint venture, but intends to use outside (as opposed to in-house or permanently and formally affiliated) consultants or associates, he should provide names and addresses of all such individuals or firms, as well as their particular areas of technical/professional expertise, as it relates to this project. Existence of previous working relationships should be noted. If more than eight outside consultants or associates are anticipated, attach an additional sheet containing requested information.

7. Regardless of whether respondent is a joint venture or an independent firm, provide brief resumes of key personnel expected to participate on this project. Care should be taken to limit resumes to only those personnel and specialists who will have major project responsibilities. Each resume must include: (a) name of each key person and specialist and his or her title, (b) the project assignment or role which that person will be expected to fulfill in connection with this project, (c) the name of the firm or organization, if any, with whom that individual is presently associated, (d) years of relevant experience with present firm and other firms, (e) the highest academic degree achieved and the discipline covered (if more than one highest degree, such as two Ph.D.'s, list both), the year received and the particular technical/professional discipline which that individual will bring to the project, (f) if registered as an architect, engineer, surveyor, etc., show only the field of registration and the year that such registration was first acquired. If registered in several states, do not list states, and (g) a synopsis of experience, training, or other qualities which reflect individual's potential contribution to this project. Include such data as: familiarity with Government or agency procedures, similar type of work performed in the past, management abilities, familiarity with the geographic area, relevant foreign language capabilities, etc. Please limit synopsis of experience to directly relevant information.

8. List up to ten projects which demonstrate the firm's or joint venture's competence to perform work similar to that likely to be required on this project. The more recent such projects, the better. Prime consideration will be given to projects which illustrate respondent's capability for performing work similar to that being sought. Required information must include: (a) name and location of project, (b) brief description of type and extent of services provided for each project (submissions by joint ventures should indicate which member of the joint venture was the prime on that particular project and what role it played), (c) name and address of the owner of that project (if Government agency, indicate responsible office), and name and phone number of individual to contact for reference (preferably the project manager), (d) completion date (actual when available, otherwise estimated), (e) total construction cost of completed project (or where no construction was involved, the approximate cost of your work) and that portion of the cost of the project for which the named firm was/is responsible.

9. List only those projects which the A-E firm or joint venture, or members of the joint venture, are currently performing under direct contract with an agency or department of the Federal Government. Exclude any grant or loan projects being financed by the Federal Government but being performed under contract to other non-Federal Governmental entities. Information provided under each heading is similar to that requested in the preceding Item 8, except for (d) "Percent Complete." Indicate in this item the percentage of A-E work completed upon filing this form.

10. Through narrative discussion, show reason why the firm or joint venture submitting this questionnaire believes it is especially qualified to undertake the project. Information provided should include, but not be limited to, such data as: specialized equipment available for this work, any awards or recognition received by a firm or individuals for similar work, required security clearances, special approaches or concepts developed by the firm relevant to this project, etc. Respondents may say anything they wish in support of their qualifications. When appropriate, respondents may supplement this proposal with graphic material and photographs which best demonstrate design capabilities of the team proposed for this project.

11. Completed forms should be signed by the chief executive officer of the joint venture (thereby attesting to the concurrence and commitment of all members of the joint venture), or by the architect-engineer principal responsible for the conduct of the work in the event it is awarded to the organization submitting this form. Joint ventures selected for subsequent discussions regarding this project must make available a statement of participation signed by a principal of each member of the joint venture. ALL INFORMATION CONTAINED IN THE FORM SHOULD BE CURRENT AND FACTUAL.

BILLING CODE 6820-34-C

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Parts 15, 19, 31, 33 and 52

[Federal Acquisition Circular 90–16; Item XXIV]

Federal Acquisition Regulation; Technical Corrections

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Technical corrections.

SUMMARY: The following technical corrections have been made to FAR parts 15, 19, 31, 33, and 52 to correct references and terms.

DATES: *Effective Date:* December 21, 1992.

FOR FURTHER INFORMATION CONTACT: The FAR Secretariat, room 4041, GS Building, Washington, DC 20405, (202) 501–4755. Please cite FAC 90–16; Technical Corrections.

Dated: December 9, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR parts 15, 19, 31, 33, and 52 is amended as set forth in the technical corrections appearing below:

1. The authority citation for 48 CFR parts 15, 19, 31, 33, and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 15—CONTRACTING BY NEGOTIATION

15.804–4 [Amended]

2. Section 15.804–4 is amended in the "Certificate of Current Cost or Pricing Data" following paragraph (a) by adding below the word "Firm", "Signature _____".

PART 19—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

19.102 [Technical amendment]

3a. Section 19.102 is amended in the table consisting of the industry size standards in Major Group 37 by removing the size standard "500" for "Motor Vehicle Parts and Accessories" and inserting "750" in its place; and in Major Group 55 by removing the size standard "$11.5" for "Motor Vehicle Dealers (New and Used)" and inserting "$17.0".

3b. In addition to the amendments set forth above, section 19.102 is also amended in footnote number 5 in the "Footnotes" section following the Industry Size Standard Tables by removing the amount "50,000" and inserting "75,000" every time it appears.

PART 31—CONTRACT COST PRINCIPLES AND PROCEDURES

31.205–33 [Technical amendment]

4. Section 31.205–33 is amended in paragraph (f) by removing the reference "31.205–38(g)" and inserting "31.205–38(f)" in its place.

PART 33—PROTESTS, DISPUTES, AND APPEALS

33.215 [Technical amendment]

5. Section 33.215 is amended by adding "(b)" at the end of the reference "33.203".

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

52.301 [Amendment]

6. Sections 52.301 is amended in the Matrix table at sections 52.214–34 and 52.214–35 by removing from the IBR column the words "No" and inserting "Yes" in their place.

Part III

Architectural and Transportation Barriers Compliance Board

36 CFR Part 1191

Americans With Disabilities Act Accessibility Guidelines; State and Local Government Facilities; Proposed Rulemaking

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

36 CFR Part 1191

[Docket No. 92–2]

RIN 3014 AA12

Americans With Disabilities Act (ADA) Accessibility Guidelines for Buildings and Facilities; State and Local Government Facilities

AGENCY: Architectural and Transportation Barriers Compliance Board.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Architectural and Transportation Barriers Compliance Board is issuing proposed guidelines to provide additional guidance to the Department of Justice in establishing accessibility standards for new construction and alterations of State and local government facilities covered by title II of the Americans with Disabilities Act (ADA) of 1990. The guidelines will ensure that newly constructed and altered State and local government facilities are readily accessible to and usable by individuals with disabilities in terms of architecture and design, and communication. The standards established by the Department of Justice must be consistent with and may incorporate the guidelines.

DATES: Comments should be received by March 22, 1993. Comments received after this date will be considered to the extent practicable. Where possible, the comments should reference specific sections in the proposed guidelines. The Board will hold public hearings on the proposed guidelines on the dates and times listed under **SUPPLEMENTARY INFORMATION** below.

ADDRESSES: Comments should be sent to the Office of the General Counsel, Architectural and Transportation Barriers Compliance Board, 1331 F Street NW., suite 1000, Washington, DC 20004–1111. Comments which are six (6) pages or less may be faxed to (202) 272–5447. Comments will be available for inspection at this address from 9 a.m. to 5:30 p.m. on regular business days. The Board will hold public hearings on the proposed guidelines at the locations listed under **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: Elizabeth A. Stewart, Office of the General Counsel, Architectural and Transportation Barriers Compliance Board, 1331 F Street NW., suite 1000, Washington, DC 20004–1111. Telephone (202) 272–5434 (Voice) or (202) 272–5449 (TDD). This is not a toll-free number. This document is available in accessible formats (cassette tape, braille, large print, or computer disc) upon request.

SUPPLEMENTARY INFORMATION:

Public Hearings

To ensure broad public input into the rulemaking, the Board has scheduled five hearings around the country to hear from all those affected by the proposed guidelines. The hearings will be held on the following dates and times at the locations listed below:

February 22, 1993—Charlotte, North Carolina, 1 p.m. to 5 p.m., Marriott City Center, 100 West Trade Street.

February 22, 1993—Denver, Colorado, 1 p.m. to 5 p.m., Westin Hotel, Taber Center, 1672 Lawrence Street.

March 2, 1993—St. Louis, Missouri, 1 p.m. to 5 p.m., Marriott Pavilion Hotel, One Broadway.

March 9, 1993—Washington, DC, 1 p.m. to 5 p.m., Sheraton City Center, 1143 New Hampshire Avenue.

March 15, 1993—San Francisco, California, 1 p.m. to 5 p.m., San Francisco Hilton on Hilton Square, One Hilton Square.

Persons who wish to present oral comments on the proposed guidelines may register at the hearing location beginning one hour before the start of the hearings. Persons will be heard in the order in which they register. Oral comments should be concise and limited to five (5) minutes. A written copy of the comments should be submitted for the official record. If more people register to present comments than can be heard in the time scheduled for the hearing, the Board reserves the right to select among those persons who register to ensure that the various interested parties are given an opportunity to speak. The Board is particularly interested in receiving comments on the specific questions identified in the preamble to the proposed guidelines.

All hearing sites are accessible to individuals with disabilities. Sign language interpreters and assistive listening systems will be available for individuals with hearing impairments.

Statutory Background

The Americans with Disabilities Act (ADA) of 1990 (42 U.S.C. 12101 *et seq.*) extends to individuals with disabilities comprehensive civil rights protections similar to those provided to persons on the basis of race, sex, national origin, and religion under the Civil Rights Act of 1964.

Title II of the ADA, which became effective on January 26, 1992, prohibits discrimination on the basis of disability in services, programs and activities provided by State and local government entities, and the National Railroad Passenger Corporation (Amtrak). Section 202 of the ADA extends the nondiscrimination policy of section 504 of the Rehabilitation Act of 1973, as amended, (29 U.S.C. 794) which prohibits discrimination on the basis of disability in federally assisted programs and activities to all State and local governmental entities regardless of whether such entities receive Federal funds. Most programs and activities of State and local governments are recipients of financial assistance from one or more Federal agencies and are already covered by section 504 of the Rehabilitation Act of 1973.

Title III of the ADA, which became effective on January 26, 1992, prohibits discrimination on the basis of disability by private entities who own, lease, lease to, or operate a place of public accommodation. Title III establishes accessibility requirements for new construction and alterations in places of public accommodation and commercial facilities.

Section 504 of the ADA requires that the Architectural and Transportation Barriers Compliance Board (Board) issue minimum guidelines to assist the Department of Justice and the Department of Transportation in establishing accessibility standards under titles II and III. Under sections 204(a) and 306(b) of the ADA, the Department of Justice is responsible for issuing final regulations, consistent with the guidelines issued by the Board, to implement titles II and III (except for transportation vehicles and facilities). Sections 229 and 306(a) of the ADA provide that the Department of Transportation is responsible for issuing regulations to implement the transportation provisions of titles II and III of the ADA. Those regulations must also be consistent with the Board's guidelines.

Rulemaking History

On July 26, 1991, the Board published the Americans with Disabilities Act Accessibility Guidelines (ADAAG) to assist the Department of Justice in establishing accessibility standards for new construction and alterations in places of public accommodation and commercial facilities. See 56 FR 35408, as corrected at FR 38174 (August 12, 1991) and 57 FR 1393 (January 14, 1992), 36 CFR part 1191. ADAAG contains scoping provisions and technical specifications generally

applicable to buildings and facilities (sections 1 through 4.35) and additional requirements specifically applicable to certain types of buildings and facilities covered by title III of the ADA: Restaurants and cafeterias (section 5); medical care facilities (section 6); mercantile and business facilities (section 7); libraries (section 8); and transient lodging (section 9).[1]

On July 26, 1991, the Department of Justice published its final regulations implementing title III of the ADA which incorporated ADAAG as the accessibility standards for newly constructed and altered places of public accommodation and commercial facilities covered by title III. See 56 FR 35544, 28 CFR part 36. On that same date, the Department of Justice published its final regulations implementing title II of the ADA. See 56 FR 35694, 28 CFR part 35. The Department of Justice's title II regulations give State and local governments the option of choosing between designing, constructing or altering their facilities in conformance with the Uniform Federal Accessibility Standards (UFAS)[2] (Appendix A to 41 CFR 101–19.6) or with ADAAG (Appendix A to 28 CFR part 36), except that if ADAAG is chosen, the elevator exemption contained in title III of the ADA does not apply.[3] See 28 CFR 35.151.

When the Board published its notice of proposed rulemaking (NPRM) for ADAAG, State and local governments were informed that the guidelines would, at a later date, apply to State and local government facilities and were encouraged to comment on how the proposed ADAAG would affect those facilities. See 56 FR 2299 (January 26, 1991). Additionally, a number of the questions in the NPRM were directed at issues particularly affecting State and local government facilities. In all, the Board received over 12,000 pages of comments and testimony on the proposed ADAAG from a broad range of interested individuals and groups, as well as from representatives of State and local governments. Comments received pertaining to State and local government facilities are discussed under General Issues below and in Section by Section Analysis.

When the Department of Justice published its title II regulations, it noted that the Board would be supplementing ADAAG in the future to include additional guidelines for State and local government facilities. The Department of Justice further stated that it anticipated that it would amend its title II regulations to adopt ADAAG as the accessibility standards for State and local government facilities after the Board supplemented ADAAG. 56 FR 35694, 35711 (July 26, 1991). Adopting essentially the same accessibility standards for titles II and III of the ADA will ensure consistency and uniformity of design in the public and private sectors throughout the country.

To further the goal of uniform standards, the Board intends to use ADAAG as the accessibility guidelines for Federally financed facilities covered by the Architectural Barriers Act of 1968 (42 U.S.C. 4151 *et seq.*) since the Federal government owns or operates many of the same type of facilities as State and local governments which are addressed in this NPRM. Under section 502 of the Rehabilitation Act of 1973 (29 U.S.C. 792), the Board is responsible for establishing guidelines for accessibility standards issued by other Federal agencies pursuant to the Architectural Barriers Act of 1968. See note 2 *supra*. The Board anticipates that when this rulemaking is completed, it will initiate action to adopt ADAAG as supplemented for State and local government facilities with special provisions as appropriate for Federal buildings (e.g., post offices, military facilities) in place of its current guidelines for Federally financed facilities. Standards issued by other Federal agencies pursuant to the Architectural Barriers Act must be consistent with the Board's guidelines. Those Federal agencies responsible for issuing accessibility standards under the Architectural Barriers Act will initiate separate rulemaking to adopt standards consistent with ADAAG as supplemented in place of UFAS. Federal agencies, and other interested persons, are encouraged to comment on this NPRM in the context of how the proposed guidelines will also affect Federal facilities and to specify any particular Federal building types which would require special provisions.

Since the Board issued ADAAG in July 1991, additional comments have been received on allowing the use of incised letters on certain signs. This NPRM asks several questions on this issue in order to assist the Board in developing appropriate requirements for State and local government facilities. The Board will also use the information that it receives during this rulemaking to guide it in determining whether to amend other provisions of ADAAG. Therefore the Board strongly encourages individuals and entities concerned about allowing the use of incised letters on certain signs to submit detailed comments to the questions in this NPRM relating to this issue.

General Issues

Alterations

Where substantial alterations occur to a building or facility, UFAS 4.1.6(3) establishes additional requirements for an accessible route, an accessible entrance, and accessible toilet facilities when the total cost of all alterations within any twelve month period amounts to 50 percent or more of the full and fair cash value of the building. ADAAG 4.1.6(2) provides that where alterations affect or could affect usability of or access to an area of a facility containing a primary function, the entity shall make the alteration in such a manner that, to the maximum extent feasible, the path of travel to the altered area and the restrooms, telephones, and drinking fountains serving the altered area are accessible to the extent that the costs of these accessibility features are not disproportionate to the overall alterations in terms of cost and scope as determined under criteria established by the Attorney General. The Department of Justice's title III regulations provide that alterations made to provide an accessible path of travel to the altered area will be deemed disproportionate to the overall alterations when the cost exceeds 20 percent of the cost of the alterations to the primary function area. See 28 CFR 36.403(f). The Department of Transportation regulations contain a similar requirement for publicly operated transit facilities. See 49 CFR 37.43.

---

[1] On September 6, 1991, the Board amended ADAAG to include additional requirements specifically applicable to transportation facilities (section 10). See 56 FR 45500, 36 CFR 1191.1. On that same date, the Board also published separate final guidelines to assist the Department of Transportation in establishing accessibility standards for transportation vehicles. See 56 FR 45530, 36 CFR part 1192. The Department of Transportation has incorporated ADAAG and the Board's guidelines for transportation vehicles and facilities in its final regulations. See 56 FR 45584 (September 6, 1991), 49 CFR parts 37 and 38.

[2] UFAS was developed by the General Services Administration, Department of Defense, Department of Housing and Urban Development, and the United States Postal Service to implement the Architectural Barriers Act of 1968 (42 U.S.C. 4151 *et seq.*) which requires certain Federally financed buildings to be accessible. Most Federal agencies reference UFAS in the accessibility standards for buildings and facilities constructed or altered by recipients of Federal financial assistance for purposes of section 504 of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 794).

[3] In new construction and alterations, title III of the ADA does not require elevators if a facility is less than three stories or has less than 3,000 square feet per story, unless the facility is a shopping center or mall; a professional office of a health care provider; or a terminal, depot or other situation used for specified public transportation or an airport terminal. See 28 CFR 36.401(d) and 36.404.

In the NPRM for ADAAG, the Board sought comment on whether the UFAS substantial alterations provision or the ADAAG primary function area provision should be applied to alterations in State and local government facilities. (See 56 FR 2319, January 22, 1991.) The overwhelming majority of comments received in response to this question supported the application of ADAAG 4.1.6(2) to buildings and facilities owned or operated by State and local governments. A few commenters stated that 100 percent accessibility should be the standard without regard to cost. In light of the response received to the question concerning alterations requirements and to make the standards consistent, the Board believes that the primary function area provision of ADAAG 4.1.6(2) should apply to facilities owned or operated by State and local governments and not the substantial alterations provision of UFAS 4.1.3(3).

Exempt Spaces and Structures

ADAAG 4.1.1(5) contains certain exceptions from the requirements for accessibility.

ADAAG 4.1.1(5)(a) provides an exception in new construction based on structural impracticability. Structural impracticability pertains to those rare circumstances when unique characteristics of terrain prevent the incorporation of accessibility features.

ADAAG 4.1.1(5)(b) excepts certain spaces that by their nature and use are not required to be accessible. This exception was provided in response to a question in the initial rulemaking which asked whether there were specific types of spaces which should be exempted from the guidelines. The exception includes: (1) Observation galleries used primarily for security purposes and (2) non-occupiable spaces that are accessed only by ladders, catwalks, crawl spaces, very narrow passageways, or freight (non-passenger) elevators; and frequented only by service personnel for repair purposes.

Exceptions under ADAAG 4.1.1(5) prevail over the other requirements of ADAAG, including those in ADAAG 4.1.1(3) pertaining to work areas. Thus, the requirement that work areas be designed and constructed so that individuals with disabilities can approach, enter and exit the areas, does not apply to an area that is exempt under ADAAG 4.1.1(5).

In addition to the spaces listed in ADAAG 4.1.1(5), some commenters recommended that structures such as air traffic control towers, fire towers, boat traffic and draw bridge towers, fixed life guard stands, lock and dam control stations and toll booths be exempt from the guidelines. Those structures were not addressed in the initial rulemaking because they are generally owned and operated by State and local government entities and are not places of public accommodation or commercial facilities under title III of the ADA. However, as part of this rulemaking for State and local government facilities, the Board is considering adding an exception in ADAAG 4.1.1(5) for those structures where providing access might significantly alter the nature or design of the facility or greatly increase construction cost of the facility. For example, providing vertical access to fire towers might only be accomplished by substantially altering their design. Other structures such as fixed life guard stands, draw bridge towers, and toll booths may have similar constraints. Another example is air traffic control towers which require a 360 degree clear view that cannot be obstructed by an elevator shaft. All of the structures have certain features in common: (1) The nature of the work performed in the structures requires that they be elevated or accessed by tunnels and (2) they are used for fire or rescue assistance, traffic control, or toll collection.

Question 1: Despite these constraints, are there design solutions which would achieve accessibility in any of the following structures: Air traffic control towers, fire towers, boat traffic and draw bridge towers, lock and dam control stations, toll booths, and fixed life guard stands? Where possible, responses should include cost information for such design solutions and, where appropriate, address any health or safety concerns.

Question 2: Should any of the structures listed in Question 1 be exempt from the requirements for accessibility? Are there any other spaces or structures which should be exempt? Responses should include a rationale for exempting the space or structure. What is the cost impact of not providing an exception for the space or structure?

During the initial rulemaking, the Board asked whether certain areas of State and local government facilities should be exempt from the requirement for passenger elevators such as the second floor of a firehouse which contains sleeping accommodations but not office space. Some of the responses to this question recommended that the guidelines include an exemption from accessibility requirements based on the presumed physical abilities of the occupants. Specifically, commenters suggested that areas used only by "able-bodied" personnel should be exempt. Many of these commenters recommended that such an exception be narrowly drawn and include examples, but they did not provide any specific guidance.

Question 3: Are there areas of State or local government facilities where an exemption from the requirement for a passenger elevator is justified based solely on the presumed physical abilities of the occupants? What would be the specific prerequisites for allowing such areas to be exempt? Commenters should give consideration to whether supervisory, maintenance or clerical personnel, visitors, or other persons doing business (e.g., sales representatives), who might have a disability, would need to have access to any of the areas recommended for the exemption. Commenters should also take into consideration if such areas would have a dual purpose which would require them to be accessible to persons with disabilities, (e.g., a conference room or classroom which is also used for public meetings) or whether the occupancy of such areas is likely to change over time.

UFAS allows a military exception from accessibility for "those portions of National Guard facilities which are designed and constructed primarily for use by able-bodied military personnel only." UFAS 4.1.4(2)(b). Commenters should note that the UFAS exception "does not apply to those portions of a building or facility which may be open to the public or which may be used by the public during the conduct of normal business or which may be used by physically handicapped persons employed or seeking employment at such building or facility." UFAS 4.1.4(2)(b). These portions of the building or facility must be accessible.

Question 4: Are there National Guard facilities which were built by or on behalf of a State government, or which are operated by State governments? Should ADAAG include a military exception, similar to the one in UFAS 4.1.4(2)(b), for National Guard facilities? Are there other facilities that are owned or operated by State or local governments where such a military exception should apply? If so, what are these areas and what would be the cost impact of not providing such an exception?

Entrances

Principal or Primary Entrances

ADAAG 4.1.3(8) requires that, at a minimum, 50 percent of all public entrances be accessible. In addition, where provided, one direct entrance to an enclosed parking garage and one

entrance to a pedestrian tunnel or elevated walkway, must be accessible. The provision also states that, "where feasible, accessible entrances shall be those used by the majority of the people visiting or working in the building" (i.e., a principal or primary entrance). State or local governments that receive Federal funds are required by section 504 of the Rehabilitation Act of 1973 to construct all new facilities in accordance with UFAS. UFAS 4.1.2(8) requires at least one principal entrance at each grade floor level to be accessible. UFAS defines a principal entrance as the main door through which most of the people enter.

Thirty State codes and the District of Columbia code require at least one principal or primary entrance to State buildings to be accessible. Many of these States have a specific definition of a principal or primary entrance. For example, the Texas Administrative Code states that: "Principal or Primary entrances—Are building and facility entrances that are recognized by the occupants and visitors as the main points of entry and exit and are used as such." (Texas Administrative Code title 16, section 68.112 (1992)). Therefore, as a result of the operation of both State law and section 504 of the Rehabilitation Act of 1973 as applied to recipients of Federal financial assistance, the majority of State buildings are already subject to the requirement that a principal or primary entrance be constructed in an accessible manner.

Architects and designers have historically recognized the principal entrance of a building as a focal point of its design. Thomas Thiis-Evensen states in his book "Archetypes in Architecture" that:

> The symbolic value of entering and of the entrance is revealed in both the rituals and behavior of most cultures. * * * By comparing the most diverse buildings throughout architectural history we find certain specific motifs which through constant recurrence accentuate the very action of entering. They appear with varying degrees of strength, alone or together, and are found in both monumental and folk architecture. (T. Thiis-Evensen, "Archetypes in Architecture" at 283 (1987)).

Entrances have been visually reinforced by varying their size, shape or ornamentation. American architects have given particular attention to the principal entrances of public government buildings because these buildings represent important principles and values of the democratic system of government. The power behind this system resides in the people and not the leaders. One of the rights that comes with this power is the right to have access to the government and the governmental process. This right of access is reflected in the way architects have designed public government buildings, specifically with respect to the principal entrances of those buildings.

Generally, entrances to public government buildings, particularly those with ceremonial uses, have been made larger and more ornate to draw attention to their importance, their significance and their difference from other buildings in the community. "A large door opening is both generous and public; generous because it lays bare the interior and extends toward the person entering and public because the opening seems calculated for the passage of large crowds or socially important people." (*Id.* at 291). In the case of American architecture, those "socially important people" are the American public. The ability to enter a public government building through the principal entrance carries the symbolic implication of access to the governmental process and may justify the application of a higher standard of accessibility to such buildings with respect to a principal or primary entrance.

In designing entrances to public government buildings, American architects have used various styles and motifs to enhance their importance. The use of monumental stairs to further enhance entrances in order to imply a greater level of importance has been common. Stairs, by their nature, exclude most persons with mobility impairments. However, accessibility and public architecture are not mutually exclusive. There are many good examples of civic architecture with grand entrances which are also accessible (e.g., the Harold Washington Library Center in Chicago, Illinois; the Pleasant Hill City Hall in Pleasant Hill, California). Requiring one principal entrance to be accessible will ensure that accessibility and good design of public buildings will coexist. Another factor to be taken into consideration is building security. Since the principal entrance is the one most used by the public, most of the security and information services of the building are focused there. If this entrance is also accessible, the job of maintaining security and providing information is easier.

Question 5: The Board is considering several options for requiring accessible entrances in legislative, judicial, and regulatory facilities which are owned or operated by State and local governments. These options include:

Option 1: Retaining the requirements in ADAAG 4.1.3(8) as written without additional requirements for principal or primary entrances;

Option 2: Specifying that at least one principal or primary entrance must be among those entrances required to be accessible by ADAAG 4.1.3(8);

Option 3: Requiring at least one principal or primary entrance to be accessible in addition to the number of entrances required to be accessible by ADAAG 4.1.3(8) (assuming that the entrances which are being made accessible under ADAAG 4.1.3(8) are not principal or primary entrances);

Option 4: Requiring 50 percent of the principal or primary entrances to be accessible and allowing those principal or primary entrances to be counted towards satisfying the requirements of ADAAG 4.1.3(8);

Option 5: Requiring 50 percent of principal or primary entrances to be accessible in addition to the number of entrances required to be accessible by ADAAG 4.1.3(8) (assuming that the entrances which are being made accessible under ADAAG 4.1.3(8) are not principal or primary entrances);

Option 6: Requiring all principal or primary entrances to be accessible and allowing those principal or primary entrances to be counted towards satisfying the requirements of ADAAG 4.1.3(8);

Option 7: Requiring all principal or primary entrances to be accessible in addition to the number of entrances required to be accessible under ADAAG 4.1.3(8), (assuming that the entrances which are being made accessible under ADAAG 4.1.3(8) are not principal or primary entrances); and

Option 8: Requiring that all entrances be accessible.

The Board seeks comments on each of these options. Commenters should state the preference and justification for a particular option and, where possible, should include information concerning the costs associated with such a requirement. Are there State and local government buildings, other than legislative, judicial, and regulatory, which should be included in this requirement? The Board also seeks information about how local codes (e.g., county and municipal) address the accessibility of entrances to local government buildings and facilities.

Restricted and Secured Entrances

In proposed ADAAG 11.5 (Judicial, Legislative and Regulatory Facilities) at least one restricted entrance and at least one secured entrance in judicial, legislative and regulatory facilities must be accessible. Proposed ADAAG 11.5

defines a restricted entrance as one used by judges, court personnel and other parties on a controlled basis. Secured entrances are used by detainees and detention officers. Additionally, under proposed ADAAG 11.5, if direct access is provided for pedestrians from an enclosed parking garage to a restricted entrance, at least one direct entrance from the garage to the restricted entrance must be accessible.

In proposed ADAAG 12.2 (Detention and Correctional Facilities), at least one secured entrance in detention and correctional facilities must be accessible. A secured entrance is one which is used only by detainees, inmates and security personnel.

Question 6: These proposed requirements for restricted and secured entrances are in addition to ADAAG4.1.3(8). The Board seeks comments on whether there may be other types of State and local government facilities which may also have restricted and secured entrances. If so, should the guidelines require that one or more of the restricted or secured entrances in those facilities be accessible? The Board also seeks information on the cost impact of the requirements for accessible restricted and secured entrances in proposed ADAAG 11.5 and 12.2 and of requirements for accessible restricted and secured entrances in other types of State and local government facilities.

Distribution or Location of Accessible Entrances

Some government buildings such as legislative and judicial facilities are very large and may occupy an entire city block. Although ADAAG 4.1.3(8)(a)(i) requires at least 50 percent of entrances to be accessible and an accessible route to connect them with parking, transportation stops, and the public way or sidewalk on the site, accessible entrances may not always be the closest entrance to these elements.

Question 7: Should the guidelines include a distribution requirement for accessible entrances? If so, should such a provision require that an accessible entrance be located on each side of a building where entrances are provided? Such a requirement would help facilitate incorporating accessibility in any future development on the site. For example, a new government office building may be constructed adjacent to unimproved property. If the adjacent property is improved at a later date to include a new parking structure, or bus stop, a convenient accessible entrance would already be provided. Another option would be to require accessible entrances to be in close proximity to certain areas such as elevators, information centers (e.g., building directories), accessible parking and passenger loading zones, transportation stops, public streets or sidewalks. Should a distribution requirement apply only to buildings above a certain size, and, if so, what criteria should be followed to identify the minimum size of a facility? Finally, should the distribution requirement apply only to certain types of buildings or facilities, such as judicial, legislative, regulatory, and detention and correctional facilities, or should it apply to all types of facilities owned or operated by State and local governments? What additional cost, if any, would be associated with such a requirement?

Automatic Door Openers

ADAAG does not specify a maximum opening force for exterior hinged doors. ANSI A117.1—1986 limits the opening force of such doors to 8.5 pounds-force (lbf). See ANSI A117.1 1986, section 4.13.11(2)(a). This maximum opening force was not included in ADAAG because of the many factors which affect the opening and closing force required at exterior doors (e.g., wind pressure, weight of door, heating and ventilation systems, and positive or negative pressure within a building). These factors can make it difficult for an individual with a disability to operate exterior doors. The Board, however, believes that a provision for an automatic or power operated door may resolve the difficulties created by these factors. An automatic or power operated door will also provide accessibility to persons who have difficulty in opening, or who cannot open, a door manually. There are currently many types of automatic and power operated doors available in a range of costs. The Board is currently sponsoring research aimed at obtaining data about automatic doors and accessibility issues. This research is intended to identify, among other things, (1) the need and appropriateness for automated doors in various building and facility types in new construction, alterations to existing facilities, and alterations to historic buildings; (2) the technical issues of opening force and maneuvering space related to automated doors; (3) the types of automated doors and operating controls; and (4) the advantages, disadvantages and costs associated with each automated door system. Although research is being conducted, the Board believes that the current body of information, including industry standards, is sufficient to establish a performance standard that enables independent operation by persons with disabilities. This would be similar to the performance standard used in ADAAG 4.34.4 (Automated Teller Machines) which provides that instructions and information for use of automated teller machines shall be made accessible to and be independently usable by persons with vision impairments.

The Board may consider adding a provision to ADAAG which requires that an automatic or power operated door be located in at least one accessible entrance in all State and local government facilities.

Question 8: Should automatic or power operated doors be required at entrances to State and local government facilities? If so, should this provision be limited to specific types of State and local government facilities? What would be the justification for limiting the requirements to certain types of State and local government facilities? Information is also sought about alternative methods of providing accessibility at exterior doors (e.g., balanced doors, accessible revolving doors, etc.), including cost information about exterior door accessibility and cost data on heating and cooling loss related to automatic and power operated door timing requirements. The Board also requests comments on appropriate power operated door activating mechanisms (i.e., pressure and motion sensors versus manual activating mechanisms, such as push plates). If manual activating mechanisms are used with a power operated door, should that mechanism (button, push plate, or other method) be required to be a certain size? Should the mechanism be located at 42 inches (1065 mm) above the finished floor similar to the requirement for elevator call buttons in ADAAG 4.10.3? Since automatic and power operated doors must be operated manually during a power failure or malfunction, should they be required to meet ADAAG 4.13.6 (Maneuvering Clearances at Doors) or should they only be required to have a specific maximum opening force when they must be opened manually? What should this maximum opening force be?

Building Signage

The Department of Justice title II regulations require State and local governments to ensure that persons with visual impairments can obtain information about the existence and location of accessible services, activities and facilities. See 28 CFR 35.163(a). Such information is normally obtained through the use of building directories and other temporary signs. ADAAG 4.1.3.(16) (Building Signage), however, exempts these types of signs from accessibility requirements. Building

directories usually cannot comply with ADAAG 4.30.4 (Raised and Brailled Characters and Pictorial Symbol Signs) because the minimum character height requirement would make the directories too large to be practical. Furthermore, ADAAG 4.30.6 (Mounting Height and Location) would require the information to be compressed into a small, specified area. One solution to this problem may be to provide alternative means of communication, such as a building directory with a telephone handset that connects to an information desk.

Question 9: Should the guidelines include provisions for tactile or audible directories, audible signs or other wayfinding devices for State and local government buildings in order to provide for the needs of persons with visual impairments? Should these requirements be restricted to specific State and local government building types? The Board seeks information about technologies that are currently available which would provide persons with visual impairments information about services, activities and facilities of State and local government buildings. Information is also sought about the cost, availability and reliability of such technologies.

Raised and Brailled Characters and Pictorial Symbol Signs (Pictograms)

ADAAG 4.30.4 (Raised and Brailled Characters and Pictorial Symbol Signs (Pictograms)) requires that letters and numerals shall be raised 1/32 inch, upper case, sans serif or simple serif type, and accompanied with Grade 2 Braille. This provision is based on ANSI A117.1–1986, section 4.28.4. ANSI A117.1–1980, section 4.28.4 originally provided that tactile letters on signs were permitted to be either raised or incised. In 1986, the ANSI provision was revised so that tactile letters were required to be raised and, in 1989, this revision was incorporated in the Board's Minimum Guidelines and Requirements for Accessible Design (MGRAD). See 36 CFR 1190.40.[4]

Additionally, a Board sponsored research project report, "A Multidisciplinary Assessment of the State of the Art of Signage for Blind and Low Vision Persons" (September 1985), concluded:

> All tactile signage should use raised rather than incised (indented) characters. For example, for upper case Helvetica Medium type, incised characters produced average success rates from 10–18% lower than those of raised characters. In addition almost every subject had every strong negative comments regarding the use of incised signage. (at 47).

Copies of this research report are available from the National Technical Information System, Springfield, Virginia.

Section 504 of the ADA provides that the Board supplement the existing MGRAD for purposes of titles II and III of the ADA. The legislative history further explains: "In no event shall the minimum guidelines issued under this legislation reduce, weaken, narrow, or set less accessibility standards than those included in the existing MGRAD." H. Rept. 101–485, pt. 2, at 139. Consequently, the Board did not deviate from MGRAD by including a technical provision for incised letters in ADAAG 4.30.4 (Raised and Brailled Characters and Pictorial Symbol Signs (Pictograms)).

Following the adoption of ADAAG, the Board heard from representatives of the engraving industry regarding the requirement for raised letters in ADAAG 4.30.4 (Raised and Brailled Characters and Pictorial Symbol Signs (Pictograms)). The engraving industry representatives question the advisability of restricting tactile signs to raised letters and believe that incised letters can be designed so as to be readable by persons with vision impairments. Secondly, engraving industry representatives claim that not allowing incised letters has had a disproportionate impact on those companies that cannot convert to technologies which produce raised lettering.

Question 10: The Board is interested in consumers' experiences with both raised and incised letters on tactile signs. Specifically, is one type generally more readable than the other? Comments regarding individual preferences are welcome. If available, supporting data including research on success rates (readability) and factors influencing success is also requested.

Section 4.30.4 (Raised and Brailled Characters and Pictorial Symbol Signs (Pictograms)) of ANSI A117.1–1980 required that incised letters must be sans serif, a minimum of 1/32 inch incised, and have a stroke width of at least 1/4 inch. A minimum height of 5/8 inches is required only for raised letters.

Question 11: If incised tactile signs are permitted, is the ANSI A117.1–1980 specification sufficient to ensure readability? If not, what minimum specifications for depth of lettering, stroke width, height of characters and typeface is recommended for such signs? Commenters are asked to provide supporting data or research, where possible. The terms incised and indented have been used to describe this type of signage lettering. The Board seeks information on industry standards for these terms. Are they interchangeable or are they distinct from one another?

As discussed earlier, ADAAG 4.30.4 (Raised and Brailled Characters and Pictorial Symbol Signs (Pictograms)) does not permit incised letters on signs that are required to be tactile. ADAAG 4.1.2(7) and 4.1.3(16) require only those building signs that identify permanent rooms and spaces to be tactile. Informational and directional signs as well as temporary signs, including personal name plaques, building directories, menus, and company logos are not required to be tactile and these could use incised letters. Considering that not all signs must be tactile, the Board seeks information regarding the financial impact of the requirement for certain signs to have raised tactile lettering.

Question 12: What percentage of engraving businesses primarily manufacture building signage? Of these, how many have already acquired or have been unable to acquire technologies that enable them to produce raised tactile signs? What is the cost and availability of such technologies? What sort of training is required for businesses to convert to these technologies? The Board seeks information on the cost of producing and maintaining raised letter tactile signs as compared to producing and maintaining incised tactile signs.

The Department of Justice has issued a technical assistance letter stating that the only signs subject to the tactile sign requirements of ADAAG 4.1.3(16)(a) are men's and women's rooms (including locker rooms and dressing rooms if they contain men's or women's restrooms), room numbers, and exit signs. In light of this interpretation, the Board is considering including an additional requirement for tactile signs in State and local government facilities. Under consideration are signs which provide information about the function, or use of a room or space, such as "Courtroom", "Council Chambers", "Classroom", "Auditorium", "Accounting Department" and other identifying signs provided at the entrance to a room or space. If such a provision is added, such signs would be required to comply with

[4] Also in 1989, the General Services Administration amended UFAS by deleting the words "indented" and "incised" where they appear in UFAS 4.30.4 which resulted in requiring tactile letters to be raised. See 41 CFR 101–19.6. This change was consistent with the ANSI A117.1–1986 provision. It should be noted that the other three standard setting agencies (the Department of Defense, the Department of Housing and Urban Development, and the U.S. Postal Service) did not make similar amendments with respect to section 4.30.4 of UFAS.

ADAAG 4.30.4 (Raised and Brailled Characters and Symbol Signs (Pictograms)), 4.30.5 (Finish and Contrast), and 4.30.6 (Mounting Location and Height).

Question 13: Should State and local government facilities be required to provide tactile signs when such signs provide information about the function or use of a room or space? If so, which informational signs should be included in this provision?

Audible Announcements and Effective Communication for Persons With Hearing Impairments

ADAAG 10.3.1(14) and 10.4.1(6) (Transit Facilities) require that when transportation facilities provide information through a public address system, equivalent information be provided to persons who are deaf or hearing-impaired. The Board is considering a requirement similar to this for State and local government facilities which also provide audible announcements to the public. For example, some courthouses use public address systems in calling cases to come before the court. Correctional facilities use public address systems to control prisoners and detainees.

Question 14: The Board seeks information on what other State and local government building types or facilities typically provide audible announcements to the public and what alternative means (such as visual paging systems, using video monitors, and computer technology) are available for providing this information to persons who are deaf or hearing-impaired. The Board is interested in cost data about such systems if available.

Assistive Listening Systems

ADAAG 4.1.3(19)(b) (Assembly Areas) requires permanently installed assistive listening systems to be provided where audible communications are integral to the use of an assembly area, if the assembly area (1) accommodates at least 50 persons or has an audio-amplification system and (2) has fixed seating. Proposed ADAAG 11.9 would require that permanently installed assistive listening systems be provided in judicial, legislative and regulatory facilities based on the type of room in lieu of criteria in ADAAG 4.1.3(19)(b).

Question 15: Are there additional types of State and local government facilities where the scoping requirements for permanently installed assistive listening systems should be based on the facility or occupancy type in lieu of criteria in ADAAG 4.1.3(19)(b)?

Certain areas or spaces in State or local government facilities may need to be secure from electronic eavesdropping. Conference rooms, hearing rooms, and courtrooms are examples. Some assistive listening systems may be incompatible with electronic security.

Question 16: Are there areas or spaces in State or local government facilities which may require protection from electronic eavesdropping? What are the technical options for solving these security-related problems with respect to certain assistive listening systems? Is one type of system more secure than another? What are the costs involved in providing a secure assistive listening system? Is it appropriate to exempt such areas from the requirement of an assistive listening system?

Assembly Areas

During the initial rulemaking, the Board requested information on lines of sight at seating locations for persons who use wheelchairs. See 56 FR 2296 (January 22, 1991). The Board received a number of comments which recommended that ADAAG 4.33 (Assembly Areas) be expanded to address other issues such as companion seating, integration and dispersal, and transfer seating. An overwhelming majority of responses favored including a provision requiring lines of sight over standing spectators in sports arenas and other similar assembly areas. A few commenters opposed such a provision because it would be either unenforceable, add significant cost or reduce seating capacity. Some commenters felt that an entry level or front row seating location was acceptable if companion seating was available for more than one person.

After careful review of comments and of State accessibility codes and standards, the Board modified the scoping provisions in the final ADAAG for wheelchair seating, added requirements for transfer seats and companion seating, and clarified the dispersal requirement. See 56 FR 35408 (July 26, 1991). Additionally, the Board felt it was essential to conduct further research on assembly areas with respect to other recommendations received in response to the rulemaking. The Board is currently sponsoring a research project on accessibility in assembly areas which will provide additional information for future revisions of ADAAG. The Board intends to address the issue of lines of sight over standing spectators in the guidelines for recreational facilities which will be proposed at a future date.

Question 17: The Board is seeking comments on the design issues associated with providing integrated and dispersed accessible seating locations with a clear line of sight over standing spectators in arenas, stadiums or other sports facilities. Clearly, not all seats in sports facilities afford clear lines of sight over standing spectators. Tall persons, guard railings or other fixed elements in the facility may block one's view of the playing field. However, since persons with disabilities have fewer choices of seating locations, should all the accessible seating locations be required to have lines of sight over standing spectators? Would such a requirement compromise the requirement for dispersed wheelchair seating by providing seating in fewer locations? If maximum dispersal of accessible seating locations is provided, what percentage of such locations can be provided with a clear line of sight over standing spectators? The Board encourages commenters to provide cost information and examples (including drawings, pictures or slides) of sports facilities where the accessible seating locations are dispersed, integrated and provide clear lines of sight over standing spectators. Additionally, the Board is seeking comments on how the dispersal requirement is achieved in arenas or stadiums where fixed seating is on different levels within a tier having steps. How should dispersal be defined in such facilities? If the same definition of dispersal cannot be applied to all types of facilities, is there a way to categorize different facilities and apply a specific dispersal requirement to each category? What are the design issues associated with providing accessible seating locations within one tier on different levels?

Other Issues

Swimming Pools

During the initial rulemaking, the Board sought information on whether swimming pools should provide more than one means of water access, since not all means of providing access are equally useful. While there were few responses to this question, the majority of the comments received stated that more than one means of water access should be provided. A few commenters stated that if more than one pool was located on a site, differing means of access would be appropriate.

The Board is considering developing a guideline that would require access to the water for persons with disabilities in swimming pools owned or operated by State or local governments. There are various means of providing access to the

water for persons with disabilities. These may include raised pool edge copings with grab bars, wheelchair ramps, slides, stairs with raised transfer platforms, wide treads and low risers, pool lifts (hydraulic, pneumatic or electric), zero grade entry and movable pool floors.

Question 18: Should the Board develop guidelines that require access to the water in swimming pools owned or operated by State and local governments? Given the wide range of types of disabilities which need to be accommodated, is there one means of access what would be usable by all or a majority of persons with disabilities? If not, should more than one means of access be provided? What are ways, other than those listed above, which could provide access to pools to persons with disabilities? Where possible, commenters should include information regarding independent operation versus operation by a pool attendant, as well as cost and maintenance information.

Polling Places, Voting Booths, and Equipment

The Board recognizes that, in most cases, voting booths and equipment are portable in nature and therefore may not come under the jurisdiction of these guidelines. However, to the extent that a State or local government building which houses a polling booth or equipment is considered new construction or an alteration, that facility is covered by the accessibility requirements of ADAAG. Furthermore, polling places which are located in buildings or facilities which are owned or operated by State or local governments are covered by the Department of Justice's regulations implementing title II of the ADA which provide that individuals with disabilities shall not be excluded from participation in, or be denied the benefits of services, programs, or activities of a public entity. See 28 CFR 35.149.

The Board is proposing to issue advisory guidelines for voting booths and equipment in the form of a Technical Assistance Bulletin.

Question 19: The Board is seeking information regarding new and existing technologies which would facilitate the independent use of voting equipment and booths by persons with disabilities. The Board is particularly interested in technologies that would meet the needs of persons with visual impairments, reach range limitations, and limitations in manipulating or operating controls in voting booths. What are the costs that would be associated with technologies? Commenters should bear in mind that those technologies recommended must maintain the confidentiality of the voting process.

Question 20: Are there polling places controlled by State or local governments which utilize fixed voting booths and devices? How do these fixed voting booths and devices currently meet the access needs of persons with visual impairments, reach range limitations, and limitations in manipulating or operating controls?

Section-by-Section Analysis

This section of the preamble contains a concise summary of the changes and additions which the Board is proposing to ADAAG.

1. Purpose

The Board is proposing additional special application sections to ADAAG and anticipates that more sections will be added in the future. Accordingly, the Board proposes to amend the purpose section to delete the reference to specific special application sections currently in ADAAG and replace it with a general reference to special application sections.

3. Miscellaneous Instructions and Definitions

3.5 Definitions

A reference to the location of the definitions for "Continuous Passage", "Public Improvement Project", "Sidewalk", and "Site Infeasibility" was added to this section. These definitions pertain to proposed ADAAG 14 (Public Rights of Way) and are located in that section.

The definition of "alteration" has been revised to include a specific reference to State and local government entities.

The existing ADAAG definition of "dwelling unit" includes references to facilities used on a transient basis, such as group homes, shelters, and hotel guestrooms providing both sleeping accommodations and food preparation areas. ADAAG 9 (Accessible Transient Lodging) addresses these types of facilities but does not contain the term "dwelling unit." Since this term appears only in proposed ADAAG 13 (Accessible Residential Housing), the definition of "dwelling unit" has been removed from ADAAG 3.5 (Definitions) and placed in proposed ADAAG 13 and was revised to reflect a more limited application to that section. To assist readers, a reference to the location of the term "Dwelling Unit" is inserted in ADAAG 3.5 (Dwelling Unit).

The definition of "transient lodging" has been modified by removing the term "dwelling unit," which is used in ADAAG only in reference to residential facilities covered by proposed ADAAG 13 (Accessible Residential Housing). Further, the change clarifies that "transient lodging" applies to facilities used on a transient basis and not to residential facilities.

4. Accessible Elements and Spaces: Scope and Technical Requirements

4.1 Minimum Requirements

4.1.1 Application

Specific references in ADAAG 4.1.1(1) to the scoping requirements for accessible sites and exterior facilities (4.1.2), newly constructed buildings (4.1.3), and alterations (4.1.6) have been deleted. This modification does not change the substance of this provision but merely removes unnecessary references for clarity.

The Board is proposing additional special application sections to ADAAG and anticipates that more sections will be added in the future. Accordingly, ADAAG 4.1.1(2) is amended to delete the reference to specific special application sections currently in ADAAG.

4.1.3 Accessible Buildings: New Construction

4.1.3(5) Exception 1 Elevators

Section 303(b) of the ADA provides that an elevator shall not be required in facilities that are less than three stories or have less than 3,000 square feet per story, unless the building is a shopping center or mall, the professional office of a health care provider, or another type of facility as determined by the Attorney General. ADAAG 4.1.3(5) Exception 1 applies only to places of public accommodation and commercial facilities subject to title III of the ADA and not to State or local government facilities covered by title II of the ADA. The Board has clarified this distinction by adding a specific reference to places of public accommodation and commercial facilities in the exception.

4.1.3(17)(c) Public Telephones—Text telephones

ADAAG 4.1.3(17)(c) provides scoping requirements for text telephones in new construction. When ADAAG was published on July 26, 1991, the Board noted in the preamble that scoping provisions for State and local government buildings would be incorporated into this section at a later date (56 FR 35424). ADAAG 4.1.3(17)(c)(1) currently requires that buildings or facilities with four or more public pay telephones (at least one of which is located in an interior location) must have at least one interior public

text telephone. ADAAG 4.1.3(17)(c) (2) and (3) and also contain additional requirements for certain types of facilities, including stadiums, arenas, convention centers, and hospitals. These facilities are required to have an interior public text telephone if an interior public pay telephone is provided. The Board is proposing a similar requirement for State and local government buildings subject to proposed ADAAG 11 (Judicial, Legislative, and Regulatory Facilities) and 12 (Detention and Correctional Facilities). Based on responses to questions (21) through (24) below, the Board may: (1) Increase the existing scoping requirements for public text telephones as they apply to public entities or (2) include other types of State and local government facilities in this scoping section as part of the final rulemaking.

Under proposed ADAAG 4.1.3(17)(c)(iv), at least one interior public text telephone must be provided in judicial, legislative, and regulatory facilities if an interior public pay telephone is provided. Proposed ADAAG 4.1.3(17)(c)(v) addresses detention and correctional facilities and requires at least one interior public text telephone in the public areas of these facilities if an interior public pay telephone is provided. Further, if a public pay telephone is provided in the secured areas of these facilities, then at least one public text telephone is required in a secured area of the facility. A text telephone is not required in every secured area with a public pay telephone, but in just one secured area of the facility. Since detainees or inmates are limited to the secured areas of these facilities, this requirement ensures equal access to telecommunication for those inmates or detainees with hearing impairments.

Question 21: Are proposed ADAAG 4.1.3(17)(c) (iv) and (v) adequate to address the need for public text telephones in judicial, legislative, and regulatory facilities and detention and correctional facilities? For example, in prisons where inmates are separated and housed in areas with different levels of security, would the provision of one public text telephone ensure accessible telecommunication to the inmates from different housing areas? The Board also requests information on the cost impact of these requirements on the design and construction of these types of facilities.

In view of concerns about vandalism to permanently installed public text telephones, the Board notes that ADAAG 4.31.9 (Text Telephones Required by 4.1), which contains the technical requirements for text telephones, includes a provision for equivalent facilitation. This provision allows use of portable devices in lieu of permanently installed public text telephones if the portable device is readily available to users. For example, a portable text telephone could be used in the secured area of a prison instead of a permanently installed public text telephone as long as it was conveniently available during the times at which inmates are allowed use of public telephones.

ADAAG 4.1.3(17)(d) requires that interior phone banks with three or more public pay telephones must have at least one phone that is equipped with a shelf and electrical outlet for use of a portable text telephone. However, since outlets may be a security hazard in the secured areas of detention and correctional facilities, the Board has exempted these areas from this requirement.

ADAAG 4.1.3(17)(c) (ii) and (iii) (Public Telephones) currently requires the provision of one text telephone when an interior public pay telephone is provided in the following locations: A stadium or arena, a convention center, a hotel with a convention center, a covered mall, or the area serving a hospital emergency room, a hospital recovery room or a hospital waiting room.

Question 22: Are the existing requirements in ADAAG 4.1.3(17)(c) (ii) and (iii) sufficient with respect to these building occupancies owned or operated by State or local government entities? Comments suggesting an alternative scoping requirement should include a justification and, if possible, estimates of any additional associated cost.

Question 23: Are there other specific State and local government building types which should be required to have a public text telephone if an interior public pay telephone is provided? Should all State and local government facilities be required to provide a public text telephone if an interior public pay telephone is provided?

Question 24: ADAAG 4.1.3(17)(c) (ii) and (iii) currently require only one public text telephone regardless of building size. Should the scoping for public text telephones take into account the size of buildings or facilities? If so, how should the requirement be delineated?

4.1.6 Accessible Buildings: Alterations

4.1.6(1)(k) Elevator Exception

As discussed under ADAAG 4.1.3(5) Exception 1 above, this section has been revised to reflect the limited application of the elevator exception to places of public accommodation or commercial facilities.

4.1.7 Accessible Buildings: Historic Preservation

4.1.7(1)(a) Exception

During the initial rulemaking, the Board received comments recommending that an exception be established under ADAAG 4.1.7(1)(a) for a small group of historic properties such as a historic house museum that has only one entrance and where modifying the doorway or cutting out a window to create an accessible entrance would destroy the characteristics that qualify the building as an historic property. The Board stated that it would consult with the National Park Service and Advisory Council on Historic Preservation on this issue and propose an exception in the next phase of rulemaking. 56 FR 35430 (July 26, 1991). An exception was reserved under ADAAG 4.1.7(1)(a) for this purpose.

When the Department of Justice issued its final regulations for titles II and III of the ADA, it included sections in each of those regulations on alterations to historic properties which permitted alternative methods of access to be provided (e.g., using audio-visual materials and devices to depict portions of an historic property that cannot otherwise be made accessible) where providing physical access would threaten or destroy the historic significance of a building or facility. See 28 CFR 35.151(d)(2) and 28 CFR 36.405(b). In effect, the Department of Justice regulations have created an exception. The Board proposes to incorporate this exception in ADAAG 4.1.7(1)(a). The Department of Justice regulations for title III of the ADA provide that the exception may only be used if the procedures in ADAAG 4.1.7(2) are followed which require the State Historic Preservation Officer and, in certain cases the Advisory Council on Historic Preservation, to be consulted. The State Historic Preservation Officer and, where applicable the Advisory Council on Historic Preservation, are responsible for determining whether complying with ADAAG will threaten or destroy the characteristics that qualify a building as an historic property and whether physical access can be achieved using the alternative minimum requirements for historic preservation in ADAAG 4.1.7(3). Historic properties covered by title II of the ADA should be treated in the same manner as historic properties under title III of the ADA and the exception made

subject to following the consultation procedures in ADAAG 4.1.7(3).

7.2 Sales and Service Counters, Teller Windows, Information Counters

ADAAG 7 (Business and Mercantile) contains requirements for sales and service counters, teller windows, and information counters (7.2); check-out aisles (7.3); and security bollards (7.4). These requirements are applied to "the design of all areas used for business transactions with the public" and apply to business and mercantile facilities. State and local government buildings and facilities may also be equipped with service and information counters and teller windows. However, as currently written, ADAAG 7.2 makes reference to places of public accommodation such as department stores and hotels. Consequently, the Board has proposed an additional provision which specifically applies to State and local government buildings and facilities as well. This new section found at ADAAG 7.2(3) and replaces an existing reserved requirement for assistive listening devices which is renumbered ADAAG 7.2(4).

The Board considers access to service counters and windows in State and local government facilities to be particularly critical for several reasons. First, State and local government entities provide a variety of services that may only be received by individuals appearing in person. For example, application for a driver's license or for certain benefits, such as unemployment, usually must be completed in person with proper forms of identification. Second, State or local laws and regulations may actually obligate a person to receive certain services or complete various transactions in person, such as registration of a firearm. Third, these services are often provided at designated locations, such as courthouses, police stations, or social service agencies. Members of the public usually have less choice in where they may go to receive government services than they do in receiving services from public accommodations. In some cases, there may be only one location or building in a geographic area where government services are provided. For example, a county courthouse may be the only location for receiving certain county permits. These factors underscore the need for both mobility access and communication access at these types of service counters and windows.

Proposed ADAAG 7.2(3)(i) clarifies that the existing requirements in ADAAG 7.2(1) for counters with cash registers apply to the same type of counters provided in State or local government facilities. ADAAG 7.2(1) requires at least one of each type of counters with cash registers to have a portion at least 36 inches in length with a maximum height of 36 inches.

Proposed ADAAG 7.2(3)(ii) states that the requirements of ADAAG 7.2(2) apply to State and local government buildings as well. ADAAG 7.2(2) covers counters and teller windows that do not have a cash register but at which goods or services are sold or distributed. These types of counters are also required to have a portion that is at least 36 inches in length with a maximum height of 36 inches. Under ADAAG 7.2(2), an auxiliary counter in close proximity to the main counter with a maximum height of 36 inches may be provided instead of making a portion of the main counter accessible. ADAAG 7.2(2) also contains an example of equivalent facilitation that may be provided in lieu of an accessible main counter or auxiliary counter. This example notes that at a hotel registration counter, equivalent facilitation might consist of (1) providing a folding shelf attached to the main counter upon which a person with a disability can write and (2) use of the space aside the counter or at the concierge desk for handing materials back and forth. Proposed ADAAG 7.2(3)(ii) would apply this example of equivalent facilitation to counter or teller windows in State or local government facilities.

Question 25: In view of the importance of access to services provided by public entities, should the example of equivalent facilitation in ADAAG 7.2(2) for the provision of a folding shelf, apply to State and local government facilities? If not, what other examples of equivalent facilitation, if any, should be provided for counters and windows in State and local government facilities?

Counters and windows in State and local government buildings often are equipped with physical barriers or partitions that separate service personnel from the public. These barriers or partitions can impair voice communication and make it more difficult for persons to conduct a conversation, particularly those persons with hearing impairments. According to the Bureau of Census, it is estimated that 7,213,000 individuals have difficulty hearing what is said in a normal conversation with another person (not including those without any hearing at all). "Bureau of Census, Disability Functional Limitation and Insurance Coverage: 1984–85." Other surveys indicate that this figure represents a conservative estimate.

Since State and local governments provide many important services at counters or windows with partitions that separate service personnel from the public, the Board is proposing that a means of facilitating voice communication be provided at counters or windows equipped with solid partitions or safety glass. Proposed ADAAG 7.2(3)(iii) applies this requirement to those windows or portions of counters required to be accessible by ADAAG 7.2(3)(i) or (ii). This provision is a performance requirement which lists some acceptable alternatives for meeting the requirement. These alternatives include elements as simple as grills, or openings in the partition to more sophisticated devices such as intercom devices or two-way telephone handsets. The method of facilitating voice communication must be accessible to both persons who use wheelchairs and persons who have difficulty bending or stooping. This language is consistent with an existing requirement in ADAAG 4.1.3(10) which pertains to accessible drinking fountains. An appendix note states that consideration should be given to the placement of communication devices in the partition, such as grills or talk-thru baffles. When such elements are used, they should be designed or mounted to accommodate persons who use wheelchairs and persons who have difficulty bending or stooping. One possible solution would be mounting a grill at both the standard height and one at a lower height appropriate for a person in a seated position. See A7.2(3)(iii).

Consistent with ADAAG 4.1.3(17) (Telephones), proposed ADAAG 7.2(3)(iii) also requires telephone handset devices, if provided, to be equipped with a volume control. In order to accommodate persons who use wheelchairs, those devices operated by hand, such as the speak button on an intercom, must comply with the requirements of ADAAG 4.27 (Control and Operating Mechanisms).

Question 26: Are there other design solutions that can facilitate voice communication at solid partitions or safety glass? The Board also seeks cost information on those solutions noted in proposed ADAAG 7.2(3)(iii) or any other recommended alternatives.

Counters and windows sometimes contain equipment that presents information such as display screens provided at point of sales terminals and information kiosks, and equipment for testing eyesight. If such equipment is permanently installed, it should be accessible to persons who use wheelchairs. Figure A3 in the appendix

of ADAAG recommends an eye level range of 43 to 51 inches for wheelchair user.

Question 27: Should the Board include specific requirements for mounting equipment that displays information? If so, is the 43 to 51 inch eye level range sufficient to provide access to persons using wheelchairs or mobility aids?

10.4 Airports

ADAAG 10.4.1(8) was previously reserved to address security barriers at airports. Where the security barrier is a fixed element within a facility, the Board proposes to require that, in airports owned or operated by State or local governments, at least one accessible route complying with ADAAG 4.3 shall be provided at each single barrier or group of security barriers (i.e., two or more security barriers, adjacent to each other, at a single location). The requirements for an accessible route in ADAAG 4.3.9 provide that doors on such a route be accessible according to ADAAG 4.13. Consequently, an exception has been included for doors or gates on the accessible route which, for security reasons, are not intended to be opened or closed by other than security personnel. These doors are exempt from the requirements pertaining to maneuvering clearances (4.13.6), door hardware (4.13.9), opening force (4.13.11), and automatic or power-assisted operation (4.13.12).

The accessible route for passengers with disabilities should coincide with that of other passengers. Persons with disabilities should not have to pass through one security barrier and then be required to travel through a restricted, service, or employee area to reach their destination. This provision would provide passengers with disabilities the ability to travel with the same ease and convenience as other members of the public. This provision further provides that passengers with disabilities will not be separated from their carry-on items. Where passengers are separated from their personal items, they are subject to increased potential for loss or theft of their personal items while they are screened separately in a location which is not within the view of the passenger.

Although an accessible route may be provided, security and screening equipment may still be inaccessible because certain aids and mobility devices, including canes, leg braces, and wheelchairs sometimes interfere with metal detection devices. As a result, individuals with disabilities must be screened and searched individually. Some persons may consider such methods to be inconvenient or embarrassing. Since the Board's guidelines do not cover the operational aspects of accessibility, proposed ADAAG 10.4.1(8) does not address the security or screening procedures implemented at airports. Such procedures are addressed by regulations issued by the Department of Transportation under the Air Carrier Access Act which prohibits discrimination by air carriers on the basis of disability. See 14 CFR part 382. The Board is aware of the necessity for effective screening of air travelers, however, it believes that consideration should be given to installing equipment that by design and new technology can accommodate most persons with disabilities and reduce the frequency of personal screenings.

Appendix note A10.4.1(8) recommends that, where barriers consist of movable equipment, they should comply with the provisions of this section so that passengers with disabilities can travel with the same ease and convenience as other members of the public.

Question 28: The Board seeks information on types of fixed security and screening equipment that is accessible or that may accommodate a greater number of persons using mobility aids which would limit the need to individually search and screen such persons. This information is sought for advisory purposes and possible inclusion in the appendix note at A10.4.1(8).

11. Judicial, Legislative, and Regulatory Facilities

This section addresses those facilities where judicial, legislative, and regulatory functions occur. Judicial facilities consist of courthouses which are further discussed below. Legislative facilities include a town hall, city council chambers, county commissioners' meeting room, and State capitols. Typically, a State capitol would contain Senate and House chambers if bicameral, or one chamber if unicameral; and committee rooms, public meeting rooms, and other assembly areas. Regulatory facilities are those which house State and local entities whose functions include regulating, governing, or licensing activities. For example, this section would address those rooms where school board meetings, zoning appeals, and adjudicatory hearings (e.g., drivers license suspensions) are held.

The organization of State and local government legislative and regulatory functions differs widely from one State to another and from one city to another, as does the location and juxtaposition of such spaces. State governments may separately house legislative and regulatory functions. Smaller localities may choose to cluster legislative and regulatory functions within a single building or facility. For example, a city hall or town hall may house regulatory functions such as building, fire, and zoning functions, and legislative functions such as the city council.

Because the structure of judicial, legislative and regulatory facilities varies so widely from State to State and locality to locality, these proposed guidelines address the activities that take place in these facilities such as debate, deliberation or the taking of testimony. Proposed ADAAG 11.2 addresses courtrooms, hearing rooms, chambers and meeting rooms designated for public use. Many of these rooms share common elements and similar accessibility issues and, therefore, the Board has combined judicial, legislative and regulatory areas under one section. For example, where a courtroom would contain a raised judge's bench, a legislative chamber would include a speaker's rostrum which is situated in a similar fashion to the bench. The judge, like the presiding officer of a legislative body, is an authority figure. As such, they are positioned on raised platforms located in prominent places at the front of the room.

In addition to architectural considerations, the Board believes that access to information and participation in the governmental process is vitally important to all citizens. In judicial, legislative and regulatory facilities, the taking of testimony, and public debate and deliberation on local issues, laws or ordinances is an integral part of that process. Therefore, as communication is essential, the Board has proposed guidelines which address permanently installed assistive listening systems and require that these facilities take advantage of current and emerging technologies for providing information to persons with vision or hearing impairments by installing duplex outlets and wiring, conduits or raceways to facilitate future communication cabling. The proposals for each of these areas are discussed below.

With respect to judicial facilities, laws affecting accessibility to courthouses vary throughout the country. See Wood, "Court-Related Needs of the Elderly and Persons with Disabilities, Toward a Barrier Free Courthouse: Equal Access to Justice for Persons with Disabilities" American Bar Association (1991). While UFAS, State laws, and courthouse facilities guidelines require accessibility to the public areas of the courthouse

(e.g., parking, entrance, restrooms), few specify access to elements in the courtroom itself such as the jury box, witness stand, or the judge's bench.

UFAS classifies the public areas of courtrooms as an assembly occupancy and requires accessibility in "all areas for which the intended use will require public access or which may result in employment of physically handicapped persons." See UFAS 4.1.4(4). The "U.S. Courts Design Guide" published by the U.S. Administrative Office of the Courts, recommends that "courtroom space and circulation paths in the vicinity of the judge's bench, deputy clerk, law clerk, court reporter/recorder stations, and the witness box should be designed to accommodate handicapped ramps, lifts, or other required apparatus as they are needed." ("U.S. Courts Design Guide" at 97 (1991)). The National Center for State Courts published "The Courthouse", a planning and design guide for court facilities which recommends accessibility to the judge's bench, the clerk's station, the court reporter's station, the witness stand, the attorney tables, and the juror box. ("The Courthouse" at 64–70 (1991)).

General requirements for accessibility to courthouses may be found in State and local building codes and in guidelines developed by judicial committees. For example, the California Accessibility Standards require courtrooms (including the jury box, witness stand, public seating and other areas) to be accessible. California Accessibility Standards, title 24 part 2 section 712 (1989). Similar requirements are contained in the New Jersey Administrative Code which provides for courtrooms in new construction to be accessible in accordance with the requirements for "large buildings" and "small buildings". N.J. Admin. Code title 5, section 23–7.2(a) (1)–(2) (1991). Similarly, the Virginia Courthouse Facility Guidelines state that "handicapped citizens and court staff should enjoy convenient entry to all court facilities and barrier-free internal access to all appropriate spaces." See Virginia Courthouse Facility Guidelines, section 1.5 Handicapped Access. The Board is proposing requirements consistent with these State codes and guidelines.

Courthouse facilities are rich in tradition and symbolism and pose unique challenges due to complex, interwoven requirements, and the symbolic relationship of elements peculiar to courtrooms. The acoustics and the spatial relationship and sightlines between the judge, jury, witness, litigants, and spectators must all be carefully balanced to ensure that everyone will be able to adequately see, hear, and participate in the proceedings. (See Greenberg, "Symbolism in Architecture: Courtrooms" Architectural Record at 114–116 (May 1979)). As stated by Allen Greenberg,

> The judge is an impartial arbitrator and is therefore positioned on a raised podium in the center of the front of the room. Defense and prosecution are equal adversaries and, as such, are each provided with seats at assigned tables in the well of the courtroom facing the judge * * *. The jury box is placed at the side of the room, deliberately divorced from the axial relationship of judge, counsel and public. This placement reflects the impartiality of the jurors, who must decide guilt or innocence. The witness stand is located adjacent to the judge's bench facing the two parties. This provides the latter with their constitutional right to confront the opposing counsel's witnesses. Seen in this light, the traditional American courtroom layout is notable for its marked orientation toward the rights of the accused. (*Id.* at 115).

While the Board recognizes the significance of symbolism in the courtroom, it is very important that all citizens be able to participate equally in the legal process. In proposing these guidelines, the Board believes that accessibility can be incorporated into the design of the courtroom without adversely affecting the spatial or symbolic relationship between the participants.

During the initial rulemaking, the Board requested information on access to jury boxes, witness stands, and judges' benches. See 56 FR 2296 (January 26, 1991). An overwhelming majority of responses favored including provisions in ADAAG for jury boxes, witness stands and judges' benches. One commenter disagreed, stating that access to such areas is a workplace issue more properly addressed under title I of the ADA.[5] Several commenters distinguished between the different areas, taking the position that jury boxes and witness stands should be accessible, but judges' benches should be covered under title I. One commenter recommended that judges' benches should be adaptable and only 5 percent of the seating in jury boxes should be accessible. Comments received from the American Bar Association addressed both program and architectural issues. The American Bar Association supported more accessibility in courtrooms and within the judicial process as a whole.

Some of the comments received suggested the use of scheduling procedures as an alternative to requiring all courtrooms to be accessible (e.g., 30 percent of the courtrooms should be accessible in combination with scheduling procedures). With respect to judges' benches, a concern was raised that the judge's bench should remain at a higher level to signify authority and to provide sightlines. The Board has taken these comments into consideration and has developed guidelines for judges' benches, jury boxes and witness stands, as well as other courthouse areas. The requirements for those areas are discussed below.

Additionally, many of the comments addressed communication accessibility for individuals with hearing impairments. A third of the commenters stated that courthouses should be equipped with assistive listening systems. A few of those commenters suggested use of "real time captioning" by the courts. Some commenters took the position that 50 percent of the courtrooms should be accessible to individuals with hearing impairments. One commenter suggested sound absorbent materials in walls would be appropriate, as well as assistive listening devices with receivers for 8 percent of the seating capacity, use of a visual announcement system, interpreter services, and the availability of transcripts. In response to the comments received and in accordance with section 504 of the ADA, the Board has also included provisions for persons with vision and hearing impairments in this section.[6]

11.1 Judicial, Legislative and Regulatory Facilities

This section is a scoping provision which applies all the provisions of ADAAG 4 (Accessible Elements and Spaces: Scope and Technical Requirements) for buildings and facilities to judicial, legislative and regulatory facilities, in addition to the applicable requirements of this section. All public and common use areas would be subject to the applicable requirements contained in ADAAG 4.1 through 4.35. Examples of public and common use areas are given in the appendix note. See A11.1.

---

[5] Modifications to an individual workstation would be covered by reasonable accommodation under title I of the ADA which prohibits discrimination in employment on the basis of disability. The Equal Employment Opportunity Commission (EEOC) is responsible for issuing regulations to implement title I of the ADA.

[6] Section 504 of the ADA requires that the guidelines issued by the Board "establish additional requirements, consistent with this Act, to ensure that buildings [and] facilities * * * are accessible in terms of architecture and design * * * and communication, to individuals with disabilities."

11.2 Courtrooms, Hearing Rooms, Chambers and Meeting Rooms

This section requires that where doors or gates, jury boxes, witness stands, fixed seating, judges' benches, clerks', litigants', court reporters', and bailiffs' stations, and lecterns are provided, each must be accessible and on an accessible route complying with ADAAG 4.3 (Accessible Route). It further requires that the accessible route to each element coincide with the circulation path provided for all persons using the element. For example, often there are different circulation paths provided for jurors, witnesses, and spectators. This section would require each circulation path to be accessible.

Paragraph (1) requires doors or gates designed to allow passage into the well of the courtroom, the witness stand, the jury box, and the speaker's rostrum and other areas to comply with ADAAG 4.13 (Doors). This provision is consistent with ADAAG 4.1.3(7) (Doors) and will ensure that minimum maneuvering clearances are provided to approach, operate, enter and exit through the door or gate.

Paragraph (2) requires all jury boxes and witness stands to be accessible and that each jury box have at least one accessible wheelchair space. Accessible spaces must be provided within the defined area of the jury box or witness stand. Jurors are selected at the outset of each trail and thus it is impossible to predict when an accessible courtroom will be needed. Accordingly, the Board is proposing at least one accessible seating space in each jury box. This provision allows readily removable seats to be installed in the jury box and witness stand so that the accessible spaces may also be used by persons not using wheelchairs. Paragraph (2) further requires minimum maneuvering clearances for the approach to the accessible spaces, referencing ADAAG 4.33.2 (Size of Wheelchair Locations). Although Figure 46 illustrates space requirements for two wheelchair seating spaces, this provision only requires a minimum of one accessible seating space. Where a fixed counter is provided in the witness stand (e.g., for a microphone), it must comply with ADAAG 4.32 (Fixed or Built-in Seating and Tables) to ensure sufficient knee clearance. Clear floor space for a forward approach must also be provided. The maximum height of controls and operating mechanisms must be 48 inches and comply with 4.27.3 (Height) and 4.27.4 (Operation). Although ADAAG 4.27.3 allows controls to be placed at either a forward or a side reach range, the Board has specified the forward reach range as it is presumed that in jury boxes and witness stands, the seated individual must be facing forward and a forward reach to controls is necessary. The 48 inches specified for such a forward reach is a maximum height requirement. If a desk or other writing surface is provided, the individual must reach over an obstruction to operate controls. Therefore, ADAAG 4.2.5 provides that controls are to be mounted at a maximum height of 48 inches only when they are located less than 20 inches from the leading edge of the obstruction (i.e., shelf). When controls are located between 20 to 25 inches from the obstruction they must be mounted at a maximum height of 44 inches as required in ADAAG 4.2.5 which is referenced by ADAAG 4.27.3. When controls are placed over an obstruction, they may never be further than 25 inches from the leading edge of that obstruction for a forward reach.

Paragraph (2) contains an exception for alterations where it is technically infeasible to provide a fixed means of vertical access to the witness stand or jury box. For example, if providing a fixed ramp to a jury box would result in reducing seating needed to meet the minimum legal requirements for jurors in a criminal courtroom, only clear floor space to accommodate a portable ramp would be required. Or, in an alteration to a witness stand, if physical constraints would require an alteration of the judge's bench, jury box or enlarging the courtroom, only clear floor space to accommodate a portable ramp would be required. This exemption only applies to the fixed means of vertical access. All other requirements in paragraph (2) (i.e., knee clearance) would still apply. As in new construction, accessible spaces must be provided within the defined area of the jury box or witness stand.

There are several options in designing an accessible jury box and witness stand. In Federal courthouses, the General Services Administration is experimenting with a multi-tiered jury box, where the accessible spaces are incorporated with other seating located on the floor level and additional seating is provided in raised tiers. Other acceptable tiered jury box designs may incorporate a ramp or lift in the courtroom or outside the courtroom from a restricted corridor.

Many persons using wheelchairs entering and exiting a platform lift in one direction can be accommodated on a minimum 30 inch by 48 inch (760 mm×1220 mm) lift. However, if a person is required to make a 90 degree turn either entering or exiting the platform lift, additional maneuvering clearances at the lift gate, and an increase in the platform size will need to be provided. Applying the minimum maneuvering clearances at doorways and gates illustrated in Figures 25 and 26 show that the required clear floor space depends on whether the lift door can be approached straight on or at right angles. For a direct approach, straight through the lift, Figure 26 shows that a lift platform with a minimum clear space of 48 inches (1220 mm) in the direction of travel is required. If a right angle turn must be made on the platform to exit, Figure 25(b) shows that a minimum clear width of 54 inches (1370 mm) perpendicular to the direction of approach is needed to accommodate the turn. However, these minimum clearances only illustrate the clearances needed to operate the gate from a front approach, and do not take into account the difficulty of making a 90 degree turn while backing out of the lift, a particularly difficult maneuver for a person who uses a motorized wheelchair. Ideally, the platform lift should allow sufficient space for a person to make a 360 degree turn. Widening the gates to provide a 36 inch to 42 inch (915 mm×1065 mm) clear width will provide additional maneuvering clearance.

The Board is considering requiring maneuvering clearances complying with ADAAG 4.2.3 (Wheelchair Turning Space) to ensure independent use in areas that are likely to be raised so that persons using wheelchairs do not have to exit the areas backwards. The areas the Board is considering adding this requirement include the jury box, witness stand, judge's bench, clerk's station, speaker's rostrum, raised dais, and the bailiff's and court reporter's stations.

Question 29: Should the guidelines require maneuvering spaces in the jury box, witness stand, judge's bench, clerk's station, speaker's rostrum, raised dais, and the bailiff's and court reporter's stations? What would be the costs associated with such a requirement? Additionally, the Board encourages commenters to submit drawings, slides, photographs and cost information of other design alternatives used in making the jury box, witness box or judge's bench accessible. How has the concern for maneuvering space been addressed?

Paragraph (3) specifies the number of wheelchair spaces required where spectator, press, or other areas with fixed seats are provided. This section references the scoping provisions in ADAAG 4.1.3(19)(a) (Assembly Areas). The Board is proposing that where the

spectator seating capacity exceeds 50 and is located on one level that is not sloped or tiered, the accessible spaces must be provided in more than one seating row.

ADAAG requires seating dispersal only when the seating capacity exceeds 300 because most fixed seats in small movie theaters are situated to provide a clear line of sight to the screen. Furthermore, these theaters have tiered or sloped aisles, which make it more difficult to provide accessible seating in more than one location. Courtrooms, however, differ in this regard in that most spectator seating areas are on a single level that is not sloped or tiered, which facilitates locating accessible seating spaces in more than one location. Where the seating is not on one level, but is sloped or tiered, the provision does not require dispersal. The provision for dispersal applies only to the total seating capacity in the spectator seating area, not the combined total of fixed seats in a courtroom.

Paragraph (4) requires all fixed judges' benches, clerks' stations, speakers' rostrums and a minimum of one raised dais to be adaptable. This provision references ADAAG 4.32 (Fixed or Built-in Seating and Tables) and requires a front approach to the bench, station or rostrum. The maximum height of controls and operating mechanisms must be 48 inches and comply with 4.27.3 (Height) and 4.27.4 (Operation). If the high forward reach is over an obstruction, reach and clearances must be as shown in Figure 5(b). This requirement is further discussed in paragraph (2). An appendix note further recommends that equipment such as a portable ramp, be on hand so that accessibility can be accomplished to at least one judge's bench and clerk's station within a few hours to accommodate court proceedings. See A11.2.1(4).

Although the areas identified in paragraph (4) are work stations, due to the complexity of courtroom and legislative chamber design and the difficulty of accommodating subsequent physical change, the Board believes that requiring adaptable judges' benches, clerks' stations, speakers' rostrums and a minimum of one raised dais, where provided, will significantly facilitate a reasonable accommodation for an employee in the future. Consistent with the definition of "adaptability" in ADAAG 3.5 (Definitions), the guidelines clarify the term "adaptable" and describe how it is applied to these areas. Adaptability means that maneuvering clearances and other features (e.g., fixed controls) are designed into the space so that accessibility can be easily provided at a later date. For example, an adaptable judge's bench which is designed for a future installation of a ramp would have the required maneuvering clearances to approach, enter, and exit the ramp, to maneuver at the bench (e.g., knee clearance), and to reach any fixed controls (e.g., alarm buttons) already designed into the space. The ramp would be installed at a later date when a reasonable accommodation is needed. An appendix note further recommends that equipment such as a ramp, be on hand so that accessibility can be accomplished to at least one judge's bench and clerk's station to accommodate court proceedings. This provision is particularly important in courtrooms where judges and clerks are assigned on a temporary or rotating basis. See A11.2.1(4).

Paragraph (5) specifies minimum clear floor space, table height, and knee clearance requirements for fixed or built-in stations, including tables for bailiffs', court reporters', and litigants' stations. This provision is consistent with UFAS 4.1.2(17) which requires fixed or built-in seating, tables or work surfaces in accessible spaces to have 5 percent, but not less than one seating space(s), tables or work surfaces complying with UFAS 4.32 (Seating, Tables and Work Surfaces). This provision references ADAAG 4.32 (Fixed or Built-in Seating and Tables) and requires a front approach to the station or table. The maximum height of controls and operating mechanisms must be 48 inches and comply with ADAAG 4.27.3 (Height) and ADAAG 4.27.4 (Operation). If the high forward reach is over an obstruction, reach and clearances must be as shown in Figure 5(b). However, as the bailiffs', court reporters' and litigants' stations are usually designed with movable furniture (which is not covered by ADAAG but rather the Department of Justice's regulations) this provision may apply in few situations. Where furniture is provided, an appendix note recommends appropriate maneuvering clearances such as clear floor space and knee clearance under tables when such furniture will be utilized by the public (e.g., the litigant's station). See A11.2.1(5).[7]

[7] In its NPRM for regulations implementing title III of the ADA, the Department of Justice included a proposed section 36.309 which would have required that newly purchased furniture or equipment made available for use at a place of public accommodation be accessible, to the extent such furniture or equipment is available, unless this requirement would fundamentally alter the goods, services, facilities, privileges, advantages, or accommodations offered, or would not be readily achievable. See 56 FR 7452 (February 22, 1991). In its final rule, proposed section 36.309 was omitted because the Department of Justice determined that its requirements were more properly addressed under other sections including sections 36.201 and 36.202 which set out general prohibitions against discrimination based on disability. Title II of the ADA provides similar prohibitions for state and local government entities. See 42 U.S.C. 12132 and 28 CFR 35.130.

Paragraph (6) requires fixed lecterns to be a maximum height and have knee clearance to accommodate litigants and speakers who use wheelchairs. This provision references ADAAG 4.32 (Fixed or Built-in Seating and Tables) and requires a front approach to the lectern. The maximum height of controls and operating mechanisms shall be 48 inches and comply with ADAAG 4.27.3 (Height) and 4.27.4 (Operation). Similar to paragraph (5), this provision may apply in relatively few situations as portable lecterns are more common. Where portable lecterns are specified, the Board encourages the selection of lecterns with adjustable heights and knee clearance underneath. Such lecterns will help facilitate use of the lectern and approaching the microphone.

11.3 Jury Assembly Areas and Jury Deliberation Areas

This section requires all jury assembly areas and jury deliberation rooms to be accessible. Since the jury deliberation room is a controlled area, where amenities such as refreshment areas, fixed tables and drinking fountains are provided, they must comply with the provisions in this section. Where restroom facilities are provided, they are covered by ADAAG 4.1.3(11) (Toilet Facilities) which requires each public and common use toilet room to comply with ADAAG 4.22 (Toilet Rooms).

Paragraph (1) references technical specifications for refreshment areas or kitchenettes in ADAAG 9.2.2 which specifies maximum counter height, clear floor area, reach ranges, and mounting height. The technical specifications would also apply to fixed refreshment dispensers where provided. For example, a wall mounted microwave would have to comply with 9.2.2(7) which references 4.2.4 (Clear Floor or Ground Space for Wheelchairs), 4.2.5 (Forward Reach), 4.2.6 (Side Reach) and 4.27 (Controls and Operating Mechanisms).

Paragraph (2) requires 5 percent but not less than one, fixed or built-in seating and tables to be accessible and comply with ADAAG 4.32. As discussed in proposed ADAAG 11.2.1(5) relative to litigants' stations, tables in jury deliberation rooms and assembly areas are usually movable furniture, and

therefore this provision may apply in few situations. Where movable furniture is provided, an appendix note recommends providing appropriate maneuvering clearances in the room and choosing furniture that would allow appropriate knee clearance under tables. See A11.3.1(2).

Paragraph (3) requires drinking fountains to be accessible to persons using wheelchairs and those who have difficulty bending or stooping. This provision is consistent with ADAAG 4.1.3(10)(a).

11.4 Courthouse Holding Facilities

11.4.1 Holding Cells: Minimum Number

This section applies to courthouse holding facilities including central holding cells and court-floor holding cells (i.e., those serving courtrooms). Where provided, at least one adult male, juvenile male, adult female, and juvenile female central holding cell must comply with the requirements in this section. Central holdings facilities are typically designed with sight and sound separation between men, women and juveniles. Where such cell separation is provided, the guidelines require at least one of each type of cell to be accessible. While there may be additional "types" of cells (i.e., isolation, group or individual cells) the Board's definition of "type" is limited to adult male, juvenile male, adult female, and juvenile female holding facilities. Court-floor holding cells, however, are not necessarily designed with sight and sound separation between adult males, juvenile males, adult female, and juvenile females. Therefore, in such instances, this provision would permit only one accessible cell to serve a courtroom.

11.4.2 Requirements for Accessible Cells

This section contains the minimum requirements for accessible cells. In proposing these requirements, the Board has taken into account various security considerations which are further discussed below. Accessible cells and the elements or spaces serving them must be on an accessible route.

Paragraph (1) requires that doors to accessible spaces and on an accessible route comply with ADAAG 4.1.3(7) (Doors). However, doors to accessible spaces and on an accessible route are exempt from the requirements pertaining to maneuvering clearances (4.13.6), door hardware (4.13.9), opening force (4.13.11), and automatic or power-assisted operation (4.13.12) in those areas where detainees are escorted by security personnel at all times.

Paragraph (2) requires toilet facilities to comply with ADAAG 4.22 (Toilet Rooms) and bathing facilities to comply with ADAAG 4.23 (Bathrooms, Bathing Facilities, and Shower Rooms). Where privacy screens are provided, they may not intrude on the clear floor space required for fixtures. The Board recognizes that typical cell design often does not provide a separate room for water closets or shower stalls. Water closets and lavatories are usually provided within individual cells behind privacy screens. The references to ADAAG 4.22 (Toilet Rooms) and ADAAG 4.23 (Bathrooms, Bathing Facilities, and Shower Rooms) do not require that separate toilet rooms or shower rooms be provided. For example, a facility may choose to provide individual fixtures and a privacy screen instead of a separate toilet or shower room. In that instance, the applicable clear floor space and mounting height requirements should be followed in ADAAG 4.22 and ADAAG 4.23 as it applies to each fixture provided.

Typical cell design includes a combination stainless steel water closet and lavatory unit which may also include a drinking fountain. The Board understands that some courthouse design guidelines may recommend a combined unit to maximize the limited amount of space within cells. However, the Board is not aware of standard combination units which fully meet ADAAG requirements for water closets and lavatories. For example, some existing "accessible" designs, such as those where the water closet projects out from the unit, would actually prohibit the installation of a 36-inch grab bar behind the water closet and would not allow for appropriate positioning of the grab bar in relation to the centerline of the water closet. See Figure 29. Additionally, some units provide a drinking fountain spout behind the wash basin which would not be usable by a person with a disability because they do not meet ADAAG 4.15.3 (Spout Location). Separate stainless steel lavatories, water closets, and drinking fountains are readily available that do meet ADAAG requirements.

Question 30: Are there standard combination units available which meet the requirements of the proposed guidelines? If so, what are the specifications of these types of combination units? Are combination units required to the exclusion of separate fixtures by any State, local or other codes?

The ADAAG requirements for water closets, bathtubs and showers require grab bars, which are considered essential for use of such elements by persons with disabilities. However, grab bars may be prohibited in some holding or detention facilities in order to reduce the risk of suicide. While the Board is not aware of a specific case in which a person has committed suicide using grab bars, there are numerous cases where persons have asphyxiated themselves by hanging underneath beds and chairs. "The Training Curriculum on Suicide Detection and Prevention in Jails and Lockups" developed by Jail Suicide Prevention Information Task Force describes how typical steel beds with holes in the bottom have been used to attach suicide nooses. The task force was sponsored by the National Center on Institutions and Alternatives, in cooperation with Juvenile, Criminal, Justice International Inc., with assistance from the National Sheriffs' Association. The training curriculum further recommends:

> * * * cells and rooms to be protrusion-free. While it is more common for suicide nooses to be affixed to bars and grills, all fixtures should be given attention, since beds, shelves, sprinklers, door handles, towel racks and water faucet lips have been used for this purpose. (Chap. 16–3B).

A grab bar without any open surfaces that is recessed in the wall is one possible alternative that would meet the ADAAG requirements as shown in Figures 39 (c) and (d). Although these figures illustrate handrail designs, the Board feels similar designs can be used for grab bars in security areas. Also, the Minnesota Regional Treatment Center Design Consortium recommends an infill welded plate at the bottom of the grab bar which would not be prohibited by ADAAG requirements. (See "Mental Health-Master Specification for Safety and Suicide Resistant Design at Minnesota Psychiatric Hospitals" at 14 (1990)). In view of these design alternatives, the Board is not inclined to provide an exception for grab bars at water closets and bathing facilities serving accessible cells.

Question 31: What are the experiences with suicide in detention and correctional facilities relative to providing accessibility features? The Board seeks further information on whether certain grab bar design solutions, including those discussed above, can be used to provide access but which do not facilitate suicide attempts. Where possible, responses should include any available information on these and other design solutions and their costs.

Concern has also been raised as to whether or not grab bars create a security risk in that they may be torn from the wall and used as a weapon. The Board feels that such concerns can be addressed by the structural strength and securement of the grab bars. Grab bars are currently required to comply with the structural strength requirements in ADAAG 4.26.3 (Structural Strength). However, these are minimum guidelines which may be exceeded where necessary.

Question 32: The Board seeks comment on whether grab bars can be installed without creating a security risk.

Paragraph (3) requires that accessible clear floor space be provided on one side of beds. Upper bunks, which often may be installed due to crowding, may interfere with the transfer between the lower bed and a wheelchair due to the insufficient vertical distance between the upper and lower bunk. While not requiring a specific distance, the Board recommends that the necessary vertical distance between the upper and lower bunk be sufficient to allow a person to sit upright during a transfer.

Paragraph (4) requires drinking fountains and water coolers serving accessible cells to be accessible to individuals who use wheelchairs and those who have difficulty bending or stooping. This provision is consistent with ADAAG 4.1.3(10(a).

Paragraph (5) requires fixed or built-in seating and tables to be accessible. This would pertain to fixed seating or table provided in the cell and is consistent with ADAAG 4.1.3(18) which requires fixed seating and tables where provided in a public or common use area to be accessible. Because the cell is a secured area, the guidelines require compliance with ADAAG 4.32 (Fixed or Built-in Seating or Tables) in each accessible cell.

Paragraph (6) requires that fixed benches be mounted at a specific height and be a minimum of 24 inches by 48 inches. It further requires compliance with the structural strength requirements in ADAAG 4.26.3 (Structural Strength). The height requirements are consistent with those for water closets (ADAAG 4.16.3 Height), shower seats (ADAAG 4.21.3 Seat), and benches in dressing rooms (ADAAG 4.35.4 Bench), and would allow for a transfer from a wheelchair.

11.4.3 Visiting Areas

This section requires that where fixed cubicles are provided, at least 5 percent but not less than one, on each side must have the maximum counter height and knee clearance underneath as required by ADAAG 4.32 (Fixed or Built-in Seating or Tables). It also requires a method to facilitate voice communication if solid partitions or safety glass separate visitors from detainees.

The scoping and technical specification in paragraph (1) is consistent with ADAAG 4.1.3(18) which requires in public and common use areas that 5 percent, but not less than one, of the built-in seating areas or tables and counters to have a maximum height of 34 inches and knee clearance underneath. Although this requirement applies to both sides of the fixed cubicles, it does not require that one particular cubicle be accessible on both sides.

Question 33: Should the guidelines require at least one cubicle to be accessible on both sides to accommodate those situations where both the detainee and visitor require accessible features?

Where counters are provided without a cubicle, a portion of the counter on both sides which is a minimum 36 inches in length must be accessible. The latter requirement is consistent with ADAAG 7.2 which also defines a portion of a counter as 36 inches in length.

Paragraph (2) requires a method to facilitate voice communication if solid partitions or safety glass separate visitors from detainees. This provision is further discussed under ADAAG 7.2(3).

Paragraph (3) requires accessible cubicles and counters to be identified by the International Symbol of Accessibility on both sides to be visible by both visitors and detainees. This provision is consistent with ADAAG 4.1.2(7) and 4.1.3(17)(b) which requires elements and spaces of accessible facilities to be identified by the international Symbol of Accessibility.

An appendix note clarifies that accessible cubicles may have fixed seats if the required clear floor space is provided within the area defined by the cubicle. See A11.4.3. This design would allow the "accessible" cubicle to be utilized by all persons. Where both the floor space and the fixed seat are provided in one cubicle, a method to facilitate voice communication would need to be usable from both areas. A wire mesh barrier typically provided in holding facilities to separate visitors from detainees would be one way to satisfy this requirement. If a glass partition is utilized, one centrally located telephone handset can be provided. The appendix note further recommends that when assistive listening systems are provided, the needs of the intended user and characteristics of the setting should be considered as described in A4.33.7 and Table A2.

11.5 Restricted and Secured Entrances

This section requires at least one restricted entrance and at least one secured entrance to be accessible where provided. Restricted entrances are defined as those used by judges, court personnel and other parties on a controlled basis; and secured entrances as those used by detainees and detention officers. In addition, if direct access is provided for pedestrians from an enclosed parking garage to a restricted entrance, at least one direct entrance from the garage to the restricted entrance shall be accessible.

ADAAG 4.1.3(8) requires at least 50 percent of all public entrances to be accessible and, in addition, accessible entrances to enclosed parking garage, pedestrian tunnels and elevated walkways. This section only addresses restricted and secured entrances. Therefore, the requirements of ADAAG 4.1.3(8) must be satisfied independently of this section. Typical courthouse design contains three distinct entrances and interior circulation routes which do not cross one another: public, restricted and secured. This section requires at least one restricted entrance and at least one secured entrance to be accessible. In addition, if direct access is provided for pedestrians from an enclosed parking garage to a restricted entrance, at least one direct entrance from the garage to the restricted entrance shall be accessible.

Question 34: What is the cost impact of requiring at least one restricted entrance and at least one secured entrance to be accessible?

In Question 6, the Board has requested comments on other types of State and local government facilities which may also have restricted and secured entrances and the appropriate number which should be accessible.

11.6 Security Systems

This provision requires an accessible route complying with ADAAG 4.3 to be provided through fixed security barriers. Where the security barriers incorporate equipment which cannot be made accessible, an alternate accessible route must be provided adjacent to the fixed security screening devices. For example, metal detectors may be triggered automatically by wheelchairs or braces and therefore cannot be made accessible. In most cases, the security devices consist of movable equipment or furniture and may not be covered under the guidelines. However, where

the security barrier is a fixed element within a facility, an accessible fixed barrier or an accessible route adjacent to the fixed security device must be provided to facilitate an equivalent path of travel. The path of travel must permit persons with disabilities passing through security barriers to maintain visual contact with their personal items to the same extent as do other members of the public. An exception is provided so that doors and gates which are designed to be opened solely by security personnel need not comply with the requirements for maneuvering clearances at doors (4.13.6), door hardware (4.13.9), door opening force (4.13.11), and automatic doors and power assisted doors (4.13.12).

11.7 Two-Way Communication Systems

This section requires two-way communication systems to provide both visible and audible signals so that person with hearing and speech impairments can utilize the systems. It further requires that such systems comply with the clear floor space, height and operating requirements for controls in ADAAG 4.27 (Controls and Operating Mechanisms). This provision is consistent with ADAAG 4.3.11.4 (Two-way Communication in Areas of Rescue Assistance) and ADAAG 4.10.14 (Emergency Communications in Elevators). An appendix note clarifies that this requirement can be met with a device that would allow security personnel to respond to a caller with a light indicating that assistance is on the way. This requirement would enable a person with hearing and speech impairments to communicate with security personnel to gain access to restricted areas.

11.8 Electrical Outlets, Wiring and Conduit for Communication Systems

This section requires that duplex electrical outlets be provided to support communication equipment for persons with vision and hearing impairments in all courtrooms, hearing rooms (including judges' chambers when used as hearing rooms), jury deliberation and orientation rooms, and meeting rooms designated for public use. In addition to duplex electrical outlets, this section requires appropriate wiring, conduit, or raceways to support equipment and systems to accommodate participants with vision and hearing impairments in judicial, legislative and regulatory proceedings.

The Board feels that this provision will assist State and local governments to comply with Department of Justice's regulations implementing title II which require public entities to take such steps as may be necessary to ensure effective communication with individuals. See 28 CFR 35.160.

"Meeting rooms designated for public use" refers to those areas of a facility in which public debate or discussion on local issues, laws or ordinances, or regulations takes place. "Hearing rooms", refers to those areas where hearings are held, other than courtrooms. Judge's chambers are included in this section when such chambers are used as hearing rooms.

In courtrooms, duplex electrical outlets are required in specified locations. State and local codes may contain provisions for the number and general placement of convenience duplex outlets. Therefore, the Board is proposing to require additional outlets to accommodate specific use requirements for communication access. Where State and local codes specifically require outlets to support communication equipment, this provision would be satisfied if such outlets are provided in the specific locations required in this provision.

Some states have developed guidelines which recommend that courthouses be designed with the flexibility to accept audio-visual and data systems. (See Courthouse Facility Guidelines, State of New Jersey, 1989, Section 3.21 Technology; and Virginia Courthouse Facility Guidelines, 1987, Section 2.7 Sound and Video Recording). The "U.S. Courts Design Guide" published by the Administrative Office of the U.S. Courts in 1991, recommends that electrical duplex outlets be provided at the judge's bench; deputy clerks' stations; witness stand; jury box and law clerk's, bailiff's, court reporters', and litigants' stations. (Chapter 3: Courtrooms, at 147). See also, "The Courthouse" National Center for State Courts at 62 (1992). Additionally, the "U.S. Courts Design Guide" suggests that data transmission outlets should be located at the judge's bench, deputy clerk's station; court reporter's/recorder's station, attorneys' and litigants' stations, and law clerk's station. (Id. at 152). The "U.S. Courts Design Guide" further recommends that a provision should be made for both present and future needs for power and data cabling at each attorney's table and at the court reporter's station. (Id. at 135–136). Although the recommendations in these guides do not necessarily pertain to accessibility, the trend in courtroom design is to provide for maximum future utilization of all types of technology. The provisions in proposed ADAAG 11.8 extend the application of this trend to include technology for persons with hearing and vision impairments.

The Board is aware that permanent wiring for all future technology cannot be anticipated, however, conduit or raceways can be provided to support a variety of current and future uses. For example, so-called "smart" technology often includes bundled wiring harnesses which can be easily installed in new construction. Examples of current technology which assists persons with hearing impairments may include assistive listening systems, or computer assisted real-time transcription. Examples of current technology which assists persons with vision impairments may include computerized reading devices with braille or magnification capability or closed circuit television reading or viewing devices.

Question 35: The Board believes that providing supplementary wiring, conduits or raceways at the construction phase can be done for minimal additional cost. The Board requests specific examples and cost information where supplementary wiring, conduits or raceways have been provided in newly built judicial, legislative and regulatory facilities.

This section does not mandate any specific system or technology, but only the physical capacity to accommodate future connections and systems that may be appropriate. Concern has been raised regarding the potential conflict between technology used in the jury deliberation room and the right to a jury trial which requires that jury deliberations are kept confidential. Jurors need to know that what they say in the jury room will not be revealed. There is a concern that the use of transcription systems, which may record the conversation in the jury deliberation room, will inhibit jurors and deny individuals the right to a jury trail. Similarly, the use of transcription systems in order to enable a client or attorney with a hearing impairment to communicate, raises similar questions regarding the confidentiality of attorney-client communications. Attorneys, clients and jurors need to be confident that their communications will not be heard by other persons at the time of the communication or later. The right to confidentiality of litigants who use computer aided transcription or other systems should be as secure as that of other litigants. The issue of whether a particular system or technology is appropriate for a specific application should be based on full consideration of the variables, including the need for privacy.

Question 36: The Board seeks comment on how issues of

confidentiality and privacy can be addressed while providing accessibility for persons with vision and hearing impairments.

11.90 Permanently Installed Assistive Listening Systems

This section requires that certain areas in judicial, legislative and regulatory facilities have a permanently installed assistive listening system comply with ADAAG 4.33.6 and 4.33.7. This provision is similar to ADAAG 4.1.3(19)(b) (Assembly Areas) which requires permanently installed assistive listening systems where audible communications are integral to the use of assembly areas, if the assembly area (1) accommodates at least 50 persons or has an audio-amplification system and (2) has fixed seating. However, the facilities covered by this section would rarely meet the threshold requirements of ADAAG 4.1.3(19)(b) (Assembly Areas) as typically there are no fixed seats and, in many instances the occupant load is fewer than 50 people. Accordingly, the Board has proposed basing the threshold requirement for permanently installed assistive listening systems on the type of room.

An appendix note references proposed ADAAG 11.8 (Electrical Outlets, Wiring, Conduit for Communication Systems) which requires that courtrooms, hearing rooms, jury deliberation and jury orientation rooms, and all meeting rooms designated for public use in judicial, legislative or regulatory facilities have a duplex outlet and wiring, conduit or raceways to support communication equipment. this requirement is in addition to the requirement in this section for permanently installed assistive listening systems and is intended to facilitate the use of portable assistive listening systems.

Paragraph (1) applies to judicial facilities, and requires 50 percent, but not less than one, of each type of courtroom (at least one of which shall have a jury box, where available) to have a permanently installed assistive listening system. "Courtrooms" refers to those areas which are generally open to the public (such as a room where a criminal trail is conducted), as opposed to smaller "hearing rooms" where admittance is generally restricted (for example where a domestic case is heard). An appendix note acknowledges the large variation in the assignment of courtrooms among jurisdictions and the difficulty in listing each "type" of courtroom or courtroom use. However, where multiple courtrooms are available, they typically fall into three "types". The appendix note defines these "types" as family (or domestic) courtroom, civil courtroom, and criminal courtroom. This definition is very broad; for example it does not distinguish between a criminal court used for adults and one used for juveniles. Proceedings such as juvenile or probate would generally fall under the three categories. For example, a courthouse has ten courtrooms: Six are assigned primarily to criminal matters (including one courtroom assigned to handle juvenile cases); one to family or domestic matters; and three to civil proceedings. Permanently installed assistive listening systems would be required in a total of six courtrooms, dispersed as follows: Three courtrooms assigned to criminal or juvenile matters, one courtroom assigned to family or domestic matters, and two courtrooms handling civil proceedings. The Board would suggest that one of the required permanently installed assistive listening systems be placed in the courtroom assigned to handle juvenile proceedings (as one of the criminal courtrooms) even though the Board does not regard courtrooms that handle juvenile cases as a different type of courtroom. See A11.9(1).

In some jurisdictions, courtrooms are assigned to accommodate more than one type of proceeding. For example, in a single courtroom, a civil trail may be in progress one day and a criminal matter the next day. In those facilities where courtrooms are not dedicated to a single type of proceeding, the guidelines would require that 50 percent of all courtrooms provided have a permanently installed assistive listening system.

In addition, paragraph (1) requires 50 percent, but not less than one, of each of the following types of rooms to have a permanently installed assistive listening system: judicial hearings rooms, jury deliberation rooms, and juror orientation rooms. "Hearing rooms", refers to those areas where hearings are held, other than courtrooms. Typically, these rooms consist of a conference table and chairs and admittance is generally restricted to the participants in the proceedings.

Paragraph (2) applies to legislative and regulatory facilities and requires 50 percent, but not less than one, of each of the following types of rooms to have a permanently installed assistive listening system: chambers and hearing or meeting rooms designated for public use where legislative or regulatory business is conducted.

"Chambers" refers to areas such as the council chambers in a city hall where public debate over proposed ordinances may occur. In addition to the requirement for 50 percent of the total number of chambers, in State legislative facilities where separate chambers are provided for a bicameral legislature (i.e., House and Senate), the guidelines require each to have a permanently installed assistive listening system.

"Hearing rooms or meeting rooms designated for public use" refers to those areas of a facility in which public debate or discussion on local issues, laws, ordinances, or regulations takes place. In this section, the terms "hearing rooms" and "meeting rooms" are used interchangeably. Hearing rooms in legislative and regulatory facilities differ from hearing rooms in judicial facilities in that they are open to the public and are usually much larger. Examples of hearing rooms or meeting rooms would include areas in which hearings on zoning applications or waivers are held; or where town council meetings or school board meetings are conducted. It would also include adjudicatory administrative hearings (e.g., drivers license suspension hearings). On the State level, a hearing or meeting room might be the Joint Committee Room in a State legislative facility as well as smaller committee hearing rooms. As provided in the appendix note, it is not the intention of the Board to require permanently installed assistive listening systems in conference rooms restricted to use by employees, consultants and other invited guests. Nor is it the Board's intention to require such systems in a space which is only occasionally or sporadically used for legislative or regulatory business such as a town meeting held in a high school cafeteria. However, the note references the Department of Justice's title II regulations which require effective communication to be provided. See A11.9(2). This may entail use of a portable assistive listening system.

Question 37: Is the proposed requirement for permanently installed assistive listening systems appropriate to meet the needs of persons with hearing impairments in judicial, legislative and regulatory facilities? What are the costs associated with providing permanently installed assistive listening systems in all courtrooms, chambers, and hearing or meeting rooms designated for public use?

During its initial rulemaking, the Board requested comment regarding which types of assistive listening systems (induction loop, FM, infra red) work best in particular environments. Each of the three types of systems received some support for all applications. Many commenters described their personal experiences

with particular types of systems. Those who provided extensive information on the advantages and disadvantages of the various systems recommended that a specific type should be selected only after consultation with experts in the field. The appendix contains additional information at A4.33.6 (Assembly Areas: Placement of Listening Systems) on the various types of assistive listening systems. As in ADAAG 4.1.3(19)(b) (Assembly Areas), the Board is not mandating a specific type of assistive listening system for judicial, legislative or regulatory facilities. However, the Board suggests that in choosing the most appropriate assistive listening system, due consideration be given to the confidentiality constraints discussed in proposed ADAAG 11.8.

Paragraph (3) requires that the minimum number of receivers shall be 4 percent of the occupant load of each covered room, as determined by applicable State or local codes, but not less than two, whichever is greater. As with ADAAG 4.1.3(19)(b) (Assistive Listening Systems), the 4 percent figure is based on a Bureau of the Census estimate of the number of persons aged 15 and over who have difficulty hearing what is said in a normal conversation with another person, excluding those who cannot hear at all. See "Bureau of Census, Disability Functional Limitation and Insurance Coverage" (1984–85). ADAAG 4.1.3(19)(b) (Assistive Listening Systems) requires that the minimum number of receivers to be provided shall be equal to 4 percent of the total number of fixed seats. As these facilities may not have fixed seats, the requirement for 4 percent receivers is based on the occupant load of the room rather than the number of fixed seats.

Paragraph (4) requires that an information sign be posted in a prominent place indicating the availability of assistive listening systems, computer-aided transcription systems, or other equipment to provide information and services to persons with vision or hearing impairments. This provision is consistent with ADAAG 4.1.3(16)(b) (Building Signage) and ADAAG 4.1.3(19)(b) (Assembly Areas) and specifies technical provisions relevant to informational signs. The Board recommends that the signage also indicate the location of such systems and equipment.

12. Detention and Correctional Facilities

During the initial rulemaking, the Board requested information on various State and local government facilities, including detention and correctional facilities. See 56 FR 2296 (January 28, 1991). Specifically, the Board sought information regarding the number of cells that should be made accessible. Commenters took the position that correctional facilities should be accessible but were divided over the number or percentage of cells that should be accessible. These comments are further discussed in proposed ADAAG 12.4. Since the Board has received limited information concerning the need for accessible cells in detention and correctional facilities, those sections concerning the percentage of accessible cells are reserved in this NPRM. However, the Board intends to specify a minimum number or percentage in the final guidelines.

Question 38: The Board seeks additional information or survey results of the number of persons with disabilities housed in detention and correctional facilities.

During the initial rulemaking, commenters also addressed concerns about security considerations in relation to certain elements of accessibility, such as grab bars, which, if loosened and removed from walls, could be used as weapons. This issue is further discussed in proposed ADAAG 12.5.

12.1 General

This section applies to those detention facilities where persons apprehended or arrested for alleged violations of law are temporarily detained and to correctional facilities where persons convicted and sentenced for such violations are housed. This section covers facilities that contain holding facilities such as police stations and sheriff's offices, and facilities housing persons for security reasons, including jails, prisons, reformatories, and juvenile detention centers. This section contains specific requirements for accessible cells or rooms and access to non-contact visiting areas. Other areas, including all public and common use areas, are subject to applicable requirements contained in ADAAG 4.1 through 4.35. An appendix note addresses common use areas that serve only a limited number of housing cells or rooms, such as dayrooms, which are provided in proximity to a particular cluster or group of cells. In this situation, not all dayrooms would have to be accessible, but only those serving accessible cells or rooms.

Question 39: The Board seeks comments on the application of "common use areas" to detention and correctional facilities. Specifically, is additional clarification needed in regard to the areas considered to be common use areas and thus required to be accessible? Further, are there other areas not specifically listed in the appendix that should be addressed?

ADAAG 5 through 9 also apply to detention and correctional facilities. For example cafeterias would have to comply with the applicable provisions of ADAAG 5 (Restaurants and Cafeterias).

In some cases, individuals are sentenced to institutional facilities for persons with mental illness instead of prisons due to reasons of insanity or determined mental disorders. While this section covers "other institutional occupancies where the occupants are under some degree of restraint or restriction for security reasons," mental institutions have not been specifically referenced.

Question 40: Should mental institutions, such as those for the criminally insane, be specifically addressed by this section or are these types of occupancies more appropriately addressed by ADAAG 6 (Medical Care Facilities)? Where possible, responses should include information about the procedures used by a State or locality in committing individuals to these types of facilities.

12.2 Entrances

12.2.1 Secured Entrances

12.2.2 Security Systems

Detention and correctional facilities typically provide secured entrances used only by inmates and security personnel and not the public. ADAAG 4.1.3(8) does not address secured entrances but only public entrances. Consequently, proposed ADAAG 12.2.1 (Secured Entrances) would require at least one secured entrance to be accessible. Since inmates are required to use such entrances, it is essential that at least one be accessible in order to ensure an accessible secured route into the facility for inmates. This requirement would be in addition to those public entrances required to be accessible by ADAAG 4.1.3(8).

Question 41: The Board seeks information on the new construction cost of providing one accessible secured entrance in addition to those public entrances required to be accessible by ADAAG 4.1.3(8).

Proposed ADAAG 12.2.2 (Security Systems) addresses security systems, such as metal detectors, which the public is required to pass through when visiting the facility. According to this provision, which is similar to a requirement in proposed ADAAG 11 (Judicial, Legislative, and Regulatory Facilities), if security systems are provided at public entrances, an accessible route either through or

around the device shall be provided. The Board does not intend this requirement to conflict with any security or screening procedures employed by the operators of detention or correctional facilities.

Question 42: Are there any existing security or screening procedures which could not be effectively carried out under the requirement for an accessible route through or around security systems?

12.3 Visiting Areas

This section addresses visiting areas where inmates are separated from visitors. These requirements are identical to those proposed in ADAAG 11.4.3 (Visiting Areas) for similar areas in judicial facilities and are discussed in that section. This requirement would pertain to all non-contact visiting areas provided in a detention or correctional facility where the elements addressed are provided.

Non-contact visiting areas are commonly provided in detention and correctional facilities, especially at higher security levels. Family and legal visits, which are very important for both inmates, family members, and lawyers, frequently occur in non-contact booths. Non-contact visiting areas are intended to provide increased comfort and privacy to both categories of users. The "Small Jail Design Guide," prepared by the National Institute of Corrections in 1988 found that only six percent of the facilities surveyed did not provide any non-contact visiting space and recommended counter surfaces in booths for leaning or writing, with sufficient dimension to allow access by inmates or visitors with disabilities. ("Small Jail Design Guide" 4–132, 4–133).

12.4 Holding and Housing Cells or Rooms: Minimum Number

12.4.1 Holding Cells and General Housing Cells or Rooms [Reserved]

This section is reserved for specifying the minimum number or percentage of required accessible cells. UFAS 4.1.4(9)(c) requires that five percent of the available residential units, but not less than one, be accessible. During the initial rulemaking, the Board requested comment on the experience of detention and correctional facilities in meeting this requirement. The response to this question was mixed. A slight majority of the comments favored a requirement of five percent but other commenters considered it excessive. Some commenters suggested a ten percent requirement, and others recommended a two percent requirement or a one percent requirement. Only one commenter, from the State of New Mexico property control division, provided information relating to the number of individuals with disabilities who are in detention facilities, estimating that two to three percent of the population in the prison system is permanently or temporarily disabled.

In addition to UFAS, several State codes, including Delaware, Illinois, and North Carolina's, currently require five percent or at least one, whichever is greater, of cells to be accessible. Other States, including California and New York, require a minimum of one detention cell or holding area. Some State codes, including Michigan and Florida, contain scoping requirements that pertain only to accessible toilet facilities serving cells, not housing or holding cells.

The Federal Bureau of Prisons (Bureau) conducted an informal survey of prisons under its jurisdiction, which are subject to the Architectural Barriers Act and section 504 of the Rehabilitation Act. According to this survey, less than one percent of the Federal prison population was identified as having a permanent disability or needing special housing accommodations. Given these initial results, the staff at the Bureau has informally stated that no more than one to two percent of the cells under the jurisdiction of the Bureau need to be accessible. The basis for identifying persons with disabilities that was used in this survey has not been determined.

The Board intends to specify a minimum number or percentage of accessible cells or rooms as part of this rulemaking. These cells or rooms would be subject to the requirements of proposed ADAAG 12.5.

Question 43: The Board requests comments on the number or percentage of housing cells or rooms that should be made accessible. In particular, the Board is interested in any information or survey results on the percentage of inmates with disabilities in State or local prisons and jails. Are there any instances where an inmate with a disability is housed in other areas of the prison or jail (e.g., infirmaries), instead of among the general population due to the fact than an accessible cell or room is not available? Are there any instances when a person with a disability is sentenced to locations other than a prison or jail (e.g., halfway house), due to the lack of an accessible cell or room? If so, what is the frequency of either of these practices? Responses should include, if possible, the working definition of "disability" used for purposes of the survey and a breakdown of the number of persons with mobility impairments and the number of persons with hearing impairments identified by the survey. Further, any available information on the cost impact in new construction of providing cells or rooms that are accessible as specified in proposed ADAAG 12.5 is also requested.

Various types or categories of housing are usually found in detention and correctional facilities. These different types include minimum, medium, and maximum security; work release; and trustee. Housing for male and female inmates, and juveniles is typically segregated. The Board is considering a requirement that accessible cells or rooms be dispersed among the various types or categories of housing provided at the facility. This would ensure that all available types of housing cells or rooms are accessible to persons with disabilities. Under such a requirement, a facility that provided minimum and maximum security housing for both men and women, would have to provide accessible cells in both the male minimum and maximum housing units and the female minimum housing units.

The Board understands that the safety of inmates or detainees with disabilities may be at greater risk in some prison environments. Consequently, some prison operators may house inmates or detainees with disabilities in safer areas of the facility. For example, an inmate with a disability may be housed in a medical facility or other area in the facility where violence may occur less frequently instead of a regular housing unit. Further, such a policy may also be based on a presumption that some individuals with disabilities may pose less of a security risk.

Question 44: Are inmates with disabilities generally at greater risk than other inmates? Do inmates with disabilities present less of a security risk? If so, should this section include an exception providing that accessible cells do not need to be dispersed among all categories of housing? Should this exception apply only to maximum security areas and facilities or are there other areas where inmates or detainees with disabilities are particularly at risk?

In addition to requiring cells to be dispersed among different categories of housing, the Board is considering whether accessible cells should be required to be dispersed within a category of housing. For example, if minimum security housing is provided in three housing units, and three accessible cells are required in that category of housing, an accessible cell would have to be provided in each of the three units. The Board recognizes,

however, that there may be certain security or safety factors that would justify grouping accessible cells or rooms in one area or building, such as in the case of emergency evacuation.

Question 45: Should accessible cells or rooms be required to be dispersed throughout housing units or buildings? If so, should an exception be added based on any security or safety considerations? Commenters should explain in detail specific safety or security considerations upon which such an exception might be based. In addition, the Board requests information on the design and cost impact of providing dispersed, as opposed to grouped or clustered, accessible cells or rooms in new construction.

Correctional facilities are sometimes designed with "shift areas" which are housing areas that can serve different security needs according to the current prison population. For example, a housing area intended for minimum security inmates might be designed and constructed so that it can easily be converted into a medium security housing area when needed. The Board believes that placement of accessible cells in these areas would provide greater flexibility in accommodating inmates with disabilities. An appendix note recommends that consideration be given to the placement of accessible cells in such areas. See A12.4.1.

12.4.2 Special Holding and Housing Cells or Rooms [Reserved]

In addition to general housing, detention and correctional facilities often provide housing units that serve special purposes and house inmates or detainees for shorter periods of time. These special types include cells or rooms used for disciplinary detention, protective custody, medical isolation, detoxification, and suicidal inmates or detainees. Since inmates with disabilities might require or necessitate the services provided in these facilities, the Board believes it is essential that some of each type be accessible. The Board is considering such a requirement and a minimum number or percentage has been reserved in proposed ADAAG 12.4.2.

Question 46: Should special housing cells or rooms be held to the same scoping requirement as general categories of housing cells or rooms or should the scoping requirement be different? Further, should each type of special housing cell or room be accessible or could one or a limited number of cells or rooms be accessible and serve as different types of special housing? For example, could a single accessible cell be used for either protective custody, medical isolation, or detoxification? What effect would this have on access to the services provided by special facilities? Where possible, commenters should include cost information.

12.4.3 Accessible Cells or Rooms for Persons with Hearing Impairments [Reserved]

This section reserves a requirement for a minimum number of cells or rooms that are accessible to persons with hearing impairments. The Board intends to require in the final rule that a certain number or percentage of cells or rooms be accessible to persons with hearing impairments according to requirements in proposed ADAAG 12.6. Accessibility requirements for persons with hearing impairments apply only to cells where certain elements such as permanently installed phones are provided in cells or rooms. (See proposed ADAAG 12.6). Generally, most correctional facilities do not provide these kinds of elements in cells, but some facility types, such as minimum security prisons, may in fact be equipped with such devices. If permanently installed phones are provided in one category of housing, the minimum number or percentage, if specified, would be based on the total number of cells or rooms provided within that category of housing, not on the total number of cells or rooms of the facility.

ADAAG 9.1.3 (Transient Lodging: Sleeping Accommodations for Persons with Hearing Impairments) requires that one of every 25 sleeping rooms be accessible to persons with hearing impairments. This scoping requirement was based in part on demographic information from the Bureau of Census indicating that 7,213,000 individuals (slightly more than 4 percent of the total population aged 15 or older) have difficulty hearing what is said in a normal conversation with another person. This figure does not include those who cannot hear at all. Bureau of Census, Disability Functional Limitation and Insurance Coverage: 1984–85. Other studies indicate that this percentage may in fact be greater. The National Center for Health Statistics determined that 7.9 percent of the population has a hearing impairment. National Health Interview Survey 1979–80. Further, an analysis of demographic data indicates that there are at least as many persons with hearing impairments as there are persons with mobility impairments. Although the Board had originally proposed requiring additional sleeping rooms in transient lodging to be accessible to persons with hearing impairments equal to the number which are totally accessible, this number was slightly reduced based on statistical data on travelers with hearing impairments provided by commenters during the initial rulemaking.

Question 47: The Board requests information on the percentage of persons with hearing impairments in detention or correctional facilities.

12.4.4 Medical Care Facilities

This section provides that if medical facilities with cells or rooms for patients are provided, an accessible number [percentage specified for new construction] of those cells or rooms shall comply with ADAAG 6 (Medical Care Facilities). Facilities providing medical treatment or care are required to comply only if persons may need assistance in emergencies and the period of stay may exceed twenty-four hours. These cells or rooms would be required to be accessible in addition to the number of general and special housing cells or rooms required to be accessible. This provision is intended to address the same range of medical facilities in accordance with the scoping requirements in ADAAG 6.1 (Medical Care Facilities; General) that are part of a detention or correctional facility. For example, if a prison contained a detoxification facility, 10 percent of the patient bedrooms would have to be accessible according to ADAAG 6.1(1). Other medical areas that do not meet this definition (e.g., that do not provide overnight stay for patients) would be required to be accessible to the extent required for common use areas. Thus, a medical clinic that did not have patient bedrooms would have to be accessible according to the requirements of ADAAG 4, which address public and common use areas.

Question 48: Is further clarification needed on the types of medical facilities addressed by this provision? Are there other kinds of medical facilities provided in detention or correctional facilities that are not clearly addressed by those covered by ADAAG 6?

Question 49: Proposed ADAAG 12.4.2 will address special housing cells and rooms, which may include those provided for medical isolation. If a correctional facility contains a medical unit subject to proposed ADAAG 12.4.4 which provides medical isolation cells, should such cells be counted as part of the percentage of patient bedrooms required to be accessible or should accessible isolation cells be required in addition to accessible patient bedrooms?

12.4.5 Alterations to Cells or Rooms

Since correctional and detention facilities are usually built to have long

life-spans, the Board has proposed a scoping provision for the alteration of cells. This provision requires that the number or percentage of cells which must be made accessible as part of the alteration, be based on the total number of rooms altered, not the total number of cells in the facility. This requirement would be in effect for each future alteration undertaken until the total number of accessible cells required for new construction was achieved. This provision is generally consistent with similar requirements in ADAAG 9 (Accessible Transient Lodging).

12.5 Requirements for Accessible Cells or Rooms

12.5.1 General

12.5.2 Minimum Requirements

This section outlines the minimum requirements for accessible cells or rooms. These requirements are based in part on specifications in ADAAG 9 for rooms in transient lodging. In proposing these requirements, the Board has taken into account various security considerations which have been discussed in proposed ADAAG 11.4 (Courthouse Holding Facilities). These issues, which are also applicable to detention and correctional facilities, include the possible security and suicide risks of grab bars, as well as the accessibility of combined watercloset and lavatory units which are a standard feature of prison cell design. [See questions 30, 31 and 32]. As noted in the beginning of this section, the Board received several comments during the initial rulemaking expressing concern about grab bars which could be loosened from the walls and used as weapons. The Board seeks information on grab bars, but notes that removal of grab bars is dependent primarily on the securement and structural strength of grab bars. ADAAG 4.26 (Handrails, Grab bars, and Tub and Shower Seats) provides minimum criteria for grab bars and handrails but does not limit their structural strength or level of securement.

Question 50: The Board requests information on any conflicts (in addition to those raised in the questions noted above) between these proposed guidelines and any security requirements inherent in the design of detention or correctional facilities. Commenters should specify both the relevant section of the guidelines and the security design requirement or feature with which it conflicts.

This section requires that accessible cells or rooms and the elements or spaces serving them must be on an accessible route. It also requires that the same common areas, amenities, spaces, and elements serving other cells or rooms in the same type of housing be accessible. For example, if dayrooms or recreation facilities are available to occupants of a medium security housing unit, then such areas must be accessible and connected by an accessible route to accessible cells or rooms within the unit. These requirements would apply either to elements provided within accessible cells or rooms or those elements that may be provided in other areas but that serve accessible cells or rooms.

Paragraphs (1) through (6) are similar to provisions previously discussed under proposed ADAAG 11.4 (Courthouse Holding Facilities). Paragraph (5) requires fixed or built-in seating and tables to be accessible according to the general scoping requirement in ADAAG 4.1.3(18), which requires five percent, but not less than one, of the fixed or built-in seating or tables to be accessible according to ADAAG 4.32 (Fixed or Built-in Seating and Tables). This requirement would apply to fixed or built-in seating or tables provided within the accessible cells and those areas where such seating or tables are provided in other areas directly serving accessible cells, such as a dayrooms. Other public or common use areas serving the facility in general, such as exercise yards, vocational or instructional areas, and visiting areas, are subject to the requirements of ADAAG 4.1 through 4.35.

Paragraphs (7) and (8), which are based on requirements in ADAAG 9 for transient lodging, contain requirements pertinent to elements found primarily in housing, as opposed to holding cells or rooms. Paragraph (7) requires accessible fixed or built-in storage facilities, and paragraph (8) specifies that controls and operating mechanisms operated by inmates must be accessible.

Under paragraph (9), cells required to be accessible must also provide accommodations for persons with hearing impairments. This provision is based on a similar requirement for transient lodging in ADAAG 9.2 (Requirements for Accessible Units, Sleeping Rooms and Suites) which requires rooms accessible to persons with mobility impairments to also be accessible to persons with hearing impairments. This provision was included under transient lodging facilities so that persons with both mobility and hearing impairments could be accommodated.

Question 51: Is the requirement in paragraph (9) for accommodations for persons with hearing impairments appropriate or necessary with respect to detention or correctional facilities?

12.6 Visual Alarms and Telephones

12.6.1 General

12.6.2 Equivalent Facilitation

This section addresses the accommodation of inmates with hearing impairments and is derived from requirements for transient lodging in ADAAG 9.3 (Visual Alarms, Notification Devices and Telephones). The requirement for a visual alarm pertains only to those cells or rooms served by audible emergency alarms and from which inmates may evacuate independently. The term "audible emergency alarm" is intended to apply only to systems used to alert occupants of the cell or room of emergencies such as fire and would pertain to systems used only to notify security personnel, such as in cases of inmate escape or riot. Where inmates are evacuated from housing cells or rooms by security personnel, this requirement would not apply even if an emergency warning system is provided. Permanently installed telephones are required to have volume controls.

The equivalent facilitation provision in proposed ADAAG 12.6.2 allows use of portable devices in lieu of permanent ones as long as the cell or room has appropriate electrical wiring for the use of such devices. This section is consistent with a similar provision in ADAAG 9 for accessible transient lodging.

13. Accessible Residential Housing

Title II of the ADA covers all State and local government programs, services, and newly constructed facilities, including residential housing. Examples of housing covered under title II include, but are not limited to, public housing projects and apartments and official residences, such as those provided for governors or State university presidents. Proposed ADAAG 13 (Accessible Residential Housing) outlines minimum requirements for these residential facilities.

In proposing these requirements, the Board took into consideration existing Federal laws and regulations pertaining to residential facilities in the public sector. Specifically, these include section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), the Fair Housing Amendments Act of 1988 (Fair Housing Act) (42 U.S.C. 3604 *et seq.*), and regulations issued pursuant to both of these laws. Many residential facilities owned or operated by State governments are subject to both section

504 of the Rehabilitation Act and the Fair Housing Act.

Section 504 of the Rehabilitation Act prohibits discrimination on the basis of disability in Federally funded programs and services. The Department of Housing and Urban Development (HUD) has issued regulations implementing section 504 as it applies to housing and other programs and services which receive HUD assistance. (See 24 CFR part 8). HUD's regulations implementing section 504 reference UFAS (24 CFR 8.32). In new construction and substantial alterations, UFAS 4.1.4(11) requires five percent of the dwelling units to be accessible according to the requirements in UFAS 4.34. HUD's section 504 regulations also require that two percent of the dwelling units be accessible to persons with hearing impairments and persons with vision impairments. (See 24 CFR 8.22).

The Fair Housing Act prohibits discrimination on the basis of disability in multifamily housing and requires that new multifamily housing units be adaptable to the access needs of persons with disabilities. Section 804(f)(3)(C) of the Act requires covered multifamily dwellings to be designed and constructed in accordance with certain accessibility requirements. (See 56 FR 9473). Pursuant to this Act, HUD issued the Fair Housing Accessibility Guidelines which contain minimum requirements for adaptability in multifamily dwelling units containing four or more units. (See 24 CFR 100.205). Title II of the ADA applies to State and local government facilities containing dwelling units without respect to the number of dwelling units. Thus, coverage of title II of the ADA and the Fair Housing Act overlap.

This section outlines requirements for accessible dwelling units which are based, with modification, on requirements in UFAS 4.34 for dwelling units. Additionally, the Board has sought to ensure that these requirements do not conflict with the minimum requirements of the Fair Housing Accessibility Guidelines for adaptable dwelling units. Except as otherwise provided in this section, all public and common use areas are subject to ADAAG 4.1 through 4.35. This provision is consistent with the Fair Housing Accessibility Guidelines which require all public and common use areas to be accessible in buildings covered by the Fair Housing Act. This would include those public and common use areas provided on upper or lower floors of facilities that do not contain elevators. In requiring this provision, the Board notes that the absence of an elevator is not a barrier to all individuals with disabilities. The guidelines include requirements for access for persons with hearing impairments and persons with vision impairments. Further, some individuals with mobility impairments, such as those using crutches or braces, may be able to use stairs to access other floors. The Board also notes that an elevator may be installed at a future date, or an addition to a building or a second building which is later connected may include an elevator. Furthermore, the legislative history of the ADA states that the exception for elevators in certain private sector facilities "does not obviate or limit in any way the obligation to comply with the other accessibility requirements established by this legislation, including requirements applicable to floors which, pursuant to the exception, are not served by an elevator." H. Rept. 101–485, pt. 2 at 114.

An exception has been included for public or common use areas that serve a recreational purpose. Under this exception, where multiple recreational facilities, such as tennis courts, are provided, at least one of each type must be accessible. This is consistent with the Fair Housing Accessibility Guidelines which state: "Where multiple recreational facilities (e.g., tennis courts) are provided, sufficient accessible facilities of each type to assure equitable opportunity for use by persons with handicaps" is required. (24 CFR Ch. 1, App. II, sec. 5, req. 2).

This section defines "public use areas" and "common use areas." "Public use area" is defined according to the definition in ADAAG 3.5. The definition of "common use area" is consistent with the definition in ADAAG 3.5, but is more specific to residential facilities covered by this section. This definition of "common use areas" is derived from the Fair Housing Accessibility Guidelines and applies to rooms, spaces or elements used by residents or their guests, such as hallways, lounges, lobbies, laundry rooms, refuse rooms, mail rooms, recreational areas and passageways among and between buildings. (24 CFR Ch. 1, App. II, sec. 2).

13.1 General

Proposed ADAAG 13.1 outlines the types of residential facilities addressed by the section. These facilities include single family and multifamily dwelling units constructed or altered by, or on behalf of, a State or local government entity. The definition of "dwelling unit" in this section is derived from the definition previously included in ADAAG 3.5 (Definitions). The definition has been incorporated here and revised to apply only to residential housing and not transient lodging since this term is used only in this section and not in ADAAG 9 (Accessible Transient Lodging).

The term "dwelling unit" as used in ADAAG 13 specifically applies only to those facilities used as a residence which provides a kitchen or food preparation area, in addition to rooms and spaces for living, bathing, and sleeping. Examples include public housing projects and apartments and official residences. Proposed appendix note A13.1 discusses certain characteristics that distinguish residential dwelling units addressed by this section from those considered transient lodging. Specifically, residential dwelling units contain full accommodations, including kitchens, bathrooms, living and sleeping areas. Often, all of these spaces are not provided within units which are used on a transient basis.

Question 52: UFAS 4.1.4(2)(a) provides for a military exclusion for residential housing for unaccompanied military personnel, when their job descriptions cannot be filled by persons with disabilities. The Board has not included such an exemption in the proposed guidelines but seeks comment on whether such an exemption is appropriate under title II of the ADA. For example, should this section exclude unaccompanied military housing located within a State National Guard facility? Are there other types of residential housing which should be exempted from this section? Responses should include discussion of the justification upon which any recommended exemption might be based.

13.2 Minimum Number and Dispersion

13.2.1 New Construction: Minimum Number

Proposed ADAAG 13.2.1(2) requires two percent, but not less than one, of the total number of dwelling units to be accessible to persons with hearing impairments, as well as to persons with visual impairments. Thus, five percent of the dwelling units are required to be accessible to persons with mobility impairments as well as persons with hearing or visual impairments and an additional two percent of the dwelling units (seven percent total) are required to be accessible to persons with hearing or visual impairments. In developing the requirements of proposed ADAAG 13.2.1 (1) and (2), the Board considered HUD's section 504 regulation, its Fair

Housing Accessibility Guidelines, and existing provisions in ADAAG, as discussed below.

HUD's section 504 regulations reference UFAS. UFAS 4.1.4(11)(b) requires that five percent of the dwelling units be accessible for persons with mobility impairments. HUD's section 504 regulation also requires that an additional two percent of the dwelling units be "accessible for persons with hearing or vision impairments." See 24 CFR 8.22.

The Fair Housing Act requires that all dwelling units in elevator buildings and all ground floor dwelling units in non-elevator buildings be adaptable. It does not require that any dwelling unit be fully accessible by design or construction. In general, adaptable dwelling units, as defined by HUD, allow for certain elements, such as grab bars, to be provided by the tenant.

Consequently, housing facilities subject to both HUD's section 504 regulations and its Fair Housing Accessibility Guidelines must be constructed so that five percent of the dwelling units are accessible for persons with mobility impairments, two percent are accessible to persons with hearing or visual impairments, and 100 percent of the dwelling units in elevator or 100 percent of the ground floor dwelling units in non-elevator buildings are adaptable. The requirement in proposed ADAAG 13.2.1(1) that a percentage of the dwelling units be accessible for persons with mobility impairments and the requirement in 13.2.1(2) that a percentage of the dwelling units be accessible to persons with hearing and visual impairments are derived from HUD's section 504 regulations.

ADAAG 9 (Accessible Transient Lodging) contains scoping requirements for accessible transient lodging in the form of a chart. The first chart, at ADAAG 9.1.2, contains requirements for the minimum number of accessible rooms. These rooms must be accessible to persons with mobility impairments according to the requirements in ADAAG 9.2 and contain accommodations for persons with hearing impairments according to the requirements in ADAAG 9.3. In addition, it also specifies a number of accessible rooms with roll-in showers. These requirements are to be satisfied independently. For example, a facility containing between 76 and 100 rooms must have a total of five accessible rooms, one of which must be equipped with a roll-in shower.

The second chart, at ADAAG 9.1.3, specifies a minimum number of rooms that must provide accommodations for persons with hearing impairments only. This number is in addition to those required to be accessible in the first chart. The requirement is based on the total number of rooms provided and ranges from two percent to four percent.

The requirement in ADAAG 13.2.1(1) that five percent of dwelling units required to be accessible also be accessible to persons with hearing or visual impairments is based in part on existing requirements for transient lodging in ADAAG 9.

While proposed ADAAG 13.2 does not require any percentage of dwelling units to be adaptable, it does not conflict with the Fair Housing Accessibility Guidelines and may facilitate compliance with the Fair Housing Accessibility Guidelines by ensuring a certain level of access in new construction and reducing the need for future adaptability.

Proposed ADAAG 13.2.1(1)(a) reserves the requirement that a certain number of accessible dwelling units provide roll-in showers. In the final guidelines, the Board intends to provide scoping for the number of dwelling units required to provide roll-in showers. Such a provision would be similar to the requirement in ADAAG 9 (Accessible Transient Lodging). In ADAAG 9, a roll-in shower stall is required in certain accessible sleeping rooms on a sliding scale according to the table in ADAAG 9.1.2. (Accessible Units, Sleeping Rooms, and Suites). According to this table, transient lodging facilities with more than fifty rooms must have roll-in showers in one to two percent of the rooms.

The roll-in showers required by these provisions are shown in Figure 57 (a) and (b) and differ from the accessible shower stalls in ADAAG 4.21 (Shower Stalls). ADAAG 4.21 allows use of a 36 inch by 36 inch transfer shower stall or a larger roll-in shower stall at least 30 inches by 60 inches. The requirement for roll-in showers was based on comments received in response to the initial rulemaking.

Question 53: What percentage of the accessible residential dwelling units should contain roll-in showers? Where possible, responses should include information on the benefits, as well as estimates on the cost and design impact, of providing roll-in shower stalls in residential dwelling units.

With respect to transient lodging, accessible rooms with roll-in showers are required only in facilities with over 50 rooms. Given the trend toward integrating a number of smaller public housing facilities within communities, as opposed to providing large isolated facilities comprised of a greater number of units, the Board is concerned that State and local government entities may not construct residential facilities that trigger the requirement for roll-in showers.

Question 54: Should the requirement for roll-in showers parallel that for transient lodging in ADAAG 9.1.2 which applies only to facilities with over 50 units or should it apply to smaller residential facilities? If so, how many dwelling units should a facility contain to trigger the requirement for roll-in showers.

Proposed ADAAG 13.2.1(1)(b) reserves the requirement for a minimum number of dwelling units with bathtubs. Persons with certain disabilities, such as severe arthritis, may have greater need for bathtubs than showers for therapeutic reasons. Consequently, the Board is considering requiring that a portion of accessible dwelling units contain accessible bathtubs.

Question 55: Should a provision for bathtubs complying with ADAAG 4.20 be included in 13.2.1(1)? If so, what portion of a facility's accessible units should contain such bathtubs? How many dwelling units should a facility contain to trigger the requirements for bathtubs complying with ADAAG 4.20?

As stated in proposed ADAAG 13.2.1(3), these requirements are not intended to increase the total number of dwelling units planned for a facility. If a facility contains only one dwelling unit, both scoping requirements could be met by making that unit accessible for persons with mobility impairments, as well as for persons with hearing and visual impairments.

Question 56: The Board seeks comment on whether the percentages specified in proposed ADAAG 13.2.1 (1) and (2) provide for an appropriate level of accessibility in residential facilities. In particular, the Board is interested in any information or survey results on the need for accessible units in existing residential facilities which are owned or operated by public entities. Public entities that have followed the UFAS scoping requirements are encouraged to comment on their experiences in providing this level of access. Responses should include, where possible, any available cost estimates or data.

The scoping percentages in proposed ADAAG 13.2.1 (1) and (2) are based on the total number of dwelling units in a facility. The term "facility" in ADAAG, as noted above, would include all buildings on a single site. However, UFAS 4.1.1 (11) requires five percent, or at least one, whichever is greater, of the "total" of Federally owned multi-family and single family dwelling units to be accessible but does not specify whether this means the total number of dwelling

units in a facility or the total number of dwelling units in each building in a facility. With respect to Federally assisted multi-family housing, UFAS bases this percentage on the total "in projects of 15 or more dwelling units, or as determined by the appropriate Federal agency following a local needs assessment conducted by local government bodies or States under applicable regulations." The term "project" is not defined in UFAS. Consequently, the Board sought guidance from HUD's section 504 regulation, which defines the term "project" as: "Project means the whole of one or more residential structures and appurtenant structures, equipment, roads, walks, and parking lots which are covered by a single contract for Federal financial assistance or application for assistance, or are treated as a whole for processing purposes, whether or not located on a common site." 24 CFR 8.3.

Basing the minimum number on projects instead of facilities may lead to a decrease in the number of accessible dwelling units required, since projects may include more than one facility or site. For example, in a project that involved construction of three different facilities at different sites each providing 15 dwelling units, a minimum number based on the project total (five percent of 45) would require at least two accessible dwelling units, whereas a minimum number based on each facility total (five percent, but not less than one, of 15) would require three accessible dwelling units.

Question 57: The Board seeks information on whether basing the minimum number on the number of dwelling units in each facility is the most appropriate means of determining an adequate level of accessibility. Should another basis, such as the total number of dwelling units in a project be used? If an alternative is recommended, commenters should state, where possible, the impact the recommendation would have on the minimum number of accessible dwelling units required.

13.2.2 New Construction: Dispersion

Proposed ADAAG 13.2.2 requires that accessible dwelling units be dispersed so as to provide people with disabilities a choice of housing types comparable to and integrated with those available to other members of the public. This section provides that the factors to be considered in dispersing units include unit size and configuration, cost, the amenities provided within or serving dwelling units, and location with respect to amenities. This requirement is based on a similar provision for transient lodging in ADAAG 9.1.4 (Classes of Sleeping Accommodations). The Department of Justice regulations implementing title II of the ADA provide that a public entity may not "afford a qualified individual with a disability an opportunity to participate in or benefit from the aid, benefit, or service that is not equal to that afforded others". See 28 CFR 35.130(b)(1)(ii).

In addition, accessible dwelling units cannot be grouped or clustered but must be dispersed so that they are integrated within the facility. The principle of integration underlies the ADA as evidenced in the legislative history:

> As with Section 504 of the Rehabilitation Act, integrated services are essential to accomplishing the purposes of Title II. As stated by Judge Mansmann in *ADAPT* v. *Skinner*, "the goal [is to] eradicat[e] the 'invisibility of the handicapped'." Separate-but-equal services do not accomplish this central goal and should be rejected.
>
> The fact that it is more convenient, either administratively or fiscally, to provide services in a segregated manner, does not constitute a valid justification for separate or different services under Section 504 of the Rehabilitation Act, or under this title. Nor is the fact that the separate service is equal to or better than the services offered to others sufficient justification for involuntary different treatment for persons with disabilities * * * (H. Rept. 101–485, Part 3, at 50).

Thus, it is essential that tenants with disabilities are not segregated from the overall facility population. An appendix note clarifies the level of dispersion required by this provision.

Question 58: The Board seeks comment on the factors that constitute an acceptable level of dispersion of accessible units. In particular, the Board seeks comment on whether there are overriding factors which are more significant than a dispersed location for certain types of facilities. For example, should accessible units be located as close as possible to entrances, amenities such as parking, or common use areas such as laundry facilities? Where possible, commenters are asked to provide cost data which takes into consideration that both these guidelines and the Fair Housing Act require all public and common use areas to be accessible.

These proposed guidelines are intended to be consistent with HUD's section 504 regulations, as previously discussed. UFAS 4.1.3(1) provides that all the accessible dwelling units may be located on one accessible level if at least one of each type of common area and amenity provided for use of residents and visitors is available on the accessible level. A similar allowance has not been included in these proposed guidelines because of the requirement for dispersion and integration of accessible dwelling units. Thus, under these proposed guidelines, a low-rise garden style apartment building may need an elevator serving all floors so that accessible dwelling units can be dispersed and integrated.

Question 59: Should the guidelines include an allowance similar to that in UFAS with respect to low-rise structures? Responses should include a discussion of the justification upon which such an allowance would be based and information on the cost impact of providing elevators in low-rise buildings in new construction.

13.2.3 Alterations: Minimum Number and Dispersion

Proposed ADAAG 13.2.3 addresses the alteration of residential dwelling units. Proposed ADAAG 13.2.3(1) provides that the minimum number of dwelling units required to be accessible to persons with mobility, vision and hearing impairments (five percent but not less than one) and the minimum number of dwelling units required to be accessible for persons with hearing or visual impairments (two percent but not less than one) is based on the total number of units being altered. This requirement would remain in effect and apply to subsequent alterations of other units until such time as the total number of accessible dwelling units required for the facility overall was achieved. Appendix note A.13.2.2. provides an illustration of this requirement by illustrating how this might affect a facility undergoing ten alterations in ten consecutive years. This requirement is consistent with similar provisions in ADAAG 6 (Medical Care Facilities) and 9 (Accessible Transient Lodging). Both of these sections cover facilities similar to residential facilities, which are often altered or renovated in phases with only a portion of units or rooms renovated at a time.

Proposed ADAAG 13.2.3(2) takes into account that existing conditions or the scope of the alteration may limit the ability to fully disperse accessible units throughout the facility. This provision only requires altered units that are made accessible to be dispersed to the maximum extent feasible in accordance with ADAAG 13.2.2.

13.3 Requirements for Accessible Dwelling Units

13.3.1 General

Proposed ADAAG 13.3 contains the technical requirements for accessible dwelling units. This section is

consistent with UFAS 4.34 (Dwelling Units) except where discussed below. Specifically, the proposed requirements do not include all the provisions allowing adaptability which are in UFAS 4.34. Under provisions of adaptability, dwelling units may be designed and constructed so that certain elements necessary for accessibility, such as grab bars, can be installed at a later date. The effectiveness of adaptability depends on operational factors which are not within the purview of these guidelines. The Board has sought to ensure a level of accessibility for dwelling units that is consistent with the statutory mandate of the ADA to ensure that buildings and facilities are accessible to persons with disabilities.

In addition to ensuring a minimum level of accessibility as part of the actual design, construction or alteration of publicly owned dwelling units covered under title II of the ADA, these requirements will facilitate compliance with section 504 of the Rehabilitation Act. Further, accessible dwelling units complying with this section will satisfy the requirements in HUD's Fair Housing Act regulations, which require all units to be adaptable.

This section includes requirements for the areas, spaces, and elements of accessible dwelling units (13.3.2), and specific sections on bathrooms (13.3.3), kitchens (13.3.4), and laundry facilities (13.3.5).

13.3.2 Minimum Requirements

Consistent with UFAS 4.34.2, proposed ADAAG 13.3.2 requires accessible dwelling units to be on an accessible route and to provide accessible elements, spaces, and areas complying with paragraphs (1) through (14).

Paragraph (1) applies the requirements of ADAAG 4.1 through 4.35 to those spaces and facilities serving accessible dwelling units. These include entry walks, trash disposal facilities, and mail boxes. The provision applies only where such spaces and facilities are provided.

Paragraph (2) requires wheelchair turning space complying with ADAAG 4.2.3 and ground and floor spaces complying with ADAAG 4.5 in accessible spaces. The UFAS requirement at 4.34.2(2) for wheelchair passing space was not included here since such a requirement could not be met within a dwelling unit. The requirement for wheelchair passing space is applicable to public and common use areas under the accessible route requirements at ADAAG 4.3.4.

Paragraph (3) requires an accessible route complying with ADAAG 4.3 to connect all accessible spaces and elements within accessible dwelling units. A provision has been added clarifying that an elevator is not required within multi-level dwelling units as long as the following accessible elements are provided on an accessible level: one full bathroom; a kitchen; a living room; a dining room; one bedroom in a dwelling unit with one bedroom, or two bedrooms in a dwelling unit with more than two bedrooms; and, where provided, patios, decks, terraces, balconies, carports, garages. This provision is derived from UFAS 4.34.2(15)(c) and there is a similar provision for transient lodging in ADAAG 9.2.2(2).

Paragraph (4)(a) requires an accessible parking space complying with ADAAG 4.6 for each accessible dwelling unit if resident parking is provided. An exception is provided regarding signage for the required accessible parking spaces. Where parking spaces are assigned to specific dwelling units, the parking sign identifying the space as accessible required at ADAAG 4.6.4 is not required to be provided until the dwelling unit is occupied by a resident with a disability. UFAS 4.1.1(5)(d) requires an accessible space for each accessible dwelling unit only where parking is provided for all residents. Where parking is provided for only a portion of residents, the same UFAS provision requires that an accessible space be provided upon the request of the occupants of accessible dwelling units. Since redesigning a parking lot to provide accessible spaces at a later date may be extremely costly, the Board has proposed applying the provision of accessible spaces for each accessible dwelling unit even when parking is provided for only a portion of residents. However, the exception for signage designating the space would allow for the space to be used by persons without disabilities until such time as a tenant with a disability requires the accommodation. Paragraph 4(b) is consistent with UFAS 4.1.1(5)(d) in requiring that where visitor spaces are provided, two percent, but not less than one, are to be accessible.

The Board is considering a requirement for accessible van parking. The Board recognizes that tenants will want to park as close as possible to their units, however, it is impossible to predict which accessible dwelling unit might be occupied by a person having a van. Therefore, the Board is considering requiring every accessible parking space in tenant lots to be van accessible. Universal design which also can be used either by cars or vans is another alternative. A Universal space, as shown in ADAAG A4.6.3, Figure A5(b) is 132 inches wide with a 60 inch access aisle. Spaces designed specifically for vans must be 96 inches wide and have a 96 inch access aisle. When only one space is provided at a location, the van and universal spaces are the same overall size, 192 inches. When spaces are paired, two universal spaces with a shared access aisle measure 324 inches and two van spaces with a shred access aisle measure 288 inches. However, given that accessible dwelling units will be dispersed within a facility, it seems unlikely that spaces will be paired.

Question 60: Should accessible van parking spaces be provided for tenants? If so, should all accessible parking spaces be van accessible or are there other design or scoping solutions? Should the Board specify the universal design parking space or the van accessible type? Responses should include, where possible, cost information.

Paragraph (5) requires that elevators serving accessible dwelling units comply with the requirements for elevators in ADAAG 4.10. This provision is reserved in UFAS. The Board feels that elevators are essential for access in some residential facilities covered by ADAAG13. This requirement would apply to accessible dwelling units provided on the upper floors of a high-rise apartment building. It may also apply to elevators located within a dwelling unit that connects levels required to be accessible. However, under paragraph (3), an elevator would not be required in an accessible dwelling unit if the required accessible spaces are on an accessible level. In providing for equivalent facilitation under paragraph (5)(ii), the Board has taken into consideration the cost and design impact of providing elevators complying with ADAAG 4.10 within accessible dwelling units and has proposed a provision allowing for the installation of a platform lift complying with ADAAG 4.11 to connect levels that are required to be accessible.

Paragraph (6) requires doors provided for passage in and to accessible spaces to comply with ADAAG 4.13. This provision is consistent with the requirements for accessible units in transient lodging in ADAAG 9.2.2(3).

Paragraph (7) requires at least one accessible entrance to the dwelling unit complying with ADAAG 4.14. This requirement is consistent with UFAS 4.34.2(7).

Paragraph (8) addresses storage facilities provided in accessible spaces.

including cabinets, shelves, closets, and drawers; and requires one of each type to be accessible in compliance with ADAAG 4.25. This provision applies to one of each type of storage facility, and is consistent with the general scoping for storage facilities in UFAS 4.1.2(11) and ADAAG 4.1.3(12), as well as a requirement specific to transient lodging in ADAAG 9.2.2(4).

Paragraph (9) requires all controls, including those used in the regular and periodic adjustment of heating, ventilating, and air conditioning, to be accessible in compliance with ADAAG 4.27. An exception provides that this requirement does not apply to controls such as air distribution registers, required to be placed in or close to ceilings for proper air circulation. This provision is consistent with UFAS 4.34.2.(9).

Paragraph (10) requires audible alarms complying with ADAAG 4.28.2 and auxiliary alarms complying with ADAAG 4.28.4 if emergency warning systems are provided. This is consistent with UFAS 4.34.2(10). Otherwise, visual alarms complying with ADAAG 4.28.3 are not required within dwelling units because they are required to be connected to a building central alarm system and currently, many residential facilities are constructed without a central alarm system.

Paragraph (11) requires at least one full bathroom complying with proposed ADAAG 13.3.3, including a water closet, lavatory, and bathtub or shower. This is consistent with UFAS 4.34.2(12).

Paragraph (12) requires kitchens to be accessible in compliance with proposed ADAAG 13.3.4 and is consistent with UFAS 4.34.2(13).

Paragraph (13) requires the following spaces to be accessible and to be on an accessible route: Living areas; dining areas; sleeping areas; and, if provided, patios, terraces, balconies, carports, and garages. This is consistent with UFAS 4.34.2(15). The Board has included an exemption based on ADAAG 9.2.2(6)(d) for transient lodging to allow for a higher threshold at doors on patios, decks, and balconies when it is necessary to protect the integrity of the unit from wind or water damage if equivalent facilitation is provided. Some local building codes require higher door thresholds or a change in the level of balconies to prevent structural damage from water.

Paragraph (14) requires laundry facilities to be accessible in compliance with proposed ADAAG 13.3.5 and is consistent with UFAS 4.34.2(15).

13.3.3 Bathrooms

This section contains requirements for bathrooms and is based on UFAS 4.34.5 with modification. The UFAS requirements for bathrooms are based in part on the concept of adaptability. Under this concept, certain elements necessary for access, such as grab bars, may be installed later instead of as part of new construction. These proposed requirements do not include adaptability in order to ensure full bathroom accessibility in the design and construction of dwelling units. The differences between the proposed requirements and those in UFAS 4.34.5 are further discussed below.

Paragraph (1) prohibits doors from swinging into the clear floor space required for any fixture. This is consistent with UFAS 4.34.5.1. The Board has also applied the requirements for doors in ADAAG 4.13 to doors leading to accessible bathrooms.

Paragraph (2) requires water closets to be accessible in compliance with ADAAG 4.16 and allows a water closet height range of 15 to 19 inches measured to the top of the seat. ADAAG 4.16 includes requirements for a grab bar 36 inches in length behind the water closet and a grab bar 42 inches in length aside the water closet. UFAS 4.34.5.2(3) requires only that bathrooms be designed so that grab bars can be installed as a feature of adaptability. ADAAG 4.16 also contains requirements for toilet paper dispensers similar to those in UFAS 4.34.5.2(4) and requirements for flush controls not included in UFAS 4.34.5.2.

Paragraph (3) requires lavatories and mirrors to be accessible in compliance with ADAAG 4.19. If medicine cabinets are provided, at least one must have a usable shelf no higher than 44 inches and provide clear floor space complying with ADAAG 4.2.4. This provision is consistent with UFAS 4.34.5.3, except that UFAS addresses only those medicine cabinets located above lavatories. The Board expanded this requirement to medicine cabinets not located above the lavatory because such cabinets are often provided elsewhere within accessible bathrooms.

Paragraph (4) requires bathtubs, if provided, to comply with ADAAG 4.20. This provision is consistent with UFAS 4.34.5.4, except that UFAS allows grab bars to be installed under the concept of adaptability.

Paragraph (5) requires shower stalls, if provided, to comply with ADAAG 4.21 and is consistent with UFAS 4.34.5.5. However, ADAAG 4.21 includes requirements for seats in roll-in shower stalls where provided, specifications for curbs, and requirements for grab bars which are not included in UFAS.

Paragraph (6) contains requirements for bathtub and shower enclosures that are derived from UFAS 4.34.5.6.

Paragraph (7) notes that the clear floor space at fixtures and controls may overlap and is based on UFAS 4.34.5.7. The Board has also clarified that those fixtures and controls required in accessible bathrooms shall be on an accessible route.

Paragraph (8) requires a turning space complying with ADAAG 4.2.3 and has been added as a restatement of a similar requirement in proposed ADAAG 13.3.2(2) which is consistent with UFAS 4.34.2(2).

13.3.4 Kitchens

This section contains requirements for accessible kitchens, which are required to be located on an accessible route. In general, this section is consistent with UFAS 4.34.6. However, where UFAS allows certain elements to be either accessible or adaptable, this proposed section requires full accessibility and does not address adaptability. Differences between these requirements and those of UFAS are further discussed below.

Paragraph (1) provides for minimum clearances between all opposing base cabinets, counter tops, appliances, or walls. This provision is identical to UFAS 4.34.6.1.

Paragraph (2) provides for clear floor space of at least 30 by 48 inches at all appliances in the kitchen, including the range or cooktop, oven, refrigerator/freezer, dishwasher, and trash compactor. Clear floor spaces must comply with ADAAG 4.2.4 and allow for either a forward or a parallel approach. Laundry equipment provided in the kitchen must comply with proposed ADAAG 13.3.5. All of the above requirements are the same as those in UFAS 4.34.6.2. A clarifying provision has been added requiring maneuvering space complying with ADAAG 4.2.3. UFAS 4.34.2(2) and proposed ADAAG 13.3.2(2) require that accessible spaces shall have maneuvering spaces complying with 4.2.3 in UFAS or ADAAG.

Paragraph (3) requires that all controls in the kitchen comply with ADAAG 4.27. This provision is identical to UFAS 4.34.5.3.

Paragraph (4), like UFAS 4.34.5.4, requires that at least one 30 inch section of counter provide an accessible work surface. Paragraph (4)(a) allows the accessible work surface to be either adjustable or mounted at a fixed height and is similar to UFAS 4.34.6.4(1). However, consistent with ADAAG

4.32.4, the proposed requirement provides a range of height for fixed counters from 28 to 34 inches whereas UFAS requires a counter height of 34 inches maximum. Paragraph (4)(b) requires that counter thickness and supporting structure be 2 inches maximum over the required knee clearance and is consistent with UFAS 4.34.6.4(3). Paragraph (4)(c) requires a clear floor space at the accessible work surface of 30 by 48 inches, and provides for a forward approach. This provision limits the amount of clear floor space that may be provided under the work surface to 19 inches, and specifies that knee space must be 30 inches wide and 19 inches deep. This section is consistent with UFAS 4.34.6.4(4).

Paragraph (4)(d) requires that there shall be no sharp or abrasive surfaces under work surfaces and is consistent with UFAS 4.34.6.4(5).

The provision in UFAS 4.34.6.4(2), which allows use of removable base cabinets, has not been included because those adaptable features that may obstruct accessible elements are not included in this section.

Paragraph (5) requires that the sink and surrounding counter comply with ADAAG 4.24. With respect to mounting height, this paragraph is consistent with UFAS 4.34.6.5(1) in that it allows for the sink to be capable of being adjusted to alternative heights. However, while UFAS requires that the sink be capable of being mounted at 28, 32, and 36 inches, this section requires that an adjustable sink be capable of being mounted at 28, 32, 34, and 36 inches. This action has been taken to provide consistency with the requirements for a fixed sink and it takes into consideration the clearances required for a sink with a 6½ inch deep bowl while maintaining the required knee clearances. ADAAG 4.24 contains provisions which are consistent with UFAS 4.34.6.5 with regard to minimum knee clearances, the depth of the sink, clear floor space, protection from exposed pipes, faucet controls and rough-in plumbing for adjustable sinks. This paragraph includes an appendix note similar to UFAS A4.34.6.5, recommending the provision of a rear drain in order to prevent garbage disposals and other plumbing from obstructing the required clear floor space.

Paragraph (6) requires that cooktops have accessible controls which do not require reaching across burners and a clear floor space allowing either a front or side approach. Cooktops with knee space underneath must be insulated or otherwise protected on the exposed contact surface to prevent burns, electrical shock, and abrasion. This section and its appendix note recommending counter top ranges with adjustable heights is similar to UFAS 4.34.6.6. The reference to ranges, as used in UFAS, was not included because this section only applies to cooktops. Ovens and ranges are included in the following section.

Paragraph (7) requires ovens to be of the self-cleaning type or to be located adjacent to an adjustable height counter with knee space below. For side opening ovens, the door latch side is required to be configured so that the oven interior is accessible to the counter space. This paragraph requires a pull-out shelf under a side opening oven extending the full width of the oven and pulling out not less than 10 inches. Ovens are also required to have controls on front panels or on either side of the door. This paragraph and its appendix note explaining the rationale for the provisions are similar to UFAS 4.34.6.7. This section clarifies the difference between floor ovens and wall ovens.

Paragraph (8) provides for refrigerators and freezers to be either: 1) the side-by-side type or, 2) the over and under type, with fifty percent of the freezer within 54 inches and 100 percent of the refrigerator below 54 inches. If the above requirements are not met, the freezer shall be a self-defrosting type of mechanism. The appendix note provided with this section is similar to UFAS, except that the Board has clarified that having the ability to open the door 180 degrees provides greater maneuvering space at the opening by allowing knee and toe clearances at the hinge side by a parallel reach.

Paragraph (9) requires that dishwashers have accessible controls, clear floor space allowing either a front or side approach, and that all rack space be accessible from the front of the machine for loading and unloading dishes. This paragraph is the same as UFAS 4.34.6.9.

Paragraph (10) covers kitchen storage and is identical to UFAS 4.34.6.10. It requires that storage cabinets, drawers and shelf areas comply with ADAAG 4.25. At least one shelf in all cabinets and storage shelves mounted above work counters shall have a maximum height of 48 inches. Additionally, door pulls and handles are required to be mounted at the top of a base cabinet and at the bottom of a cabinet over a counter. As in UFAS, an appendix note recommends pantry style storage for greater accessibility.

The Board is considering a requirement that a portion of the kitchen storage cabinets be provided with pull-out shelving that will facilitate access to the rear of the unit.

Question 61: Should pull-out shelving the required in kitchen storage? If so, what are the costs associated with such a requirement?

13.3.5 Laundry Facilities

This section contains requirements for accessible laundry facilities which are essentially the same as UFAS 4.34.5.7. Paragraph (1) requires laundry facilities and equipment to be on an accessible route. Paragraph (2) requires a minimum of one washing machine and clothes dryer provided in each common use laundry room to be front loading. Under paragraph (3), laundry equipment controls must comply with ADAAG 4.27.

13.4 Requirements for Dwelling Units Accessible to Persons with Hearing Impairments

13.4.1 General

13.4.2 Equivalent Facilitation

This section addresses accommodations for persons with hearing impairments and is based on requirements for transient lodging in ADAAG 9.3 (Visual Alarms, Notification Devices and Telephones). Proposed ADAAG 13.4.1 requires auxiliary alarms complying with ADAAG 4.28.4 (Auxiliary Alarms); devices providing visual notification of incoming telephone calls and door knocks in living and sleeping rooms; volume controls complying with ADAAG 4.31.5 (Hearing Aid Compatible and Volume Control Telephones Required by 4.1) for permanently installed phones; and electrical outlets in proximity to telephone connections to facilitate use of portable text telephone devices. Proposed ADAAG 13.4.2 allows, as a means of equivalent facilitation, use of portable devices in lieu of permanent devices if appropriate electrical wiring for their use is provided. This section is consistent with ADAAG 93.3.

13.5 Requirements for Dwelling Units Accessible to Persons with Visual Impairments: Reserved

This section reserves requirements for persons with visual impairments. UFAS 4.34 which addresses dwelling units, is the main basis for the requirements in proposed ADAAG 13.3, does not include any specifications pertaining to access for persons with visual impairments. HUD's section 504 regulations require that two percent of the dwelling units in new construction be accessible to persons with visual impairments (24 CFR 8.22). The Board is considering including specific

requirements for persons with visual impairments as part of its final guidelines. Requirements that are under consideration are discussed below.

HUD has recommended certain accommodations for persons with visual impairments under section 504 with regard to its section 202 program, which provides rental subsidies for elderly persons and persons with disabilities. (See Memorandum from James E. Schoenberger, HUD General Deputy Assistant Secretary for Housing, to all Regional Administrators, July 3, 1989). These recommendations are: lighting fixtures which can accommodate 150 watt bulbs for tenants with residual vision; the mounting of cooktop controls on the front and side of ranges; tactile markings for controls; and colors for baseboards, doors, door frames, and windows that contrast with the color of walls and floors.

A number of publications have identified additional recommendations. One publication recommends use of a contrasting color to mark the leading edge of steps. (See "Making Life More Livable", American Foundation for the Blind at 59 (1983)). Another suggested decals placed on sliding glass doors and other large areas of glass at face and chest height (See Duncan, et. al., "Environmental Modifications for the Visually Impaired: A Handbook," Visual Impairment and Blindness at 444 (December 1977)). Another study recommended that doors to upper kitchen cupboards be of the sliding type to reduce the risk of injury posed by doors left ajar. (See Braf, "The Physical Environment and the Visually Impaired", Swedish Institute for the Handicapped at 24 (March 1974)).

Question 62: The Board seeks comment on what provisions, if any, are appropriate and should be included in this section. In particular, information is sought on what provisions, if any, are necessary in residential housing to accommodate persons with low vision as well as those who are blind. Where possible, responses should identify any supporting data or other sources, including building codes and State or local requirements and include cost information. Individuals and organizations representing persons who are blind or visually impaired are requested to provide recommendations based on their experience or expertise.

14. Public Rights-of-Way

The need to complement and connect accessible public and private sites and facilities with accessible pedestrian components is recognized in the House Education and Labor Committee Report on the ADA: ". . . the employment, transportation, and public accommodation sections of this Act [the ADA] would be meaningless if people who use wheelchairs were not afforded the opportunity to travel on and between the streets." (H. Rept. 101–485, pt. 2, at 84)

Standards directed toward the elimination of architectural barriers have been largely focused on buildings and facilities located on easily defined sites and on the accessible routes that ensure access within buildings and sites. Pedestrian circulation systems in the public right-of-way have not been explicitly addressed, although individual elements, such as walks and curb ramps, are covered by UFAS and ADAAG.

Travel between buildings, districts, and transportation modes requires the connection of individual pedestrian elements such as the public sidewalks, curb ramps, and street crossings of a jurisdiction into an accessible network. The transportation planning and development process offers the most useful model for the development of guidelines for connecting accessible pedestrian elements, components, and networks for a number of reasons. The purpose of a transportation system is to move an individual from one location to another and to provide the major origin/destination linkages that pedestrian routes connect to and from. Transportation systems are not site-specific and they are largely a public service. A pedestrian circulation system performs similar functions. For the most part, transportation facilities and services and pedestrian circulation networks operate within an environment limited by the constraints of topography and existing adjacent development. Both systems are part of the infrastructure of a municipality. They are complementary in that pedestrian routes complete the origin/destination linkages of public transportation.

Research sponsored by the Department of Transportation developed guidelines for the individual elements of the pedestrian circulation network and proposed the first nationwide guidelines for accessible pedestrian networks.[8] Municipalities that applied these planning and implementation strategies developed accessible networks within districts and along routes that served significant local destinations.[9] A subsequent study conducted by the Department of Transportation and the Federal Transit Administration (formerly the Urban Mass Transportation Administration) followed with an assessment of the physical and operational barriers associated with getting to and from the transportation stops and facilities.[10] This study demonstrates that the goals of accessibility are not adequately served if the design of individual elements such as curb ramps or pedestrian overpasses do not consider the planning context of the sidewalk and intersections they connect.

Accordingly, this section addresses the overall framework for a pedestrian circulation system, as well as the elements and components of such a system. Standards are proposed for sidewalks, curb ramps, crosswalks, and crossing controls with special provisions for drinking fountains, telephones, toilet facilities, and tables, seating and benches located along the pedestrian route. It also covers vehicular elements which are related to the pedestrian network such as on-street parking and roadside emergency communication systems. In addition to addressing the individual elements, this section provides for the connection of those elements within the sidewalk to ensure that pedestrians with disabilities are afforded the opportunity to travel on and between the streets.

14.1 General

This section generally applies ADAAG provisions for buildings and facilities to new construction in public rights-of-way, subject to the modifications contained in this section. It covers work: (1) that is undertaken by or on behalf of a State or local government entity, and (2) that involves elements for pedestrian access, circulation, and use whether by intention or as a consequence of other work. Such elements include sidewalks, curb ramps, crosswalks, crossing controls, drinking fountains, telephones, toilet facilities, fixed tables, seating, benches, and related on-street parking and roadside communication systems that are constructed or installed on or adjacent to a sidewalk or roadway within the limits or scope of a public improvement project. These elements are discussed in the sections that follow.

[8] "Provisions for Elderly and Handicapped Pedestrians" DOT/FHWA (1979); "Guidelines for Making Pedestrian Crossing Structures Accessible" DOT/FHWA (1984); "Planning, Design and Maintenance of Pedestrian Facilities" DOT/FHWA (1984), "Priority Accessible Networks" DOT/FHWA (1980).

[9] "Accessibility for Elderly and Handicapped Pedestrians—A Manual for Cities" DOT/FHWA (1987).

[10] "Planning, Implementing, and Maintaining Accessible Accessways to and from Bus Stops: Existing Problems and Possible Solutions for the Wheelchair Traveler" DOT/UMTA (1983).

An appendix note clarifies that this section is intended to apply special provisions to those pedestrian facilities that are constrained by terrain, vehicular roadways, and existing buildings or elements of the pedestrian network. Other areas or sites constructed or altered as part of a public improvement project, such as plazas or courts where the constraints listed above do not apply, are subject to the applicable provisions of ADAAG 4.1.1 through 4.35.

Where an improvement to the public right-of-way includes a plaza or court, those facilities are subject to the requirements of ADAAG 4.1.1 through 4.35. For example, an accessible route complying with ADAAG 4.3 must be provided connecting accessible elements within the site such as public transportation stops, accessible parking spaces, accessible entrances and other accessible elements provided on the site. Proposed ADAAG 14.2 requires that sidewalks or a continuous passage connect to the accessible route. Where the accessible route exceeds 1:20 (e.g., walks leading to the accessible entrance), and is constructed on a site not covered by proposed ADAAG 14, it must meet the requirements for handrails, level landings, and all other requirements in ADAAG 4.8. See A14.1.

Although the general section applies to new construction, most public improvement projects will occur within limits established by existing adjacent sidewalks, buildings, curbing, and roadway paving. Therefore, it may be difficult to distinguish between new construction and alterations in many public improvement projects. For example, the construction of a new sidewalk for an entire city block must connect on both ends to the existing sidewalks. The sidewalk is new construction even though it occurs within the boundaries of existing sidewalks. Therefore, this section contains provisions for site infeasibility which would normally apply only to alterations.

Vehicular and pedestrian planning within a new subdivision may seem less constrained, but in fact will be subject to limits of grading and filling, and may not always be able to meet all criteria for sidewalk slope. However, curb ramps and adjacent level landings should rarely, if ever, require exception.

Many public improvement projects may involve elements not covered by this section, such as new decorative lighting standards and lanterns, but which may involve altering the sidewalk. When the sidewalk is replaced following construction, it must comply with the provisions of this section for new construction.

Moreover, structural alterations undertaken in accordance with a jurisdiction's ADA transition plan must comply with the provisions of this section. See 28 CFR 35.150(b)(i).

14.1.1 Definitions

This section defines the key terms used in ADAAG 14.

Continuous passage is defined as a continuous unobstructed pedestrian circulation path within a sidewalk connecting pedestrian elements, systems, and facilities covered by ADAAG 14.

The definitions in ADAAG 3.5 for marked crossing and walk have been included here for reference.

Public improvement project is defined as a public works project consisting of the construction, alteration or installation of site improvements or amenities in the public right-of-way by or on behalf of a State or local government. This definition is derived from common terminology within the planning profession. Examples of public improvement projects include: (1) the construction or installation of site improvements and pedestrian amenities, landscaping, street furniture, and decorative paving, often as part of a downtown revitalization program; (2) the widening or realignment of a street which frequently involves new sidewalk and curb ramp construction; (3) the addition of transit shelters, pedestrian walkways, or bicycle paths for public circulation; (4) the upgrading of a storm or sanitary sewer, surface drainage system, or other utility; (5) the burial of overhead power or telephone lines; and (6) the installation of new area lighting. These projects are largely concerned with the infrastructure of a jurisdiction and are typically planned and budgeted for in a multi-year capital improvements program or as an annual maintenance and repair line item. Federal support may be provided through Community Development Block Grants or Federal Highway Act funding and may already require compliance with the Architectural Barriers Act of 1968 (42 U.S.C. 4151, *et seq.*) or section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794). Projects may be undertaken within clearly defined boundaries or may consist of the installation of a typical item dispersed throughout an area or jurisdiction such as drinking fountains, toilets, benches, or curb ramps.

An appendix note recommends that public entities ensure that developers who provide sidewalks, curb ramps and other pedestrian improvements in the public right-of-way as part of the scope of a private project comply with the provisions of this section. Similarly, the suburban residential developer who constructs streets and sidewalks as part of a new subdivision in anticipation of a later annexation or donation of public ways to a local government should also comply with these guidelines. Most jurisdictions will already require conformance to their street and highway specifications as a condition of acceptance. See A14.1.1.

Sidewalk is defined as a walk in the public right-of-way bordering a vehicular way as part of an interconnected pedestrian circulation network. This definition is consistent with UFAS 3.5 (Definitions: Walk) and ADAAG 3.5 (Definitions: Walk), and incorporates the definition of "walk" but is limited to those walks that are in the public right-of-way along vehicular ways. Unlike the definition of "walk", the definition of "sidewalk" does not include general pedestrian areas such as plazas and courts which can be designed, altered, and constructed to meet the requirements of 4.1 through 4.35. Sidewalks covered by this section are constrained by the slope of vehicular ways, topography, and existing facilities and pedestrian circulation routes which limit the ability to meet ADAAG 4.1 through 4.35.

The definition is also consistent with the language in the Department of Justice regulations implementing title II of the ADA which address pedestrian walks and walkways in relation to requirements for curb ramps. See 24 CFR 35.150(d)(2) and 35.151(e). It is also consistent with the definition of sidewalk in the California Accessibility Standards. (See title 24, part 2, section 3325 (1989).)

Site infeasibility means, with respect to construction in the public right-of-way, that there are existing physical or site constraints prohibiting the incorporation of elements, spaces, or features which are in full and strict compliance with the minimum requirements for new construction and which are necessary to provide accessibility. This definition is derived from the definition of technically infeasible in ADAAG 4.1.6(1)(j) (Accessible Buildings: Alterations) and is applied to new construction because public improvement projects most frequently will occur within limits established by existing adjacent sidewalks, buildings, curbing, and roadway paving.

14.2 Sidewalks

14.2.1 Minimum Requirements

Proposed ADAAG 14.2 requires that sidewalks have a continuous passage along their length at least 36 inches in width which connects to building entrances and curb ramps, marked crossings, telephones, drinking fountains, toilet facilities, and other elements addressed in this section. The sidewalk or continuous passage must comply with requirements for width, slope, passing space, surface and separation.

The requirements of this section are derived from ADAAG 4.3 (Accessible Route). However, the provisions relating to handrails, level landings on ramps and at doors are not applicable to sidewalks except where the accessible route is coincident with the sidewalk. Therefore, the Board has applied only the requirements for width, passing space, surfaces and slope. In addition, this section requires that a 36 inch continuous passage connect to curb ramps or other sloped areas at street crossings and to the accessible routes on sites as specified in ADAAG 4.1.2(1). ADAAG 4.1.2(1) requires accessible sites to be connected to public transportation stops, sidewalks, and accessible building entrances. A provision requiring the separation of the sidewalk from the vehicular way has been added.

The Board is proposing a requirement for a 36 inch continuous passage along a sidewalk. The Board is not specifying an overall sidewalk width. Sidewalk design and construction, where regulated, is typically the province of a State transportation or highway department, most of which follow Department of Transportation and Federal Highway Administration recommendations. A 1988 study for the Federal Highway Administration proposed that central business district sidewalks be sized according to level of service and that other sidewalks be a minimum of 5 feet in width with a 2-foot planting strip or parkway except in low-density residential areas, where 4 feet was recommended.[11] The Board's proposal for a 36 inch continuous passage can be easily accommodated within these recommendations without special or additional construction. The Board's proposal is consistent with sidewalk requirements in several States, such as California, Massachusetts and North Carolina.

This provision is consistent with ADAAG 4.3.3 (Width), which requires a 36 inch clear width for an accessible route, and is derived from the space required for a comfortable gait by persons using walking aids. ADAAG 4.1.2(1) requires an accessible route to connect accessible elements within a site. This section permits use of the sidewalk, or a portion of it, to satisfy the requirements for an accessible route in ADAAG 4.1.2(1) only if the sidewalk meets all the requirements of 4.3 (Accessible Route).

An appendix note explains that where a required accessible route is coincident with that of the sidewalk or continuous passage along it, the sidewalk or passage must comply with ADAAG 4.3. See A14.2.1. The appendix note further explains that these provisions do not preclude sidewalk segments at different levels or sidewalks with stairs (which are sometimes advantageous in providing access to building entrances on or along steeply sloping sites) provided that a continuous passage serves each accessible entrance and is connected to a continuous accessible sidewalk. Where a sidewalk contains steps or where sidewalk levels diverge, a railing, planter or other barrier separating the levels is recommended. Stairs abutting a sidewalk should have uniform riser heights and uniform tread widths. See A14.2.1.

The appendix note also explains that the cross slope requirements pertain only to the portion of the sidewalk that is required to be 36 inches wide. Cross slopes on portions of sidewalks adjacent to the continuous passage required by proposed ADAAG 14.2 may exceed 2 percent, provided that the adjacent portions are smoothly blended. This may facilitate connecting the clear passage to building entrances, facilities or elements. See A14.2.1.

The appendix note also illustrates how narrow sidewalks immediately adjacent to the curb or roadway can be offset to avoid a non-conforming cross slope at driveway aprons by diverting the sidewalk around the apron. See Fig. A9. Sidewalks separated from the curb or roadway by a planted parkway can accommodate an apron within the width of the parkway. See A14.2.1.

Paragraph (1) requires the least possible running slope to be provided. The maximum slope shall be 1:12. It further requires that the cross slope of the minimum 36 inch passage not exceed 1:50. Handrails are not required. This provision is consistent with ADAAG 4.8.2 (Slope and Rise) and ADAAG 4.3.7 (Slope). Cross slopes are difficult for wheelchair users to manage on relatively flat routes of travel. When combined with steep running slopes, a 1:50 (2 percent) limit is important for safe travel. Although ADAAG 4.8 (Ramps) requires handrails where the slope of a ramp exceeds 1:20, this exception for handrails on sidewalks is consistent with ADAAG 4.8.5 (Handrails) which does not require handrails on curb ramps.

Due to a variety of existing conditions, it may not be possible for sidewalk slopes to meet all the requirements of ADAAG 4.3.7 (Slope). Therefore, the Board proposes an exception to paragraph (1) where site infeasibility precludes a maximum running slope of 1:12. Site infeasibility is derived from ADAAG 4.1.6(1)(j) and in this section applies to both new construction and alterations. This exception permits a jurisdiction to use site infeasibility where the public right-of-way may be physically constrained by existing construction or extremes of terrain. The Board recognizes that the gradients of pedestrian and vehicular circulation within the boundaries of a jurisdiction are directly tied to topography and the finish grades already established by existing adjacent building and public way construction. In such instances, this provision would require the least possible running slope to be provided.

Paragraph (2) requires sidewalks less than 60 inches in width to provide passing space at reasonable intervals. Passing space must provide a 60 inch by 60 inch minimum clear space or a T-shaped space and have a cross slope not exceeding 1:50. This provision is consistent with ADAAG 4.3.4 (Passing Space). Passing space will typically occur well within the more generous widths of standard urban sidewalks. Passing spaces along narrower sidewalks can generally be accommodated without special construction at building entrances or sidewalk intersections within the 200-foot limitation given a typical municipal block length.

Question 63: Is the 200 foot distance between passing spaces appropriate in all areas or should the distance be different for urban, suburban, and rural areas? If not, what should the distances be? Should the volume of pedestrian traffic be a determining factor? If so, how would future development and volume increase be accommodated? What would be the cost of the additional width required to permit a 60 by 60 inch passing space along a 36 inch wide sidewalk?

Question 64: California requires level landings at 400 foot intervals along some sidewalks where the slope is extreme. Should the Board include a similar provision in this section? If so, how can it be achieved without

[11] "Planning, Design and Maintenance of Pedestrian Facilities" DOT/FHWA (1988).

increasing the slope of the sidewalk? What increased cost would result?

Question 65: The natural terrain in many developed areas such as parts of San Francisco, Seattle, and Pittsburgh, will preclude, in many instances, construction of sidewalks with a running slope of less than 1:12. The Board is interested in local solutions and accommodations for persons with mobility impairments who need access to buildings and facilities on or along steeply sloping sidewalks. How can passing space, cross slope, and level landing provisions be satisfied in such areas? Commenters are encouraged to submit details and figures demonstrating approaches to pedestrian access under such conditions and to provide cost data where available.

Paragraph (3) requires sidewalk surfaces to be firm, stable, and slip resistant and that differences in level between ¼ and ½ inch be beveled. It further requires that gratings with elongated openings be placed so that the long dimension is perpendicular to the dominant direction of travel. This provision is consistent with ADAAG 4.5.1 (General), ADAAG 4.5.2 (Changes in Level), and ADAAG 4.5.4 (Gratings).

Paragraph (4) requires a separation between pedestrian walkways and vehicular ways. Separations may include but are not limited to curbs, grass or other plantings, or gravel. Components such as curbs, parkways, or other barriers which separate the pedestrian way from the roadway will not be continuous where driveways, or the continuous passage required by ADAAG 14.2.1, cross the separation. This provision is to ensure that edges of the sidewalk are detectable by persons who are blind or who have low vision. These types of separations are usually provided for drainage and safety to separate the pedestrian paths from roadways.

Paragraph (5) requires that where bus passenger loading areas or shelters are provided on or adjacent to sidewalks, they shall comply with ADAAG 10.2.

14.2.2 Historic and Special Use Sidewalks (Reserved)

The Board is considering treating historic sidewalks in a manner similar to ADAAG 4.1.7. A qualified historic sidewalk is one that is listed in, or eligible for listing in, the National Register of Historic Places or designated as historic under an appropriate State or local law. However, special scoping and technical provisions must be developed.

Many historic districts have areas where sidewalks are raised several steps above the roadway or are constructed of materials such as brick, cobblestones, Belgian blocks, or loose pea gravel on a consolidated base, that are difficult to traverse. Many historic neighborhoods have narrow sidewalks where passage is limited by large, mature trees, raised entrance porches or stairs, and other impediments to pedestrian circulation. Older brick and stone pavings have settled or heaved beyond acceptable limits.

Problems may arise if a portion of a historic sidewalk is removed and replaced as a consequence of a public improvement project. In such cases, historic preservation requirements would generally mandate that the new work match existing adjacent construction.

Special use sidewalks may include boardwalks constructed along beaches or areas which are subject to alternating tides or flooding. Such sidewalks have unique problems and characteristics similar to historic sidewalks.

Question 66: How can requirements for historic preservation be reconciled with the provisions of this section for new construction? The Board seeks comment on appropriate scoping and technical provisions for new construction and alterations to historic and special use sidewalks.

Should there be an alternate route provision similar to the exception provided in ADAAG 4.1.7(3)(b)? What means of equivalent facilitation might be appropriate? Is this an issue more properly addressed by program accessibility?

14.2.3 Street Identification and Pedestrian Signage

This provision requires pedestrian informational and directional signage and street identification signs to meet the minimum requirements for character proportion (ADAAG 4.30.2), character height (ADAAG 4.30.3), and finish and contrast (ADAAG 4.30.5).

Although some jurisdictions provide raised and brailled street names and bus stop and route information, the Board has not proposed a requirement for tactile or braille signage at this time because emerging technologies piloted in projects in this country and in Europe suggest that tactile signage may not be the most effective way of providing such information.

Pedestrian information and directional signs, such as markers along the route of an historic trail, the identification of historic elements and buildings on that route, and pedestrian advisory and warning signs can be useful in orientation only if users know where to find them. Signage directing pedestrians around temporary construction or hazards may also need to be provided. The Board is not aware of research which addresses issues of sign size, location, and standardization with respect to pedestrians with vision impairments. Providing some information in raised letters, such as Pittsburgh's "Boulevard of the Allies" street name sign, could be a protruding object if mounted at a 60 inch height due to the length of the street name (see 14.2.4 below). The Board may include a provision for some tactile signage in the final rule and is seeking information.

Question 67: If raised and brailled signage is provided, what pedestrian signs should be covered and how can issues such as sign size, location, and standardization be addressed? What are the costs involved? Is the absence of street name information a significant barrier to persons with visual impairments? Should applications vary according to location, such as urban, suburban, and rural areas?

New developments in audible and radio-transmitted wayfinding information suggest that communications technology may present options preferable to tactile signage such as the transmission of street names. A "smart intersection" pilot project in California is currently testing similar systems for providing information to vehicle drivers. Such technologies may be appropriate for pedestrian use.

Question 68: The Board seeks comment on how to provide orientation information contained in pedestrian signage accessible to persons with vision impairments. An audible system may provide access for persons who cannot read because of other disabilities, such as learning disabilities and mental retardation, but would be inaccessible to those who are both deaf and blind. Are there technologies that could accommodate all users? Should applications vary according to location, such as urban, suburban, and rural areas? Where possible, commenters should include cost information.

14.2.4 Protruding Objects

This section parallels ADAAG 4.4 (Protruding Objects) and applies it to public sidewalks and the areas adjacent to them. The provisions for a continuous passage within the sidewalk are intended to accommodate persons with mobility impairments. However, provisions for protruding objects apply to the entire width of a sidewalk because pedestrians with vision impairments will use all portions of the sidewalk.

Paragraph (1) permits objects projecting from walls to protrude a maximum of 4 inches into any portion

of the sidewalk when their leading edges are between 27 inches and 80 inches above the finished surface. Wall mounted objects that are located below 27 inches or above 80 inches may project any amount into the sidewalk provided they do not reduce the continuous passage required by proposed ADAAG 14.2. Free-standing objects mounted on posts or pylons are permitted to overhang their mountings a maximum of 12 inches within the same neight limits.

Paragraph (2) requires guardrails or other barriers where headroom along a sidewalk is less than 80 inches. The leading edge of such protective barriers must be at or below 27 inches above the finished surface of the sidewalk.

Pedestrians with vision impairments may be forced to adopt a restricted cane sweep technique on crowded sidewalks. Additionally, the speed with which people walk outdoors may cause them to encounter protruding objects before the cane sweep can detect them. Comments received during the initial rulemaking indicated that the 27-inch maximum requirement is insufficient for cane detection under many circumstances and may constitute a particular hazard along sidewalks. Several comments recommended various heights, but none provided any data as a basis for those suggestions. Commenters also suggested that the Board conduct additional research on the issue of protruding objects.

Question 69: Is the maximum 27-inch height for protruding objects sufficient to provide adequate warning to individuals who use canes and those who do not use canes? If adequate warning is not given, what changes should be made to these provisions and what research supports such changes? Should all protrusions between 0 and 80 inches be prohibited? Should post-mounted objects continue to be permitted to overhang their mountings up to 12 inches, instead of the 4-inch limitation applied to wall-mounted objects?

Paragraph (3) provides that fixed objects not covered by paragraph (1) and placed on or along a sidewalk shall not reduce the continuous 36-inch clear passage required by proposed ADAAG 14.2.1. Such objects may include permanently installed trash receptacles, fire hydrants, utility poles, or mail boxes.

14.2.5 Sidewalk Curb Ramps and Other Sloped Areas

This section addresses the technical requirements for curb ramps or other sloped areas. The technical provisions of ADAAG 4.7 (Curb Ramps) have been modified for applications in the public right-of-way because of constraints imposed by existing conditions.

The Department of Justice regulations implementing title II require that: (1) newly constructed or altered streets, roads, and highways must contain curb ramps or other sloped areas at any intersection having curbs or other barriers to entry from a street level pedestrian walkway; and (2) newly constructed or altered street level pedestrian walkways must contain curb ramps or other sloped areas at intersections to streets, roads, or highways. See 28 CFR 35.151(e).

The regulations further provide that program accessibility requirements apply to curb ramps at existing crossings. That is, each public entity is required to ensure the accessibility of the program of providing a pedestrian circulation system by undertaking a self-evaluation (28 CFR 35.105). If structural changes are needed, the public entity must develop its transition plan, identifying locations where curb ramps will be installed at existing street and highway crossings. (28 CFR 35.150(d)(2)). In making alterations to existing sidewalks or facilities, public entities must meet the new construction and alterations requirements of 28 CFR 35.151 (New Construction and Alterations). See 28 CFR 35.150(b)(1).

Paragraph (1) requires a curb ramp or other sloped area to be provided wherever a sidewalk crosses a curb or other barrier (e.g., parkway, berm, or gutter) to a street crossing and requires that it be connected to a continuous passage. This provision is consistent with ADAAG 4.7.1 (Location) and has been modified to incorporate the language in the Department of Justice title II regulations and the concept of continuous passage of this section.

"Other sloped areas" is a term used in Department of Justice title II regulations and is being defined here as an alternative to sidewalk curb ramps where severe slopes and constrained rights-of-way may preclude the installation of conventional curb ramps at pedestrian street crossings. This is further discussed below.

Paragraph (2) requires all curb ramps and other sloped areas to be constructed with the least possible slope. The maximum slope of a curb ramp is 1:12 when measured according to Fig. 59(a). This provision is consistent with ADAAG 4.7.2 (Slope) except that the reference to ADAAG 4.8.2 (Ramp: Slope and Rise) and ADAAG 4.1.6(3)(a) has been eliminated. Two new exceptions addressing severe site constraints have been incorporated in proposed ADAAG 14.2.5(2) and 14.2.5(4). Transitions and slopes of adjoining surfaces have been incorporated into proposed ADAAG 14.2.5(8).

Other sloped areas is applied in this section to one of two exceptions. The first exception under paragraph (2) (Slope) permits a parallel curb ramp. The second exception in paragraph (4) (Landings) allows an alternative method of measuring the slope.

The exception in paragraph (2) (Slope) permits a ramp to be installed parallel to the run of the sidewalk and curb when site unfeasibility precludes construction of a standard curb ramp. This exception will permit access to a street crossing from narrow rights-of-way or steeply sloping sidewalks. Three figures (58 (a) (b) and (c)) illustrate possible applications. The running slope and cross slope provisions are unchanged. This exception requires a level landing area the width of the ramp and minimum of 60 inches in length at the bottom of the ramp to accommodate a 90 degree turn when entering the perpendicular street crossing, in accordance with ADAAG 4.2.3 (Wheelchair Turning Space). The parallel ramp is taken from the "Illustrated Handbook of the Handicapped Section of the North Carolina State Building Code" (1982).

Paragraph (3) requires a 36 inch minimum width for sidewalk curb ramps and other sloped areas connecting to street crossings. This provision is consistent with the continuous passage width of proposed ADAAG 14.2 and ADAAG 4.7.3 (Width) for accessible routes.

Paragraph (4) proposes a requirement for level landings at curb ramps and other sloped areas at street crossings to provide safe stopping places along these sloping routes. Curb ramps and other sloped areas running in the primary direction of travel must have a level landing at the top that is the width of the ramp or other sloped area and a minimum of 48 inches in length.

Where severe slopes occur in the direction of pedestrian and vehicular travel, perpendicular cross-streets, alleys, and sidewalks typically afford level landing space. Building entrances may provide level landings. Relatively level platforms are normally provided at cross streets to keep water from entering buildings on the lower side of the street. However, level areas will not generally be available at mid-block crossings.

Exception 1 to paragraph (4) allows a landing to be a minimum of 36 inches in length where site infeasibility precludes a 48 inch landing. (See Fig. 60). Where site infeasibility also precludes exception 1, an alternative is provided in exception 2. Exception 2

proposes an alternative method of measuring the slope of a curb ramp or other sloped area (see Fig. 59(b)) where site infeasibility precludes a level landing at the top in accordance with proposed ADAAG 14.2.5(4) or exception 1, or a parallel ramp permitted by proposed ADAAG 14.2.5(2) cannot be provided. The alternative method of measuring slope applies to the side flares and cross slope as well as to the running slope. This is especially relevant to mid-block crossings.

Where there is no level area at an intersection, and the adjoining roadway slope equals or exceeds 1:12 (as permitted by the exception in proposed ADAAG 14.2(1)), it is impossible to provide a curb ramp with a maximum slope of 1:12, Where site infeasibility precludes a curb ramp with a narrow landing at the top or a parallel ramp, the Board is proposing an alternative method of measuring slope relative to the slope of the adjoining roadway. An alternative method is proposed because the traditional method of measuring the slope as shown in Fig. 59(a) cannot be used where the area around the curb ramp is not level. Cross slope and other provisions are unchanged. The Board intends the alternative measuring method to be used only in those limited instances where other provisions and exceptions cannot accommodate site constraints. The Board notes that this alternative method may result in steep slopes but believes it is necessary to provide access. Neither the ADA nor the regulations exempt steeply sloped areas from a requirement to provide curb ramps or other sloped areas at street crossings. Such slopes may not be negotiable by persons using manual wheelchairs but could be negotiated by persons using motorized wheelchairs, scooters and similar conveyances.

Question 70: Is the exemption proposed an acceptable solution to providing curb ramps in such steeply sloped areas? If not, is there a better way to ensure accessibility such as a different ramp configuration? Are there situations in which this exception should not be permitted?

Some cities have provided an alternate path as part of a "priority accessible network" to allow persons with disabilities to bypass a steep hill or other barrier.

Question 71: Does the designation of an alternate path provide equivalent facilitation? Are there other methods which have been found useful in providing access to facilities on steeply sloping sidewalks? Where possible, commenters should include cost information.

Paragraph (5) requires flared sides on curb ramps and other sloped areas where pedestrians must walk across the ramp, or where curb ramps are not protected by returned curbs. This provision applies ADAAG 4.7.5 (Sides of Curb Ramps) to curb ramps or other sloped areas in the public right-of-way. This provision is consistent with proposed ADAAG 14.2.5(4) which requires a landing at the top of the curb ramp and clarifies that the flared sides shall be 1:12 maximum where the landing length at the top of the curb ramp is at least 36 inches but less than 48 inches. See Figure 12(b).

Paragraph (6) requires curb ramps or other sloped area surfaces to be firm, stable and slip resistant. This provision is consistent with ADAAG 4.5.1 (General).

Paragraph (7) (Detectable Warnings) has been reserved. The Board plans to conduct additional research on detectable warnings and will be issuing a separate notice of proposed rulemaking to suspend certain ADAAG provisions for detectable warnings until January 26, 1995. The Board will consider public comments on that notice, as well as the results of the additional research, before proposing specific requirements for detectable warnings at curb ramps along a circulation route in the public right-of-way.

Paragraph (8) requires counter slopes of adjoining gutters and road surfaces connecting to the curb ramp or sloped area to be 1:20 maximum. This provision applies the requirements of ADAAG 4.7.2 (Slope) for counter slope to the roadway surfaces adjoining curb ramps or other sloped areas. Curb ramps and other sloped areas may not have lips where they meet the gutter or roadway. Transition and gratings provisions found in ADAAG 4.5 (Ground and Floor Surfaces) and 4.7 (Curb Ramps) are also incorporated to cover gratings which may be located in the roadway and otherwise would not be covered by proposed ADAAG 14.2.1(3).

Paragraph (9) requires curb ramps or other sloped areas at marked crossings to be wholly contained within the markings, excluding flared sides. This provision is consistent with ADAAG 4.7.9 (Location at Marked Crossings).

Paragraph (10) requires curb ramps or other sloped areas to be protected and located to prevent their obstruction by parked vehicles. This is consistent with ADAAG 4.7.8 (Obstructions).

Paragraph (11) requires built-up curb ramps or other raised sloped areas to be located so that they do not project into vehicular traffic lanes or into parking spaces or access aisles. This is consistent with ADAAG 4.7.6 (Built-up Curb Ramps) and ADAAG 4.6.3 (Parking Spaces).

Paragraph (12) contains provisions for diagonal curb ramps or other sloped areas and is identical to ADAAG 4.7.10 (Diagonal Curb Ramps).

Paragraph (13) contains provisions for islands and is identical to ADAAG 4.7.11 (Islands).

14.2.6 Crossing Controls

This section requires crossing controls to have a minimum size control button close to the curb ramp, mounted at a 48 inch height adjacent to a firm, stable, slip resistant surface 30 inches by 48 inches.

Pedestrian-actuated crossing controls are typically provided at intersections based upon traffic conditions and location characteristics that establish the minimum requirements necessary for such an installation. They are generally mounted on the traffic signal pole of the dominant traffic direction. When activated, they interrupt the standard signal cycle in order to provide an interval for pedestrian crossing. In some areas, signals have no regular crossing interval unless activated by pedestrians.

Paragraph (1) requires the button control to be raised or flush and ¾ inches in the smallest dimension. This requirement is consistent with ADAAG 4.10.3 (Hall Call Buttons) which requires hall call buttons in elevators to be a minimum of ¾ inches in the smallest dimension. It further requires that the force required to activate the controls may not exceed 5 lbf. This provision is consistent with ADAAG 4.1.3(13) which requires controls and operating mechanisms in accessible spaces, along accessible routes, or as parts of accessible elements to comply with ADAAG 4.27 (Controls and Operating Mechanisms). Some crossing control buttons are very small or require extreme pressure to depress, making them difficult to operate for persons with limited hand dexterity. Other devices have large buttons which may be easier to use. The Board's proposal requires a control button to be a minimum of ¾ inches.

Question 72: Should pedestrian crossing control buttons be required to be larger than ¾ inches? If so, what size should they be? Should the Board require the controls for pedestrian crossings to be two inch square raised buttons that permit activation from any angle? Are such controls available for pedestrian crossings? Are there cost differences between larger and smaller buttons? Are there any problems with

vandalism or maintenance associated with larger control buttons?

Paragraph (2) requires the crossing controls to be located as close as possible to a curb ramp and, to the maximum extent feasible, operable from a level area adjacent to the controls rather than from the sloped surface of the curb ramp itself. This requirement is to ensure that people with disabilities do not have to travel out of their way to activate the signal before crossing the street, and allows a maximum crossing time for those who may travel more slowly.

The technical provisions referenced in paragraphs (3) (Mounting Height) and (4) (Surface) depart slightly from ADAAG 4.2.5 (Forward Reach) and ADAAG 4.2.6 (Side Reach), which allow a maximum reach range of either 48 inches or 54 inches depending on the approach to the object. Paragraph (4) requires a firm, stable and slip resistant surface a minimum of 30 inches by 48 inches to be provided to allow for a forward or parallel approach to the controls. However, paragraph (3) limits the controls to a maximum height of 48 inches. The Manual on Uniform Traffic Control Devices recommends a mounting height between 42 and 48 inches. In proposing a maximum reach range of 48 inches, the Board took into consideration that in inclement weather and colder temperatures people will be wearing coats and jackets which may limit their reach ranges.

Question 73: Is a 48 inch mounting height appropriate for persons who use wheelchairs or would a lower height be more useful? Would a lower height be difficult for a person who uses crutches or a person with short stature?

Audible signal, vibro-tactile controls, and radio frequency transmissions to make "WALK/DON'T WALK" indicators accessible to pedestrians with vision impairments are being tested in some communities. Other detectable technologies and applications may be under development. Comments during the initial rulemaking suggested that the Board should require auditory or vibro-tactile crossing signals. The Board is considering a provision for audible or vibro-tactile crossing signals and is seeking additional information.

Question 74: The Board is interested in appropriate scoping and technical requirements for auditory or vibro-tactile crossing signals and the experience of jurisdictions that have used such signals. Should there be differences between requirements for noisy urban streets and quiet residential neighborhoods? Should applications vary according to location, such as in urban, suburban, and rural areas or by levels of pedestrian use? What technology is currently available or under development for such applications? What are the advantages, disadvantages, costs and user preferences of each system?

14.2.7 Marked Crossings

This section requires marked crossings to be delineated with contrasting markings or materials (e.g., paint, brick, tile). An appendix note recommends marked crossings at State and local government buildings and facilities, transportation facilities, places of public accommodation, at irregular intersections, and at mid block crossings.

Locating marked crossings in these areas is also recommended in the Manual on Uniform Traffic Control Devices (MUTCD) published by the Federal Highway Administration (FHWA) and "A Policy on the Geometric Design of Highways and Streets" (1990) published by the American Association of State Highway and Transportation Officials (AASHTO).

Where provided, markings legally establish a crosswalk and therefore function as traffic control devices. They may be needed where high traffic volume makes crossings difficult. They clearly facilitate pedestrian crossing on vehicular ways. Since persons with certain disabilities may take longer to cross traffic lanes, marked crossings may be a critical portion of an accessible circulation path. They are of particular benefit to persons with low vision and may assist them in crossing an intersection. This is especially important where there are irregular crossings such as Y-shaped intersections or mid block crossings.

The greatest number of pedestrian accidents involve children, but the most severe pedestrian accidents involve elderly persons and persons with disabilities. Marked crossings are the single most recommended provision in research conducted on the needs of pedestrians who are elderly or who have disabilities. Elderly persons are involved in a large number of pedestrian accidents. As population, they do more walking than other age groups, both because of less access to vehicles and greater leisure time. Several researchers have found that poor eyesight is the cause of many accidents involving elderly pedestrians; poor hearing is a significant but lesser factor.[12]

The MUTCD observes that:

> Crosswalk markings at signalized intersections and across intersectional approaches on which traffic stops, serve primarily to guide pedestrians in the proper paths. Crosswalk markings across roadways on which traffic is not controlled by traffic signals or STOP signs must also serve to warn the motorist of a pedestrian crossing point * * *. Marked crosswalks should also be provided at other appropriate points of concentration, such as at loading islands, midblock pedestrian crossings, or where pedestrians could not otherwise recognize the proper place to cross. (MUTCD 3B–18).

Further, AASHTO's "A Policy on Geometric Design of Highways and Streets" (1990) indicates that the major pedestrian-vehicular conflict usually occurs at intersections and indicates that crosswalks are usually necessary at every intersecting street in business districts. (page 545).

MUTCD recommends that street crossings be marked:

> * * * at all intersections where there is substantial conflict between vehicle and pedestrian movements * * * [and] * * * at other appropriate points of pedestrian concentration, such as at loading islands, midblock pedestrian crossings, or where pedestrians would not otherwise recognize the proper place to cross. (MUTCD, 3B–23).

A similar recommendation covers established routes to school. (MUTCD, 7C–3). Local jurisdictions may have standard criteria for high pedestrian use areas, including requirements based on pedestrian and traffic flow, special districts, or central business districts.

In some jurisdictions, citizens may request that a marked crossing be installed to facilitate pedestrian crossing. Such a program may be a part of the overall program accessibility requirements of Department of Justice regulations implementing title II. (28 CFR 35.151(d)).

Question 75: Should the Board recommend locating marked crossings in areas other than those listed in the appendix, such as at traffic signals? Are there areas where marked crossings should be required? Commenters should provide cost and safety data where possible.

14.2.8 Pedestrian Overpasses and Underpasses

This section requires grade separated pedestrian overpasses and underpasses to be accessible by means of a ramp, elevator, or where permitted by ADAAG 4.1.3(5), a platform lift (wheelchair lift) and to connect to a sidewalk or other pedestrian circulation path.

Overpasses and underpasses built with funds from FHWA have generally been designed with ramps. However, many facilities have not been built with FHWA funds and some of those have

[12] Templer, "Accidents: Causes and Countermeasures" Pedestrian Research Laboratory, Georgia Institute of Technology (1975).

been constructed with a circular ramp. Circular ramps do not meet ADAAG 4.8 and are a particular problem for persons using wheelchairs because they have non-uniform cross slopes which does not permit all wheels to be on the ground at the same time. Also, the lack of level landings does not provide any rest area for persons with limited stamina.

Question 76: Are there constraints specific to overpasses and underpasses that could affect accessibility and which are not accommodated by the general provision for site infeasibility? Should there be a specific exception for certain conditions peculiar to overpasses and underpasses?

ADAAG 4.1.3(4) requires stairs to comply with ADAAG 4.9 only where no ramp or elevator is provided. Some ramped crossings may provide both stairs and ramps. Persons with mobility impairments may find lengthy ramps more difficult than stairs complying with ADAAG 4.9 (Stairs).

Question 77: Where stairs are provided in addition to a ramp at an overpass or underpass, should the guidelines require such stairs to comply with ADAAG 4.9 (Stairs)? What is the cost differential between stairs complying with ADAAG 4.9 and those which comply with local applicable building codes?

14.3 Drinking Fountains, Telephones, Toilet Facilities, Fixed Seating, Tables and Benches

14.3.1 Minimum Requirements

This section contains scoping provisions for drinking fountains, telephones, toilet facilities, fixed seating, tables and benches where provided on or adjacent to a sidewalk as part of a public improvement project. These elements must be reasonably dispersed within the project area, taking into consideration the proximity and number of existing accessible elements. An appendix note clarifies the dispersal requirement. See A14.3.

Paragraph (1) requires at least 50 percent, but not less than one, of drinking fountains to comply with ADAAG 4.15 (Drinking Fountains and Water Coolers). Where only one drinking fountain is provided it must be accessible to individuals who use wheelchairs in accordance with ADAAG 4.15 (Drinking Fountains and Water Coolers) and to those who have difficulty bending or stooping. This scoping provision is consistent with ADAAG 4.1.3(10) (Drinking Fountains).

Paragraph (2) requires at least 50 percent, but not less than one, of single unit public pay telephones to comply with ADAAG 4.31.2 through 4.31.8 (Telephones). Where banks of telephones are provided, this provision requires at least one accessible telephone per bank to be provided. In addition, 25 percent, but never less than one, of all other public telephones provided shall be equipped with a volume control. Signage complying with applicable provisions of ADAAG 4.30.7 (Symbols of Accessibility) is also required. This scoping provision is consistent with ADAAG 4.1.3(17)(a) and (b).

Paragraph (3) requires at least 50 percent, but not less than one, of fixed single user toilet facilities provided on a public right-of-way as part of a public improvement project to comply with ADAAG 4.22 (Toilet Rooms). This is a departure from ADAAG 4.1.2(6) which requires all public and common use toilet facilities to comply with ADAAG 4.22. Proposed ADAAG 14.3(3) is intended to cover individual fixed single-user toilet units connected to sanitary sewer lines and not portable units covered by 4.1.2(6). Signage complying with ADAAG 4.30.7 is required to be provided on the accessible units consistent with ADAAG 4.1.2(7). Signage on inaccessible units must indicate the location of the nearest accessible unit.

In some European cities, publicly-provided toilet facilities include permanent installations of prefabricated single-user units dispersed throughout a central business district on street corners. Both kiosk-sized inaccessible and larger accessible units are manufactured. Several U.S. cities are considering similar installations and at least one has initiated a pilot program to test the facilities in use, providing paired installations of inaccessible and accessible units. However, concerns have been raised that the larger accessible toilets could be used for shelter or for illicit activities. The Board is aware of one pilot project that was discontinued because the installation of a universal design accessible unit was reported to have resulted in a high rate of vandalism and abuse, particularly by drug dealers.

Question 78: Given such public safety concerns, is the proposed requirement to 50% accessible fixed single-user toilet units appropriate to meet the needs of persons with disabilities? Are there design solutions that would allow for a safe and universally accessible public toilet that could be used by everyone? Are there operational approaches, such as limiting the hours of use, that would allow all units to be accessible without raising concerns about vandalism and illicit activities?

Question 79: What are the manufacturing, installation, and maintenance cost differentials of providing and servicing a single standard type of unit versus two types of units?

Card, token, or key access to accessible units have been proposed as a way of avoiding vandalism and other abuses of the larger accessible units. In a pilot project that provided both accessible and non-accessible units, non-accessible units could be entered using coins or tokens, while accessible units required the use of an access card by persons with disabilities. This required special control and distribution procedures that may be viewed as discriminatory. Further, the Board is concerned that restricted access procedures may be subject to abuse and misuse, resulting in the same levels of vandalism and illicit activity as would uncontrolled or coin-operated access to accessible units. If this is so, then limiting access may prove ineffective as a preventive measure.

Question 80: How effective have limited access procedures been in similar situations? If restricting access by requiring card, token, or key operation is necessary, in what ways could equivalent facilitation be provided? Should the state or local government having jurisdiction be required to provide cards at all hours the units are operable and within a specified distance from the units?

Paragraph (4) requires at least five percent, but not less than one, of fixed seating and tables to comply with ADAAG 4.32 (Fixed or Built-in Seating and Tables) and five percent, but not less than one, of fixed benches to comply with 4.35.4. This provision is consistent with ADAAG 4.1.3(18).

Question 81: Should fixed benches, or some percentage thereof, be required to have armrests? Should some benches be required to have backrests? What technical situations would be appropriate for back height, seat slope, and arm rests? Are the specifications in ADAAG 4.35.4 adequate? Where possible, commenters should provide cost data.

14.4 Vehicular Ways and Facilities

14.4.1 On-Street Parking

Proposed ADAAG 14.4.1 contains provisions for new on-street parking resulting from construction that is part of a public improvement project in areas zoned for business uses, including mixed-use zoning that contains business occupancies. This provision covers parking spaces that are metered, time-limited, or similarly regulated by a

jurisdiction and that are designated by signage. It does not apply to areas in which on-street parking is simply permitted, such as residential neighborhoods and developments.

On-street parking is often more convenient to facilities than off-street parking lots. In small towns and business districts, such parking may be the only public parking that a State or local government provides. Therefore, the Board is proposing a provision that requires a percentage of on-street parking to be accessible where on-street parking is provided.

Proposed ADAAG 14.4.1 requires on-street parking to be provided according to the table in ADAAG 4.1.2(5)(a). The provision requires a minimum 60 inch access aisle to be provided clear of the driving lane. This provision references figures from Texas [13] and the Department of Transportation.[14] The access codes of New Jersey and North Carolina contain similar technical specifications, as does the Board-sponsored UFAS Retrofit Manual (1991). Accessible parallel parking spaces are designed and constructed much like passenger loading zones referenced in ADAAG 4.6.6. The Board is not requiring designated van accessible spaces because side lift vans can exit onto the sidewalk from a standard parking space, provided that access to the sidewalk is not obstructed by fixed or movable objects. Vans with rear lifts should be able to use the spaces shown in Figures 61 (a) and (b), provided that the space is at least 26 feet long.

Question 82: What is an appropriate basis for determining the numbers of accessible parking spaces required within the inventory of designated on-street spaces provided by a public entity? The Board is seeking information on the requirements in other States and intends to provide a scoping provision in the final rule. Should the requirements be different for a central business district, a mixed-use area, or near medical and other special facilities? Should the requirement apply only where the sidewalk is a minimum width or where there is a parkway or a space not intended for pedestrian circulation, such as segments normally occupied by trees, benches or other amenities where the accessible aisle could be most easily accommodated? Should the requirement be different for alterations, such as where a street is widened or pedestrian amenities, such as planters, trees, or benches, as well as parking, are provided as part of a downtown improvement project? What technical and scoping requirements have been developed for accessible or van accessible parallel, angled, or perpendicular on-street parking spaces based upon the total number of spaces provided by a jurisdiction in parking districts or at special uses and facilities? What cost data are available on the provision of accessible on-street parking spaces?

Paragraph (1) requires a curb ramp or other sloped area to be provided to connect the access aisle to the sidewalk and references proposed ADAAG 14.2.5. This provision is consistent with ADAAG 4.6.3 (Parking Spaces).

Paragraph (2) requires accessible parking spaces to be dispersed throughout the project area. An appendix note clarifies that accessible on-street parking spaces provided immediately adjacent to intersections may be served by sidewalk curb ramps, provided that the required access aisle connects to the pedestrian crossing. It also recommends that accessible on-street parking spaces be located in relatively level areas. It should be noted that program accessibility requirements may not be satisfied if a majority of accessible parking spaces are located along steeply-sloping roadways.

Question 83: Where a city expands its incorporated limits or provides new on-street parking spaces in outlying areas, the new accessible spaces may be the furthest from business districts. Should there be a provision permitting or requiring the State or local government to provide additional spaces in an existing municipal parking lot if it provides greater accessibility to business districts than does the remote on-street parking? Commenters are encouraged to provide cost data when possible.

Paragraph (3) requires accessible parking spaces to be designated as reserved by a sign showing the symbol of accessibility. It further requires that the sign be located to be visible from a driver's seat. This provision is consistent with ADAAG 4.6.4 (Parking Spaces).

Paragraph (4) requires parking meter controls, including the coin slot, to be located a maximum 48 inches above the sidewalk and that the controls be easy to operate. A firm, stable slip resistance surface must be provided at the controls and connect to a sidewalk. This provision is consistent with ADAAG 4.27.4 (Operation) and ADAAG 4.2.5 (Forward Reach). As discussed under proposed ADAAG 14.2.6 (Crossing Controls), the proposed reach range of 48 inches anticipates that people will be wearing coats and jackets in inclement and cold weather which may limit their reach ranges.

Question 84: Is a 48 inch control height appropriate for persons who use wheelchairs or would a lower height be more useful? Would a lower height be difficult for a person who uses crutches? Is there an additional cost associated with a lower control height?

Question 85: Currently, 24 States permit no-charge parking at meters for vehicles displaying an authorized parking plate or placard for a person with a disability. In these jurisdictions, parking meters may not need to be accessible unless reciprocity with other jurisdictions is not guaranteed. The Department of Transportation encourages States to extend reciprocal recognition. See 23 CFR 1235.8. Should parking meters be required to be accessible in those jurisdictions that both: (a) exempt vehicles displaying the appropriate plate or placard from parking fees and (b) recognize plates or placards from other jurisdictions?

14.4.2 Roadside Emergency Communications Systems

Roadside call boxes are essential for emergency situations, such as engine failure or accidents, in which it is especially important for all people to get immediate assistance. In particular, some persons with disabilities have extreme sensitivity to cold and cannot wait for assistance in an unheated automobile. The Board is aware of concerns raised about the safety of persons with disabilities getting out of their cars or vans on the highway where uneven terrain and high speed traffic may be a problem, but considers the need for accessible roadside emergency communication to be equally important. People in emergency situations need to have the choice to remain in the vehicle or call for help.

Paragraph (1) requires controls and operating mechanisms to be operable by one hand and not require tight grasping, twisting or pinching of the wrist. It further requires that the force to operate the controls not exceed 5 lbf (22.2N). This provision is consistent with ADAAG 4.1.3(13) which requires controls and operating mechanisms in accessible spaces, along accessible routes, or as parts of accessible elements to comply with ADAAG 4.27 (Controls and Operating Mechanisms). This paragraph further requires the maximum mounting height of such controls to be 54 inches. This provision is consistent with ADAAG 4.2.6 (Side Reach).

---

[13] Texas Admin. Code title 16 section 68.112(i)1.5.

[14] "Provisions for Elderly and Handicapped Pedestrians" DOT/FHWA (1980).

In August 1985, the Delaware Architectural Accessibility Board conducted a study in response to complaints by the disability community that the call boxes were mounted too high and blocked by curbs, guard rails and poles. Subject testing and subsequent pole crash testing resulted in a recommendation that controls be mounted at a maximum height of 54 inches, adjacent to a concrete pad. The call boxes tested had a pull requirement of 12 lbs. On this issue, the study noted that it was not possible, "* * * to evaluate the mechanical arrangement to determine whether gearing changes or other modifications could reduce the necessary pull force * * *" and that further study was required. See "Report on the Accessibility and Usability of the Sig Com Motorist Aid Communication System" Delaware Architectural Accessibility Board at 6 (1985).

Additionally, the specific device tested required pulling a handle through a specified range to activate the transmission of a signal. The study suggested that lowering the box below 54 inches could interfere with this operation. Also, the study raised issues regarding snow removal and build-up covering the call boxes.

Question 86: The Board seeks information on whether the 5 lbf requirement can be met. Are there existing devices or systems that currently comply?

Question 87: The Board is considering a requirement for a mounting height of 48 inches and is seeking information on whether it can be achieved.

Paragraph (2) requires the system to provide both visual and auditory acknowledgement of call receipt and not require voice communication. This provision is consistent with ADAAG 4.10.14 (Emergency Communications). The system studied by Delaware did not require voice communication and provided an auditory call confirmation (beep) feature. The study recommended that future models incorporate a visual indicator as well.

Paragraph (3) requires that a firm, stable, slip resistant surface that is a minimum of 30 inches by 48 inches be provided immediately adjacent to the call box. Typically this will consist of a concrete pad with a level surface. ADAAG 4.2.6 (Side Reach) specifies a maximum depth of 10 inches for a side reach height at 54 inches. The Delaware study noted that such pads were frequently placed a significant distance from the pole on which the call box was mounted and recommended that the pads be placed a maximum distance of 21 inches from the mounting, which is consistent with the 48 inch maximum height requirement in ADAAG 4.25.3 (Height).

This provision requires the level area to be connected to the roadway shoulder, sidewalk or pedestrian path, but does not require that paved shoulders or sidewalks be provided. However, it does require that a person using a wheelchair be able to reach the level area from the roadway shoulder. This would prohibit the level area from being separated from the roadway by a ditch, gutter, curb, or other barrier.

Question 88: Some jurisdictions have considered providing persons with disabilities cellular phones in lieu of providing accessible call boxes. How can such a distribution be accomplished especially for non-residents? How can communication be provided in areas (country or rural areas) where there is no cellular phone capability and limited, if any, call boxes provided? Should such a system be permitted as an alternative to making roadside emergency communication systems accessible? What are the costs associated with such systems?

14.5 Alterations

This section requires elements that are altered in the scope of a public improvement project, to be altered to comply with the applicable provisions of ADAAG 4.1.6 Accessible Buildings: Alterations and proposed ADAAG 14.

An alteration, as defined in ADAAG 3.5, means any change to a building or facility that affects or could affect the usability of the building or facility or any part thereof.

Alteration sections of the guidelines typically follow new construction provisions and include provisions that are somewhat less stringent. An alteration section would also typically include exceptions for technical infeasibility to allow for existing constraints that might preclude strict compliance with the provisions for new construction. However, construction in the public right-of-way has characteristics that are not usually found in the construction of buildings and facilities on well-defined sites. As explained in the preamble to proposed ADAAG 14.1, new construction in the public right-of-way has many of the characteristics of an alteration because it must fit within the confines of roadways and buildings and must connect to an existing pedestrian circulation network. For this reason, an allowance for site infeasibility has been included in the provisions for new construction in this section. Therefore, the allowances for site constraints are not confined only to alterations and the alteration section here simply references the guidelines for new construction.

When a pedestrian route is modified, each element that is a part of the modification must be brought into compliance with the applicable sections of these requirements. Additionally, the Board encourages jurisdictions to consider each project as an opportunity to further the accessibility of its pedestrian network and should not unnecessarily restrict the scope of work so as to avoid the requirements for new accessible elements or construction. For example, utility work that removes part of a sidewalk adjacent to an intersection might not involve breaking through the curb face. Therefore, no curb ramp would be installed. In such a case, however, there is an opportunity to install a curb ramp with very little additional cost. The replacement of a length of sidewalk, removed to permit the installation of new curbs and gutters, presents an opportunity to bring at least a continuous passage into compliance with new construction standards.

Furthermore, ADAAG 4.1.6(1)(a) requires that alterations not decrease accessibility. For example, the installation of decorative lighting, lanterns, or other elements such as street furniture, landscaping, hydrants, transformers, signals, or kiosks located within a sidewalk or right-of-way shall not restrict a required width of passage.

Replacing a section of sidewalk damaged by the encroachment of tree roots will fall into the category of repair and maintenance and the replaced section must meet adjacent existing surfaces at its edges. However, the replacement of a block-long sidewalk segment removed for the installation of below-grade piping should be treated as new construction if it affords the opportunity to remedy the slope, cross slope, surface or other deficiency in accessibility.

The Board recommends that jurisdictions review their standard contract language and specifications to ensure that such considerations supersede the requirement to "restore to existing conditions" where the work is performed by outside contractors.

14.6 Temporary Work

This section applies ADAAG 4.1.1(4) (Temporary Structures) to temporary work in the public right-of-way, whether it be new construction, alterations, or maintenance and repair. It requires (1) barriers to protect pedestrians from hazards along the circulation path and (2) appropriate identification of an alternate accessible

circulation path around any obstructions.

Temporary work may be a particular hazard to pedestrians with vision impairments who may have memorized the circulation routes and are not provided with accessible directions to the proper path. Jurisdictions and their contractors should ensure that barriers meet the specific needs of pedestrians as detailed in proposed ADAAG 14.2.4 Protruding Objects.

Further, the removal, even for only a short time, of a curb ramp or other accessible element may preclude access to buildings, facilities, or areas by a person using a wheelchair or require a lengthy, circuitous route to bypass such barriers in order to reach regular destinations. The alternate route should be equally convenient and accessible for all sidewalk users and should be clearly marked to avoid extra travel distance.

Regulatory Process Matters

Preliminary Regulatory Impact Analysis

These guidelines are issued to provide guidance to the Department of Justice in establishing accessibility standards for new construction and alterations of State and local government facilities covered by title II of the ADA. The standards established by the Department of Justice must be consistent with these guidelines. These guidelines meet the criteria for a major rule under Executive Order 12291 and this Notice of Proposed Rulemaking has been reviewed by the Office of Management and Budget pursuant to that order.

The Board has prepared a Preliminary Regulatory Impact Analysis (PRIA) which has been placed in the docket and is available for public inspection at the Board's office. The PRIA includes a cost impact analysis for certain accessibility elements and a discussion of the regulatory alternatives considered. The Board encourages comment on the PRIA as well as the submission of any data that would assist the Board in estimating the costs and benefits of the proposed rule.

Accessibility does not generally add features to a building or a facility but rather simply requires that features commonly provided have certain characteristics. Some of the characteristics may add marginally to the cost of an element; however, the costs for installation are not usually increased. In addition, accessibility generally adds little or no space to buildings and facilities. Several studies discussed in the Regulatory Impact Analysis prepared for the initial rulemaking have shown that designing buildings and facilities to be accessible, from the conceptual phase onward, adds less than one percent to the total construction costs.

For purposes of the PRIA, the Board analyzed those provisions that pertain only to buildings and facilities constructed or operated by State and local governments which are covered by title II of ADA. Included in the analysis were: Jury boxes and witness stands, adaptability to fixed judges' benches, clerks' stations, speakers' rostrums and raised daises, drinking fountains, security systems, two-way communication systems, electrical outlets, wiring and conduit for communication systems, grab bars in bathrooms, visual alarms and notification devices, platform lifts and elevators, passing space on sidewalks, crossing controls, and on-street parking. The PRIA also discusses the indirect costs of the accessibility elements such as maintenance, operation and opportunity costs.

Preliminary Regulatory Flexibility Act Analysis

Under the Regulatory Flexibility Act, the publication of a proposed rule requires the preparation of a preliminary regulatory flexibility analysis if such rule could have a significant economic impact on a substantial number of small entities. These guidelines will have such an impact. Section 605(A) of the Regulatory Flexibility Act permits an agency to satisfy the flexibility analysis requirement by addressing the impacts of the rule on small entities in the agency's PRIA. The Board has chosen to exercise that option and will thus address the impact of the guidelines on small entities as part of the PRIA.

The Board would also like to point out that the economic impacts imposed upon the small entities subject to the guidelines are the necessary result of the ADA statute itself. Every effort has been made by the Board to lessen the economic impact of this rule on small entities, but little discretion was reserved to the Board in this area.

Federalism Statement

These guidelines will have some Federalism impacts. The Board would point out that the impacts imposed upon State and local government entities are the necessary result of the ADA statute itself. Every effort has been made by the Board to lessen the impact of these guidelines on State and local government entities, but little discretion was reserved to the Board in this area. The PRIA discusses the impacts of these guidelines on public entities. This discussion serves the purposes of a Federalism Statement under Executive Order 12612 for purposes of this rule.

List of Subjects in 36 CFR Part 1191

Buildings and facilities, Civil rights, Individuals with disabilities.

Authorized by vote of the Board on July 15, 1992.

Kathleen Parker,

Chairman, Architectural and Transportation Barriers Compliance Board.

For the reasons set forth in the preamble, it is proposed to amend part 1191 of title 36 of the Code of Federal Regulations as follows:

PART 1191—AMERICANS WITH DISABILITIES ACT (ADA) ACCESSIBILITY GUIDELINES FOR BUILDINGS AND FACILITIES

1. The authority citation for 36 CFR part 1191 continues to read as follows:

Authority: Americans with Disabilities Act of 1990, Pub. L. 101–336, 104 Stat. 370 (42 U.S.C. 12204).

Appendix to Part 1191—Americans with Disabilities Act (ADA) Accessibility Guidelines for Buildings and Facilities

2. The Appendix to part 1191 is amended as follows:

a. In section 1. Purpose, the second paragraph is amended by removing the words "sections 5 through 10" and adding in their place "the special application sections" and by adding "-1980" after "ANSI A117.1" in the last sentence.

b. In section 1. Purpose, the third paragraph is amended by adding "-1980" after "ANSI A117.1" in the first sentence.

c. In section 3.5 Definitions, the definition for "Alteration" is amended by adding the words "place of" immediately following "for the use of a" in the first sentence; by adding a comma after the word "accommodation" in the first sentence; by removing the word "or" which follows the word "accommodation" in the first sentence; and by adding "or a State or local government entity" in the first sentence to follow "commercial facility,".

d. Section 3.5 Definitions, by adding a definition for "Continuous Passage" in alphabetical order.

e. Section 3.5 Definitions, by revising a definition for "Dwelling Unit".

f. Section 3.5 Definitions, by adding a definition for "Public Improvement Project" in alphabetical order.

g. Section 3.5 Definitions, by adding a definition for "Sidewalk" in alphabetical order.

h. Section 3.5 Definitions, by adding a definition for "Site Infeasibility" in alphabetical order.

i. In section 3.5 Definitions, the definition for "Transient Lodging" is amended by adding the words "and residential facilities" immediately following the words "medical care facilities" in the first sentence; by removing the words "one or more dwelling units or" in the first sentence; and by adding the words "and other facilities used on a transient basis" in the last sentence immediately following the words "and dormitories".

j. In section 4.1.1 Application, paragraph (1) General is amended by removing the words "required to be accessible by 4.1.2 and 4.1.3," in the first sentence; by removing the words "required to be accessible by 4.1.6" in the first sentence; and by removing the words "these guidelines," in the first sentence.

k. In section 4.1.1 Application, paragraph (2) Application Based on Building Use is amended by removing the words "5 through 10" in the first sentence; by removing the words "for restaurants and cafeterias, medical care facilities, business and mercantile, libraries, accessible transient lodging, and transportation facilities" and adding in their place the words "based on building use".

l. In section 4.1.3 Accessible Buildings: New Construction, Exception 1 in paragraph (5) is amended by adding the words "places of public accommodation and commercial" in the first sentence immediately following the words "Elevators are not required in".

m. Section 4.1.3(17) Public Telephones, paragraph (c), by adding new paragraphs (c)(iv) and (c)(v).

n. Section 4.1.3(17) Public Telephones, by adding an exception to paragraph (d).

o. In section 4.1.6 Accessible Buildings: Alterations, paragraph (k)(i) is amended by adding the words "place of public accommodation or commercial" in the first sentence immediately following the words "an elevator in an altered".

p. In section 4.1.7 Accessible Buildings: Historic Preservation, paragraph (1)(a) is amended by removing the words "5 through 10" in the first sentence and by revising the exception in paragraph (1)(a).

q. Section 7.2 Sales and Service Counters, Teller Windows, Information Counters, by redesignating paragraph (3) as paragraph (4) and by adding new paragraph (3).

r. Section 10.4.1 New Construction, by revising paragraph (8) Security Systems.

s. By adding new sections 11 through 14.

t. In the appendix to the appendix, by redesignating note A7.2(3) as note A7.2(4) and by adding new note A7.2(3)(iii).

u. In the appendix to the appendix, by adding note A10.4.1(8).

v. In the appendix to the appendix, by adding notes A11.0 through A14.4.2(3).

The additions and revisions of the appendix to part 1191 are published and other parts of the appendix are republished to read as follows:

Appendix to Part 1191—Americans with Disabilities Act (ADA) Accessibility Guidelines for Buildings and Facilities

* * * * *

BILLING CODE 8150-01-M

1. PURPOSE.

This document sets guidelines for accessibility to buildings and facilities by individuals with disabilities under the Americans with Disabilities Act (ADA) of 1990. These guidelines are to be applied during the design, construction, and alteration of buildings and facilities covered by titles II and III of the ADA to the extent required by regulations issued by Federal agencies, including the Department of Justice and the Department of Transportation, under the ADA.

The technical specifications 4.2 through 4.35, of these guidelines are the same as those of the American National Standard Institute's document A117.1-1980, except as noted in this text by italics. However, sections 4.1.1 through 4.1.7 and the special application sections are different from ANSI A117.1-1980 in their entirety and are printed in standard type.

The illustrations and text of ANSI A117.1-1980 are reproduced with permission from the American National Standards Institute. Copies of the standard may be purchased from the American National Standards Institute at 1430 Broadway, New York, New York 10018.

• • • • •

3. MISCELLANEOUS INSTRUCTIONS AND DEFINITIONS.

• • • • •

3.5 Definitions.

• • • • •

Alteration. *An alteration is a change to a building or facility made by, on behalf of, or for the use of a place of public accommodation, commercial facility, or a State or local government entity that affects or could affect the usability of the building or facility or part thereof. Alterations include, but are not limited to, remodeling, renovation, rehabilitation, reconstruction, historic restoration, changes or rearrangement of the structural parts or elements, and changes or rearrangement in the plan configuration of walls and full-height partitions. Normal maintenance, reroofing, painting or wallpapering, or changes to mechanical and electrical systems are not alterations unless they affect the usability of the building or facility.*

• • • • •

Continuous Passage. See 14.1.1.

• • • • •

Dwelling Unit. See 13.1.

• • • • •

Public Improvement Project. See 14.1.1.

• • • • •

Sidewalk. See 14.1.1.

• • • • •

Site Infeasibility. See 14.1.1.

• • • • •

Transient Lodging. *A building, facility, or portion thereof, excluding inpatient medical care facilities and residential facilities, that contains sleeping accommodations. Transient lodging may include, but is not limited to, resorts, group homes, hotels, motels, and dormitories and other facilities used on a transient basis.*

• • • • •

4. ACCESSIBLE ELEMENTS AND SPACES: SCOPE AND TECHNICAL REQUIREMENTS.

4.1 Minimum Requirements

4.1.1* Application.

(1) General. All areas of newly designed or newly constructed buildings and facilities and altered portions of existing buildings and facilities shall comply with 4.1 through 4.35, unless otherwise provided in this section or as modified in a special application section.

(2) Application Based on Building Use. Special application sections provide additional requirements based on building use. When a building or facility contains more than one use covered by a special application section, each portion shall comply with the requirements for that use.

• • • • •

4.1.3 Accessible Buildings: New Construction.

Accessible buildings and facilities shall meet the following minimum requirements:

• • • • •

(5)* One passenger elevator complying with 4.10 shall serve each level, including mezza-

nines, in all multi-story buildings and facilities unless exempted below. If more than one elevator is provided, each full passenger elevator shall comply with 4.10.

EXCEPTION 1: Elevators are not required in places of public accommodation and commercial facilities that are less than three stories or that have less than 3000 square feet per story unless the building is a shopping center, a shopping mall, or the professional office of a health care provider, or another type of facility as determined by the Attorney General. The elevator exemption set forth in this paragraph does not obviate or limit in any way the obligation to comply with the other accessibility requirements established in section 4.1.3. For example, floors above or below the accessible ground floor must meet the requirements of this section except for elevator service. If toilet or bathing facilities are provided on a level not served by an elevator, then toilet or bathing facilities must be provided on the accessible ground floor. In new construction if a building or facility is eligible for this exemption but a full passenger elevator is nonetheless planned, that elevator shall meet the requirements of 4.10 and shall serve each level in the building. A full passenger elevator that provides service from a garage to only one level of a building or facility is not required to serve other levels.

• • • • •

(17) Public Telephones:

• • • • •

(c) The following shall be provided in accordance with 4.31.9:

• • • • •

(iv) If an interior public pay telephone is located in a judicial, legislative, or regulatory facility subject to section 11, then at least one interior public text telephone shall be provided.

(v) If an interior public pay telephone is located in a public area in a detention or correctional facility subject to section 12, then at least one interior public text telephone shall be provided in at least one public area. In addition, if an interior public pay telephone is provided in the secured area of such a facility, then at least one public text telephone shall also be provided in at least one secured area. Secured areas are those areas used only by detainees or inmates and security personnel.

(d) Where a bank of telephones in the interior of a building consists of three or more public pay telephones, at least one public pay telephone in each such bank shall be equipped with a shelf and outlet in compliance with 4.31.9(2).

EXCEPTION: This requirement does not apply to the secured areas of detention or correctional facilities where outlets are prohibited for purposes of security or safety.

• • • • •

4.1.6 Accessible Buildings: Alterations.

(1) General•••

• • • • •

(k) EXCEPTION:

(i) These guidelines do not require the installation of an elevator in an altered place of public accommodation or commercial facility that is less than three stories or has less than 3,000 square feet per story unless the building is a shopping center, a shopping mall, the professional office of a health care provider, or another type of facility as determined by the Attorney General.

• • • • •

4.1.7 Accessible Buildings: Historic Preservation.

(1) Applicability:

(a) General Rule. Alterations to a qualified historic building or facility shall comply with 4.1.6 Accessible Buildings: Alterations, the applicable technical specifications of 4.2 through 4.35 and the applicable special application sections unless it is determined in accordance with the procedures in 4.1.7(2) that compliance with the requirements for accessible routes (exterior and interior), ramps, entrances, or toilets would threaten or destroy the historic significance of the building or facility in which case the alternative requirement in 4.1.7(3) may be used for the feature.

EXCEPTION: If it is determined in accordance with the procedures in 4.1.7(2) that it is not feasible to provide physical access to a qualified historic building or facility in a manner that will not threaten or destroy the historic significance of the building or facility, alternative methods of access shall be provided as required by 28 CFR 35.151(d)(2) for State and local government programs and 28 CFR 36.405(b) for places of public accommodation and commercial facilities.

• • • • •

7.2 Sales and Service Counters, Teller Windows, Information Counters.

* * * * *

(3) In buildings or facilities owned or operated by a State or local government:

(i) Where counters have cash registers and are provided for the sales or distribution of goods or services to the public, at least one of each type shall comply with 7.2(1).

(ii) At teller windows, service counters, or other counters that do not have a cash register but at which goods or services are sold or distributed, at least one of each type shall comply with 7.2(2).

(iii)* In addition, at counters or teller windows with solid partitions or safety glass separating personnel from the public, at least one of each type shall provide a method to facilitate voice communication. Such methods may include, but are not limited to, grilles, talk-thru baffles, intercoms, or telephone handset devices. The method of communication shall be accessible to both individuals who use wheelchairs and individuals who have difficulty bending or stooping. If provided, at least one telephone communication device shall be equipped with volume control complying with 4.31.5. Hand-operable communication devices, if provided, shall comply with 4.27.

(4)* Assistive Listening Devices. (Reserved)

* * * * *

10.4 Airports.

10.4.1 New Construction.

* * * * *

(8)* Security Systems. In airports owned or operated by State or local government entities, at least one accessible route complying with 4.3 shall be provided through fixed security barriers at each single barrier or group of security barriers. A group is two or more security barriers immediately adjacent to each other at a single location. Where security barriers incorporate equipment such as metal detectors, fluoroscopes, or other similar devices which cannot be made accessible, an accessible route shall be provided adjacent to such security screening devices to facilitate an equivalent path of travel. The path of travel shall permit persons with disabilities passing through security barriers to maintain visual contact with their personal items to the same extent provided other members of the general public.

EXCEPTION: Doors, doorways, and gates designed to be operated only by security personnel shall be exempt from 4.13.6, 4.13.9, 4.13.11, and 4.13.12.

* * * * *

11. JUDICIAL, LEGISLATIVE, AND REGULATORY FACILITIES.

11.1* In addition to the requirements in 11, judicial, legislative and regulatory facilities shall comply with the applicable provisions of 4.1 through 4.35. All public and common use areas are required to be designed and constructed to comply with section 4.

11.2 Courtrooms, Hearing Rooms, and Chambers.

11.2.1 Where the following elements are provided, each shall be on an accessible route complying with 4.3 which coincides with the circulation path provided for all persons using the element. The elements shall comply with the following provisions.

(1) Doors or Gates. Doors or gates designed to allow passage into the well of the courtroom, the witness stand, the jury box, the speaker's rostrum, or other areas shall comply with 4.13.

(2)* Jury Boxes and Witness Stands. Each jury box and witness stand shall have at least one accessible wheelchair space complying 4.33.2. Readily removable seats may be installed in wheelchair spaces when the spaces are not required to accommodate wheelchair users. Accessible spaces shall be provided in the defined area of the jury box or witness stand. Fixed counters in the witness stand shall comply with 4.32. Clear floor space for a front approach shall be provided. The maximum height of controls and operating mechanisms shall be 48 in (1220 mm) and comply with 4.27.3 and 4.27.4.

EXCEPTION: In alterations to existing facilities where it is technically infeasible to provide a fixed means of vertical access to the witness stand or jury box, clear floor space shall be provided to accommodate a portable ramp as long as jurors or witnesses with disabilities are inside the defined area of the jury box or witness stand.

(3) Spectator, Press, and Other Areas with Fixed Seats. Where spectator, press or other areas with fixed seats are provided, each area shall comply with 4.1.3(19)(a). In addition, where the spectator seating capacity exceeds 50 and is located on one level that is not tiered or sloped, wheelchair spaces shall be provided in more than one seating row.

(4)* Fixed Judges' Benches, Clerks' Stations, Speakers' Rostrums, and Raised Daises. Fixed judges' benches, clerks' stations, speakers' rostrums and a minimum of one raised dais shall be adaptable and comply with 4.32. Clear floor space for a front approach shall be provided. The maximum height of controls and operating mechanisms shall be 48 in (1220 mm) and comply with 4.27.3 and 4.27.4. If the high forward reach is over an obstruction, reach and clearances shall be as shown in Figure 5(b).

Adaptable means that maneuvering clearances and other features (e.g., fixed controls) shall be designed into the space so that accessibility can easily be provided. For example, the judge's bench may be designed so that a ramp complying with 4.8 or a lift complying with 4.11 can easily be installed at a later date provided that the required maneuvering clearances are provided to approach, enter, and exit the ramp or lift. Maneuvering clearances must also allow an individual to open gates, maneuver at the bench (e.g., knee clearance), and reach any fixed controls (e.g., alarm buttons) and electrical outlets that are integral components of the design.

(5)* Fixed Bailiffs' Stations, Court Reporters' Stations and Litigants' Stations. Fixed or built-in stations, including tables for bailiffs, court reporters and litigants, shall provide clear floor space for a front approach and shall comply with 4.32. The maximum height of controls and operating mechanisms shall be 48 in (1220 mm) and comply with 4.27.3 and 4.27.4. If the high forward reach is over an obstruction, reach and clearances shall be as shown in Figure 5(b).

(6) Fixed Lecterns. Fixed lecterns shall comply with 4.32 and clear floor space for a front approach shall be provided. The maximum height of controls and operating mechanisms shall be 48 in (1220 mm) and comply with 4.27.3 and 4.27.4.

11.3 Jury Assembly Areas and Jury Deliberation Areas.

11.3.1 Where the following elements or spaces are provided in areas used for jury assembly or deliberation, each element or space shall be accessible and on an accessible route complying with 4.3:

(1) Refreshment Areas. Refreshment areas, kitchenettes and fixed refreshment dispensers shall comply with 9.2.2(7).

(2)* Fixed or Built-in Seating and Tables. At least 5 percent, but not less than one fixed or built-in seating and tables shall comply with 4.32. Readily removable seats may be installed in wheelchair spaces when the spaces are not required to accommodate wheelchair users.

(3) Drinking Fountains. Where provided in rooms covered under 11.3, there shall be a drinking fountain accessible to individuals who use wheelchairs in accordance with 4.15 and one accessible to those who have difficulty bending or stooping. This can be accomplished by the use of a "hi-lo" fountain; by providing one fountain accessible to those who use wheelchairs and one fountain at a standard height convenient for those who have difficulty bending; by providing a fountain accessible under 4.15 and a water cooler; or by other such means as would achieve the required accessibility for each group.

11.4 Courthouse Holding Facilities.

11.4.1 Holding Cells - Minimum Number. Where provided, facilities for detainees, including central holding cells and court-floor holding cells, shall comply with the following:

(1) Central Holding Cells. Where separate central holding cells are provided for adult male, juvenile male, adult female, and juvenile female, one of each type shall comply with 11.4.

(2) Court-Floor Holding Cells. Where separate court-floor holding cells are provided for adult male, juvenile male, adult female, and juvenile female, one of each type shall comply with 11.4. Where court-floor holding cells are provided, and are not separated by age or sex, courtrooms shall be served by at least one cell complying with 11.4.

11.4.2 Requirements for Accessible Cells. Accessible cells shall be on an accessible route complying with 4.3. Where provided, the following elements or spaces serving accessible cells shall be accessible and on an accessible route:

(1) Doors and Doorways. All doors and doorways to accessible spaces and on an accessible route shall comply with 4.13.

EXCEPTION: Doors and doorways shall be exempt from 4.13.6, 4.13.9, 4.13.11 and 4.13.12 in those areas where detainees are escorted by security personnel at all times.

(2) Restrooms. Toilet facilities shall comply with 4.22 and bathing facilities shall comply with 4.23. Where privacy screens are provided, they shall not intrude on the clear floor space required for fixtures or the accessible route.

(3) Beds. Beds shall have a minimum 36 in (915 mm) clear width maneuvering space located along one side. Where more than one bed is provided in a cell, the clear space provided at adjacent beds may overlap.

(4) Drinking Fountains and Water Coolers. Where provided, there shall be a drinking fountain accessible to individuals who use wheelchairs in accordance with 4.15 and one accessible to those who have difficulty bending or stooping. This can be accomplished by the use of a "hi-lo" fountain; by providing one fountain accessible to those who use wheelchairs and one fountain at a standard height convenient for those who have difficulty bending; by providing a fountain accessible under 4.15 and a water cooler; or by other such means as would achieve the required accessibility for each group.

(5) Fixed or Built-in Seating and Tables. At least one fixed or built-in seating and table or counter shall comply with 4.32.

(6) Fixed Benches. Fixed benches shall be a minimum of 24 in by 48 in (610 mm x 1220 mm) and be mounted at 17 in to 19 in (430 mm to 485 mm) above the finish floor. The structural strength of the bench attachments shall comply with 4.26.3.

11.4.3* Visiting Areas. The following elements, where provided, shall be accessible and located on an accessible route complying with 4.3.

11.5 Restricted and Secured Entrances

(1) Cubicles and Counters. If fixed cubicles are provided, at least five percent, but not less than one, of each side of the fixed cubicle shall comply with 4.32. Where a counter is provided without cubicles, a portion on both sides at least 36 in (915 mm) in length shall comply with 4.32.

(2) Partitions. Solid partitions or safety glass that separate visitors from detainees shall comply with 7.2(3).

(3) Signage. Accessible cubicles or counters shall be identified on each side by the International Symbol of Accessibility. This symbol shall be displayed as required in 4.30.7.

11.5 Restricted and Secured Entrances. Where provided, at least one restricted entrance and at least one secured entrance to the facility shall comply with 4.14, in addition to the entrances required by 4.1.3(8). Restricted entrances differ from public entrances in that they are used by judges, court personnel and other parties on a controlled basis. Secured entrances are used by detainees and detention officers. In addition, if direct access is provided for pedestrians from an enclosed parking garage to a restricted entrance, at least one direct entrance from the garage to the restricted entrance shall be accessible.

11.6 Security Systems. An accessible route complying with 4.3 shall be provided through fixed security barriers. Where security barriers incorporate equipment such as metal detectors, fluoroscopes, or other similar devices which cannot be made accessible, an accessible route shall be provided adjacent to such security screening devices to facilitate an equivalent path of travel.

EXCEPTION: Doors and doorways designed to be operated only by security personnel shall be exempt from 4.13.6, 4.13.9, 4.13.11 and 4.13.12.

11.7* Two-Way Communication Systems. Where a two-way communication system is provided to gain admittance to a facility or to restricted areas within the facility, the system shall provide both visible and audible signals and shall comply with 4.27.

11.8* Electrical Outlets, Wiring, and Conduit for Communication Systems.

(1) In judicial, legislative, or regulatory facilities, all courtrooms, hearing rooms, jury deliberation and jury orientation rooms, and meeting rooms designated for public use shall be provided with the following to support communication equipment for persons with vision and hearing impairments:

(a) Duplex electrical outlets; and

(b) Wiring, conduit, or raceways.

(2) Within the courtroom, electrical outlets and wiring, conduit, or raceways shall be provided to serve the litigants' stations, clerk's station, court reporter's station, jury box, witness stand, and the judge's bench.

(3) These electrical outlets shall be provided in addition to those convenience outlets required by applicable State or local codes.

11.9* Permanently Installed Assistive Listening Systems. Permanently installed assistive listening systems complying with 4.33.6 and 4.33.7 shall be provided in judicial, legislative and regulatory facilities as follows:

(1)* Judicial Facilities. In judicial facilities, 50 percent, but not less than one, of each type of courtroom (at least one of which shall have a jury box, where one is provided) shall have a permanently installed assistive listening system. In addition, 50 percent, but not less than one, of each of the following types of rooms shall have a permanently installed assistive listening system: hearing rooms, jury deliberation rooms, and juror orientation rooms.

(2)* Legislative and Regulatory Facilities. In legislative and regulatory facilities, 50 percent, but not less than one, of each of the following types of rooms shall have a permanently installed assistive listening system: chambers, and hearing or meeting rooms which are designated for public use and where legislative or regulatory business is conducted. In addition, where separate chambers are provided for a bicameral legislature (i.e., house and senate), each chamber shall have a permanently installed assistive listening system.

(3) Receivers. The minimum number of receivers shall be 4 percent of the room occupant load, as determined by applicable State or local codes, but not less than two, whichever is greater.

(4) Signage. An informational sign complying with 4.30.1, 4.30.2, 4.30.3, 4.30.5 and 4.30.7(4) shall be posted in a prominent place indicating the availability of assistive listening systems, computer-aided transcription system, or other communication equipment for persons with vision or hearing impairments.

12. DETENTION AND CORRECTIONAL FACILITIES.

12.1* General. This section applies to jails, holding cells in police stations, prisons, juvenile detention centers, reformatories, and other institutional occupancies where the occupants are under some degree of restraint or restriction for security reasons. Except as specified in this section, detention and correctional facilities shall comply with the applicable requirements of 4.1 through 4.35. All public and common use areas serving accessible cells or rooms are required to be designed and constructed to comply with section 4.

12.2 Entrances.

12.2.1 Secured Entrances. Where provided, at least one secured entrance shall comply with 4.14. This requirement is in addition to the entrances that are required to be accessible by 4.1.3(8). Secured entrances are those entrances used only by inmates or detainees and security personnel and not the general public.

12.2.2 Security Systems. Where security systems are provided at public entrances required to be accessible by 4.1.3(8), an accessible route complying with 4.3 shall be provided through fixed security barriers. Where security barriers incorporate equipment such as metal detectors, fluoroscopes, or other similar devices which cannot be made accessible, an accessible route shall be provided adjacent to such security screening devices to facilitate an equivalent path of travel.

EXCEPTION: Doors and doorways designed to be operated only by security personnel shall be exempt from 4.13.6, 4.13.9, 4.13.11 and 4.13.12.

12.3* Visiting Areas. In non-contact visiting areas where inmates or detainees are separated from visitors, the following elements, where provided, shall be accessible and located on an accessible route complying with 4.3:

(1) Cubicles and Counters. If fixed cubicles are provided, at least five percent, but not less than one, of each side of the fixed cubicle shall comply with 4.32. Where a counter is provided without cubicles, a portion on both sides at least 36 in (915 mm) in length shall comply with 4.32.

(2) Partitions. Solid partitions or safety glass separating visitors from inmates or detainees shall comply with 7.2(3).

(3) Signage. Accessible cubicles or counters shall be identified on each side by the International Symbol of Accessibility. This symbol shall be displayed as required in 4.30.7.

12.4 Holding and Housing Cells or Rooms: Minimum Number.

12.4.1* Holding Cells and General Housing Cells or Rooms. [Reserved]

12.4.2 Special Holding and Housing Cells or Rooms. [Reserved]

12.4.3 Accessible Cells or Rooms for Persons with Hearing Impairments. [Reserved]

12.4.4 Medical Care Facilities. Medical care facilities providing physical or medical treatment or care shall comply with the applicable requirements of section 6, if persons may need assistance in emergencies and the period of stay may exceed twenty-four hours.

12.4.5 Alterations to Cells or Rooms. When cells or rooms are being altered in an existing facility, or portion thereof, at least [percentage specified for new construction] of the number being altered shall be made accessible according to 12.4.1 until the number of accessible cells or rooms equals the total number of accessible cells or rooms required for the facility.

12.5 Requirements for Accessible Cells or Rooms.

12.5.1 General. Cells or rooms required to be accessible by 12.4 shall comply with 12.5.

12.5.2 Minimum Requirements. Accessible cells or rooms shall be on an accessible route complying with 4.3. Where provided, the following elements or spaces serving accessible cells or rooms shall be accessible and connected by an accessible route. At least one of each type of common area, amenity, space, or element provided for other housing cells or rooms in the same category of housing shall be accessible.

(1) Doors and Doorways. All doors and doorways on an accessible route shall comply with 4.13.

EXCEPTION: Doors and doorways in those areas where detainees or inmates are escorted by security personnel at all times shall be exempt from 4.13.6, 4.13.9, 4.13.11 and 4.13.12.

(2) Restrooms. At least one toilet facility shall comply with 4.22 and one bathing facility shall comply with 4.23. Where privacy screens are provided, they shall not intrude on the clear floor space required for fixtures and the accessible route.

(3) Beds. Beds shall have a minimum 36 in (915 mm) clear width maneuvering space located along one side. Where more than one bed is provided in a room or cell, the clear space provided at adjacent beds may overlap.

(4) Drinking Fountains and Water Coolers. Where provided, there shall be a drinking fountain accessible to individuals who use wheelchairs in accordance with 4.15 and one accessible to those who have difficulty bending or stooping. This can be accomplished by the use of a "hi-lo" fountain; by providing one fountain accessible to those who use wheelchairs and one fountain at a standard height convenient for those who have difficulty bending; by providing a fountain accessible under 4.15 and a water cooler; or by providing other such means as would achieve the required accessibility for each group.

(5) Fixed or Built-in Seating or Tables. Fixed or built-in seating or tables within, or serving, accessible cells or rooms shall comply with 4.1.3(18).

(6) Fixed Benches. Fixed benches shall be a minimum of 24 in by 48 in (610 mm x 1220 mm) and be mounted at 17 in to 19 in (430 mm to 485 mm) above the finish floor. The structural strength of the bench attachments shall comply with 4.26.3.

(7) Storage. At least one of each type of fixed or built-in storage facility provided, such as cabinets, shelves, closets, and drawers, shall contain storage space complying with 4.25. Additional storage may be provided outside of the dimensions required by 4.25.

(8) Controls. All controls intended for operation by inmates shall comply with 4.27.

(9) Room accommodations for persons with hearing impairments required by 12.4.3 and complying with 12.6 shall be provided in accessible cells or rooms.

12.6 Visual Alarms and Telephones.

12.6.1 General. Auxiliary visual alarms complying with 4.28.4 shall be provided in cells or rooms which are served by audible emergency warning systems and which house inmates or detainees who are allowed independent means of egress. Permanently installed telephones shall have volume controls complying with 4.31.5.

12.6.2 Equivalent Facilitation. For purposes of this section, equivalent facilitation shall include the installation of electrical outlets (including outlets connected to a facility's central alarm system) and telephone wiring in the cell or room to enable inmates or detainees with hearing impairments to utilize portable visual alarms and communication devices made available by the operator of the facility.

13. ACCESSIBLE RESIDENTIAL HOUSING.

Except as specified in this section, accessible residential housing shall comply with the applicable requirements of 4.1 through 4.35. All public and common use areas shall be designed and constructed to comply with

section 4. "Public use areas" pertains to interior or exterior spaces of a building or facility that are made available to the general public. As used in this section, "common use areas" means rooms, spaces or elements inside or outside of a building that are made available for the use of residents of a building or the guests thereof; these areas include, but are not limited to, hallways, lounges, lobbies, laundry rooms, refuse rooms, mail rooms, recreational areas and passageways among and between buildings.

EXCEPTION: Where multiple recreational facilities, such as tennis courts, are provided for public or common use, then at least one of each type shall be designed and constructed to comply with section 4.

13.1* General. This section applies to single-family and multifamily dwelling unit facilities constructed or altered by, for, or on behalf of a State or local government entity. For purposes of this section, the term "dwelling unit" means a single unit which provides a kitchen or food preparation area, in addition to rooms and spaces for living, bathing and sleeping.

13.2 Minimum Number and Dispersion.

13.2.1 Minimum Number. Accessible dwelling units shall be provided as follows:

(1) Five percent of the total number of dwelling units in a facility, but not less than one, shall comply with 13.3, 13.4, and 13.5.

(a) Dwelling Units with Roll-in Showers. [Reserved]

(b) Dwelling Units with Bathtubs. [Reserved]

(2) In addition to those accessible dwelling units required by 13.2.1(1), two percent of the total number of dwelling units in a facility, but not less than one, shall comply with 13.4 and 13.5.

(3) This paragraph does not require an increase in the total number of dwelling units planned for a facility. If the total number of dwelling units is one, that dwelling unit shall meet the requirements of 13.2.1(1).

13.2.2* New Construction: Dispersion. Accessible dwelling units shall be dispersed throughout the facility so as to provide people with disabilities a choice of housing types comparable to and integrated with those available to other members of the public. In dispersing accessible units, the following factors are to be considered: unit size and configuration, cost, amenities within or serving dwelling units, and location with respect to amenities.

13.2.3* Alterations: Minimum Number and Dispersion.

(1) Minimum Number: When dwelling units are altered in an existing facility, five percent, but not less than one, of the dwelling units altered shall comply with the requirements of 13.3, 13.4 and 13.5 for each alteration until the number of accessible dwelling units in each facility equals the number required to be accessible by 13.2.1(1). In addition, two percent but not less than one of the altered dwelling units shall comply with the requirements of both 13.4 and 13.5 until the number of accessible dwelling units equals the number required to be accessible by 13.2.1(2).

(2) Dispersion: When existing dwelling units are altered and are required to be accessible they shall be dispersed according to 13.2.2, to the maximum extent feasible.

13.3 Requirements for Accessible Dwelling Units.

13.3.1 General. The requirements of 13.3 apply to dwelling units required to be accessible by 13.2.

13.3.2* Minimum Requirements. An accessible dwelling unit shall be on an accessible route complying with 4.3 and shall have the following accessible elements and spaces:

(1) Ancillary Areas. Spaces and facilities serving individual accessible dwelling units, including but not limited to, entry walks, trash disposal facilities, and mail boxes, where provided, shall comply with 4.1 through 4.35.

(2) Maneuvering Space. Accessible spaces shall have maneuvering space complying with 4.2.3 and surfaces complying with 4.5.

(3) Accessible Route. At least one accessible route complying with 4.3 shall connect the accessible entrances with all accessible spaces and elements within the accessible dwelling

13.3 Requirements for Accessible Dwelling Units

unit. This is not intended to require an elevator within an accessible dwelling unit as long as the spaces identified in 13.3.2 (11), (12), and (13) are connected by an interior accessible route.

(4) Parking. Parking spaces complying with 4.6 shall be on an accessible route and shall be provided in accordance with the following:

(a) Where parking is provided for residents, one accessible parking space shall be provided for each dwelling unit required to be accessible by 13.2.1(1); and

(b) Where parking is provided for visitors, 2 percent of the spaces, but not less than one, shall be accessible.

EXCEPTION: Where parking spaces are assigned to specific dwelling units, the requirements for signage under 4.6.4 apply only during the tenancy of a person with a disability.

(5) (i) Elevators. If provided, elevators shall comply with 4.10.

(ii) Equivalent Facilitation. A platform lift complying with 4.11 may be used in lieu of an elevator complying with 4.10 to connect levels within an individual dwelling unit.

(6) Doors. Doors intended for passage to and in accessible spaces shall comply with 4.13.

(7) Entrances. At least one accessible entrance to the dwelling unit shall comply with 4.14.

(8) Storage. At least one of each type of fixed or built-in storage facility in accessible spaces in dwelling units, including cabinets, shelves, closets, and drawers shall comply with 4.25.

(9) Controls. All controls in accessible spaces shall comply with 4.27. Those portions of heating, ventilating, and air conditioning equipment requiring regular or periodic maintenance and adjustment by the resident of a dwelling unit shall comply with 4.27.

EXCEPTION: This requirement shall not apply to controls, such as air distribution registers, which must be placed in or close to ceilings for proper air circulation.

(10) Alarms. If emergency warning systems are provided, they shall include audible alarms complying with 4.28.2 and auxiliary alarms complying with 4.28.4.

(11) Bathrooms. At least one full bathroom shall comply with 13.3.3. A full bathroom shall include a water closet, a lavatory, and a bathtub or a shower.

(12) Kitchens. The kitchen shall comply with 13.3.4.

(13) Living Spaces. The following spaces shall be accessible and shall be on an accessible route:

(a) The living area.

(b) The dining area.

(c) The sleeping area or bedroom as follows:

(i) In dwelling units with one bedroom, one bedroom.

(ii) In dwelling units with more than one bedroom, at least two bedrooms.

(d) Patios, decks, terraces, balconies, carports, and garages, if provided on an accessible level within the dwelling unit.

EXCEPTION: The requirements of 4.13.8 and 4.3.8 do not apply to patios, decks, terraces, or balconies where it is necessary to utilize a higher door threshold or a change in level to protect the integrity of the unit from wind or water damage. Where the exception results in level changes at patios, decks, terraces or balconies, equivalent facilitation shall be provided. Equivalent facilitation in residential housing may consist of providing raised decking or a ramp to provide accessibility.

(14) Laundry Facilities. If laundry facilities are provided, they shall comply with 13.3.5 and shall be located on an accessible route complying with 4.3.

13.3.3 Bathrooms. Accessible bathrooms shall be on an accessible route and shall comply with the following:

(1) Doors. All doors to accessible bathrooms shall comply with 4.13 and shall not swing into the clear floor space required for any fixture.

(2) Water Closets. Water closets shall comply with 4.16, except that the height of the water closet shall be between 15 in (380 mm) and 19 in (485 mm) measured to the top of the toilet seat.

(3) Lavatories and Mirrors. Lavatories and mirrors shall comply with 4.19. If medicine cabinets are provided, at least one shall be located with a usable shelf no higher than 44 in (1120 mm) above the floor. Clear floor space complying with 4.2.4 shall be provided at the medicine cabinet.

(4) Bathtubs. If a bathtub is provided, it shall comply with 4.20.

(5) Showers. If a shower is provided, it shall comply with 4.21.

(6) Bathtub and Shower Enclosures. Enclosures for bathtubs or shower stalls shall not obstruct controls or transfer from wheelchairs onto shower or bathtub seats. Enclosures on bathtubs shall not have tracks mounted on their rims.

(7) Fixtures and Controls. The accessible fixtures and controls required in an accessible bathroom shall be on an accessible route. The clear floor space at fixtures and controls and the accessible route may overlap.

(8) Maneuvering Space. Maneuvering space complying with 4.2.3 shall be provided.

13.3.4 Kitchens. Accessible kitchens and their components shall be designed to allow for the operation of cabinet and/or appliance doors so that all cabinets and appliances are accessible and usable. Accessible kitchens shall be on an accessible route complying with 4.3 and shall comply with the following:

(1) Maneuvering Clearance. Clearances between all opposing base cabinets, counter tops, appliances, or walls shall be 40 in (1015 mm) minimum, except in U-shaped kitchens, where such clearance shall be 60 in (1525 mm) minimum.

(2) Clear Floor Space. A clear floor space at least 30 in by 48 in (760 mm by 1220 mm) complying with 4.2.4 that allows either a forward or a parallel approach by a person using a wheelchair shall be provided at all appliances in the kitchen, including the range or cooktop, oven, refrigerator/freezer, dishwasher, and trash compactor. Maneuvering space complying with 4.2.3 shall be provided. Laundry equipment located in the kitchen shall comply with 13.3.5.

(3) Controls. All controls in kitchens shall comply with 4.27.

(4) Counters. At least one 30 in (760 mm) length of counter shall provide a work surface that complies with the following requirements:

(a) The counter shall be mounted at a maximum height between 28 in to 34 in (710 to 865 mm) above the floor, measured from the floor to the top of the counter surface, or shall be adjustable to provide alternative heights of 28 in, 32 in, 34 in and 36 in (710 mm, 815 mm, 865 mm and 915 mm) measured from the floor to the top of the counter surface.

(b) Counter thickness and supporting structure shall be 2 in (50 mm) maximum over the required clear floor space.

(c) A clear floor space of 30 in by 48 in (760 mm by 1220 mm) shall allow a forward approach to the counter. Nineteen inches (485 mm) maximum of the clear floor space may extend underneath the counter. The knee space shall have a minimum clear width of 30 in (760 mm) and a minimum clear depth of 19 in (485 mm).

(d) There shall be no sharp or abrasive surfaces under such counters.

(5)* Sinks. The sink and its surrounding counter shall comply with 4.24. The sink may be adjustable to provide alternative heights of 28 in, 32 in, 34 in, and 36 in (710 mm, 815 mm, 865 mm and 915 mm), measured from the floor to the top of the counter surface or sink rim. The total length of the sink and counter area shall be 30 in (760 mm) minimum. If the sink is adjustable, rough-in plumbing shall be located to accept connections of supply and drain pipes for alternative mounting heights.

(6)* Cooktops. Cooktops shall comply with 13.3.4(2) and 13.3.4(3). If cooktops have knee spaces underneath, they shall be insulated or otherwise protected on the exposed contact surfaces to prevent burns, abrasions, or electric shock. The clear floor space may overlap

the knee space, if provided, by 19 in (485 mm) maximum. The location of controls for cooktops shall not require reaching across burners.

(7)* Ovens. Ovens, including those with cooktops, shall comply with 13.3.4(2) and 13.3.4(3). Ovens shall be of the self-cleaning type or be located adjacent to an adjustable height counter with knee space below. (See Fig. 52). For side opening ovens, the door latch side shall be next to the open counter space, and there shall be a pull-out shelf under the oven extending the full width of the oven and not less than 10 in (255 mm) when fully extended. Wall ovens having knee spaces underneath shall be insulated or otherwise protected on the exposed contact surfaces to prevent burns, abrasions, or electric shock. Where knee space is provided, the clear floor space may overlap the knee space by 19 in (485 mm) maximum. Ovens shall have controls on front panels and may be located on either side of the door.

(8)* Refrigerators and Freezers. Refrigerators and freezers shall comply with 13.3.4(2) and 13.3.4(3). Provision shall be made for refrigerators which are:

(a) Of the vertical side-by-side refrigerator and freezer type; or

(b) Of the over-and-under type and meet the following requirements:

(i) Have at least 50 percent of the freezer space no higher than 54 in (1370 mm) above the floor.

(ii) Have 100 percent of the refrigerator space and controls no higher than 54 in (1370 mm) above the floor.

Freezers with less than 100 percent of the storage volume within the limits specified in 4.2.5 and 4.2.6 shall be the self-defrosting type.

(9) Dishwashers. Dishwashers shall comply with 13.3.4(2) and 13.3.4(3). Dishwashers shall have all rack space accessible from the front of the machine for loading and unloading dishes.

(10)* Kitchen Storage. Kitchen storage cabinets, drawers, and shelf areas shall comply with 4.25 and shall have the following features:

(a) Maximum height shall be 48 in (1220 mm) for at least one shelf of all cabinets and storage shelves mounted above work counters.

(b) Door pulls or handles for wall cabinets shall be mounted as close to the bottom of cabinet doors as practicable. Door pulls or handles for base cabinets shall be mounted as close to the top of cabinet doors as possible.

13.3.5 Laundry Facilities. If laundry equipment is provided within individual accessible dwelling units, or if separate laundry facilities serve one or more accessible dwelling units, then they shall meet the following requirements:

(1) Location. Laundry facilities and laundry equipment shall be on an accessible route.

(2) Washing Machines and Clothes Dryers. A minimum of one washing machine and clothes dryer in each common use laundry room shall be front loading.

(3) Controls. Laundry equipment controls on front loading machines shall comply with 4.27.

13.4 Requirements for Dwelling Units Accessible to Persons with Hearing Impairments.

13.4.1 General. In dwelling units required to be accessible by 13.2.1, auxiliary visual alarms complying with 4.28.4 shall be provided if an emergency warning system or single station emergency alarm is provided. Visual notification devices shall also be provided in living and sleeping rooms to alert occupants of incoming telephone calls and a door knock or bell. Notification devices shall not be connected to auxiliary visual alarm signal appliances. Permanently installed telephones shall have volume controls complying with 4.31.5. An accessible electrical outlet within 48 in (1220 mm) of each telephone connection shall be provided to facilitate the use of a text telephone.

13.4.2 Equivalent Facilitation. For purposes of this section, equivalent facilitation shall include the installation of electrical outlets (including outlets connected to a facility's central alarm system) and telephone wiring in sleeping rooms to enable persons with hearing impairments to utilize portable visual alarms and communication devices provided by the operator of the facility.

13.5 Requirements for Dwelling Units Accessible to Persons with Visual Impairments: Reserved.

14. PUBLIC RIGHTS-OF-WAY.

14.1* General. In addition to the requirements of 4.1 through 4.35, unless otherwise provided in this section, all areas, elements, and facilities in the public right-of-way intended for pedestrian access, circulation, and use that are constructed or installed on or adjacent to a sidewalk within the limits or scope of a public improvement project shall comply with 14.

14.1.1 Definitions.

Continuous Passage. A continuous unobstructed pedestrian circulation path within a sidewalk connecting pedestrian areas, elements, and facilities covered by Section 14.

Marked Crossing. A crosswalk or other identified path intended for pedestrian use in crossing a vehicular way.

***Public Improvement Project.** A public works project consisting of the construction, alteration or installation of site improvements or amenities in the public right-of-way by or on behalf of a State or local government.

***Sidewalk.** A walk in the public right-of-way along a vehicular way that is part of a pedestrian circulation network.

Site Infeasibility. Existing physical or site constraints which prohibit the incorporation of elements, spaces, or features which are in full and strict compliance with the minimum requirements for new construction in the public right-of-way and which are necessary to provide accessibility.

Walk. An exterior pathway with a prepared surface intended for pedestrian use, including general pedestrian areas such as plazas and courts.

14.2 Sidewalks.

14.2.1* Minimum Requirements. Sidewalks, or a continuous passage along their length, shall provide a clear width of 36 in (915 mm) minimum, connect to the accessible route required by 4.1.2(1) and elements covered by section 14, and shall comply with the following requirements:

(1)* Slope. The least possible running slope shall be provided and shall not exceed 1:12. Cross slopes shall not exceed 1:50 (2 percent). Handrails are not required on sidewalks.

EXCEPTION: Where site infeasibility precludes a running slope of 1:12, the least possible running slope shall be provided.

(2) Passing Space. Sidewalks less than 60 in (1525 mm) in continuous width shall provide passing space at reasonable intervals not to exceed 200 ft (61 m). Passing space shall provide a 60 in by 60 in (1525 mm by 1525 mm) minimum clear space or a T-shaped turning space as shown in Figure 3 and may be provided at landings at new building entrances required by ADAAG 4.1.2(1) or at the intersection of two sidewalks. The passing space at the intersection of two sidewalks shall have the minimum possible running slope and a cross slope that does not exceed 1:50 (2 percent).

(3) Surfaces. Surfaces shall be firm, stable and slip resistant. Differences in level up to 1/4 in (6.5 mm) may be vertical and without edge treatment. (See Fig. 7(c)). Differences in level between 1/4 in and 1/2 in (6.5 mm and 13 mm) shall be beveled with a slope no greater than 1:2. (See Fig. 7(d)). Gratings shall have spaces no greater than 1/2 in (13 mm) wide in one direction. (See Fig. 8(g)). Gratings with elongated openings shall be placed so that the long dimension is perpendicular to the dominant direction of travel. (See Fig. 8(h)).

(4)* Separation. Sidewalks shall be separated from vehicular ways by curbs, planted parkways, or other barriers, which shall be continuous except where interrupted by driveways, alleys, or connections to accessible elements.

(5) Bus stops. Where bus passenger loading areas or bus shelters are provided on or adjacent to sidewalks, they shall comply with 10.2.

14.2.2 Historic and Special Use Sidewalks (Reserved).

14.2.3 Street Identification and Other Pedestrian Signage. Where provided for pedestrian use, informational and directional

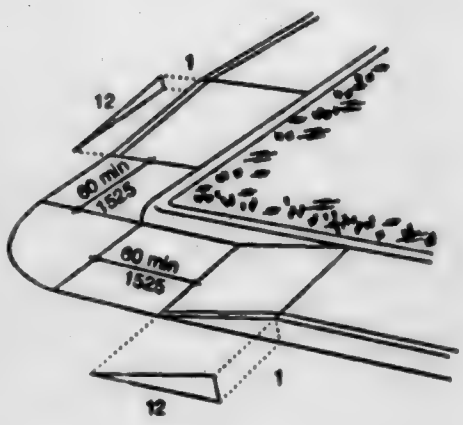
14.2 Sidewalks

signage, and street identification signs shall comply with 4.30.2, 4.30.3, and 4.30.5.

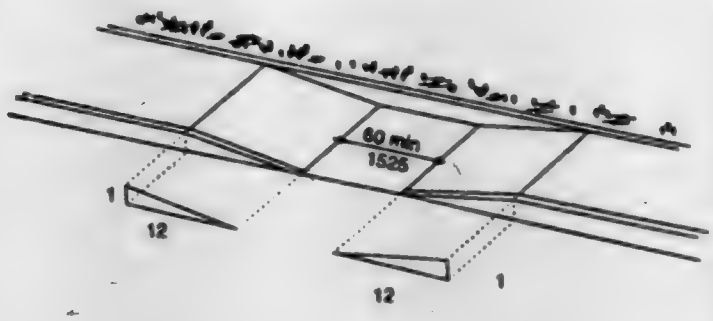
14.2.4* Protruding Objects.

(1) General. Objects projecting from walls (e.g., signs, telephones, canopies) with their leading edges between 27 in and 80 in (685 mm and 2030 mm) above the finished sidewalk shall protrude no more than 4 in (100 mm) into any portion of a sidewalk. Objects mounted with their leading edges located less than 27 in (685 mm) or more than 80 in (2030 mm) above the finished sidewalk may project any amount provided that they do not reduce the required continuous passage along the sidewalk. Free-standing objects mounted on posts or pylons may overhang their mountings a maximum of 12 in (305 mm) when located between 27 in and 80 in (685 mm and 2030 mm) above the ground or finished sidewalk provided that they do not reduce the required continuous passage along the sidewalk.

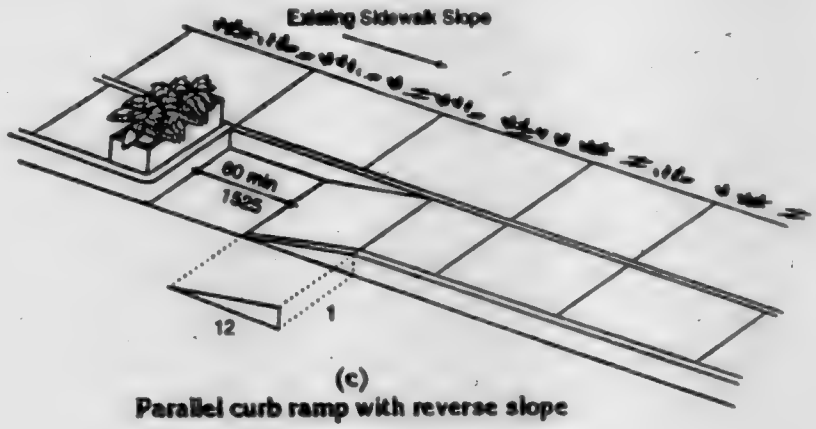
(2) Head Room. Guardrails or other barriers shall be provided when the vertical clearance of an area along or adjoining a sidewalk or continuous passage is less than 80 in (2030 mm) high. Leading edges of such barriers shall be located a maximum of 27 in (685 mm) above the finished sidewalk, as shown in Figure 8(c-1).



(a)
Parallel curb ramp in narrow sidewalk at intersection

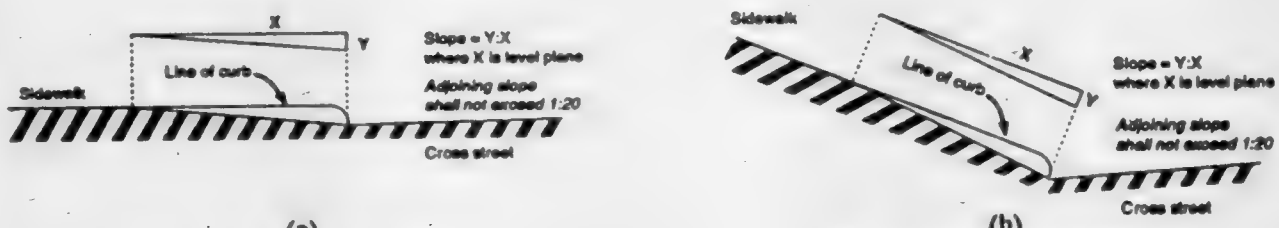


(b)
Parallel curb ramp in narrow sidewalk at midblock crossing



(c)
Parallel curb ramp with reverse slope

Fig. 58
Examples of Parallel Curb Ramps



(a)
Slope measurement relative to level sidewalk/street

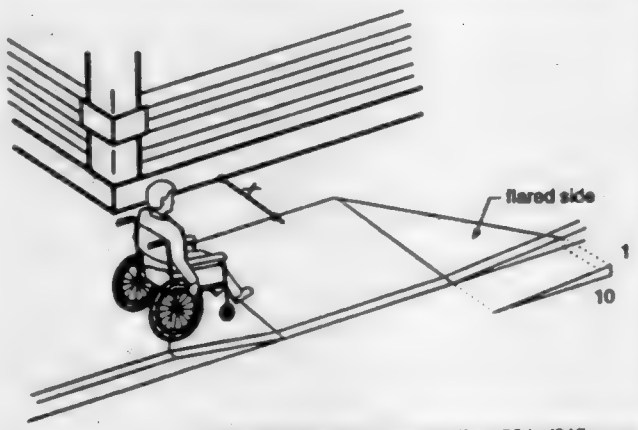
(b)
Slope measurement relative to sloping sidewalk/street

Fig. 59
Measurement of Curb Ramp Slopes

(3) Clear Width. Fixed objects not covered by paragraph (1) shall not reduce the continuous passage required by 14.2.1.

14.2.5 Sidewalk Curb Ramps and Other Sloped Areas.

(1) Location. A curb ramp or other sloped area complying with 14.2.5 shall be provided wherever a pedestrian circulation path crosses a curb or other barrier (e.g., parkway, berm, or gutter) to a street crossing and shall be connected to a continuous passage. Handrails are not required on sidewalk curb ramps or other sloped areas connecting to street crossings.



1. X shall be equal to or greater than 36 in (915 mm).
2. If X is less than 48 in (1220 mm), then the slope of the flared sides shall not exceed 1:12.

Fig. 60
Level Landing at Top of Curb Ramp

(2) Slope. The least possible slope shall be used for any curb ramp or other sloped area. The maximum slope shall be 1:12 when measured as shown in Figure 59(a).

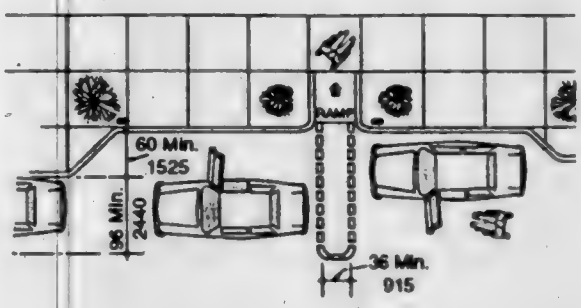
EXCEPTION: Where site infeasibility (e.g., steeply sloped roadways or constrained right-of-way) precludes the installation of a curb ramp, a sloped area parallel to the curb with its gradient measured according to Figure 59(a), may be provided. (See Fig. 58). The least possible slope shall be provided for any parallel sloped area. The maximum slope shall be 1:12. The cross slope shall be no greater than 1:50 (2 percent). A landing which has a minimum of 60 in (1525 mm) clear in the direction of the running slope shall be provided at the bottom of the sloped area. The surface slope of the landing shall not exceed 1:50 (2 percent) in all directions.

(3) Width. Curb ramps or other sloped areas shall be 36 in (915 mm) wide minimum, exclusive of flared sides.

(4) Landings. A landing the width of the curb ramp and 48 in (1220 mm) in length shall be provided at the top of the curb ramp or other sloped area and shall be connected to the continuous passage. The surface slope of landings shall not exceed 1:50 (2 percent) in all directions.

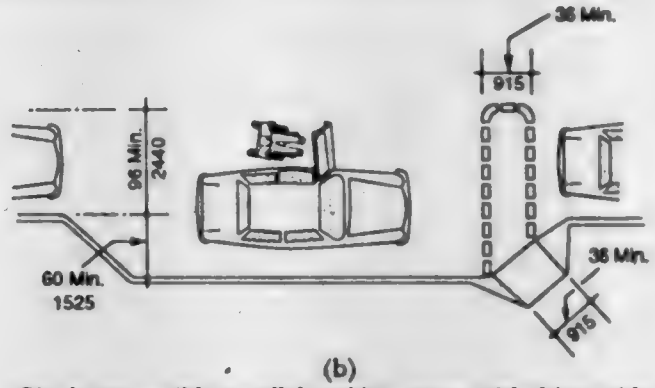
EXCEPTION 1: Where site infeasibility precludes the installation of a 48 in (1220 mm) landing length at the top of the curb ramp or other sloped area, a landing a minimum of 36 in (915 mm) in length may be provided. (See Fig. 60).

14.2 Sidewalks



(a)

Two accessible parallel parking spaces in series, separated by an access aisle, with both driver-side and passenger-side access demonstrated.



(b)

Single accessible parallel parking space with driver-side access demonstrated; passenger side access can be provided by parking in line with standard on-street spaces.

Fig. 61

Examples of Parallel On-Street Parking

EXCEPTION 2: Where the 36 in (915 mm) level landing allowed in Exception 1 above, or a parallel ramp complying with 14.2.5(2) Exception cannot be provided, a sloped area connecting to the street crossing with its gradients (i.e., running slope, cross slope, side flare slope) measured from a plane parallel to that of the street, as shown in Figure 59(b), may be provided. The least possible slope shall be used for any sloped area connecting to a street crossing. The maximum slope shall be 1:12. The cross slope shall be no greater than 1:50 (2 percent).

(5) Sides of Curb Ramps or Other Sloped Areas. Curb ramps or other sloped areas located where pedestrians must walk across the ramp, or where curb ramps are not protected by returned curbs, shall have flared sides. The slope of the flare shall be 1:10 maximum. Where the landing at the top is at least 36 in (915 mm) but less than 48 in (1220 mm), the slope of the flares shall be 1:12 maximum. (See Fig. 60). Curb ramps or other sloped areas with returned curbs may be used where pedestrians would not normally walk across the ramp from the side. (See Fig. 12(b)).

(6) Surface. The surfaces of curb ramps or other sloped areas shall be firm, stable and slip resistant.

(7) Detectable Warnings. [Reserved]

(8) Adjacent Surfaces. Counter slopes of adjoining gutters and road surfaces connecting to the curb ramp or sloped area shall be 1:20 maximum. (See Fig. 59(a)). Transitions from curb ramps to gutters or streets shall be flush and free of abrupt changes. Gratings located in adjacent walking surfaces shall have spaces no greater than 1/2 in (13 mm) wide in one direction. (See Fig. 8(g)). Gratings with elongated openings shall be placed so that the long dimension is perpendicular to the dominant direction of travel. (See Fig. 8(h)).

(9) Location at Marked Crossings. Curb ramps and other sloped areas at marked crossings shall be wholly contained within the markings, excluding any flared sides. (See Fig. 15).

(10) Obstructions. Curb ramps and other sloped areas shall be protected or located to prevent their obstruction by parked vehicles.

(11) Built-up Curb Ramps or Other Sloped Areas. Built-up curb ramps or other sloped areas shall be located so that they do not project into vehicular traffic lanes or into parking spaces or access aisles. (See Fig. 13).

(12) Diagonal Curb Ramps or Other Sloped Areas. Diagonal (or corner-type) curb ramps or other sloped areas with returned curbs or other well-defined edges shall have the edges parallel to the direction of pedestrian flow. Bottoms of

diagonal curb ramps or other sloped areas shall have a 48 in (1220 mm) minimum clear space as shown in Figure15(c) and (d). Diagonal curb ramps or other sloped areas provided at marked crossings shall have the 48 in (1220 mm) minimum clear space within the markings. (See Fig. 15(c) and (d)). Diagonal curb ramps or other sloped areas with flared sides shall have a segment of straight curb at least 24 in (610 mm) long located on each side of the curb ramp or other sloped area and within the marked crossing. (See Fig. 15(c)).

(13) Islands. Raised islands in crossings shall be cut through level with the street or have curb ramps or other sloped areas at both sides and a level area 48 in (1220 mm) long minimum and a minimum of 36 in (915 mm) wide in the part of the island intersected by the crossings. (See Fig. 15(a) and (b)).

14.2.6 Crossing Controls.

(1) Controls. Where provided, buttons shall be raised or flush and be a minimum of 3/4 in (19 mm) in the smallest dimension. The force required to activate controls shall be no greater than 5 lbf (22.2N).

(2) Location. Where provided, controls shall be located as close as possible to the curb ramp and, to the maximum extent feasible, shall permit operation from a level area immediately adjacent to the controls.

(3) Mounting Height. Where provided, pedestrian-actuated crossing controls shall be a maximum of 48 in (1220 mm) above the sidewalk.

(4) Surface. A firm, stable and slip resistant area a minimum of 30 in by 48 in (915 mm by 1220 mm) shall be provided to allow for a forward or parallel approach to the controls.

14.2.7* Marked Crossings. Where provided, marked crossings shall be delineated with contrasting markings or materials (e.g., paint, brick, tile).

14.2.8 Pedestrian Overpasses and Underpasses. Grade-separated pedestrian overpasses and underpasses shall be connected to a sidewalk or other pedestrian circulation path by means of a ramp or elevator complying with 4.8 or 4.10 or, where permitted by 4.1.3(5), a platform lift (wheelchair lift) complying with 4.11.

14.3* Drinking Fountains, Telephones, Toilet Facilities, Fixed Seating, Tables and Benches. Where provided on or adjacent to a sidewalk as part of a public improvement project, the following elements shall be reasonably dispersed within the project area, taking into consideration the proximity and number of existing accessible elements:

(1) Drinking Fountains. At least 50 percent, but not less than one, of each drinking fountain provided shall comply with 4.15. Where only one drinking fountain is provided it shall be accessible to individuals who use wheelchairs in accordance with 4.15 and to those who have difficulty bending or stooping. This can be accomplished by the use of a "hi-lo" fountain; by providing one fountain accessible to those who use wheelchairs and one fountain at a standard height convenient for those who have difficulty bending; by providing a fountain accessible under 4.15 and a water cooler, or by other such means as would achieve the required accessibility for each group.

(2) Public Pay Telephones. Where single unit public pay telephones are provided, at least 50 percent, but not less than one, shall comply with 4.31.2 through 4.31.8. Where a bank of telephones (two or more adjacent public telephones, often installed as a unit) is provided, at least one telephone per bank shall comply with 4.31.2 through 4.31.8. Where two or more banks of telephones are provided, at least one telephone complying with 4.31.2 through 4.31.8 shall be mounted with the highest operable part no higher than 48 in (1220 mm). In addition, 25 percent, but not less than one, of all other public telephones provided shall be equipped with a volume control and shall be dispersed among all types of public telephones. Signage complying with applicable provisions of 4.30.7 shall be provided.

(3) Single User Toilet Facilities. At least 50 percent, but not less than one, of fixed single user toilet facilities shall comply with 4.22. Signage complying with 4.30.7 shall be provided on accessible units. In addition, signage complying with 4.30.2, 4.30.3, and 4.30.5 shall be provided on the inaccessible units indicating the location of the nearest accessible unit.

14.4 Vehicular Ways and Facilities

(4) Fixed Seating, Tables, and Benches. At least five percent, but not less than one, of the fixed seating and tables provided in a public improvement project shall comply with 4.32. At least five percent of fixed benches provided in a public improvement project shall have a minimum 24 in by 48 in (610 mm by 1220 mm) seating area, mounted 17 in to 19 in (430 mm to 485 mm) above the finished surface. Clear floor space shall be provided alongside the bench to allow a person using a wheelchair to make a parallel transfer onto the bench. The structural strength of the bench and attachments shall comply with 4.26.3.

14.4 Vehicular Ways and Facilities.

14.4.1 On-Street Parking. Where new on-street paid or time-limited parking is provided and designated in districts zoned for business uses, accessible on-street parking spaces shall be provided in accordance with the table in 4.1.2(5)(a). A 60 in (1525 mm) wide minimum access aisle shall be provided. The driving lane shall not encroach on the required access aisle. (See Fig. 61).

(1) Curb Ramps. A curb ramp or other sloped area complying with 14.2.5 shall connect the access aisle to the sidewalk by a continuous passage which is a minimum of 36 in (915 mm) wide.

(2)* Location. Accessible on-street parking spaces shall be dispersed throughout the project area.

(3) Signage. Accessible parking spaces shall be designated as reserved by a sign that complies with 4.30.7. Such signs shall be located so as to be visible from a driver's seat.

(4) Parking Meters. Where provided, parking meter controls shall be a maximum of 48 in (1220 mm) above the sidewalk or pedestrian circulation path. Controls and operating mechanisms shall be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to activate controls shall be no greater than 5 lbf (22.2N). A firm, stable and slip-resistant area a minimum of 30 in by 48 in (760 mm by 1220 mm), with the least possible slope, shall be provided at the controls and shall be connected to the sidewalk by a continuous passage that is a minimum of 36 in (915 mm) wide.

14.4.2 Roadside Emergency Communications Systems.

(1) Controls. Where provided, controls and operating mechanisms at roadside emergency communications system call boxes shall be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The highest operable part shall be at 54 in (1370 mm) above the finished grade at the call box location. The force required to activate controls shall be no greater than 5 lbf (22.2N).

(2) Communications. The system shall accommodate both visual and auditory acknowledgement of call receipt and shall not require voice communication.

(3)* Surface. A firm, stable, slip resistant surface a minimum of 30 in by 48 in (760 mm by 1220 mm) shall be provided a maximum of 10 in (255 mm) from the vertical plane of the face of the call box and shall be connected to the roadway shoulder, sidewalk, or pedestrian path by a continuous passage that is a minimum of 36 in (915 mm) wide.

14.5 Alterations. If existing elements are altered in the scope of a public improvement project, they shall be altered to comply with the applicable provisions of 4.1.6 and section 14.

14.6 Temporary Work. Construction and repair projects within the public right-of-way that affect pedestrian circulation elements, routes, or facilities shall comply with 4.1.1(4).

(1) Construction sites in the public right-of-way shall be protected with barriers to warn of hazards on the circulation path.

(2) The temporary circulation path from building entrances along a sidewalk or continuous passage to the nearest accessible street crossing shall be clearly marked.

Appendix

APPENDIX:

• • • • •

A7.0 Business and Mercantile.

A7.2(3)(iii) Counter or Teller Windows with Partitions. Methods of facilitating voice communication may include grills, talk-thru baffles, and other devices mounted directly into the partition which users can speak directly into for effective communication. Such methods should be designed or placed so that they can be used at both a standard height and a lower height appropriate for a person in a seated position.

A7.2(4) Assistive Listening Devices. *At all sales and service counters, teller windows, box offices, and information kiosks where a physical barrier separates service personnel and customers, it is recommended that at least one permanently installed assistive listening device complying with 4.33 be provided at each location or series. Where assistive listening devices are installed, signage should be provided identifying those stations which are so equipped.*

• • • • •

A10.4 Airports.

A10.4.1(8) Security Systems. This provision requires that, at a minimum, an accessible route or path of travel be provided but does not require security equipment or screening devices to be accessible. However, where barriers consist of movable equipment, it is recommended that they comply with the provisions of this section to provide passengers with disabilities the ability to travel with the same ease and convenience as the general public.

A11.0 Judicial, Legislative and Regulatory Facilities.

A11.1 All public use and common use areas are required to be accessible. In judicial, legislative and regulatory facilities, these include, but are not limited to, press rooms, conference rooms, and attorney lounges.

A11.2 Courtrooms, Hearing Rooms, and Chambers.

A11.2.1(2) Jury Boxes and Witness Stands. Figure 46 illustrates space requirements for two wheelchair seating spaces.

A11.2.1(4) Fixed Judges' Benches, Clerks' Stations, Speakers' Rostrums, and Raised Daises. Where courtrooms are assigned on a temporary basis, equipment should be on hand so that accessibility can be accomplished to at least one judge's bench and clerk's station within a few hours to accommodate court proceedings.

A11.2.1(5) Fixed Bailiffs' Stations, Court Reporters' Stations and Litigants' Stations. Providing appropriate maneuvering clearances such as knee clearance under tables should be considered when selecting furniture for accessible areas that will be utilized by the public such as the litigants' stations in a courtroom.

A11.3 Jury Assembly Areas and Jury Deliberation Areas.

A11.3.1(2) Fixed or Built-in Seating and Tables. Providing appropriate maneuvering space in the room and knee clearance under tables should be considered when selecting furniture for accessible areas that will be used by jurors.

A11.4 Courthouse Holding Facilities.

A11.4.3 Visiting Areas. Accessible cubicles or portions of counters may have fixed seats if the required clear floor space is provided within the area defined by the cubicle. Consideration should be given to the placement of grills, talk-thru baffles, intercoms, telephone handsets or other communication devices which should be usable from both the fixed seat and from the accessible seating area. If an assistive listening system is provided, the needs of the intended user and characteristics of the setting should be considered as described in A4.33.7 and Table A2.

A11.7 Two-Way Communication Systems. Two-way communication entry systems must provide both voice and visual display so that persons with hearing or speech impairments can utilize the system. This requirement may be met with a device that would allow security personnel to respond to a caller with a light indicating that assistance is on the way.

A11.8 Electrical Outlets, Wiring, and Conduit for Communication Systems. All courtrooms, hearing rooms (including

judges' chambers when used as hearing rooms), jury deliberation and jury orientation rooms, and meeting rooms designated for public use should be designed to take advantage of current and emerging technologies for providing information to persons with vision and hearing impairments. Since such persons may be litigants, jurors, witnesses, attorneys or courtroom personnel, it is important that the designated rooms be wired to support appropriate systems or that conduits or raceways be provided to facilitate future wiring as systems are added. For example, the use of so-called "smart" technology often includes bundled wiring harnesses which can be easily installed in new construction and can support a variety of current and future uses.

A11.9 Permanently Installed Assistive Listening Systems. In addition to the requirement for permanently installed assistive listening systems, section 11.8 (Electrical Outlets, Wiring, Conduit for Communication Systems) requires that all courtrooms, hearing rooms, jury deliberation and jury orientation rooms, and meeting rooms designated for public use in judicial, legislative or regulatory facilities have a duplex outlet and wiring, conduit or raceways to support communication equipment. This requirement is to facilitate the use of portable assistive listening systems.

A11.9(1) Judicial Facilities. Due to the large variation in the methods of assignment of courtrooms among jurisdictions, it is impossible to include an exhaustive list of each "type" of courtroom. "Type" is generally meant to include such distinct categories as civil courtroom(s), criminal courtroom(s), and family courtroom(s). For example, if a courthouse has 7 courtrooms and 3 are assigned to criminal matters, 2 are assigned to civil matters and 2 are assigned to family law matters, then section 11.9 would require that at least two criminal courtrooms, one civil courtroom and one family law courtroom have a permanently installed assistive listening system. In those facilities where courtrooms are not dedicated to a single type of proceeding, section 11.9 would require that 50 percent of all courtrooms provided have a permanently installed assistive listening system.

A11.9(2) Legislative and Regulatory Facilities. Permanently installed assistive listening systems are not required in conference rooms restricted to use by employees, consultants, and other invited guests or areas which are only occasionally or sporadically used for legislative or regulatory business such as a school board meeting held in a high school cafeteria. However, the Department of Justice's regulations implementing title II require public entities to take such steps as may be necessary to ensure effective communication with individuals with hearing impairments. See 28 CFR 35.160. Accordingly, a portable assistive listening system may be needed to provide communication access in the school board meeting held in the cafeteria.

A12.0 Detention and Correctional Facilities.

A12.1 General. All public and common use areas serving accessible cells or rooms are required to be accessible. In detention and correctional facilities, public areas would include visiting areas and other areas available to the general public. Common use areas include those areas serving a group of inmates or detainees, including, but not limited to, exercise yards and recreation areas, workshops and areas of instruction or vocational training, counseling centers, cafeterias, commissaries, and medical facilities. Detention and correctional facilities also contain areas that may be regarded as common use areas which specifically serve a limited number of housing cells or rooms. Where this occurs, only those common use areas serving accessible cells or rooms would need to be accessible as required by 12.5. For example, several housing cells may be located at and served by a dayroom or recreation room. In this instance, only those dayrooms serving accessible housing cells or rooms would need to be accessible.

A12.3 Visiting Areas. Accessible cubicles or portions of counters may have fixed seats if the required clear floor space is provided within the area defined by the cubicle. Consideration should be given to the placement of grills, talk-thru baffles, intercoms, telephone handsets or other communication devices which should be usable from both the fixed seat and from the accessible seating area. If an assistive listening system is provided, the needs of the intended user and characteristics of the setting should be considered as described in A4.33.7 and Table A2.

A12.4 Holding and Housing Cells or Rooms: Minimum Number.

A12.4.1 Holding Cells and General Housing Cells or Rooms. Many detention and correctional facilities are designed so that certain areas (e.g., "shift" areas) can be adapted to serve as different types of housing according to need. For example, a shift area serving as a medium security housing unit might be redesignated for a period of time as a high security housing unit to meet capacity needs. Consequently, it is recommended that consideration be given to the placement of some accessible cells or rooms in shift areas to allow for the greatest flexibility in housing persons with disabilities.

A13.0 Accessible Residential Housing.

A13.1 General. The requirements for transient lodging in section 9 differ from residential housing in this section. Residential housing includes, but is not limited to, single family homes, which may be a facility consisting of one dwelling unit, and multifamily dwelling facilities, which are those facilities consisting of more than one dwelling unit. A facility may consist of more than one building within a single site, such as garden apartments and townhouses. Examples of single family dwelling units include official residences, such as those provided for governors and state university presidents and single family housing provided as public housing. Multifamily dwelling units include public housing projects and apartments. Residential housing also includes dwelling units that are used to accommodate live-in employees such as faculty, visiting fellows, care-takers, rangers and curators. With respect to colleges and universities, student apartments containing dwelling units are considered residential housing.

A13.2 Minimum Number and Dispersion.

A13.2.2 New Construction: Dispersion. When dispersing accessible dwelling units throughout a facility, persons with disabilities must have the same choices regarding the type of unit as other members of the public. For instance, it would not be acceptable to offer only one bedroom accessible units when units with two and three bedrooms are also offered in the same facility. In addition, the availability of amenities such as view or the proximity to fitness facilities must also be comparable. For example, it is not acceptable to locate all accessible units on a side of a building overlooking an interior courtyard while inaccessible units are provided with exterior views.

A13.2.3 Alterations: Minimum Number and Dispersion. The following example illustrates the requirements of 13.2.3(1). An existing facility containing one hundred multifamily residential dwelling units is the subject of ten consecutive alterations over a period of ten years. Each year, ten units are altered. During the first five years, at least one unit of the ten altered units must comply with 13.3, 13.4 and 13.5 (five percent but not less than one) until the total number, five percent, required for the facility overall is achieved. Similarly, as part of the alterations during the first two years, one unit complying with sections 13.4 and 13.5 must be provided in addition to those which are accessible to people with mobility, hearing and vision impairments until the two percent minimum is achieved in units accessible to persons with hearing impairments and persons with visual impairments.

A13.3 Requirements for Accessible Dwelling Units.

A13.3.2 Minimum Requirements. An accessible second exit from dwelling units is recommended for emergency evacuation purposes.

A13.3.4(5) Sinks. Installing a sink with a drain at the rear so that plumbing is as close to the wall as possible can prevent garbage disposal units from obstructing the required clear knee space.

A13.3.4(6) Ranges and Cooktops. Although not required for minimum accessibility, countertop range units in a counter with adjustable heights can be an added convenience for wheelchair users.

A13.3.4(7) Ovens. Countertop or wall-mounted ovens with side-opening doors provide greater access. Clear space at least 30 in (760 mm) wide under counters at the side of ovens are an added convenience. The pull-out board or fixed shelf under side-opening oven doors provides a resting place for heavy items being moved from the oven to a counter.

A13.3.4(8) Refrigerator and Freezers. Side-by-side refrigerators and freezers provide the most usable freezer compartments. Locating refrigerators so that their doors can swing 180 degrees provides greater access by increasing maneuvering space so that knee and toe clearance is provided on the hinge side. Reaching items placed far back on the hinge side will be easier if the door arrangement permits the optimal maneuvering space.

A13.3.4(10) Kitchen Storage. Pantry type cabinets or tall cabinets can be provided rather than cabinets mounted over work counters. Additional storage space located conveniently adjacent to kitchens can be provided to make up for space lost when cabinets are not provided under sinks and work surfaces.

A14.0 Public Rights-of-Way.

A14.1 General. This section applies access provisions to pedestrian areas, elements, and facilities constrained by terrain, vehicular roadways, and existing buildings or elements of the pedestrian circulation network. Other areas or sites constructed or altered as part of a public improvement project such as plazas or courts where the constraints listed above do not apply are subject to the applicable provisions of ADAAG 4.1.1 through 4.35. (See appendix note A14.2.1).

A14.1.1 Definitions.

Public Improvement Project. Public improvement projects undertaken by or on behalf of a State or local government include, but are not limited to, work in the public right-of-way such as the construction or installation of site improvements and pedestrian amenities; the widening or realignment of a street, and the upgrading of a sewer, drainage system, or other utility. These projects are largely concerned with the infrastructure of a jurisdiction and are typically planned and budgeted in a multi-year capital improvements program or as an annual maintenance and repair line item. Projects may be undertaken within clearly defined boundaries or may consist of the installation of a typical item (e.g., drinking fountains, toilets, benches, curb ramps) dispersed throughout an area or jurisdiction.

Public entities which may later accept pedestrian circulation elements and networks constructed by private entities should ensure, through the permit process, that such elements and systems meet the requirements of this section.

Sidewalk. Unlike the definition of "walk", the definition of "sidewalk" does not include general pedestrian areas such as plazas and courts which can be designed, altered, and constructed to meet the requirements of 4.1 through 4.35. A court or plaza within the public right-of-way may be surrounded by sidewalks. While the sidewalk must conform to adjacent road slope and connect to existing sidewalks, which limits the ability to fully comply with 4.1 through 4.35, a newly-constructed court or plaza, like public sites generally, can be graded so that walks within it can either provide a slope less than 1:20 or meet the requirements for ramps in ADAAG 4.8.

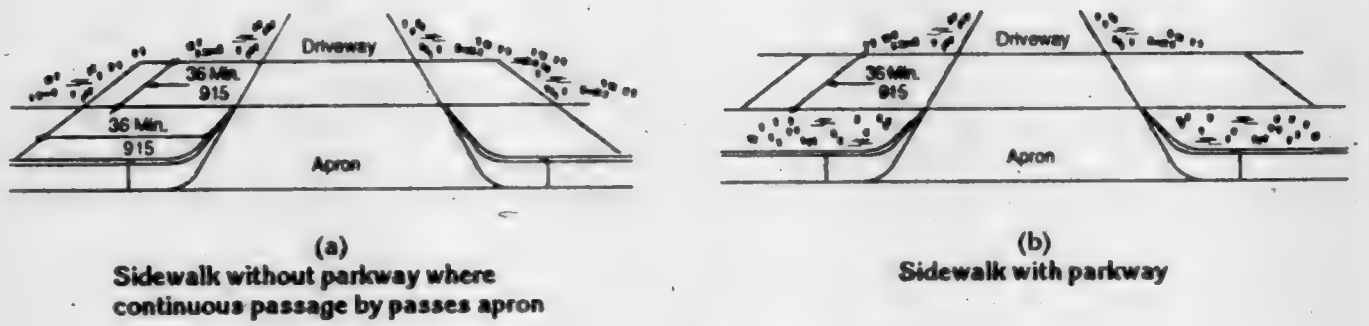
A14.2 Sidewalks.

A14.2.1 Minimum Requirements. Section 4.1.2(1) requires accessible elements on a site to be connected by an accessible route. Where the required accessible route is coincident with that of the sidewalk or continuous passage along it required by 14.2.1, the requirements of 4.3 prevail. The provisions of section 14 do not preclude sidewalk segments at different levels or sidewalks with stairs (which are sometimes advantageous in providing access to building entrances on or along steeply sloping sites) provided that a continuous passage within the sidewalk serves each accessible entrance and is connected to a continuous accessible sidewalk. Where a sidewalk contains steps or where sidewalk levels diverge, a railing, planter or other barrier separating the levels is recommended. Stairs abutting a sidewalk should have uniform riser heights and uniform tread widths.

A14.2.1(1) Slope. Cross slopes on portions of sidewalks adjacent to the continuous passage required by 14.2 may exceed 1:50 (2 percent) provided that the adjacent portions are smoothly blended. This may facilitate connecting the clear passage to building entrances, facilities or other pedestrian circulation elements.

A14.2.1(4) Separation. Narrow sidewalks immediately adjacent to the curb or roadway may be offset to avoid a non-conforming cross slope at driveway aprons by diverting the sidewalk around the apron. Sidewalks separated from the curb or roadway by a planted

A14.2 Sidewalks



(a)
Sidewalk without parkway where continuous passage by passes apron

(b)
Sidewalk with parkway

Fig. A9
Sidewalks at Driveway Aprons

parkway can accommodate an apron within the width of the parkway. (See Fig. A9).

A14.2.4 Protruding Objects. These provisions apply to the entire width of a sidewalk. Many objects on or along a sidewalk, such as newspaper vending machines, trash receptacles and construction barricades, are not fixed and thus are not subject to these guidelines but may nevertheless be covered under the Department of Justice rule regarding maintenance of accessible features. (See 28 CFR 35.133). Tree branches should also be trimmed periodically to comply with provisions for required head room.

A14.2.7 Marked Crossings. Marked crossings should be provided at the following areas: State and local government buildings and facilities, transportation facilities, places of public accommodation, at irregular intersections, and at mid block crossings.

A14.3 Drinking Fountains, Telephones, Toilet Facilities, Fixed Seating, Tables and Benches. Drinking fountains, telephones, toilet facilities and fixed seating, tables, and benches shall be reasonably dispersed within the project area. However, where one area of the project already has more existing accessible elements than another area, the new accessible elements should be dispersed within a portion of the project area where there are fewer or none, or at project boundaries with areas not served by existing accessible elements. Where there are no existing accessible elements, the distribution may be uniformly dispersed or dispersed in the same proportion as all units as required by the public improvement project.

A14.4 Vehicular Ways and Facilities.

A14.4.1(2) Location. Accessible on-street parking spaces located immediately adjacent to intersections may be served by sidewalk curb ramps, provided that the path of travel from the access aisle to the curb ramp is within the pedestrian crossing area. To the maximum extent feasible, accessible on-street parking should be located in level areas.

A14.4.2(3) Surface. The level surface at the call box must be connected to the roadway shoulder, sidewalk or pedestrian path. This does not require that paved shoulders or sidewalks be provided, but it does require that a person using a wheelchair be able to reach the level surface from the roadway shoulder. This would prohibit the level surface from being separated from the roadway by a ditch, gutter, curb, or other barrier.

Department of the Treasury

Fiscal Service

31 CFR Part 205
Rules and Procedures for Funds Transfers; Final Rule

DEPARTMENT OF THE TREASURY

Fiscal Service

31 CFR Part 205

RIN Number—1510–AA19

Rules and Procedures for Funds Transfers

AGENCY: Treasury, Fiscal, Financial Management Service.

ACTION: Final Rule: Revision.

SUMMARY: On September 24, 1992, the Financial Management Service published in the **Federal Register** (57 FR 44272) a Final Rule (31 CFR part 205) implementing the interest accrual provisions of the Cash Management Improvement Act of 1990 for the transfer of funds between Federal agencies and States. The effective date of those provisions was amended by the Cash Management Improvement Act Amendments of 1992 (Pub. L. 102–589). This Final Rule only revises part 205 to reflect the amended compliance date provisions; it does not make any other changes to part 205. However, in order to facilitate the implementation of part 205 by States and affected Federal agencies, the complete text of part 205, as amended, is published by this final rule.

EFFECTIVE DATE: December 21, 1992.

ADDRESSES: Financial Management Service, CMIA Program Manager, Room 521C, 401 14th Street SW, Washington, DC 20227.

FOR FURTHER INFORMATION CONTACT:

John Galligan, (Program Manager), (202) 874–6935.
Gary Grippo, (Program Specialist), (202) 874–6955.
Christopher Kubeluis, (Program Specialist), (202) 874–6873.
Steven D . Laughton, (Principal Attorney), (202) 874–6680.
Randall S. Lewis, (Principal Attorney), (202) 874–6680.

SUPPLEMENTARY INFORMATION:

Background

On September 24, 1992, the Financial Management Service issued a Final Rule to implement the Cash Management Improvement Act of 1990, Public Law 102–453, codified at 31 U.S.C. 3335 and 6503. 57 FR 44272. Subsequently, the Cash Management Improvement Act Amendments of 1992, Public Law. 102–589, amended the 1990 Act by changing the effective date of the interest accrual provisions of the 1990 Act, codified at subsections (c) and (d) of § 6503 of title 31, United States Code, from October 24, 1992 to July 1, 1993, or the first day of a State's 1994 fiscal year, whichever is later.

The final rule published on September 24, 1992, implemented the statutory requirement that then existed for the interest liability to begin to accrue as of October 24, 1992, by including a section, 31 CFR 205.5, that described the period from October 24, 1992, to the later of June 30, 1993, or the last day of a State's 1993 fiscal year as the Onset Period. During the Onset Period, special rules would have applied to minimize the disruption and inconvenience resulting from the commencement of interest accrual liability on October 24, 1992.

The enactment of the Cash Management Improvement Act Amendments of 1992 changed the effective date of the interest accrual provisions of the 1990 Act from October 24, 1992, to the later of July 1, 1993, or the first day of a State's 1994 fiscal year. The Onset Period section, 31 CFR 205.5, in the final rule has been removed, and references to the Onset Period section throughout the final rule have been removed to make the rule consistent with the amended statute.

Section 205.5 has been reserved due to the removal of the Onset Period from the final rule.

Regulatory Analysis

Because this rule merely conforms the effective date provisions of part 205 to a change in the law, it is a rule of agency management not subject to Executive Order 12291. Because no notice of proposed rulemaking is required by 5 U.S.C. 553 or any other law, the provisions of the Regulatory Flexibility Act (5 U.S.C. 601) do not apply.

Notice and Comment

Because this rule merely conforms the effective date provisions of part 205 to the 1992 Act, notice and public procedure are not required pursuant to 5 U.S.C. 553 (a)(2) and (b)(B). For this reason, and because this rule merely grants an exemption by deferring the October 24, 1992, effective date of the existing regulations, a delayed effective date is not required pursuant to 5 U.S.C. 553(d) (1) and (3).

List of Subjects in 31 CFR Part 205

Electronic Fund Transfers, Grant Administration, Grant programs, Intergovernmental relations.

Authority and Issuance

For the reasons set forth in the preamble, 31 CFR part 205 is revised to read as follows.

PART 205—RULES AND PROCEDURES FOR FUNDS TRANSFERS

Sec.

205.1 Purpose
205.2 Scope of part.
205.3 Definitions.

Subpart A—Negotiation of Intergovernmental Agreements for Financing Federal Assistance Programs—Interest Liabilities on Intergovernmental Funds Transfers

205.4 Scope of subpart.
205.5 [Reserved]
205.6 Funding techniques.
205.7 Requesting and transferring funds.
205.8 Clearance patterns.
205.9 Treasury-State Agreements.
205.10 Funding of indirect costs and administrative cost grants.
205.11 Federal interest liabilities.
205.12 State interest liabilities.
205.13 Interest calculation.
205.14 Direct costs of implementation.
205.15 Annual reports.
205.16 Interest payment.
205.17 Compliance and oversight.
205.18 Appeals and dispute resolution.

Appendix A to Subpart A of Part 205—Definition of Major Federal Assistance Program

Subpart B—Potential Liabilities on Intergovernmental Funds Transfers Included in the Catalog of Federal Domestic Assistance but Otherwise Generally Excluded From Subpart A

205.19 Scope of subpart.
205.20 Cash advances.
205.21 Federal agency oversight responsibilities.
205.22 State noncompliance.
205.23 Failure to make funds available.

Subpart C—[Reserved]

Authority: 5 U.S.C. 301; 31 U.S.C. 321, 3335, 6501, 6503.

§ 205.1 Purpose.

Subparts A and B of this part implement the Cash Management Improvement Act and prescribe rules and procedures for the transfer of funds between the Federal Government and the States for Federal grant and other programs. Subpart C of this part is reserved and, if issued, may implement other authorities and govern transactions outside the scope of subparts A and B.

§ 205.2 Scope of part.

(a) Subparts A and B apply to programs listed in the Catalog of Federal Domestic Assistance, Pursuant to chapter 61 of title 31, United States Code.

(b) This Part does not generally apply to direct loan programs.

(c) This Part does not apply to payments made to States acting as vendors on Federal contracts, which are

subject to the Prompt Payment Act of 1982, as amended, 31 U.S.C. 3901 *et seq.*, Office of Management and Budget (OMB) Circular A–125 "Prompt Payment," and 48 CFR part 32.

(d) This Part does not apply to the Tennessee Valley Authority (TVA) or programs administered by the TVA.

§ 205.3 Definitions.

For the purpose of this part:

Administrative cost grant means a grant exclusively for administrative expenses under a program with separate grant awards for benefit payments and administrative expenses.

Auditable means the sources of data and information for a calculation are readily available, fully documented, and verifiable, such that the calculation can be replicated and proven to comply with all pertinent standards.

Authorized State official means a person with the authority under the laws of a State to make commitments on behalf of the State for the purposes of this regulation, or that person's official designee as certified in writing.

Check means a negotiable demand draft or warrant.

Clearance pattern means a frequency distribution showing the proportion of a total amount disbursed that is debited against the payor's bank account each day after the disbursement.

Current project cost means a cost for which the liability has been recorded on or after the day on which a State last requested funds for the project.

Day means a calendar day unless otherwise specified.

Disburse means to issue a check or initiate an electronic funds transfer payment.

Discretionary grant project means a project for which a Federal agency is statutorily authorized to exercise judgment in awarding a grant and in selecting a grantee, generally through a competitive process.

Drawdown means a process whereby a State requests and receives Federal funds.

Electronic funds transfer (EFT) means, in the context of Federal payments to States, the delivery of funds through wire transfer or the Automated Clearing House.

Equivalent rate means auction average equivalent yield, also known as the auction average investment rate of 13-week Treasury bills.

Federal agency means an executive agency as defined by section 102 of title 31, United States Code, exclusive of the TVA.

Federal-State agreement means an agreement between a State and a Federal program agency specifying terms and conditions for carrying out a program or group of programs, but does not mean a Treasury-State Agreement described in § 205.9.

Fiscal year means, unless otherwise indicated, a State's budget year ending in the specified calendar year.

Issue checks means to release or distribute checks to the payees.

Major Federal assistance program is defined in appendix A to subpart A of this part.

Obligational authority means the existence of a definite commitment on the part of the Federal Government to provide appropriated funds to a State to carry out specified programs, whether the commitment is executed before or after a State pays out funds for program purposes. This term means that an obligation to a State has been executed and does not refer to the amount of budgetary resources available.

Pay out means to debit the payor's bank account.

Pay out funds for program purposes means, in the context of State payments, to debit a State account for the purpose of making a payment to:

(1) A person or entity that is not considered part of the State pursuant to the definition of "State" in this section, or

(2) A State entity for the procurement of goods or services for the direct benefit or use of the payor State entity or the Federal Government.

Program means the range of activities encompassed under, and classified by, a Catalog of Federal Domestic Assistance number (CFDA #).

Refund means a recovery of funds previously paid out for program purposes.

Related banking costs means stand-alone, non-credit services which are considered necessary and/or customary for sustaining an account in a financial institution, whether in commercial financial institutions or State Treasurer accounts. Investment service fees are not related banking costs.

Request for funds means a solicitation for funds that is completed and submitted in accordance with Federal agency guidelines.

Secretary means the Secretary of the United States Department of the Treasury. The Financial Management Service (FMS) is the Secretary's representative in all matters concerning this Part, unless otherwise specified.

State means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, American Samoa, Guam, the Virgin Islands, and an agency, instrumentality, or fiscal agent of a State so defined, but does not mean a local government or an Indian tribal government.

A State agency or instrumentality is any organization or component unit of the State reporting entity as defined by Generally Accepted Accounting Principles.

A fiscal agent of a State is an entity that pays, collects, or holds Federal funds on behalf of the State in furtherance of a Federal program, exclusive of a private nonprofit community organization.

Trust fund for which the Secretary is the trustee means a trust fund administered by the Secretary.

Subpart A—Negotiation of Intergovernmental Agreements for Financing Federal Assistance Programs—Interest Liabilities on Intergovernmental Funds Transfers

§ 205.4 Scope of subpart.

(a) *Initial programs.* From the later of July 1, 1993, or the first day of a State's 1994 fiscal year, to the end of a State's 1994 fiscal year, this Subpart applies, at a minimum, to the following programs, provided they meet the threshold for major Federal assistance programs in the State:

Alcohol and Drug Abuse and Mental Health Services Block Grant (CFDA 93.992);
Chapter 1 Programs—Local Educational Agencies (CFDA 84.010);
Child Support Enforcement (CFDA 93.023);
Family Support Payments to States (CFDA 93.020);
Foster Care—Title IV–E (CFDA 93.658);
Highway Planning and Construction (CFDA 20.205);
Job Opportunities and Basic Skills Training (CFDA 93.021)
Job Training Partnership Act (CFDA 17.250);
Low-Income Home Energy Assistance (CFDA 93.028);
Medical Assistance Program (CFDA 93.778);
National School Lunch Program (CFDA 10.555);
Nutrition Assistance for Puerto Rico (CFDA 10.566).
Pell Grant Program (CFDA 84.063);
Rehabilitation Services—Basic Support (CFDA 84.126);
Social Services Block Grant (CFDA 93.667);
Special Education—State Grants (CFDA 84.027);
Special Supplemental Food Program for Women, Infants, and Children (CFDA 10.557);
State Administration Matching Grants—Food Stamp Program (CFDA 10.561);

Supplemental Security Income (CFDA 93.807);
Unemployment Insurance (CFDA 17.225);

(b) *Threshold of materiality.* From the beginning of a State's 1995 fiscal year and thereafter, this Subpart applies, at a minimum, to all programs that meet the threshold for major Federal assistance programs in a State.

(c) *Determining major Federal assistance programs.* Unless otherwise specified in a Treasury-State Agreement, major Federal assistance programs will be determined from the most recent Single Audit data available from the U.S. Bureau of the Census and, if necessary, other data from the most recent fiscal year for which funding can be documented.

(d) *Covering additional programs.* A State and the FMS may agree, in a Treasury-State Agreement, to cover additional programs under this subpart. However, the FMS has unilateral authority to require a State and a Federal agency to cover additional programs under this subpart if a State or a Federal agency fails to comply with subpart B of this Part, as set forth in §§ 205.22 and 205.23.

(e) *Programs not covered by this subpart.* Programs in the Catalog of Federal Domestic Assistance that are not covered by this subpart are subject to subpart B of this Part.

(f) *Grace period for colleges and universities.* Unless otherwise specified in a Treasury-State Agreement, this subpart does not apply to a State institution of higher education prior to a State's 1995 fiscal year, notwithstanding any other provision of this section.

§ 205.5 [Reserved].

§ 205.6 Funding techniques.

(a) *Zero balance accounting.* Zero balance accounting is a method of transferring Federal funds to a State based on the actual amount of funds that are paid out by the State each day after a disbursement. Neither the Federal Government nor a State will incur an interest liability when this funding technique is properly applied.

(b) *Estimated clearance.* Estimated clearance is a method of transferring Federal funds to a State based on the estimated amount of funds that are paid out by the State each day after a disbursement. Neither the Federal Government nor a State will incur an interest liability when this funding technique is properly applied.

Example: A State mails $1 million in checks to benefit recipients under a Federally funded program. The State has developed the following clearance pattern for the program, based on when checks historically have been presented for payment:

Day	Percentage of dollars paid out
0 (checks mailed)	0
1	0
2	0
3	0
4	40
5	30
6	15
7	10
8	5

On Day 3, the State requests 40 percent of the funds disbursed, or $400,000, and the Federal agency deposits funds in the State account on Day 4 to coincide with the expected presentment of 40 percent of the total disbursement. On Day 4, the State requests 30 percent of the funds to pay for checks presented on Day 5, and so on. Furthermore, if the State draws down $400,000 to pay for checks presented on Day 4, neither the State nor the Federal Government will incur an interest liability if the amount of checks actually presented is more or less than $400,000. Over the long term, the amounts drawn down and the amounts of checks presented for payment will converge to the historical clearance pattern.

(c) *Pre-issuance funding.* Pre-issuance funding is a method of transferring Federal funds to a State prior to the day the State issues checks or initiates EFT payments. When this funding technique is applied, a State will incur an interest liability to the Federal Government from the day Federal funds are credited to a State account to the day the State pays out the funds for programs purposes.

Example: Three business days before a State issues $1 million in checks, it requests $1 million from a Federal agency, which deposits the funds in a State account the next day. The State has developed the following clearance pattern, based on when the State's checks historically have been presented for payment:

Day	Percent of dollars paid out
0 (funds deposited)	0
1	0
2 (checks issued)	0
3	0
4	0
5	40
6	30
7	15
8	10
9	5

The State will owe the Federal Government 5 days of interest on 40 percent of the funds, or $400,000, since that amount will be paid out for checks presented 5 days after Federal funds are deposited in a State account. The State will owe 6 days of interest on 30 percent of the funds, or $300,000, 7 days of interest on 15 percent of the funds, and so on.

(d) *Average clearance.* Average clearance is a method of transferring funds to a State based on the dollar-weighted average number of days required for funds to be paid out by the State after a disbursement. Neither the Federal Government nor a State will incur an interest liability when this funding technique is properly applied.

Example: A State mails $1 million in checks to contractors for a Federally funded program. The State has developed the following clearance pattern, based on when checks historically have been presented for payment, and has determined the average day of clearance, weighted by dollar amount, to be 5 days after checks are issued:

Day	Percent of dollars paid out	Factor (day x percentage)
0 (checks issued)	0	
1	0	
2	0	
3	0	
4	40	1.60
5	30	1.50
6	15	0.90
7	10	0.70
8	5	0.40
Average day of clearance		5.10

The State requests $1 million on day 4 and receives that amount on day 5, which is the dollar-weighted average number of days required for checks to be presented at the State's bank, and neither the State nor the Federal Government incurs an interest liability.

(1) In determining a dollar-weighted average day of clearance, fractions of days are rounded to the nearest whole number.

(2) The standards and maintenance requirements for clearance patterns, as set forth in § 205.8, apply for average day of clearance calculations.

(e) *Reimbursable funding.* Reimbursable funding is a method of transferring Federal funds to a State after the State has paid out its own funds for program purposes. After June 30, 1994, reimbursable funding is prohibited, except where mandated by Federal law.

§ 205.7 Requesting and transferring funds.

(a) *Electronic funds transfer.* To the maximum extent practicable, a Federal agency shall use EFT for transfers of funds to a State.

(b) *Minimizing the time between transfer and payment.* A State and a Federal agency shall minimize the time

elapsing between the transfer of funds from the United States Treasury and the pay out of funds for program purposes by a State, whether the transfer occurs before or after the pay out.

(c) *Procedures for funding techniques.* Unless otherwise specified in a Treasury-State Agreement, a State and a Federal agency shall adhere to the following procedures for each funding technique:

(1) *Zero balance accounting.* A State shall request funds the same day it pays out funds for program purposes, and a Federal agency shall deposit funds in a State account the same day it receives a request for funds.

(2) *Estimated clearance.* A State shall request funds 1 business day prior to the day it expects to pay out funds, in accordance with a clearance pattern, and a Federal agency shall deposit funds in a State account the next business day after receiving a request for funds.

(3) *Average clearance.* A State shall request funds 1 business day prior to the dollar-weighted average number of days required for funds to be paid out after a disbursement, and a Federal agency shall deposit funds in a State account the next business day after receiving a request for funds.

(4) *Pre-issuance funding.* A State shall request funds not more than 3 business days prior to the day on which it makes a disbursement, and a Federal agency shall deposit funds in a State account the next business day after receiving a request for funds.

(5) *Reimbursable funding.* A State shall request funds only after it has paid out its own funds for programs purposes, and a Federal agency shall deposit funds in a State account the next business day after receiving a request for funds.

(d) *Limiting the amount transferred.* Consistent with a funding technique and with funds transfer procedures in a Treasury-State Agreement, a State and a Federal agency shall limit the amount of funds transferred to a State to the minimum required to meet a State's actual, immediate cash needs.

(e) *Frequency of requests for funds.* A Federal agency shall allow a State to submit requests for funds, or bills, as often as daily. However, this requirement shall not be construed to change Federal agency guidelines defining a properly completed request for funds.

(f) *Prohibition of reimbursable funding requirements.* A Federal agency may not require a State to use reimbursable funding, unless mandated by Federal law.

§ 205.8 Clearance patterns.

(a) *Use and basis of development.* When required by a funding technique, a clearance pattern will be used to schedule the transfer of funds to a State and to support the calculation of interest. A State may:

(1) Develop a separate clearance pattern for an individual program; or

(2) Develop a composite clearance pattern for a logical group of programs that have the same disbursement method and that reasonably can be expected to have comparable clearance activity. A composite clearance pattern for a group of programs must be applied separately to each program in the group when scheduling funds transfers or calculating interest; or

(3) Develop a clearance pattern on another basis that is agreed upon by the FMS.

(b) *Standards for clearance patterns.* A State shall ensure that a clearance pattern accurately represents the flow of Federal funds and that a clearance pattern reflects seasonal or other periodic variations in clearance activity. A State shall ensure that a clearance pattern is auditable.

(c) *Maintaining clearance patterns.*

(1) If a State has actual or constructive knowledge, at any time, that a clearance pattern does not correspond to a program's clearance activity, or if a program undergoes operational changes that may affect clearance activity, the State shall:

(i) Immediately notify the FMS in writing of the program requiring a new clearance pattern, and

(ii) Develop a new clearance pattern and certify that it corresponds to a program's clearance activity.

(2) If a Federal agency has actual or constructive knowledge, at any time, that a State's clearance pattern does not correspond to a program's clearance activity, the agency shall notify the FMS in writing of the State and the program. The FMS shall immediately notify the State of the programs, and the State shall either:

(i) Develop a new clearance pattern and certify that it corresponds to a program's clearance activity, or

(ii) Re-certify the accuracy of the existing clearance pattern.

(d) *Certification for accuracy.* An authorized State official shall certify that a clearance pattern corresponds to a program's clearance activity. If a State develops a clearance pattern for a program or a group of programs, as set forth in paragraphs (a)(1) and (a)(2) of this section, an authorized State official shall re-certify the accuracy of the clearance pattern at least every 5 years. If a State develops a clearance pattern on another basis, as set forth in paragraph (a)(3) of this section, the FMS may prescribe requirements for re-certifying the accuracy of the clearance pattern.

§ 205.9 Treasury-State agreements.

(a) *Purpose.* A State may enter into a Treasury-State Agreement with the FMS to set forth terms and conditions for implementing this Subpart.

(b) *Components.* A Treasury-State Agreement pursuant to this Subpart must include, but will not be limited to, the following:

(1) *Programs.* Consistent with § 205.4, a Treasury-State Agreement must indicate the programs subject to this Subpart.

(2) *Funding techniques.* A Treasury-State Agreement must indicate the funding techniques to be applied to the programs subject to this Subpart, in accordance with the following:

(i) Zero Balance Accounting, Estimated Clearance, and Pre-Issuance Funding are techniques available for selection by a State, subject to the approval of the FMS.

(ii) A State may request approval to use the Average Clearance funding technique, but must provide the FMS with adequate justification for its use in lieu of Estimated Clearance.

(iii) Reimbursable funding is available for selection by a State, subject to the approval of the FMS, only for a program for which the State used reimbursable funding prior to the later of July 1, 1993, or the first day of a State's 1994 fiscal year. However, reimbursable funding is not available for selection by a State for the programs listed in § 205.4(a).

(iv) A State and the FMS may negotiate the use of other mutually agreed upon funds transfer procedures.

(v) A State may apply more than one funding technique or funds transfer procedure to a program with multiple cash flows.

(3) *Interest calculation method.* Consistent with § 205.13, a Treasury-State Agreement must indicate the method a State will use to calculate and document interest liabilities pursuant to this Subpart.

(4) *Clearance pattern method.* Consistent with § 205.8, a Treasury-State Agreement must indicate the method and standards a State will use to develop and maintain clearance patterns pursuant to this Subpart.

(5) *Direct costs.* Consistent with § 205.14, a Treasury-State Agreement must specify the types of direct costs a State expects to incur.

(6) *Reverse flow programs.* Consistent with §§ 205.8 and 205.13, with respect to programs for which the Federal

Government makes payments on behalf of a State, a Treasury-State Agreement must indicate the methods a Federal agency will use to calculate and document interest liabilities and to develop and maintain clearance patterns pursuant to this Subpart.

(c) *Consultation with Federal agencies.* The FMS will consult with Federal program agencies as necessary and appropriate when negotiating a Treasury-State Agreement.

(d) *Amendment.* A Treasury-State Agreement may be amended by the mutual written consent of the State and the FMS.

(e) *Five-year expiration.* A Treasury-State Agreement expires if it is not amended for 5 years.

(f) *Default provisions for a State without a Treasury-State Agreement.* With respect to a State that does not have a Treasury-State Agreement in effect after the later of June 30, 1993, or the last day of the State's 1993 fiscal year, the following apply:

(1) The FMS shall prescribe funds transfer procedures to be used by the State and the Federal agency in implementing this subpart, consistent with Federal and State law.

(2) The FMS shall prescribe the method for calculating interest liabilities pursuant to this subpart.

§ 205.10 Funding of indirect costs and administrative cost grants.

(a) A State and the FMS may agree, in a Treasury-State Agreement, to the following funding conventions for indirect costs and administrative cost grants:

(1) The State will draw down a prorated amount of an administrative cost grant on the date of the State payday. For example, the State would draw one-third of a quarterly administrative cost grant if payroll is monthly, or one-sixth of a quarterly administrative cost grant if payroll is semi-monthly.

(2) If an indirect cost rate is applied to a program, the State will include a proportionate share of the indirect cost allowance in each drawdown by applying the indirect cost rate to the appropriate direct costs of each drawdown.

(3) If costs must be allocated to various programs pursuant to a labor distribution or other system under an approved cost allocation plan, the State will draw down funds to meet cash outlay requirements based on the most recent, certified cost allocations, with subsequent adjustments pursuant to the actual allocation of costs.

(b) A State and the FMS may agree, in a Treasury-State Agreement, that no interest liabilities will be incurred or calculated for indirect costs and administrative cost grants, notwithstanding any other provision of this subpart.

§ 205.11 Federal interest liabilities.

(a) *General.* The Federal Government will incur an interest liability to a State if the State pays out its own funds for program purposes with valid obligational authority under Federal law, Federal regulation, or Federal-State agreement. A Federal interest liability will accrue from the day a State pays out its own funds for program purposes to the day Federal funds are credited to a State account.

(b) *Late appropriations.* If a State pays out its own funds for program purposes due to delay in passage of a Federal appropriations act, the Federal Government will incur an interest liability if an appropriations act, as enacted, covers the period of the State's expenditure and permits payment for expenses already incurred by the State.

(c) *Lack of obligational authority other than occurring through late appropriations.* If a State pays out its own funds for program purposes without obligational authority, the Federal Government will incur an interest liability if the lack of obligational authority is not the result of limitation, reduction, or termination of the program and where obligational authority is subsequently established to permit payment for the State's expenditure.

(d) *Federal Highway Trust Fund.* The following applies to programs and projects funded out of the Federal Highway Trust Fund, notwithstanding any other provision of this section:

(1) If a State does not request funds at least weekly for current project costs, a Federal interest liability will not accrue prior to the day a State submits a request for funds.

(2) If a State pays out its own funds in the absence of a project agreement or in excess of the Federal obligation in a project agreement, the Federal Government will not incur an interest liability.

(e) *Discretionary grant project approval.* If a State pays out its own funds prior to the earlier of:

(1) The day a Federal agency officially notifies the State in writing that a discretionary grant project has been approved, or

(2) The date that a Federal agency is otherwise obligated in law to pay the discretionary grant project to the State, the Federal Government will not incur an interest liability, notwithstanding any other provision of this section.

(f) *Authorizations and appropriations for future years.* If a State pays out its own funds prior to the availability of Federal funds that have been authorized or appropriated for a future Federal fiscal year, the Federal Government will not incur an interest liability, notwithstanding any other provision of this section.

(g) *Reverse flow programs.* With respect to programs for which the Federal Government makes payments on behalf of a State, such as Supplemental Security Income, the Federal Government will incur an interest liability if State funds are in a Federal Government account prior to the day a Federal agency pays out funds for program purposes. A Federal interest liability will accrue from the day State funds are credited to the Federal Government's account to the day the Federal agency pays out the State funds for program purposes.

§ 205.12 State interest liabilities.

(a) *General.* A State will incur an interest liability to the Federal Government if Federal funds are in a State account prior to the day the State pays out funds for program purposes. A State interest liability will accrue from the day Federal funds are credited to a State account to the day the State pays out the Federal funds for program purposes.

(b) *Refunds.* A State will incur an interest liability to the Federal Government on a refund transaction of Federal funds. A State interest liability will accrue from the day the refund is credited to a State account to the day the refund is either paid out for program purposes or credited to a Federal Government account. However, a State may adopt a transaction threshold not exceeding $10,000, below which the State will not incur an interest liability on a refund transaction.

(c) *Reverse flow programs.* With respect to programs for which the Federal Government makes payments on behalf of a State, such as Supplemental Security Income, a State will incur an interest liability to the Federal Government if a Federal agency pays out Federal funds for program purposes on behalf of the State. A State interest liability will accrue from the day the Federal agency pays out Federal funds for program purposes to the day State funds are credited to the Federal Government's account.

(d) *Exception.* Notwithstanding any other provision in this section, a State will not incur an interest liability to the Federal Government if Federal law requires that the interest a State earns on Federal funds must be retained by

the State or used for program purposes. This exception shall not be construed to exempt a program from any other provision of this Subpart.

§ 205.13 Interest calculation.

(a) *State responsibilities.* A State shall calculate Federal interest liabilities and State interest liabilities for each program subject to this subpart, except as provided for in paragraph (b) of this section.

(b) *Reverse flow programs.* A Federal agency shall calculate Federal interest liabilities and State interest liabilities for a program subject to this subpart for which the Federal agency makes payments on behalf of a State, such as Supplemental Security Income.

(c) *Start date.* Interest liabilities begin accruing the later of July 1, 1993, or the first day of a State's 1994 fiscal year.

(d) *Interest rate.* The interest rate for all interest liabilities pursuant to this Subpart is the annualized rate equal to the average equivalent yields of 13-week Treasury Bills auctioned during a State's fiscal year, except as provided for in paragraph (i) of this section. The FMS will provide this rate to each State.

(e) *Interest calculation method and standards.* A State shall calculate and report interest liabilities on the basis of its fiscal year. A State shall ensure that its interest calculations are auditable. As set forth in § 205.9, a Treasury-State Agreement must include the method a State will use to calculate and document interest liabilities pursuant to this Subpart.

(f) *Statistical sampling.* If a State uses statistical sampling to calculate interest, the State must randomly sample transactions for each program subject to this Subpart to ensure, at a minimum, a 95 percent confidence interval subject to a .3 dollar-weighted day bound of error estimate.

(g) *Transactions prior to a State's 1994 fiscal year.* A State shall not include in an interest calculation a transaction in which either the transfer of funds to the State or the pay out of funds for program purposes by the State occurs prior to the later of July 1, 1993, or the first day of the State's 1994 fiscal year.

(h) *Funds withdrawn from a State account in the Unemployment Trust Fund (UTF).* A State shall account for the actual interest earnings and the related banking costs attributable to funds withdrawn from the State's account in the UTF.

(1) If funds withdrawn from the several accounts in the UTF are commingled in the State's Unemployment Insurance benefit payment account, the funds withdrawn from the State's account must be allocated a pro rata share of the actual interest earnings and related banking costs of the benefit payment account. Funds withdrawn from the State's account in the UTF that are included in investment pools must be allocated a pro rata share of interest earnings of the investment pool.

(2) Notwithstanding any other provision of this subpart, a State's interest liability on funds withdrawn from its account in the UTF consists of the actual interest earnings less the related banking costs of such funds, and shall be deposited in the State's account in the UTF.

(3) This paragraph (h) does not apply to funds withdrawn from the Federal Employees Compensation Account and the Extended Unemployment Compensation Account in the UTF.

§ 205.14 Direct costs of implementation.

(a) *Definition.* Direct costs of implementing this Subpart are those costs necessary for the development and maintenance of clearance patterns and those costs necessary to perform the actual calculation of interest liabilities. Direct costs do not include expenses incurred for upgrading or modernizing of accounting systems.

(b) *Reimbursement of direct costs.* A State will be compensated annually for the direct costs of implementing this Subpart, subject to the following conditions and limitations.

(1) *Treasury-State Agreement.* A State must have a Treasury-State Agreement with the FMS, as set forth in § 205.9.

(2) *Direct cost claim.* A State must submit a claim for direct costs with its Annual Report, as set forth in § 205.15(c).

(3) *Documentation.* A State must maintain documentation to substantiate its claim for direct costs.

(4) *Eligibility of costs.* Direct costs in excess of $50,000 in any year are not eligible for reimbursement, unless a State can justify to the FMS that it would be unable to develop clearance patterns or perform the actual calculation of interest without incurring such costs.

(5) *Costs incurred in prior years.* Direct costs incurred prior to a State's most recently completed fiscal year are not eligible for reimbursement, excepting costs incurred prior to the first day of a State's 1994 fiscal year and claimed for reimbursement with the State's first Annual Report submitted pursuant to this Subpart.

(6) *Costs incurred prior to July 22, 1991.* Direct costs incurred prior to July 22, 1991, are not eligible for reimbursement, unless a State makes separate application for such costs, with adequate justification and documentation.

(7) *Review by the FMS.* The FMS will review all direct cost claims for reasonableness. Unreasonable cost claims, as determined by the FMS, will not be reimbursed, notwithstanding any other provision of this section.

(8) *Method of reimbursement.* The FMS will effect direct cost reimbursement by reducing the State interest liability and adjusting the Federal interest liability for each State, to the extent allowed by the following limitations:

(i) Interest liabilities for programs funded out of trust funds for which the Secretary is trustee may not be reduced or adjusted; and

(ii) The aggregate Federal interest liability for all States may not increase.

(c) *Application of cost principles.* A State shall not include direct costs of implementing this Subpart, as defined in paragraph (a) of this section, in the development of its Statewide cost allocation plan, as provided for in OMB Circular A–87. All other costs incurred by a State to implement this Subpart are subject to the procedures and principles of OMB Circular A–87.

(d) *Sunset review.* By July 1, 1996, the FMS will review the policies in this section to determine their effectiveness.

§ 205.15 Annual reports.

(a) A State shall submit an Annual Report to the FMS by December 31 accounting for the interest liabilities of the State's most recently completed fiscal year. The format of the Annual Report will be prescribed by the FMS and will include, at a minimum, the following:

(1) the Federal interest liability for each program subject to this subpart;

(2) the State interest liability for each program subject to this subpart, with the State interest liability on refunds for each program reported separately;

(3) the total Federal interest liability for all programs subject to this subpart;

(4) the total State interest liability for all programs subject to this subpart;

(5) the net total interest owed by the State or the Federal Government;

(6) for information purposes, not for the calculation of interest, the actual interest earnings on and the related banking costs for funds drawn from the State's account in the UTF.

(b) A State shall submit its Annual Report both in hard copy and either on computer diskette or by other electronic means prescribed by the FMS.

(c) A State may submit as part of its Annual Report a claim for reimbursement of the direct costs of

implementing this Subpart, in accordance with § 205.14. An authorized State official shall certify the accuracy of a State's direct cost claim.

(d) An authorized State official shall certify the accuracy of a State's Annual Report.

(e) *Reverse flow programs.* With respect to a program for which the Federal Government makes payments on behalf of a State, a Federal agency shall provide an interest report to a State by December 1 for the State's most recently completed fiscal year. The interest report will include the State interest liability and the Federal interest liability for the program, including the Federal interest liability on refund transactions of $10,000 or more. The Federal agency shall certify the accuracy of the interest report. A State shall incorporate the interest report in its Annual Report.

(f) The FMS will distribute Annual Reports to Federal agencies.

§ 205.16 Interest payment.

(a) *Adjusted interest liabilities.* The FMS will adjust a State's total interest liability and the Federal Government's total interest liability to a State to effect direct cost reimbursement, as set forth in § 205.14(b)(8).

(b) *Net interest payment.* The adjusted total State interest liability and the adjusted total Federal interest liability for each State will be offset to determine the net interest payable to or from a State. The payment of net interest to or from a State for its most recently completed fiscal year will occur no later than March 1.

(c) *Disputed amounts.* If the amount of interest payable is disputed according to the provisions of § 205.18, payment must occur for any undisputed portions. The interest in dispute must be paid within 14 days of receipt of the decision by the Assistant Commissioner, Federal Finance, as set forth in § 205.18.

§ 205.17 Compliance and oversight.

(a) *State coordinator.* A State shall designate an official representative with the statutory or administrative authority to coordinate all interaction with the Federal Government concerning this Subpart, and shall notify the FMS of the representative's name and title in writing.

(b) *Federal agency coordinator.* A Federal Agency shall designate an official representative to coordinate all interaction with the FMS and the States concerning this Subpart, and shall notify the FMS of the representative's name and title in writing.

(c) *Recordkeeping.* A State shall maintain records supporting interest calculations, clearance patterns, direct costs, and other functions directly pertinent to the implementation and administration of this Subpart.

(d) *Record retention.* A State shall retain the records related to implementation of this Subpart of each fiscal year for 3 years from the date the State submits its Annual Report, or until any dispute or action involving the records and documents is completed, whichever is later.

(e) *Availability of records.* The FMS, the Comptroller General, and a Federal agency shall have the right of access to all records for the purpose of verifying interest calculations, clearance patterns, direct cost claims, and the State's accounting for Federal funds.

(f) *Records for reverse flow programs.* With respect to programs for which the Federal Government makes payment on behalf of a State, a Federal agency shall maintain records supporting interest calculations and clearance patterns. A Federal agency shall retain such records for 3 years from the date the Federal agency submits its interest calculations to a State, as set forth in § 205.15(e), or until any dispute or action involving the records is completed, whichever is later. The FMS, the Comptroller General, and a State shall have the right of access to all records for the purpose of verifying interest calculations, clearance patterns, and the Federal agency's accounting for State funds.

(g) *State audits.* A State's implementation of this Subpart is subject to audit in accordance with chapter 75 of title 31, United States Code, "Requirements for Single Audits."

(h) *Federal agency compliance reviews.* A Federal agency's implementation of this Subpart is subject to review pursuant to procedural instructions issued by the FMS.

(i) *Reviewing Annual Reports.* The FMS will distribute Annual Reports to Federal agencies, as set forth in § 205.15(f). Upon request by the FMS, a Federal agency shall review a State's Annual Report for accuracy and reasonableness and shall report its findings to the FMS.

(j) *Federal agency noncompliance.* If a Federal agency egregiously or repeatedly causes Federal interest liabilities or fails to comply with this Subpart, the FMS may collect a charge from the Federal agency in an amount the FMS determines to be the cost to the general fund of the Treasury caused by such noncompliance, in accordance with the following:

(1) The FMS will issue a Notice of Assessment to the Federal agency, indicating the nature of the noncompliance, the amount of the charge, the manner in which it was calculated, and the right to file an appeal.

(2) A charge for noncompliance, to the maximum extent practicable, will be paid out of appropriations available for the Federal agency's operations and will not be paid from amounts available for funding the programs of the Federal agency.

(3) If a Federal agency does not pay a charge for noncompliance within 45 days after receiving a Notice of Assessment, the FMS will debit the appropriate Federal agency account.

(4) A Federal interest liability resulting from circumstances beyond the control of a Federal agency does not constitute noncompliance.

(k) *State noncompliance.* If a State materially fails to comply with this Subpart, the FMS may take one or more of the following actions, as appropriate in the circumstances:

(1) Request a Federal agency or the General Accounting Office to conduct an audit of the State to determine interest owed to the Federal Government, and implement procedures to recover such interest; or

(2) Deny the reimbursement of all or a part of the State's direct cost claim; or

(3) Take other remedies legally available.

(l) *Failure to request funds.* If a State repeatedly or deliberately fails to request funds in accordance with the procedures established for its funding techniques, as set forth in § 205.7 or in a Treasury-State Agreement, the FMS may deny the State payment or credit for any resultant Federal interest liability, notwithstanding any other provision of this part.

§ 205.18 Appeals and dispute resolution.

(a) *Appeal by a Federal agency.* A Federal agency may appeal any charge assessed by the FMS for noncompliance by submitting an appeal in writing to the Assistant Commissioner, Federal Finance (hereinafter Assistant Commissioner), of the FMS, within 45 days of the date of the Notice of Assessment. The appeal shall include a concise factual statement of the conditions leading to the Notice of Assessment, the basis of the appeal, and the action requested by the agency. In the event of an appeal, the charge imposed under the Notice of Assessment will be deferred pending the results of the appeal.

(1) *Appeal review process.* The Assistant Commissioner will review the Notice of Assessment, any documentation supporting the Notice, and the written appeal from the agency.

If based on this review, the Assistant Commissioner finds that additional information is required, the Assistant Commissioner may request to meet with the agency, as well as other parties selected by the Assistant Commissioner, as part of the review process.

(2) *Decision.* The Assistant Commissioner will issue a written decision within 30 days of receipt of the appeal. The Assistant Commissioner may unilaterally extend this period for an additional 30 days if required. The decision of the Assistant Commissioner whether to uphold the Notice of Assessment, to overturn the Notice, or to mandate some other action will be stated in the written decision. Other actions mandated may include a reduced charge, a deferral of the charge, an alternate solution to cash management improvement, or any combination thereof. The basis of the decision, the amount of the charge and the effective date of the charge will be stated in the written decision. The effective date of the charge may be retroactive to the date indicated in the Notice of Assessment.

(b) *Resolution of disputes.* If a dispute arises from the implementation or administration of this Subpart, the following resolution mechanism is available:

(1) The aggrieved party may submit a written appeal to the Assistant Commissioner. The aggrieved party shall concurrently serve a copy of the written appeal to the other concerned parties.

(2) Within 20 days of the submission of the written appeal, the aggrieved party shall submit to the Assistant Commissioner a written statement not exceeding 15 pages, with supporting documentation in appendices, that articulates the dispute, the aggrieved party's position, and the relief sought. The aggrieved party shall concurrently serve its statement upon the other concerned parties.

(3) Within 30 days of receipt of the aggrieved party's statement, the responding party may submit a response statement not exceeding 15 pages, with supporting documentation in appendices, to the Assistant Commissioner. The responding party shall concurrently serve its response statement to the other concerned parties.

(4) The Assistant Commissioner will issue a written decision within 30 days after the period for the submission of the response statement. The Assistant Commissioner may unilaterally extend the deadline for issuing a decision by 30 days if required. The Assistant Commissioner's decision shall be the final agency action on the part of the FMS for the purposes of judicial review procedures under the Administrative Procedures Act, 5 U.S.C. 701–706, unless either party invokes the provisions of the Administrative Dispute Resolution Act of 1990, 5 U.S.C. 581–593 (ADRA), in accordance with the following.

(i) Either party may seek to invoke the assistance of a neutral party appointed under the provisions of the ADRA within 30 days of receipt of the Assistant Commissioner written decision. The party invoking the ADRA shall notify both the Assistant Commissioner and the responding party in writing. With the written mutual consent of the parties and the Assistant Commissioner, a neutral party appointed under the provisions of the ADRA may assist in resolving the dispute through the use of alternate means of dispute resolution as defined in the ADRA.

(ii) If the party invoking the ADRA is unable to reach a satisfactory resolution of the problem using the ADRA, the Assistant Commissioner's decision shall be the final agency action on the part of the FMS for purposes of the judicial review procedures under the Administrative Procedure Act, 5 U.S.C. 701–706.

Appendix A to Subpart A of Part 205—Definition of Major Federal Assistance Program

"Major Federal Assistance Program," for State governments having Federal assistance expenditures between $100,000 and $100,000,000 means any program for which Federal expenditures during the applicable year exceed the larger of $300,000, or 3 percent of such total expenditures. Where total expenditures during the applicable year exceed $100,000,000, the following criteria apply:

Total expenditure of Federal financial assistance for all programs		Major Federal Assistance Program means any program that exceeds (million)
More than	But less than (billion)	
$100 million	$1	$3
1 billion	2	4
2 billion	3	7
3 billion	4	10
4 billion	5	13
5 billion	6	16
6 billion	7	19
Over 7 billion		20

Subpart B—Potential Liabilities on Intergovernmental Funds Transfers Included in the Catalog of Federal Domestic Assistance but Otherwise Generally Excluded From Subpart A

§ 205.19 Scope of subpart.

This subpart applies to programs in the Catalog of Federal Domestic Assistance that are not subject to subpart A.

§ 205.20 Cash advances.

(a) Cash advances to a State shall be limited to the minimum amounts needed and shall be timed to be in accord only with the actual, immediate cash requirements of the State in carrying out a program or project. The timing and amount of cash advances shall be as close as is administratively feasible to the actual cash outlay by the State for direct program costs and the proportionate share of any allowable indirect costs.

(b) Neither a State nor the Federal Government will incur an interest liability on the transfer of funds for a program subject to this Subpart.

§ 205.21 Federal agency oversight responsibilities.

(a) A Federal agency shall review the practices of States as necessary to ensure compliance with this Subpart. A Federal agency shall notify the FMS if a State demonstrates an unwillingness or inability to comply with this Subpart.

(b) A Federal agency shall formulate procedural instructions specifying the methods for carrying out the responsibilities of this section.

§ 205.22 State noncompliance.

If a State demonstrates an unwillingness or inability to comply with this Subpart, the FMS may require the State and a Federal agency to cover additional programs under subpart A of this part, notwithstanding any other provision of this part.

§ 205.23 Failure to make funds available.

Consistent with program purposes and regulations, if a Federal agency demonstrates an unwillingness or inability to make Federal funds available to a State as needed to carry out a program, the FMS may require the State and the Federal agency to cover additional programs under subpart A of this part, notwithstanding any other provision of this part.

Subpart C—[Reserved]

Dated: November 19, 1992.

Russell D. Morris,

Commissioner.

Department of the Interior

Bureau of Indian Affairs

Indian Gaming; Approved Tribal-State Compact; Standing Rock Sioux Tribe, North Dakota; Notice

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Indian Gaming; Approved Tribal-State Compact; Standing Rock Sioux Tribe, North Dakota

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of approved Tribal-State Compact.

SUMMARY: Pursuant to 25 U.S.C. 2710, of the Indian Gaming Regulatory Act of 1988 (Pub. L. 100–497), the Secretary of the Interior shall publish, in the **Federal Register**, notice of approved Tribal-State Compacts for the purpose of engaging in Class III (casino) gambling on Indian reservations. The Assistant Secretary—Indian Affairs, Department of the Interior, through his delegated authority, has approved the Tribal-State Compact for Control of Class III Games of Chance for the Standing Rock Sioux Tribe and the State of North Dakota, which was enacted on August 31, 1992.

DATES: This action is effective December 21, 1992.

FOR FURTHER INFORMATION CONTACT: Hilda Manuel, Interim Staff Director, Indian Gaming Management Staff, Bureau of Indian Affairs, Washington, DC 20240, (202) 219–0994.

Dated: December 8, 1992.

Ross Eden,

Acting Assistant Secretary—Indian Affairs.

Part VII

Department of Labor

Mine Safety and Health Administration

30 CFR Part 100
Criteria and Procedures for Proposed Assessment of Civil Penalties; Final Rule

DEPARTMENT OF LABOR

Mine Safety and Health Administration

30 CFR Part 100

RIN 1219–AA44

Criteria and Procedures for Proposed Assessment of Civil Penalties

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Final rule.

SUMMARY: This rule revises the Mine Safety and Health Administration's (MSHA) procedures in 30 CFR part 100 for proposing civil penalties under the Federal Mine Safety and Health Act of 1977 (Mine Act). The rule is responsive to a November 21, 1989, Order of the United States Court of Appeals for the District of Columbia Circuit. The rule applies a regular assessment, rather than a single penalty, to a timely abated non-significant and -substantial (non-S&S) violation at a mine with an excessive history of violations. This change will induce greater overall mine operator compliance with MSHA's safety and health standards, thereby improving miner safety and health.

EFFECTIVE DATE: February 1, 1993.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey, Director Office of Standards, Regulations, and Variances, MSHA, (703) 235–1910.

SUPPLEMENTARY INFORMATION:

I. Paperwork Reduction Act

The rule contains no information collection requirements subject to the Paperwork Reduction Act of 1980.

II. Rulemaking History

MSHA initially had two types of assessments: regular assessments and special assessments. The computer-generated regular assessments used, and continue to use, a formula system, based on the criteria in the Mine Act for the assessment of penalties, to compute penalty points which are then converted to a dollar amount. These criteria include mine and company size, history of violations, negligence, gravity of the hazard, and good faith on the part of the operator in abating the hazard within the time set by the inspector. The individually prepared special assessments were, and continue to be, for violations of such a nature or seriousness that an appropriate penalty cannot be determined under the regular assessment formula.

On May 21, 1982, MSHA revised its penalty regulations to include a $20 single penalty assessment for timely abated non-S&S violations (47 FR 22286). Non-S&S violations are violations that are not reasonably likely to result in a reasonably serious injury or illness. The regular formula system continued to address significant and substantial (S&S) violations, which are those that are reasonably likely to result in a reasonably serious injury or illness. Special assessments continued to deal with many of the most serious violations. For regular assessment purposes, history of violations was defined as the average number of violations per inspection day (VPID) for mine operators and as the average number of violations assessed per year at all mines for independent contractors; i.e., contractor violation history points (CVHP). Timely paid single penalty violations were not included in the history computation.

On February 17, 1988, the Coal Employment Project and the United Mine Workers of America (UMWA) challenged the Secretary of Labor's authority to assess a $20 single penalty for timely abated non-S&S violations. On November 21, 1989, the United States Court of Appeals for the District of Columbia Circuit upheld MSHA's authority to assess the $20 single penalty, *Coal Employment Project et al.* v. *Dole*, 889 F.2d 1127, but ordered MSHA to revise its civil penalty regulations to: (1) Take a mine operator's history of violations specifically into account in determining whether a non-S&S violation qualifies for a single penalty assessment; and (2) include single penalty violations in the history of violations computation for regular assessments. The Court further ordered MSHA to take immediate interim steps to correct these defects in the assessment system and remanded the record to MSHA to revise part 100 to comply with the Court's order. The Court retained jurisdiction of the case.

In response to the remand, MSHA published an interim action on December 29, 1989 (54 FR 53609), that temporarily suspended the sentence in 30 CFR 100.3(c) by which timely paid single penalty violations were excluded from an operator's history of violations for regular assessment purposes. Thus, in calculating penalties proposed for S&S violations, MSHA now includes all final violations, both S&S and non-S&S, in an operator's history. At the same time, the Agency also revised its assessment policies by instructing MSHA enforcement personnel to review non-S&S violations involving high negligence and an excessive history of the same type of violation for possible special assessment. While these interim provisions were in effect, the Agency would begin rulemaking to develop a final rule, thereby complying with the Court's order.

On March 12, 1990, the Coal Employment Project, *et al.*, filed a motion to enforce compliance with the order of remand with the Court, stating that MSHA's interim actions were an inappropriate response to the Court order.

On April 12, 1990, the Court found the "high negligence" requirement in MSHA's new assessment policy for non-S&S violations to be inconsistent with the November 21, 1989, order. Accordingly, the Court gave MSHA 45 days to respond to the Court's expressed concerns and, on May 29, 1990, MSHA issued a program policy letter implementing a program of increased penalties for both S&S and non-S&S violations at a mine with an "excessive history" of violations.

On December 28, 1990, MSHA published a proposed revision to its civil penalty regulations (55 FR 53482) that included: (1) an across-the-board increase in all of the Agency's penalties; and (2) increased penalty assessments when a mine has an excessive history of violations. The excessive history proposal was based on the May 1990 program policy letter. The comment period on the proposal was initially scheduled to close on March 1, 1991, but it was extended to March 18, 1991 (56 FR 8171), and then to April 2, 1991 (56 FR 11130), at which time it closed. MSHA received comments from all sectors of the mining industry. Subsequently, based on these comments, MSHA separated the rulemaking into a final rule and a reproposal.

The final rule published on January 24, 1992 (57 FR 2968), revised the penalty table in accordance with the Omnibus Budget Reconciliation Act of 1990 and increased the single penalty from $20 to $50. It also made permanent the interim action of December 29, 1989, that included single penalty violations in an operator's history of violations for regular penalty assessments.

As a result of comments received, MSHA issued a reproposal of the excessive history program on January 24, 1992 (57 FR 2972). These comments and MSHA's experience had persuaded the Agency that the excessive history program criteria should be substantively revised. Consequently, in order to obtain public comment on the proposed new criteria, MSHA reproposed an excessive history program containing these substantively revised criteria.

On January 24, 1992, simultaneously with the final rule and reproposal, MSHA issued a new program policy

letter to replace the May 1990 policy letter. This new program policy letter implemented the revised excessive history criteria contained in the January 1992 reproposal.

The comment period for the January 1992 reproposal, initially scheduled to close on March 24, 1992, was extended to April 24, 1992 (57 FR 9518). Once again, MSHA received comments from all sectors of the mining industry.

III. Discussion and Summary of the Final Rule

A. General Discussion

With this final rule, MSHA accomplishes two basic objectives: (1) It encourages mine operators who have an excessive history of violations to improve compliance; and (2) it responds to the Court of Appeals order by evaluating an operator's history of violations in determining whether a timely abated non-S&S violation is eligible for a single penalty assessment.

MSHA received numerous and extensive comments on both of its excessive history proposals. All of these comments were carefully reviewed and evaluated and the significant issues raised are discussed in this preamble.

In addition, commenters raised several other assessment-related issues such as: A general revision of part 100; a revision of enforcement policies as they pertain to assessments; a definition of inspection day; and some issues that were outside the specific scope of the proposed excessive history program. The scope of this final rule, however, is specifically limited to only those issues related to the excessive history program addressed in the proposals.

B. Section-By-Section Analysis of the Rule

The following section-by-section analysis addresses the public comments on the proposals and describes the resulting final rule.

Section 100.3 Determination of Penalty Amount; Regular Assessment

In this section, MSHA revises paragraph (c) to insert the word "Overall" as the first word in this paragraph. This will clarify the distinction between overall history and excessive history.

Section 100.4 Determination of Penalty Amount, Single Penalty Assessment

In this section, MSHA establishes an excessive history assessment program in which a timely abated non-S&S violation cited at a mine with an excessive history of violations will not be eligible for a single penalty assessment but will, instead, receive a regular penalty assessment. This increased assessment will more effectively deter violations and should help to reduce the number of both S&S and non-S&S violations at those mines, thereby providing a safer and more healthful work environment.

Consistent with the Court of Appeals order, the final rule establishes an excessive history assessment program for only non-S&S violations. The excessive history criteria and penalty assessment increases are specifically included in the final rule. This excessive history program is based upon § 100.3(c), overall history of violations for a preceding 24-month period as determined by VPID or CVHP. In addition, a mine must have more than 10 violations in a preceding 24-month period in order to receive any excessive history assessment. Upon payment or final adjudication, citations and orders are counted in history and, therefore, included in determining excessive history. Only citations and orders issued on or after January 1, 1991, are used in determining excessive history. The Agency will use the available history data starting on January 1, 1991, when determining excessive history until the full 24 months of history are available on January 1, 1993. Thereafter, the calculation of excessive history will be based on a preceding 24-month period.

In establishing this excessive history program, MSHA has complied with the Court of Appeals order, evaluated its experience gained under the May 1990 and the January 1992 program policy letters, examined the most recent violation and enforcement data, and responded to the public comments submitted on the December 1990 proposal and the January 1992 reproposal.

Since the issuance of the initial Court order in November 1989, the Agency has reviewed a number of options for an excessive history program and the appropriate criteria. In every option reviewed, however, the one constant requirement was the incorporation of history of violations in determining whether a timely abated non-S&S violation would be eligible for a single penalty assessment.

One commenter to the December 1990 proposal recommended the abolition of the single penalty in favor of a regular penalty assessment for all non-S&S violations. Another commenter to the December 1990 proposal recommended a minimum $500 penalty for all non-S&S violations, while a few commenters suggested that the increase in the single penalty from $20 under the old penalty table to $50 under the new penalty table was a sufficient penalty increase for all non-S&S violations and that an additional assessment was unnecessary.

The single penalty assessment for timely abated non-S&S violations was established in 1982 to permit the mining community and MSHA to focus their resources on S&S violations that have the greatest impact on miner safety and health. As noted in the preamble to the January 1992 reproposal (57 FR 2976), the single penalty assessment continues to serve an important safety and health purpose by reducing the amount of time spent on violations that have a minimal impact on safety and health. The suggested elimination of the single penalty assessment or the increase in the single penalty to $500 may lead to a substantial increase in the number of non-S&S violations contested and a refocusing of inspector and mine operator time from the S&S violations to the non-S&S violations.

However, MSHA did not intend the single penalty assessment to suggest that non-S&S violations were unimportant as long as they were promptly abated. In addition, a high level of noncompliance would indicate that the single penalty has not provided adequate compliance incentive. Further, the Court order requires the single penalty assessment program to include consideration of an operator's history of violations. As a result, the Agency has determined that certain non-S&S violations should not be eligible for a $50 single penalty assessment.

MSHA's experience with excessive history programs under the program policy letters and the public comments on the proposed rules indicate that the Agency should resolve 10 issues in order to construct an excessive history program that would equitably affect all mines. The first two of these issues, (1) whether S&S violations should be subject to excessive history assessments, and (2) whether repeat violations should be subject to excessive history assessments received considerable comment and are discussed at some length in this preamble.

The first issue is whether S&S violations should be subject to excessive history assessments. The most significant difference among this final rule and MSHA's December 1990 proposal, the January 1992 reproposal, and the two program policy letters is that this final rule does not provide for S&S violations to receive excessive history assessments. Although the Court of Appeals did not address S&S violations, the Agency had included S&S violations in the excessive history programs because it believed that applying excessive history assessments

to S&S violations would increase the deterrent effect of a civil penalty, leading to greater compliance and ultimately resulting in greater safety and health.

Therefore, MSHA initially instituted an excessive history program for S&S violations in the May 1990 program policy letter. This program subjected an S&S violation to an excessive history assessment when either: (1) There was an excessive number of violations per inspection day; or (2) there was an excessive number of repeat violations of the same safety or health standard. The excessive history program for S&S violations was continued—albeit with different criteria—in the December 1990 proposal, the January 1992 reproposal, and the January 1992 program policy letter.

On May 5, 1992, the Federal Mine Safety and Health Review Commission (Commission) ruled in *Drummond Co. Inc.*, 14 FMSHRC 661, (*Drummond*) that MSHA had exceeded its authority when it implemented an excessive history assessment for S&S violations under a program policy letter rather than through notice and comment rulemaking. The Commission held that MSHA's use of the Court of Appeals order as justification for instituting an excessive history program for S&S violations was inappropriate because the Court order had only addressed non-S&S violations. The Agency did not appeal the *Drummond* decision. However, the Commission decision affected only the excessive history program contained in the program policy letter. This rulemaking, having gone through public notice and comment, is not subject to the same procedural defect ascribed to the policy letter in the *Drummond* case.

The second and related issue is whether repeat violations should be used as a criterion for an excessive history assessment. The final rule does not subject violations to excessive history assessments based on repeat violations, whereas both proposals did. The December 1990 proposal and the May 1990 policy letter subjected all violations, under certain criteria, to excessive history assessments based on repeat violations, while the January 1992 reproposal and policy letter subjected only S&S violations, under certain revised criteria, to excessive history assessments based on repeat violations. Excessive history was applied, based on repeat violations of the same safety or health standard, as MSHA's response to a recommendation in the September 30, 1988, Department of Labor Inspector General (IG) final audit of MSHA entitled "The Mine Plan Approval and Selected Enforcement Activities." In this report, the IG recommended that progressive penalties be automatically assessed for repeated violations of the same safety or health standard. As the excessive history assessment program was based on repeat violations and would have been applied automatically, this program would have been in accord with the IG recommendation.

The comments received in response to the December 1990 proposal and the January 1992 reproposal addressed: (1) The general concept of applying the excessive history program to S&S violations; and (2) the specific criteria found in the May 1990 program policy letter and in the January 1992 reproposal and policy letter.

With respect to the general concept of applying the excessive history program to S&S violations, industry commenters had three opposing arguments. The first opposing argument was that MSHA already has a special assessment program that can be used to impose additional penalties on mines with excessive numbers of S&S or repeat violations. These commenters asserted that a computer-generated excessive history program cannot account for the unique situations at individual mines that may cause them to have high numbers of violations, but which may not be indicative of the overall level of safety and health of those work environments. They also asserted that the number of citations issued would depend on the MSHA district in which the mine is located. Consequently, the excessive history program would often wrongly target mines for additional penalties. They stated that a better approach would be to rely upon the District Manager, who is in a position to take these circumstances into account, to determine whether a mine has an excessive history of violations and who would refer those violations for special assessment.

The second opposing argument was that MSHA has nearly completed the initial violations documentation record for its pattern of violations rule. This rule took effect on October 1, 1990, and the violation history necessary for a pattern notice to be given to a specific mine is now being reached. These commenters contended that the impact of this pattern of violations rule upon compliance should be evaluated before the Agency implements an additional assessment program that would target excessive history violations.

The third opposing argument was that the new regular assessment penalty table took effect on March 1, 1992, and that the impact of these substantial increases in regular assessments on compliance should be analyzed before a new assessment program is instituted.

Commenters, including labor, although supporting the principle of an excessive history program, tied their support for such a program to MSHA revising its enforcement policies. They asserted that the current enforcement system treats mines unequally and that any excessive history program based on current enforcement practices will exacerbate the unequal treatment. They supported the industry comment that different MSHA districts have different citation issuance practices. They also stated that as mines with an "effective" miner walkaround participation receive more citations and orders because the inspector receives more help in spotting violations, an excessive history program should adjust the raw violation data to account for an "effective" miner walkaround presence.

Finally, there were some commenters who supported the general inclusion of S&S violations in the excessive history program because they believed that a systematic increase in penalty assessments would result in greater compliance with MSHA standards and, thus, greater safety and health.

With respect to comments on the specific criteria in the May 1990 program policy letter and in the January 1992 reproposal and program policy letter, nearly all industry commenters stated that both sets of proposed excessive history criteria were too inclusive and were poorly designed. As the preamble to the January 1992 reproposal contained MSHA's discussion of the comments on the May 1990 program policy letter and the Agency's reasons for changing these criteria in the reproposal, this preamble will not repeat that discussion. However, upon reviewing those comments, the Agency determined that the May 1990 program policy letter excessive history criteria should be revised in order to make the program more equitable. The Agency also decided to continue to use an excessive history assessment based on repeat violations as the response to the IG recommendation. Thus, in the January 1992 reproposal and program policy letter, an excessive history assessment would be given: (1) To all violations (both S&S and non-S&S) at mines with 20 penalty points for VPID or CVHP; and (2) to S&S violations only, when a mine had accumulated at least 10 violations of the same safety or health standard in a previous twelve month period and had a repeat violations per inspection day (RPID) greater than 0.20.

In response to this January 1992 reproposal of the specific excessive history criteria, industry commenters reiterated their general comments that the excessive history program for S&S violations was unnecessary because MSHA has its special assessment program and its pattern of violations program. With respect to their comments on the specific proposed criteria, they asserted that the reproposal criteria were still inequitable because: (1) Large mines would continue to receive a disproportionate share of excessive history assessments; and (2) the RPID criteria excluded contractor violations from an excessive history based on repeat violations because MSHA does not record the number of inspection days for a contractor. In addition, they commented that the revised excessive history criteria had significantly complicated the existing part 100 regulations, making it difficult for an operator to determine how a particular penalty would be calculated.

Commenters representing labor made similar remarks with respect to the inequity of the revised excessive history criteria, and reiterated their statements concerning the need for MSHA to revise its enforcement policies before a fair and effective excessive history program could be enacted.

In response to these commenters, MSHA re-evaluated the disaggregated assessment data by commodity, type of mine, and mine size. In this re-evaluation, MSHA found that the impact of the reproposed excessive history criteria continued to be greater on large mines than on small mines. For example, although the percentage of large underground coal mine violations that would have received an excessive history assessment would have decreased from 45 percent under the May 1990 excessive history criteria to about 8 percent under the January 1992 reproposal criteria, the percentage of small underground coal mine violations that would have received an excessive history assessment would have similarly decreased from about 6 percent to about 2 percent. Thus, although the January 1992 reproposal criteria reduced the inequity resulting from the May 1990 criteria, the excessive history program derived from the computer-generated criteria still produced an inequitable result.

A joint industry and labor comment suggested that the ultimate goal of an excessive history assessment program should be to reduce miner fatalities and injuries. In order to realize that goal, these commenters asserted that the excessive history program should target mines with higher fatality rates to improve compliance in the most effective way and to reduce the potential for fatalities. At their request, MSHA calculated the average 1991 fatality rates for mines: (1) That would have received an excessive history assessment based on the criteria in the January reproposal; and (2) that would not have received such an excessive history assessment. These average fatality rates were separately calculated for the four mining categories of: (1) Underground coal; (2) surface coal; (3) underground metal and nonmetal; and (4) surface metal and nonmetal. The results indicated that (except for underground coal) the fatality rates within each category between excessive history mines and non-excessive history mines exhibited no significant statistical difference. In underground coal, however, the fatality rate for the non-excessive history mines was substantially higher than the fatality rate for the excessive history mines. On that basis, therefore, these commenters contended that the proposed excessive history criteria and program were inherently flawed because they did not target the appropriate mines.

As a result of these comments and MSHA's analysis of several different excessive history criteria, the Agency has decided to limit the excessive history assessment program to non-S&S violations and to base it only on VPID or CVHP. MSHA agrees with the commenters that the Agency should evaluate the effect of the new penalty table and the pattern of violations rule upon compliance before it adopts an additional civil penalty program.

Nevertheless, the Agency will continue to make "excessive history" information on non-S&S violations, as well as information reflecting overall history on a mine-specific basis, available to its District Managers. This information will aid District Managers in deciding which mines may need closer monitoring and more frequent inspections. It will also aid inspectors in targeting the individual standards with which a specific mine may be having compliance difficulty. Further, this information may also be used by the District Manager to help in determining whether to request a special assessment for certain violations at individual mines. By providing excessive history information to its District Managers, the Agency will provide a useful enforcement aid to the District Manager who, in fact, is the individual best qualified to identify a special history problem.

The third issue to be resolved in order to develop an equitable excessive history program is which violations to count in determining excessive history. In the proposal, reproposal, and the program policy letters, MSHA counted all violations (S&S as well as non-S&S) in the computation for excessive history. The Agency rationale was that the general compliance level at a mine is indicated by the overall history of violations (including both S&S and non-S&S) and, therefore, the overall history of violations should be used to determine whether a mine has an excessive history of violations. In addition, with an excessive history for non-S&S violations based on the overall history of violations, operators will have more incentive to reduce the number of S&S violations because that will lower their VPID and, thereby, lessen the potential of receiving an excessive history assessment for a non-S&S violation.

MSHA received relatively few comments on this position. Some of these comments were supportive. One commenter, however, asserted that compliance with the Court of Appeals order requires MSHA to use a history of only non-S&S violations for determining history for non-S&S violations. The American Mining Congress, in support of this position in *American Mining Congress* v. *Department of Labor* (D.C. Cir. No. 92–1067) asserted that MSHA had exceeded the Court order in the May 1990 program policy letter by including S&S violations in determining excessive history for non-S&S violations. On September 14, 1992, the Court of Appeals upheld MSHA's policy of including S&S violations in the history of violations for determining excessive history for non-S&S violations. Therefore, on the basis of the rulemaking record, the Agency concludes that, as all violations are counted in the overall history for regular formula assessments for S&S violations, all violations should also be counted in determining whether a non-S&S violation is eligible for a single penalty. Thus, the determination of whether a non-S&S violation will receive an excessive history assessment is based on the overall history of all violations.

The fourth issue is the appropriate criterion to use for violation history. Since its inception, MSHA has used VPID as the measure for history of violations. MSHA uses VPID rather than the total number of violations to adjust for inspector presence in order to place all mines on a more equal basis. Some industry commenters argued that VPID should not be used for violation history for the previously cited reasons that the enforcement policies lead to differences among mines. In addition, some

commenters criticized this criterion because part 100 does not define "inspection day." Nevertheless, despite the possible differences across mines, MSHA believes that VPID is the best measure available for history of violations. Furthermore, no commenter suggested an alternative to VPID. As a result of all these considerations, the final rule retains VPID for mines as the violation history criterion for excessive history.

For contractor operations, however, the concept of average violations per inspection day cannot be used because MSHA does not record inspection days for contractors. Consequently, the previous regulations, and the proposal, reproposal, and program policy letters used average number of violations per year (CVHP) as the violation history criterion for establishing overall and excessive history, respectively. MSHA received a few comments critical of this criterion for contractors but there were no alternative suggestions. As the use of this approach has proved to be both successful and practical, the final rule retains CVHP for contractors as the violation history criterion for excessive history.

The fifth issue is the appropriate VPID or CVHP value to trigger an excessive history assessment. Although the December 1990 proposal did not contain any such specific VPID value, the May 1990 program policy letter used a VPID value of at least 1.7 (16 penalty points) to trigger an excessive history assessment. Several commenters to the December 1990 proposal stated that an excessive history assessment should be limited to only the highest penalty point category; i.e., mines with VPID equal to 20 penalty points. On the basis of these comments, MSHA reconsidered the VPID value used for an excessive history assessment and, in the January 1992 reproposal and program policy letter, used the highest penalty point category of 20 points to trigger an excessive history assessment. All of the comments on this issue supported the reproposal VPID value. An excessive history assessment applied to those mines with the highest category of penalty points continues the progressive penalty concept in the VPID and CVHP penalty point tables and provides further economic motivation for these operators to devote additional effort and resources to comply with MSHA standards. Further, the greatest penalties will be incurred by mines that have the highest non-compliance levels. Therefore, in this final rule a VPID greater than 2.1 (20 penalty points) is needed for a non-S&S violation to receive an excessive history assessment.

For contractors, although the December 1990 proposal did not contain any specific number of violations, the May 1990 program policy letter used a CVHP of 16 penalty points (more than 40 violations) to trigger an excessive history assessment. Although MSHA received no comments on the appropriateness of this CVHP value, as a consequence of shifting the VPID criterion for mines to the highest VPID category, MSHA similarly shifted the CVHP value for an excessive history assessment to the highest CVHP category of 20 points (more than 50 violations) in the January 1992 reproposal and program policy letter. MSHA received no comments on this reproposal CVHP value. Consistent with the reproposal and the VPID value for mines, the final rule requires CVHP to be 20 penalty points for a contractor violation to receive an excessive history assessment.

The sixth issue is whether a minimum number of violations should be required before an excessive history assessment is made. For example, a small surface mine may receive only three inspections during any specific two year period even though it has received its requisite semiannual inspections. In such small operations, a total of 7 or 8 non-S&S violations may be cited during these 3 inspections over a two-year period and that number of violations could result in a VPID greater than 2.1. Notwithstanding that VPID value, those operators are not necessarily the type the Agency views as having exhibited an "excessive history" of noncompliance and, thus, should not categorically receive an excessive history assessment. In order to reduce the potential for a mine to receive an excessive history assessment based on a minimal number of violations, MSHA determined in the May 1990 and January 1992 policy letters and the January 1992 reproposal to exclude a mine with fewer than 11 violations in a preceding two year period from receiving an excessive history assessment. This number, therefore, has been available for public comment since the December 1990 proposal. All of the few comments on this issue supported the concept of a minimum number of violations being a necessary criterion for an excessive history assessment. One commenter suggested that this minimum number be normalized by mine size. Normalization by mine size, however, would duplicate the effect of violations per inspection day and it would significantly complicate part 100. Thus, the final rule incorporates the approach taken in the program policy letters and the reproposal because it has proven to be both successful and practical.

The seventh issue is the type and amount of penalty associated with an excessive history assessment. In the program policy letters, the December 1990 proposal, and the January 1992 reproposal, a non-S&S violation that was ineligible for a single penalty assessment received a regular penalty assessment. A comment on the January 1992 reproposal recommended that the single penalty be a graduated penalty dependent only on the overall history of violations. They proposed a $70 single penalty for an operation with 16 penalty points for overall history, an $80 single penalty for an operation with 18 penalty points for overall history, and a $90 single penalty for an operation with 20 penalty points for overall history. They contended that their alternative would maintain the original intent of the single penalty for all timely abated non-S&S violations to receive an equal penalty regardless of the mine size, size of controlling entity, etc. while explicitly allowing overall history of violations to determine whether a violation is eligible for a single penalty. The other commenters on this issue, however, agreed with MSHA's proposal.

In resolving this issue, MSHA carefully evaluated these comments, its experience under the program policy letters, the intent of the May 1982 rule that instituted the single penalty, and the Court of Appeals order. MSHA has not adopted the recommended sliding scale single penalty for two reasons. The first reason is that the Agency's intent is to affect the overall compliance at mines that have the highest overall history of violations. Based on Agency experience, the commenter's recommended graduated scale single penalty amounts would not provide sufficient economic penalties for operators to reduce the numbers of violations. Thus, in order to encourage mines with the highest overall histories of violations to reduce both their S&S and non-S&S violations, MSHA has determined that timely abated non-S&S violations at a mine with an overall history of 20 penalty points will receive a regular penalty assessment rather than a single penalty assessment. The second reason is that the graduated scale single penalty would significantly complicate part 100. As noted earlier, the Agency agrees with commenters that an unduly complex part 100 would not aid safety and health.

The eighth issue is whether the specific excessive history criteria should be contained in part 100. The December 1990 proposal did not contain these

criteria, and all commenters on this issue stated that these criteria should be incorporated into the rule because the public has a right to notice and comment on rules that affect them. Further, some commenters stated that any changes to these criteria should be subject to notice and comment rulemaking. In response to these comments, MSHA specifically included these criteria in the January 1992 reproposal. All of the comments on this issue supported this inclusion of the criteria in part 100. In light of these reasons, the final rule remains as proposed in the January 1992 reproposal and includes the specific excessive history assessment criteria.

The ninth issue was the date from which violations would be counted for excessive history assessments. In both the December 1990 proposal and the January 1992 reproposal, MSHA proposed a starting date of January 1, 1991. Until January 1, 1993, the VPID and CVHP calculations would be based on fewer than 2 years of data. However, no excessive history assessment would be proposed until a mine had accumulated more than 10 fully paid or finally adjudicated violations.

Many industry commenters criticized the January 1, 1991, date as imposing a retroactive penalty on mine operators. They contended that violations should not be counted for the purposes of excessive history assessments until a final rule is promulgated because operators need to be given fair and adequate notice of this change in assessments. These commenters asserted that many mine operators would have contested more of their violations had they known that these violations could be a factor in determining that a future non-S&S violation would not be eligible for a single penalty assessment. It was further asserted that mine operators do not now contest every violation that they believe to be improperly cited—particularly those involving the $50 single penalty assessment—because the time and labor cost of contesting the violation is substantially greater than the penalty itself. If, however, operators had known that these violations could result in a future excessive history assessment that could raise the $50 single penalty to a $200 regular assessment (for example), then they would have contested more of these violations. In support of these assertions, one commenter noted that the contested violation rate went from an historical average of about 3 percent to about 6 percent after the publication of the pattern of violations rule in July 1990 and the May 1990 program policy letter establishing the excessive history assessment program. Thus, they concluded that to provide mine operators with adequate notice of this penalty assessment change, the violation history for an excessive history assessment would have to start no sooner than 30 days after the final rule is promulgated.

Other commenters criticized the January 1, 1991, date because the May 1990 program policy letter had already established an excessive history assessment program with retroactive starting dates back to May 1988. Thus, these commenters stated that the issue of retroactive criteria in assessing penalties is not relevant because mine operators have received adequate notice, and, therefore, the final rule should continue the policy started in the May 1990 program policy letter. They contended that continuing the existing system would minimize industry confusion about the date from which violations will be counted for excessive history when the final rule becomes effective.

Based on its review of the comments and its experience under the program policy letters, MSHA has determined that publication in the December 1990 **Federal Register** of the proposed January 1, 1991, starting date for counting violations for excessive history assessment purposes provided sufficient notice to operators of MSHA's intention. Furthermore, all violations, including non-S&S violations, have been counted in history since the interim action of December 29, 1989, and operators have been on notice of the importance of this approach since the original Court order of November 21, 1989. Thus, MSHA has determined that an effective date of January 1, 1991, for including violations in history of violations for excessive history assessments is appropriate.

The tenth issue concerns whether excessive history should be based on all violations or only on those paid or finally adjudicated. In the December 1990 proposal, the January 1992 reproposal, and the program policy letters, MSHA took the position that excessive history should be based only on violations paid or finally adjudicated. Of the few commenters on this issue, all but one supported MSHA's position that an operator has the right to exhaust all legal avenues of appeal before the Agency's authority to penalize can be invoked.

One commenter, however, noted that under certain circumstances, a mine operator may be able to avoid an excessive history assessment by contesting violations from previous inspections. This commenter suggested that in order to discourage widespread filing of notices of contest solely to minimize the length of time a violation would be included in the history compilation, all violations (including those contested) should be counted as of the date they were cited, and contested violations would be eliminated from the history of violations only if they were vacated.

Based on the comments and experience under the program policy letters, the Agency's final rule retains the proposed concept that the excessive history program should be based on violations paid or finally adjudicated because the Agency believes that it is neither appropriate nor fair to include violations in an excessive history computation that are not final and could possibly be vacated. In addition, there are substantial economic costs associated with contesting violations, and the average amount of time during which the contested violation is pending and not counted for history has been too brief for the potential financial gain to be greater than this cost. Finally, this concept is consistent with MSHA's historical practice, which has been to calculate overall history using only violations paid or finally adjudicated, and the Agency has found no evidence that operators have filed notices of contest solely to reduce the amount of time a violation is counted in overall history of violations.

Section 100.5 Special Assessments

The wording change in this section references § 100.4(b) in which an excessive history program is established for non-S&S violations. As a result, violations that are processed under the special assessment provision (§ 100.5) and that meet the excessive history criteria will receive an additional dollar penalty to reflect excessive history. Under the previous proposals and program policy letters, MSHA had included an increased penalty for excessive history for violations that receive special assessments. A few commenters contended that the additional excessive history penalty was unnecessary for a violation that has already received an increased penalty from being special-assessed. The Agency disagrees with these commenters because the circumstances governing excessive history are separate from those governing a special assessment. A special-assessed violation occurring at a mine with excessive history should receive a higher penalty than an identical special-assessed violation occurring at a mine without excessive history. On that basis, MSHA will consider excessive history, where

appropriate, on special-assessed non-S&S violations.

III. Executive Order 12291 and the Regulatory Flexibility Act

Executive Order 12291 requires that a regulatory impact analysis (RIA) be completed for any regulation that would have an impact of at least $100 million on the economy or would have a major impact on an industry sector. As this rule does not have a major impact on the economy or the industry, MSHA has not prepared a separate RIA but the analysis contained in this preamble meets the Agency's responsibilities under the Executive Order and the Regulatory Flexibility Act.

The number of non-S&S violations with excessive history and the resulting amount assessed will be exactly the same under this rule as they would have been under the criteria in the January 1992 reproposal. The only assessment differences would be those resulting from this rule's exclusion of S&S violations from receiving an excessive history assessment.

In order to estimate the economic impact of the rule, MSHA used 1991 assessment data to estimate the number of mines and the number of non-S&S violations that would have been affected by the excessive history criteria. On that basis, MSHA determined that 109 coal mines (about 2.8 percent of all active coal mines, including mines that are intermittently active) would have received an excessive history assessment. Of these 109 coal mines, 47 would have been small mines (2.0 percent of all small coal mines), 54 would have been medium-sized mines (4.3 percent of all medium-sized coal mines), and 8 would have been large mines (3.2 percent of all large coal mines). On that same basis, MSHA also determined that 370 metal and nonmetal mines (about 3.2 percent of all metal and nonmetal mines, including a substantial number of mines that are intermittently active) would have received an excessive history assessment. Of these 370 metal and nonmetal mines, 262 would have been small mines (2.8 percent of all small metal and nonmetal mines), 106 would have been medium-sized mines (5.3 percent of all medium-sized metal and nonmetal mines), and 2 would have been large mines (2.4 percent of all large metal and nonmetal mines).

With respect to the number of violations in 1991 that would have received an excessive history assessment, MSHA determined that 872 coal mine violations (2.1 percent of all coal non-S&S violations) would have received an excessive history assessment. On the basis of mine size, 204 of these violations would have occurred at small mines (2.1 percent of all small coal mine non-S&S violations), 599 would have occurred at medium-size mines (3.5 percent of all medium-size coal mine non-S&S violations), and 69 of these violations would have occurred at large mines (0.6 percent of all large coal mine non-S&S violations). MSHA also determined that 1,999 metal and nonmetal mine violations (6.9 percent of all metal and nonmetal mine non-S&S violations) would have received an excessive history assessment. On the basis of mine size, 943 of these metal and nonmetal mine violations would have occurred at small mines (6.0 percent of all small metal and nonmetal mine non-S&S violations), 825 would have occurred at medium-sized mines (7.7 percent of all medium-sized metal and nonmetal mine non-S&S violations), and 231 would have occurred at large mines (8.7 percent of all large metal and nonmetal mine non-S&S violations).

Summarizing the cost of compliance using the violation data for calendar year 1991 and the new penalty table that became effective March 1, 1992, MSHA estimates the amounts that would have been assessed: (1) Under no excessive history program; (2) under the May 1990 program policy letter excessive history criteria; (3) under the January 1992 reproposal excessive history criteria; and (4) under the final rule excessive history criteria. A similar table that had been prepared for the January 1992 reproposal preamble was based on the old penalty table.

WHAT WOULD HAVE BEEN ASSESSED UNDER THE NEW PENALTY TABLE

Baseline	(In $ millions)	
	Total	Increase
No Excessive History	44.3	—
Excessive History (May 1990 Policy)	49.8	5.5
Excessive History (January 1992 Reproposal)	46.6	2.3
Excessive History (Final Rule)	45.3	1.0

NOTE: The amounts in the "Increase" column are based on a comparison with the baseline of "No Excessive History."

As can be calculated from this table, the rule's excessive history criteria would generate a 2.3 percent increase in penalty assessments compared to a 5.2 percent increase in penalty assessments under the January 1992 reproposal excessive history criteria and a 12.4 percent increase in penalty assessments under the May 1990 program policy letter excessive history criteria.

On a per mine basis, the average non-S&S excessive history penalty assessment in 1991 would have been about $435, an increase of about $385 above the $50 single penalty. As a result, a few of the small operations that will receive an excessive history assessment may experience some resultant financial difficulties. Nevertheless, although MSHA has not performed a financial analysis of every potentially affected small mine, the Agency has determined that this increase for non-S&S violations would be unlikely to contribute significantly to a mine's closing. As a result, the Secretary has determined that this rule would not have a significant economic impact upon a substantial number of small entities.

Another consideration in determining the overall economic impact of this rule is its affect upon the rate of contested citations and orders. Several commenters asserted that the previous excessive history criteria had been a significant factor in the increased rate of contested citations and orders that has gone from a pre-1990 historical average of about 3 percent to about 6 percent in 1990, and, excluding contested citations issued from dust sample tampering, to 10.5 percent in 1991, and 9 percent through mid-1992. Although the operator's decision to contest a citation or order is discretionary and, hence, not a cost of the rule, the expected reduction in the number of contested violations due to the new excessive history criteria will reduce some operators' (as well as MSHA's) expenditures.

The preambles to the December 1990 and January 1992 proposed rules presented some 1989 and 1990 fatality and injury rate statistics for mines that: (1) Would have received an excessive history assessment; and (2) would not have received an excessive history assessment. In response to commenters, MSHA has reviewed these data in more detail. On the basis of this more detailed review, the Agency concludes that the data cannot support the argument that mines that would have received an excessive history assessment under the previous or new criteria had a statistically significant higher incidence of fatalities and injuries than mines that would not have received an excessive history assessment. However, MSHA's experience indicates that mines with higher numbers of violations have a greater potential for accidents and injuries. Consequently, MSHA has qualitatively concluded that this rule's excessive history criteria will increase overall compliance, resulting in safer mining environments and fewer fatalities and injuries.

List of Subjects in 30 CFR Part 100

Mine safety and health, Penalties.

Dated: December 14, 1992.

William J. Tattersall,

Assistant Secretary for Mine Safety and Health.

Therefore, part 100, subchapter P, chapter I, title 30 of the Code of Federal Regulations is amended as follows:

PART 100—CRITERIA AND PROCEDURES FOR PROPOSED ASSESSMENT OF CIVIL PENALTIES

1. The authority citation for part 100 continues to read as follows:

Authority: 30 U.S.C. 815, 820, and 957.

§ 100.3 [Amended]

2. Section 100.3(c) is amended by revising the first word "History" to read "Overall history" in the first sentence.

3. Section 100.4 is revised to read as follows:

§ 100.4 Determination of penalty; single penalty assessment.

(a) An assessment of $50 may be imposed as the civil penalty where the violation is not reasonably likely to result in a reasonably serious injury or illness (non-S&S) and is abated within the time set by the inspector. If the violation is not abated within the time set by the inspector, the violation will not be eligible for the $50 single penalty and will be processed through either the regular assessment provision (§ 100.3) or special assessment provision (§ 100.5). If the violation meets the criteria for excessive history under § 100.4(b), the violation will not be eligible for the $50 single penalty and will be processed through the regular assessment provision (§ 100.3).

(b) Excessive history shall be based on overall history from paragraph (c) of § 100.3. Excessive history is defined as 20 penalty points for overall history. Mines having 10 or fewer assessed violations in a preceding 24-month period will be excluded from any excessive history determination. Only violations that are paid or finally adjudicated will be included in determining excessive history. Only citations and orders issued on or after January 1, 1992, shall be considered in determining excessive history.

§ 100.5 [Amended]

4. The concluding text of § 100.5 is amended by revising the phrase "the criteria enumerated in § 100.3(a)." to read "the criteria enumerated in § 100.3(a) and § 100.4(b)."

Part VIII

Department of Education

34 CFR Part 674, et al.
Federal Perkins Loan Program, Federal Work-Study Program, and Federal Supplemental Educational Opportunity Grant Program; Final Rule

DEPARTMENT OF EDUCATION

34 CFR Parts 674, 675, and 676

RIN: 1840–AB22

Federal Perkins Loan Program, Federal Work-Study Program, and Federal Supplemental Educational Opportunity Grant Program

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary amends the regulations for the Federal Perkins Loan, Federal Work-Study (FWS), and Federal Supplemental Educational Opportunity Grant (FSEOG) programs. These programs are known collectively as the campus-based programs and are authorized by the Higher Education Act of 1965, as amended (HEA). These regulations modify provisions governing the campus-based programs, clarify existing policy, and make other necessary changes.

EFFECTIVE DATE: These regulations take effect either 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments. A document announcing the effective date will be published in the **Federal Register**. If you want to know the effective date of these regulations, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Sylvia Ross or Gwendolyn Dockett-Morris, Loans Branch, Division of Policy Development, Office of Student Financial Assistance, U.S. Department of Education, 400 Maryland Avenue, SW., ROB–3, room 4018, Washington, DC 20202–5446, Telephone (202) 708–4690. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300 between 8 a.m. and 7 p.m., Eastern time).

SUPPLEMENTARY INFORMATION: On November 13, 1990, the Secretary published a notice of proposed rulemaking for the campus-based programs in the **Federal Register** (55 FR 47438–47443). The regulations have been revised in accordance with public comments on the proposed rule and reflect changes required by the Higher Education Amendments of 1992 (Pub. L. 102–325). These changes required by the Higher Education Amendments of 1992 include program name changes in part 674, part 675, and part 676 as well as the addition of the definition of "community services" in the Federal Work-Study Program.

The Secretary believes that these regulatory changes complement the President's national education strategy of AMERICA 2000 by providing flexibility to institutions in exchange for more accountability in administering the campus-based programs.

The NPRM included a discussion of the major issues surrounding the proposed changes. The following list summarizes those issues and identifies the pages of the preamble to the NPRM on which discussion of those issues may be found:

A change in definition of "low-income individual" under § 674.33(c) of the Federal Perkins Loan Program for Federal Perkins and Direct loans (pages 47438–47439).

Clarification under § 674.47(d) that an institution does not need to have a written repayment agreement with a borrower as a precondition for waiving collection costs if a borrower makes a lump-sum payment of the full amount of principal and interest outstanding on a loan (page 47439).

An amendment in § 674.47(e) to change the limits on the amount of collection costs that may be charged to the Fund (pages 47439–47440).

A change in § 674.47(g) to increase the ability of an institution to write off small balance accounts on defaulted loans of less than $25.00 (page 47440).

A revision was made to § 674.50 to allow institutions to assign a borrower's account of at least $25.00 to the Department for collection after following regulatory requirements (pages 47440–47441).

Codification of the definition of student services under the FWS Program in § 675.2(b) for FWS students enrolled in proprietary institutions (page 47441).

A new requirement in § 676.14 for institutions that are seeking but are unable to recover FSEOG overpayments to refer to the Department those cases where the overpayment equals $25.00 or more.

Major Changes to the NPRM

As a result of the comments received in response to the NPRM, the Secretary made three changes to the proposed regulations. The write-off provisions in 674.47(g) have been amended to reduce the steps involved for an institution to write off small balance accounts of less than $25.00. Additionally, in order to make the write-off provisions consistent with the assignment provisions, the Secretary amended § 674.50 of the regulations to cover the assignment of accounts with balances of at least $25.00 to the Department for collection. Also, as a result of public comments, the Secretary increased the amount of collection costs chargeable to the Fund in § 674.47(e) from 25 percent to 30 percent for first collection efforts and from 35 percent to 40 percent for litigation and second collection efforts.

Analysis of Comments and Changes

In response to the Secretary's invitation in the NPRM, 60 parties submitted comments on the proposed regulations. An analysis of the comments and of the changes in the regulations since publication of the NPRM follows.

Federal Perkins Loan Program

Section 674.33(c)—Low-Income Individual

Comments: The Secretary received several comments on the proposed provision in § 674.33(c) that would redefine the term "low-income individual." Several commenters generally supported the modifications proposed here and stated that the change to the Standard Maintenance Allowance (SMA) as a benchmark would simplify the identification procedure for institutions, because SMA amounts should be easily accessible to any institution. However, a few commenters suggested adding language to the regulations to allow institutions to use professional judgment in the computation of a family's ability to pay and to allow latitude in unusual circumstances if an individual does not qualify under SMA criteria. Several commenters stated that while efforts to move toward consistency with Part F of the HEA would normally be applauded, the proposal to extend to the collection area the standards used to award financial aid is overly restrictive and without merit. Some commenters stated that, in practice, borrowers served by the extended repayment period do not want to default, but instead want to repay their student loans. Another commenter stated that the new limits would be unrealistically low for many urban areas and that those who become ineligible will continue to be unable to make larger payments than were required by the original repayment schedule in order to pay out the loan within that original 10-year repayment period. The commenters suggested that extending the borrower's repayment period an additional 10 years will not decrease default rates or reduce the cost of collection.

Discussion: Pursuant to the Higher Education Act of 1965, as amended by the Higher Education Amendments of 1992, the term "Standard Maintenance Allowance" has been renamed "Income

Protection Allowance" (IPA) and will be used throughout the remainder of this document. The Secretary determined that the IPA is the best indicator of a "low-income individual" and that use of IPA charts effectively reduces any burden associated with individual low-income computations being performed in the financial aid office. IPA charts are more accessible within the institution than are the annual updates of the survey issued by the Bureau of Labor Statistics and, by far, less burdensome. The Secretary maintained provisions in the regulations that permit an institution to reduce a borrower's scheduled repayments as provided in § 674.33(b)(9), to extend a borrower's repayment period as provided in § 674.33(c), and to defer a borrower's payments as provided in § 674.34(i) if the borrower is unable to make the scheduled payments due to hardship. These provisions allow institutions latitude in unusual circumstances in cases where an individual does not qualify as a low-income individual under the new requirements. The Secretary believes that student default rates, institutional default rates, and collection costs will decrease, as a result of the revised definition of a low-income individual.

Changes: None.

Comments: One commenter indicated that the proposal fails to recognize that, while student need is determined in the financial aid office, repayment is generally handled through the business office and the business office does not have access to components used in need analysis or the IPA in particular. Another commenter stated that the proposal appears designed to ease the burden of the U.S. Department of Education, which would no longer be required to develop guidelines for low-income borrowers.

Discussion: It is the responsibility of an institution, in accordance with § 668.14 of the Student Assistance General Provisions regulations, to administer adequately its Title IV student financial aid programs. The institution's administration must be coordinated in such a way that all pertinent information relative to student aid from any institutional office is communicated appropriately. In accordance with section 478 of the HEA, the Secretary publishes annually in the **Federal Register** the revised IPA table that is mailed to all institutions participating in Title IV Programs. This distribution is sufficient to provide IPA information to all institutional officials.

Changes: None.

Comments: One commenter questioned whether the new definition of a low-income individual affects student loan borrowers who were counseled and who signed promissory notes prior to the enactment of these regulations.

Discussion: The new definition of the term "low-income individual" is applicable to all Federal Perkins and Direct loans made on or after October 1, 1980.

Changes: None.

Section 674.47(d)—Waiver of Collection Costs

Comments: The majority of the commenters strongly supported the proposal in § 674.47(d) which clarifies that the institution does not need to have a written repayment agreement with a borrower as a precondition for waiving collection costs if the borrower makes a lump-sum payment of the full amount or principal and interest outstanding on a loan.

One commenter recommended that the 30-day period in which the institution may waive collection costs that are applicable to a past due balance a borrower pays after the execution of a new written repayment agreement be increased to 60 days to permit institutions and borrowers greater flexibility.

Discussion: The Secretary believes that 30 days allows sufficient time for a borrower to make payment based on a new written repayment agreement. Institutions should bear in mind that only that portion of the past due loan balance paid by the borrower within the 30-day period is subject to the provision of the waiver of collection costs.

Changes: None.

Section 674.47(e)—Limitation on costs charged to the Fund

Comments: Numerous commenters strongly objected to the proposal in § 674.47(e) to reduce the amount of collection costs that may be charged to the Fund. Several commenters suggested that rates should be a by-product of the marketplace and should be based on net results and competitive practices within the industry as opposed to being dictated by regulations. A few other commenters recommended that industry standards be used for first placements, second placements, and litigation efforts.

Additionally, a few other commenters recommended that the Department continue to allow the 33⅓ percent ceiling for first placements and the 50 percent ceiling for second placements, because these percentages reflect reasonable collection costs. Several commenters stated that in their opinion the Secretary defined "reasonable" collection costs during the development of the regulations that were published in the **Federal Register**, dated December 1, 1987, and this provision severely reduced the financial drain of the collection expenses from the Federal Perkins Loan Fund by mandating that these costs be passed on to the borrower. Several more commenters stated that there is no evidence to demonstrate that current rates are unreasonable and, therefore, no justification to limit further the amount the institution may charge the Fund. One commenter stated that it would be contradictory to state that it is reasonable for the borrower to pay current collection costs but unreasonable for the Fund to bear those expenses. A few commenters indicated that the circumstances under which those costs exceeding the proposed percentages would not be covered by the borrower are those in which either direct benefit is afforded to the Fund through prompt payment of an outstanding delinquent debt or those in which the institution has no control over costs as is the case with bankruptcy or litigation expenses. Several commenters stated that the proposed reductions are excessive and unaffordable to most institutions and would have a significantly negative impact financially. A few other commenters suggested that the reductions would prove burdensome for institutions and servicers if institutions were to have to make up the difference in the amounts collected. In addition, several commenters suggested that, considering the extensive collection efforts accounts go through, including first referral efforts, second referral agencies are usually beset with very difficult collection accounts and simply will not have the monetary incentive to pursue these accounts as necessary. As a result there will be decreases in collection returns to the Federal Government. A few commenters stated that the Department should be concerned with achieving the greatest yield rather than be preoccupied with collection rates. Some commenters questioned whether the Department has data indicating that the proposed reductions in caps on collection costs will increase high yields and thus help to preserve the Fund. These commenters suggested that if the Department has that data, it should justify its position by sharing that data with institutions before acting as proposed. Otherwise, the Department should not implement the proposal until it has the data. A few commenters objected to the Secretary's statement that excess collection costs

could be waived without affecting the contractor's, attorney's, or school's ability to receive a "fair recovery" for their efforts. These commenters stated that regardless of all the rhetoric to the contrary, the judicial system will interpret this statement in defense of the borrower, thus undercutting the Department's original position of what reasonable collection costs are. They went on to state further that a precedent has not yet been established within the judicial system supportive of the original cap and that a precedent should be established before a change is considered.

Discussion: The Secretary determined, based on public comment and a review of Departmental collection efforts, that reasonable collection costs that may be charged to the Fund should be increased from 25 percent for first placement and 35 percent for litigation and second placement (as stated in the November 13, 1990 proposed rule) to 30 percent and 40 percent respectively. Under the previous regulations, the rates were 33⅓ percent and 50 percent respectively. The Department has been successful in collection efforts at contingent fee rates that did not exceed 35 percent. Thus, the Secretary believes that collection agencies can be as successful in collecting on defaulted loans at the 30 to 40 percent rates specified above.

The Secretary believes that it is the borrower's responsibility to repay his or her loan prior to default. If the borrower does not repay prior to default, then it is reasonable to expect the borrower to pay any costs associated with collecting past due amounts. The Secretary believes that the taxpayer should not have to bear the costs for the borrower's failure to pay his or her debts. The Secretary has determined that the 33⅓ percent and 50 percent rates have been used for a long enough period of time to show that they do not significantly increase recoveries. Collection agencies do little more at the 50 percent rate than at the 33⅓ percent rate. In light of scarce Federal dollars and the Secretary's desire for all eligible students to have access to student financial aid, the Secretary believes that the Fund must not bear the expense of collection costs of a borrower who will not repay a loan. The revolving Fund will be depleted and deserving students will be denied loans, if institutions continue to charge the Fund for expenses that should rightfully be borne by a borrower who has defaulted. The Secretary has reduced the collection costs based on a balancing of factors affecting the management of the Funds.

As stated previously in this discussion section, the Secretary believes that collection agencies can be successful in collecting defaulted loans at the 30 to 40 percent contingency fee rates. At the same time, the Secretary also believes that the reduction in collection costs chargeable to the Fund will not be burdensome or have a negative impact on the institutions or the servicers. The Secretary did state on page 47440 of the NPRM that "* * * the proposed reduction in the amount of collection costs that can be waived as to the borrower and paid from Fund assets still provides a fair recovery for the contractor or attorney * * *." The Secretary advanced this proposal to limit the amount of waived collection costs that may be charged to the Fund. The Secretary does not intend to prescribe a limit on the collection cost rate or to imply that the imposition of a collection cost at a rate in excess of that proposed here be available as a defense to a borrower. The Secretary recognizes that the amount that can be recovered from the Fund may not provide a complete recovery for the contractor or attorney, but believes that the amount recovered from the Fund still provides a fair recovery of the expenses involved in these accounts, while at the same time lessening the drain to the Fund. Furthermore, when interpreting these regulations, the judicial system should give deference to the Secretary's statement of intent in adopting the regulations. The Secretary is not just amending the regulations to change the amount of contingent fee collection costs that may be paid from Fund assets. The Secretary is also amending the regulations to permit the institution to use Fund assets to pay the actual amount of those court costs specified in 28 U.S.C. 1920. Those court costs were previously included in the amount chargeable against the percent limits on contingent fees.

Changes: The Secretary is amending § 674.47(e) by increasing the costs chargeable to the Fund to 30 percent for the first placement and 40 percent for litigation and second placements.

Comments: Several commenters indicated that unlike most schools, the Department is not restricted in its efforts to collect on assigned loans. For example, the Department is allowed to waive costs, compromise, or accept repayment terms for whatever time frame it so chooses. A few commenters suggested that if the regulations allowed for some institutional discretion in settling accounts, such as permitting the waiver of some portion of interest, the reduction in the collection costs chargeable to the Fund would not be nearly as problematic.

Discussion: The Secretary believes that while institutions have some flexibility in settling Federal Perkins Loan accounts, including the authority to waive a percentage of collection cost under § 674.47(d), a provision that would allow institutions to compromise, forgive, or forget some portion of the amount due would be detrimental to the intent of the Federal Perkins Loan Program (replenishing the Fund). At this time, the Department is not considering any proposals to allow an institution to compromise or accept repayment terms other than those allowed in the regulations at § 674.33.

Changes: None.

Comments: One commenter indicated that the Secretary's statement in the preamble to the NPRM, that said that borrowers in advanced stages of delinquency enter repayment promptly after initial demand by a new collector, is inaccurate and suggested that the Secretary obtain valid data from institutions and contractors who perform collection functions daily.

Discussion: As previously stated on page 47440 of the preamble contained in the November 13, 1990 NPRM, the Secretary has over the past 10 years negotiated over a dozen major collection contracts on defaulted student loans. Based on the Department's experience in collecting defaulted loans, which were typically in advanced states of delinquency (approximately three to five years in default), the Secretary believes that a significant portion of those defaulters who enter repayment do so promptly after initial demand by a new collector. Generally, borrowers in advanced stages of delinquency have begun to earn a substantial income, enabling them to begin repayment. These borrowers are, therefore, in a better position to repay their student loan debts on a regular basis. Opinions by guarantee agencies support the Department's position regarding borrowers in advanced stages of delinquency. Based on a study conducted by the American Management Systems, Inc., for the Department of Education (February 1989), guarantee agencies revealed that: "Most individuals involved in student loan collections (such as lenders and collection agents) recognize that student loans become more collectible over time because borrowers become more responsible—they find jobs, establish credit, and gain assets, and are in a better position to repay the loans. Most guarantors conclude that their recovery rate on accounts older than five years is from 25 percent to 70 percent. In the

first six to eight months after default, guarantors find that many borrowers are financially unable to pay."

Changes: None.

Comments: A few commenters stated that the Department should recognize that the Federal Perkins Loan Program is well managed at the institutional level and that management has resulted in a declining default rate. A few other commenters suggested that current regulations governing the area of collection costs are very complex and that the proposed regulations add further complexity. Several commenters strongly urged simplification of the regulations. Several other commenters suggested that, if the Department must make reductions in the caps on collection costs chargeable to the Fund, they be implemented through a sliding scale of reductions to allow the impact to be felt the most by institutions with the highest default rates; i.e., the higher the default rate, the lower the cap. In addition, a few commenters suggested that since the Secretary offers an incentive to the borrower in the form of waiving collection costs, an incentive should be offered to institutions to collect on accounts in the form of a graduated cap. Additionally, a graduated cap related to default rates versus an across the board cap might be viewed more favorably by the judicial system.

Discussion: The proposed regulations serve to reduce complexities in the Federal Perkins Loan Program regulations. For example, a requirement pertaining to the waiver of collection costs chargeable to the Fund under § 674.47(d) will be eliminated from the collection procedures. Institutions and borrowers will no longer be required to enter into a new written repayment agreement in order to waive collection costs for lump sum payments made on defaulted loan accounts. In addition, for institutions that hold small balance accounts, the rule under § 674.47(g) will reduce many of the write-off requirements. A sliding scale or a graduated cap concept for collection costs purposes would prove burdensome for institutions and would create unnecessary complexities in the regulations and in the overall collection process. The Secretary believes there are other less complex ways of providing incentives to institutions to collect loan payments and keep defaults down. The provisions contained in the current regulations governing the area of collection costs provide the necessary guidance that allows institutions to manage properly the Federal Perkins Loan Program.

Changes: None.

Comments: Several commenters indicated that there appears to be confusion regarding the circumstances under which reduced contingency fees can be charged to the Fund. The commenters further stated that the preamble indicates three occasions, while the proposed regulatory language implies that the new caps placed on costs chargeable to the Fund affect all collection costs incurred more than 30 days after the execution of a new repayment agreement. In addition, one commenter stated that the proposed regulations recognize that, for amounts paid later than 30 days after signing a new repayment agreement, current rate structures are justified. Therefore, the proposed regulations would only affect accounts that qualify for the waiver of collection costs. The commenter did not believe the factors listed in the proposed regulations provide a compelling argument to justify a rate reduction for this waiver period.

Discussion: The Secretary believes that it is necessary to clarify that the new limitations on the amount of contingency fee costs chargeable to the Fund apply to collection costs that have been waived by the institution in conjunction with a borrower signing a new written repayment agreement and making payments within 30 days under § 674.47(d) and to collection costs incurred by the institution more than 30 days after the execution of a new repayment agreement. The preamble (55 FR 47439) describes three instances in which an institution may charge the Fund for collection costs arising in connection with contingency fee charges. In the first situation described in the preamble, the institution, pursuant to § 674.47(d), may have agreed to waive the enforcement of some or all of the collection costs, including contingency fees. For example, if the borrower enters a new repayment agreement with the institution and repays one-half of the past-due outstanding principal and interest balance on his or her defaulted loan account within 30 days of the date of the execution of the agreement, the institution may waive the collection of one-half of the collection costs that have been incurred through the date of the payment. Payment in full can permit a full waiver of collection costs that may be charged to the Fund. To the extent that these accrued costs have been waived under § 674.47(d), the institution may charge the costs against the Fund, subject to the limitations applicable under § 674.47(e).

As under the current regulations, an institution must assess against the borrower the full amount of any collection costs incurred in collecting the remaining balance of the loan under the repayment agreement after the expiration of the 30-day waiver period. An institution may not charge the Fund for collection costs arising in connection with contingency fee charges for amounts paid more than 30 days after the signing of the repayment agreement, unless the second or third situation described in the preamble is applicable. Specifically, the institution may not charge the Fund for collection costs arising in connection with contingent fee charges for amounts paid more than 30 days after the signing of the repayment agreement unless the institution is legally barred from assessing the full amount of these costs against the borrower or unless the institution has demanded that the borrower pay these costs but the amount recovered from the borrower is insufficient to satisfy both the contingency fees and other collection costs.

Furthermore, the new limitations on the amount chargeable against the Fund do not affect an institution's ability to negotiate contingency fee arrangements and assess the borrower at a rate in excess of the limits under § 674.47(e) with respect to those amounts paid more than 30 days after the signing of the new repayment agreement. By establishing the new limitations on the amounts chargeable against the Fund, the Secretary does not intend to reduce directly or indirectly the contingency fee rate charged on recoveries outside that 30-day period.

Changes: None.

Comments: One commenter suggested that the Secretary allow institutions sufficient time to make a transition from the old limits to the new ones.

Discussion: The Secretary, by virtue of the 45 days between the publication of the regulations and their effective date, will allow sufficient time for institutions to implement these regulations and to make the transition from old to new limits.

Changes: None.

Comments: Several commenters stated that it will be necessary to renegotiate contracts with agencies in order to reduce the amount of collection costs to be retained by the agency. In addition, if the agency refuses to renegotiate the original contract, institutions could be forced to pay the difference to meet due diligence requirements. One commenter pointed out that ongoing surveys by the American Collectors Association show that fee cuts ultimately and absolutely mean substantial cuts in performance and could ultimately reduce the ability

of an agency to service accounts properly. Several commenters stated that institutions will be unable to find collection agencies willing to undertake collection responsibilities at the lower rates and that many reputable and proven collection firms will leave the student loan market forcing institutions to use less expensive collection agencies with unproven collection records. Several other commenters stated that many firms represent student loan clients in bankruptcy court, file proofs of claim, attend meetings of creditors, review bankruptcy court documents, attend confirmation hearings, object to confirmation, conduct discovery in various bankruptcy court proceedings, and contest requests for hardship discharge. A few commenters stated that it will become necessary for some firms, should institutions wish them to continue to represent them in bankruptcy cases, to charge an hourly fee for bankruptcy representation.

Discussion: Institutions must make a diligent effort to negotiate better contracts with collection firms in order to receive the best service possible. Institutions should have at least two or three collection firms from which to choose and should demand quality service and not allow agencies to dictate to them.

Changes: In response to the comments, the Secretary has amended § 674.47(e) of the regulations by increasing the amount of collection costs that may be charged to the Fund to 30 percent for first placements and 40 percent for litigation and second placements.

Section 674.47(g)—Write-offs

Comments: Several commenters fully supported the Secretary's proposal in § 674.47(g) to allow institutions to write off accounts of less than $25.00 and stated that the change makes good business sense. A few commenters stated that this change will make it much simpler to assign accounts to the Department. A few other commenters stated that while the reduction in the number of accounts subject to write-off will ease the paperwork and administrative burden on institutions it will not be cost effective to be required to comply with the provisions of § 674.47(g)(1) (i) through (iii). A commenter suggested that, rather than restricting institutional write-offs to balances under $25, the Secretary make a change to include balances under $200.

Discussion: The Secretary agrees with the commenters and does not intend for institutions to continue carrying out all of the procedures contained in current regulations in order to write off small balance accounts. Under current regulations, an institution is encouraged to assign to the Department accounts over $200. Further, it is encouraged to make those assignments before the statute of limitation period has run, since the institution need not complete the course of semiannual collection efforts prior to assigning the accounts. The new regulation is intended to increase the number of defaulted loans assigned to the Department by lowering the minimum amount that qualifies for assignment from $200 to $25 and to give institutions added incentives to assign the loans by lowering the authority to write off defaulted accounts with minimum balances from $200 or less to balances under $25.

Changes: The Secretary is revising § 674.47(g) of the regulations by removing paragraphs (g)(1)(i) through (g)(1)(iii) of this section to reduce the due diligence steps required by institutions to write off small balance amounts of less than $25.00. Further, § 674.50 is amended to include requirements for institutions to follow before assigning a borrower's account of at least $25.00 to the Department for collection.

Federal Work-Study Program

Section 675.2—Definitions

Section 675.21—Institutional Employment

Comments: The proposed change to codify the definition of "student services" to include areas in which the student employee provides direct and personal services to other students that are incidental to the training or education being offered seemed reasonable to most commenters. Another commenter felt that while there may be additional service categories not listed in the definition, the "not limited to" language would permit an institution to employ students in that service if appropriate. One commenter suggested that "reasonable accommodation services" be added to the list to comply with the new Americans with Disabilities Act (ADA). Another commenter suggested that campus clerical functions that provide direct and personal services be included. Two commenters felt that the proposal fails to address the student population at most proprietary schools that offer short-term training in a specific skill. As a result, students would be denied on-the-job experience. By limiting the types of employment permitted under the FWS Program, commenters felt that the Department is also limiting the types of job experiences students can obtain. A number of commenters believe that the areas that are proposed to be eliminated from the program can provide valuable experiences to students in their chosen field of study. These commenters further stated that the types of jobs in question actually do provide a service to students, some more directly than others. One commenter felt that work experiences should not necessarily be required to provide direct and personal services to other students in order to assist the student in obtaining future employment in his or her chosen field. The commenter felt the focus should be on work that is beneficial to the student since employers generally seek prospective employees with work experience. One commenter thought that the interpretation and language of the proposed rule went beyond the intent of the statute, which he felt was only to address the solicitation of potential students.

Discussion: Pursuant to the Higher Education Act of 1965, as amended by the Higher Education Amendments of 1992, the Secretary has revised the definition of "student services" to allow proprietary institutions to employ students in jobs furnishing student services only when these services are directly related to the work-study student's education. Also, in carrying out the provisions of the amendments to the HEA, the Secretary is amending § 675.21 of the regulations to allow proprietary institutions to employ students to work for the institution off campus, provided the student is employed in "community services" as defined in § 675.2.

Changes: Changed as noted above.

Federal Supplemental Educational Opportunity Grant Program

Section 676.14 Overawards

Comments: Most commenters supported the Secretary's proposal to recover the overpayments from students in cases in which the Federal share of FSEOG overpayment is $25.00 or more. However, they suggested that funds recovered by the Secretary, minus the reasonable fee, be remitted to the institution to assist other financially needy students. Two commenters indicated that a provision should be added to the regulations stating that, if an overpayment occurs that did not result from student error, the student is not held liable and the institution cannot recover the overpayment from the student. A typical example of this circumstance would be if a student reports his resources and needs accurately and, due to the fault of the

institution, the amount of his grant is not recalculated, resulting in an overpayment. Several commenters stated that recovery in such an instance can prove burdensome and unjust to the student already living on a meager income. Four commenters expressed concern over the timeframes required for institutions to notify the student. One commenter stated that requiring a second notification to recover overpayments within a 30-day period is redundant. According to the commenter, the time expenditure and additional mailing costs incurred are not warranted and would prove to be counter-productive to the intent of recovery.

Another commenter would like to see a 120-day period instead of the 90-day limitation. One commenter stated that students generally do not make serious arrangements until the beginning of the next term when they want to return to school. A third commenter stated that the 30-day period is restrictive and unreasonable during some time periods, such as semester breaks when it may be difficult to contact a student. In addition, the student is only permitted a 10-day time period to make repayment arrangements and, if he or she fails to do so, would become ineligible for additional Title IV funds. The commenter suggested that consideration should be given to allow for two reasonable attempts within a 60-day period and allow for a 120-day period for the student to make repayment arrangements. One commenter suggested that the restrictive 30-day period be omitted and the institution should be given the option to submit the minimum $25.00 if all other attempts to collect have been futile. One commenter felt the proposal would restrict flexibility and force some students out of eligibility because of $25.00 overpayment. The commenter stated that the current regulations appear reasonable because they allow the student and institution to work together to resolve the overaward situation without undue hardship on either party.

Several commenters suggested patterning the proposed FSEOG overpayment system more closely after the Federal Pell Grant system, especially in the areas of institutional errors and institutional discretion. According to a commenter, the Federal Pell Grant overpayment system has a "floor" of $100.00 and the commenter felt the $100.00 floor was more appropriate than the $25.00 floor that is being proposed. Another commenter stated that FSEOG overpayments will, as a rule, be much smaller than Federal Pell Grant overpayments; therefore, mandating the referral of FSEOG overpayments to the Department raises the question of cost effectiveness. One commenter did not believe it would be a useful expenditure of scarce institutional resources to have to make reports to the Secretary. Another commenter felt that this proposal would be paper intensive for just $25.00.

Discussion: Pursuant to section 413D of the HEA, the Secretary must allocate funds to each eligible institution for use in each fiscal year. Similarly, an institution may not use funds allocated for a given award year to make FSEOG disbursements to students in any subsequent award year, or to satisfy any other obligation incurred after the end of the designated award year.

In the majority of instances, any funds recovered by the Secretary will not be recovered in the award year that the FSEOG was disbursed to the student. Therefore, those recovered funds cannot be returned to the institution that made the award to use in a subsequent award year. In cases where an institution recovers FSEOG funds from students made in a prior award year, the institution must adjust award expenditures and administrative cost allowances for the year that the award was made. In fact, as a result of a recovery by an institution of a prior year award or grant, the institution is obligated to repay money to the Federal Government. The FISAP is the mechanism by which repayment is reported to the Department.

If, however, an institution is able to recover an overaward in the award year in which the award was disbursed, the institution may keep and reuse that amount.

The Secretary agrees with the commenters that the number of notifications and timeframes during which notification must be sent by an institution to a borrower to recover an overpayment may be counter-productive to the intent of recover. The Secretary, therefore, has eliminated this provision in the final rule.

The Secretary believes that when a student receives the benefit of an increased award amount, the student is obligated to repay that amount regardless of whether the institution is also liable for the overpayment. This requirement is prescribed in § 676.14(d)(1). In cases where the institution is liable for an overpayment because the institution failed to follow the procedures set forth in the regulations, the institution must follow the procedures prescribed in § 674.14(d)(2).

The proposed FSEOG overpayment provisions are closely patterned after the Federal Pell Grant "Recovery of overpayments" provisions found in 34 CFR 690.79 of the Federal Pell Grant Program regulations. The Federal Pell Grant Program regulations do not provide for institutional discretion when an institutional error has caused an overpayment. In addition, the Federal Pell Grant Program regulations do not provide a "floor" of $100.00 as one commenter suggested. If an institution makes an overpayment for which the institution is liable in the Federal Pell Grant Program, regardless of the amount, Federal Pell Grant Program regulations require the institution to restore those funds to its Federal Pell Grant account whether or not it collects from the student.

If an institution makes an overpayment for which it is not liable, the institution must help the Secretary recover the overpayment regardless of the amount. The Secretary believes that the proposed requirements for recovery of FSEOG overpayments are less stringent than those required by the Federal Pell Grant Program, in part because institutions are not required to notify the Secretary regarding overpayments of less than $25.00.

Changes: In response to the comments, the Secretary has amended § 676.14(d)(3) of the regulations by removing the time-frames in which an institution would be required to contact the student and the Secretary following the initial written notification to the student requesting payment in full.

Waiver of Proposed Rulemaking

In accordance with section 431(b)(2)(A) of the General Education Provisions Act (20 U.S.C. 1232(b)(2)(A)) and the Administrative Procedure Act (5 U.S.C. 553), it is the practice of the Secretary to offer interested parties the opportunity to comment on proposed regulations. Most of the changes in these final regulations were published for public comment on November 13, 1990 (55 FR 47438–47443). However, some of these changes are needed to conform the regulations to statutory changes made by Public Law 102–325. Public comment would have no effect on the content of these changes. Therefore, the Secretary has determined that publication of a proposed rule for these changes is unnecessary and contrary to the public interest under 5 U.S.C. 553(b)(B).

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for

major regulations established in the order.

Assessment of Educational Impact

In the notice of proposed rulemaking, the Secretary requested comments on whether the proposed regulations would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Based on the response to the proposed rules and on its own review, the Department has determined that the regulations in this document do not require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Parts 674, 675, and 676

Education, Loan programs—education, Student aid reporting and recordkeeping requirements.

(Catalog of Federal Domestic Assistance Numbers: 84.007 Federal Supplemental Educational Opportunity Grant Program; 84.003 Federal Work-Study Program; and 84.038 Federal Perkins Loan Program)

Dated: December 15, 1992.

Lamar Alexander,

Secretary of Education.

The Secretary amends parts 674, 675, and 676 of title 34 of the Code of Federal Regulations as follows:

PART 674—[AMENDED]

1. The authority citation for part 674 continues to read as follows:

Authority: 20 U.S.C. 1087aa–1087hh and 20 U.S.C. 421–429, unless otherwise noted.

2. The heading of Part 674 "PERKINS LOAN PROGRAM" is revised to read "FEDERAL PERKINS LOAN PROGRAM".

3. Section 674.33 is amended by revising paragraph (c)(2) to read as follows:

§ 674.33 Repayment

* * * * *

(c) * * *

(2) *Low-income individual.* (i) For Federal Perkins loans and Direct loans made on or after October 1, 1980, the institution may extend the borrower's repayment period up to 10 additional years beyond the 10-year maximum repayment period if the institution determines during the course of the repayment period that the borrower is a "low-income individual." The borrower qualifies for an extension of the repayment period on the basis of low-income status only during the period in which the borrower meets the criteria described in paragraph (c)(2)(i) (A) or (B) of this section. The term *low-income individual* means the following:

(A) For an unmarried borrower without dependents, an individual whose total income for the preceding calendar year did not exceed 45 percent of the Income Protection Allowance for the current award year for a family of four with one in college.

(B) For a borrower with a family that includes the borrower and any spouse or legal dependents, an individual whose total family income for the preceding calendar year did not exceed 125 percent of the Income Protection Allowance for the current award year for a family with one in college and equal in size to that of the borrower's family.

(ii) The institution shall use the Income Protection Allowance published annually in accordance with section 478 of the HEA in making this determination.

(iii) The institution shall review the borrower's status annually to determine whether the borrower continues to qualify for an extended repayment period based on his or her status as a "low-income individual."

(iv) Upon determining that a borrower ceases to qualify for an extended repayment period under this section, the institution shall amend the borrower's repayment schedule. The term of the amended repayment schedule may not exceed the number of months remaining on the original repayment schedule, provided that the institution may not include the time elapsed during any extension of the repayment period granted under this section in determining the number of months remaining on the original repayment schedule.

* * * * *

(Approved by the Office of Management and Budget under control number 1840–0535)

4. Section 674.47 is amended by revising paragraphs (d), (e), and (g) to read as follows:

§ 674.47 Costs chargeable to the Fund.

* * * * *

(d) *Waiver: collection costs.* Before filing suit on a loan, the institution may waive collection costs as follows:

(1) The institution may waive the percentage of collection costs applicable to the amount then past-due on a loan equal to the percentage of that past-due balance that the borrower pays within 30 days after the date on which the borrower and the institution enter into a written repayment agreement on the loan.

(2) The institution may waive all collection costs in return for a lump-sum payment of the full amount of principal and interest outstanding on a loan.

(e) *Limitations on costs charged to the Fund.* The institution may charge to the Fund the following collection costs waived under paragraph (d) of this section or not paid by the borrower:

(1) A reasonable amount for the cost of a successful address search required in § 674.44(b).

(2) Costs related to the use of credit bureaus as provided in § 674.45(b)(1).

(3) For first collection efforts pursuant to § 674.45(a)(2), an amount that does not exceed 30 percent of the amount of principal, interest and late charges collected.

(4) For second collection efforts pursuant to § 674.45(c)(1)(ii), an amount that does not exceed 40 percent of the amount of principal, interest and late charges collected.

(5) For collection costs resulting from litigation, including attorney's fees, an amount that does not exceed the sum of—

(i) Court costs specified in 28 U.S.C. 1920;

(ii) Other costs incurred in bankruptcy proceedings in taking actions required or authorized under § 674.49;

(iii) Costs of other actions in bankruptcy proceedings to the extent that those costs, together with costs described in paragraph (e)(5)(ii) of this section, do not exceed 40 percent of the total amount of judgment obtained on the loan; and

(iv) 40 percent of the total amount recovered from the borrower in any other proceeding.

(6) If a collection firm agrees to perform or obtain the performance of both collection and litigation services on a loan, an amount for both functions that does not exceed the sum of 40 percent of the amount of principal, interest and late charges collected on the loan, plus court costs specified in 28 U.S.C. 1920.

* * * * *

(g) *Write-offs.* (1) An institution may write off an account with a balance of less than $25.00, including outstanding principal, accrued interest, collection costs and late charges.

(2) An institution that writes off an account under this paragraph may no longer include the amount of the account as an asset of the Fund.

(3) If an institution receives a payment from a borrower after the loan has been written off, it shall deposit that payment into the Fund.

5. Section 674.50 is amended by revising paragraph (a)(2) to read as follows:

§ 674.50 Assignment of defaulted loans to the United States.

(a) * * *

(2) The amount of the borrower's account to be assigned, including outstanding principal, accrued interest, collection costs and late charges is $25.00 or greater; and

* * * * *

PART 675—[AMENDED]

1. The authority citation for Part 675 continues to read as follows:

Authority: 42 U.S.C. 2751–2756a, unless otherwise noted.

2. The heading of Part 675 "COLLEGE WORK-STUDY AND JOB LOCATION AND DEVELOPMENT PROGRAMS" is revised to read "FEDERAL WORK-STUDY PROGRAM AND JOB LOCATION AND DEVELOPMENT PROGRAM".

3. Section 675.2(b) is amended by adding, in alphabetical order, definitions of "Community services" and "Student services" to read as follows:

§ 675.2 Definitions.

* * * * *

(b) * * *

Community services: Services which are identified by an institution of higher education, through formal or informal consultation with local nonprofit, governmental, and community-based organizations, as designed to improve the quality of life for community residents, particularly low-income individuals, or to solve particular problems related to their needs. These services include—

(1) Such fields as health care, child care, literacy training, education (including tutorial services), welfare, social services, transportation, housing and neighborhood improvement, public safety, crime prevention and control, recreation, rural development, and community improvement;

(2) Work in service opportunities or youth corps as defined in section 101 of the National and Community Service Act of 1990, and service in the agencies, institutions and activities designated in section 124(a) of that Act;

(3) Support to students with disabilities; and

(4) Activities in which a student serves as a mentor for such purposes as—

(i) Tutoring;

(ii) Supporting educational and recreational activities; and

(iii) Counseling, including career counseling.

* * * * *

Student services: Services that are offered to students that are directly related to the work-study student's training or education and that may include, but are not limited to, financial aid, library, peer guidance counseling, and social, health, and tutorial services.

* * * * *

4. Section 675.21(b) is revised to read as follows:

§ 675.21 Institutional employment.

* * * * *

(b) A proprietary institution may employ a student to work for the institution, but only in jobs that—

(1)(i) Are on campus; or

(ii) Are in community service;

(2) Involve the provision of student services as defined in § 675.2;

(3) To the maximum extent possible, complement and reinforce the educational program or vocational goals of the student; and

(4) Do not involve the solicitation of potential students to enroll at the proprietary institution.

PART 676—[AMENDED]

1. The authority citation for Part 676 continues to read as follows:

Authority: 20 U.S.C. 1070b–1070b–3, unless otherwise noted.

2. The heading of Part 676 "SUPPLEMENTAL EDUCATIONAL OPPORTUNITY GRANT PROGRAM" is revised to read "FEDERAL SUPPLEMENTAL EDUCATIONAL OPPORTUNITY GRANT PROGRAM".

3. Section 676.14 is amended by revising paragraph (d)(3) to read as follows:

§ 676.14 Overawards.

* * * * *

(d) * * *

(3)(i) If the institution makes an overpayment for which it is not liable, it shall promptly attempt to recover the overpayment by sending a written notice to the student requesting payment in full. Failure to make repayment of the overawarded funds renders the student ineligible for further Title IV aid until final resolution of the overpayment.

(ii) If a student objects to the institution's overpayment determination on the grounds that it is erroneous, the institution shall consider any information provided by the student and determine whether the objection is warranted prior to referring the overpayment to the Secretary.

(iii)(A) If an institution fails to collect the overpayment after taking the action required by paragraphs (d)(3)(i) and, if applicable, (ii), of this section, and the Federal share of the overpayment is $25.00 or more, it shall notify the Secretary identifying the Federal share of the overpayment, the student's name, most recent address, telephone number, and other relevant information. After notifying the Secretary under this section, the institution need make no further recovery efforts.

(B) If an institution fails in its attempt to collect the overpayment and the Federal share of the overpayment is less than $25.00, the institution need make no further recovery efforts.

Department of Education

Chapter 1—Migrant Education Coordination Programs for State Educational Agencies; Notices

DEPARTMENT OF EDUCATION

Chapter 1—Migrant Education Coordination Program for State Educational Agencies

AGENCY: Department of Education.

ACTION: Notice of final priority for Fiscal Year 1992.

SUMMARY: The Secretary amends the notice of final funding priorities for fiscal year (FY) 1992 grant competitions under the Chapter 1—Migrant Education Coordination Program for State Educational Agencies, by adding an additional absolute priority to the list of priorities that may be used in the FY 1992 competition for funds. Under this priority, the Secretary will support projects to expand State efforts to recruit currently migratory children so that more children can be served by the Migrant Education Program (MEP). Funds will be reserved for State educational agencies (SEAs), whose MEP funds are insufficient to support adequate recruitment into the program of currently migratory children throughout their States, to expand their recruitment efforts in coordination with other States. The Secretary also announces a competitive preference and other considerations to direct the use of these funds.

EFFECTIVE DATE: This priority takes effect either 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments. If you want to know the effective date of this priority, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Ann Weinheimer, Office of Migrant Education, U.S. Department of Education, room 2149, 400 Maryland Avenue, SW., Washington, DC 20202–6135. Telephone: (202) 401–0744. Deaf and hearing impaired individuals may call (202) 401–1985 or, if unavailable, the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

SUPPLEMENTARY INFORMATION:

Background

Authority for the Chapter 1–Migrant Education Coordination Program for SEAs is contained in section 1203 of the Elementary and Secondary Education Act of 1965. Under this program, awards are made to SEAs to improve the interstate and intrastate coordination of educational programs available for migratory students. The statute directs the Secretary to make awards to SEAs in consultation with, and with the approval of, the States.

On February 28, 1991, the Secretary published in the **Federal Register** (56 FR 8610) a notice of eight final funding priorities from which the Secretary could select in conducting competitions for funds appropriated in FY 1991 and FY 1992. For FY 1991, the Secretary awarded grants under two of those priorities—a national project for a system of credit exchange and accrual for secondary students and a migrant stop-over site service center—and, for FY 1992, the Secretary made continuation awards to these grant recipients.

Since publication of the notice of absolute priorities, migrant education officials in many States have asked the Department to determine whether section 1203 funds could be made available to enhance their efforts to recruit currently migratory children (those who have migrated across school district boundaries during the past 12 months). These officials believe that there may be significant numbers of currently migratory children residing in their States who do not benefit from the MEP because the SEAs have inadequate funds for identifying these children and recruiting them into the program. These officials have indicated that the problem is particularly acute in States with relatively small MEP formula allocations.

Currently migratory children are among the Nation's neediest populations, and a more concerted effort is needed to identify and recruit these children. Large numbers of children who could benefit from the supplemental educational services that the MEP offers are never identified in any of the several States in which they reside during the year. Data provided to the Department by the Migrant Student Record Transfer System (MSRTS) also suggest that many other currently migratory children are identified in only one State, even though they have crossed State boundaries.

This priority seeks to help States to provide appropriate supplemental MEP assistance to currently migratory children, thereby helping to ensure that those children reach the higher levels of achievement called for in AMERICA 2000, the President's strategy to help the Nation move itself toward the six National Education Goals. MEP programs for preschool and school-aged children are designed to help migratory children enter school ready to learn (Goal 1), increase their high school graduation rate (Goal 2), and demonstrate competency in challenging subjects such as English, mathematics, science, history, and geography (Goal 3). In addition, MEP programs help young adults attain full literacy, increase their ability to compete in a global economy, and exercise the rights and responsibilities of citizenship (Goal 5).

So that greater numbers of currently migratory children may benefit from the MEP and the assistance it provides in helping the Nation to meet these goals, the Secretary announces this new funding priority. Under this priority, the Secretary will reserve a portion of funds available for the FY 1992 Migrant Education Coordination projects for competitive grants to SEAs whose MEP allocations are inadequate to enable them to identify and recruit all the currently migratory children who move to or pass through their States, and to expand and strengthen the capacity of State recruitment efforts in ways that may yield long-term benefits for the State and, at the same time, promote activities that enhance interstate or intrastate coordination. Publication of this notice of final priority follows discussions at a meeting in December, 1991, of the National Association of State Directors of Migrant Education (NASDME) about the need to find ways to identify and recruit more currently migratory children. At that meeting, NASDME concurred with a proposal to use section 1203 funds to support the kinds of projects described in this final priority.

The Secretary published a notice of proposed priority to include the new final priority for the Migrant Education Coordination Program on June 16, 1992 (57 FR 26832). That notice solicited comments from the public, which have been considered in development of this notice of final priority. Funding of particular projects under this priority will depend upon the availability of funds and the quality of the applications received. The publication of this final priority does not preclude the Secretary from proposing additional priorities, nor does it limit the Secretary to funding only this priority, subject to meeting applicable rulemaking requirements.

Note: This notice of final priority does not solicit applications. A notice inviting applications under this competition is published in a separate notice in this issue of the **Federal Register.**

Analysis of Comments and Changes

In response to the Secretary's invitation in the notice of proposed priority, the Department received comments from four State educational agency officials in three States. The major concerns raised by these officials were about the priority's purpose and usefulness, and about the requirement that awarded funds be used for supplemental identification and

recruitment activities. In addition, several alternative suggestions were offered.

The final priority is an appropriate activity under the Migrant Education Coordination Program and will serve to benefit migratory children who reside both in small and large allocation States that compete successfully for funds by enabling those States to carry out expanded identification and recruitment activities and provide services to newly recruited migratory children. No changes have been made based on the comments received.

A more detailed analysis of the comments received in response to the notice of proposed priority is published as an appendix to this final priority notice.

Priority

Under 34 CFR 75.105(c)(3), the Secretary gives an absolute preference under the Migrant Education Coordination Program for SEAs for the following priority. Assuming the availability of funds, the Secretary will reserve funds under section 1203 of the Act for competitive grants to SEAs only for projects that implement this priority.

Absolute Priority

Under this priority, SEAs will compete for grants to cover the costs of supplemental efforts to identify and recruit currently migratory children who are found to be residing in their States during portions of the grant period. Funds will be made available to SEAs whose 1991–92 or 1992–93 MEP project year allocations are insufficient to permit full recruitment of currently migratory children in their States. The Secretary will consider only applications from SEAs that establish the likelihood that a State's proposed activities will address unmet national needs by increasing the number of identified currently migratory children beyond levels now permitted by its MEP allocations.

Aside from recruiting these children and entering data on them into the MSRTS, recipients will undertake activities to enhance the likelihood that currently migratory children found in one locality will subsequently be identified in other localities to which the children migrate, so that MEP services on an interstate or intrastate basis can become more available to these children.

At a minimum, project activities must include—

(1) Development of a plan of operation that promotes the most efficient and effective use of program funds for supplemental activities designed to recruit additional currently migratory children into the MEP under 34 CFR 201.20(a)(3) and 201.30;

(2) Assessment of these children's special educational needs, as required by 34 CFR 201.32 and, where possible, provision of necessary instructional or support services to them; and

(3) Special activities designed to enhance the likelihood that these children will continue to be recruited and served by the MEP as they migrate within the State or to other States. These special activities must include, but need not be limited to—

(a) Advance notification, on the basis of information gathered during the recruitment and any follow-up interviews, to other States and localities of the locations to which the children are expected later to move and their expected dates of arrival;

(b) Communication with those other States and localities to determine whether the children made those moves and were subsequently recruited;

(c) Use of the recruitment interview to determine whether the children's families have migrated previously to the location in which they were identified, and whether they are likely to do so in the future;

(d) Development and distribution of information to parents and guardians of migratory children about the MEP and its parental involvement components, and on how to contact school officials and service agencies in all other locations to which they migrate; and

(e) Recruitment efforts planned for future years, using the SEA's allocation of MEP funds, in those areas of the State in which currently migratory children are found to be likely to return.

SEAs that receive grants will be required to coordinate, to the extent possible, all recruitment and other activities supported by this project with other States to or from which identified children migrate and to seek appropriate assistance from the MEP Coordination Centers, the Chapter 1 Technical Assistance Centers, and the Rural Technical Assistance Centers.

Restrictions on the Use of Project Funds

To ensure that activities funded under this priority are devoted to recruiting migratory children whom an SEA otherwise would not identify, program funds may be used only for recruitment activities that supplement, rather than supplant, resources that the SEA otherwise would expend on the State's recruitment activities. Moreover, since all activities must be designed to promote interstate or intrastate coordination, funds awarded under this competition may not be targeted for identifying or recruiting formerly migratory children.

Competitive Preference and Other Considerations

The Secretary gives a competitive preference under 34 CFR 75.105(c)(2) of up to 15 additional points to applicants that establish, under the selection criterion in 34 CFR 205.31(a)(2) (yielding a maximum of 25 points), the likelihood that their States' "proposed activities address unmet national needs" by increasing the number of identified currently migratory children beyond levels now permitted by their MEP allocations.

Depending on the availability of funds, the Secretary will allocate up to $1.2 million from funds appropriated in FY 1992 only for projects that meet this priority. In keeping with the belief that insufficient recruitment may be particularly severe in States that receive relatively small MEP allocations, the Secretary will award grants from two different applicant pools. One pool will consist of SEAs whose MEP allocations for either the 1991–92 or 1992–93 program years were $500,000 or less. Fourteen States qualify for this pool on this basis. The other applicant pool would be open to all other SEAs. Of the total amount made available to the Secretary, up to two-thirds will be available for awards to the smaller allocation SEAs. The remainder will be available for awards to the larger allocation SEAs. The actual amounts awarded to SEAs in each pool of applicants will depend on both the total amount available to fund activities that support this priority and the number and quality of applications. The Secretary believes that these procedures will permit program funds to be concentrated in States with the most limited means to recruit migratory children, and at the same time, allow SEAs with larger MEP allocations, but with a demonstrable need for additional funds with which to recruit these children, the opportunity to benefit from the program.

Intergovernmental Review:

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early

notification of the Department's specific plans and actions for this program.

APPLICABLE PROGRAM REGULATIONS: 34 CFR part 205

Program Authority: 20 U.S.C. 2783.

Dated: November 24, 1992.

Lamar Alexander,

Secretary of Education.

(Catalog of Federal Domestic Assistance Number 84.144, Chapter 1—Migrant Education Coordination Program for State Educational Agencies)

Appendix—Analysis of Comments and Changes

In response to the Secretary's invitation in the notice of proposed priority, four State officials from three States submitted comments. An analysis of the comments and of the significant changes, if any, since publication of the notice of proposed priority follows. The comments are grouped into four areas—the purpose of the priority; the usefulness of the priority; why activities supported by the priority must be supplemental to those supported by State Migrant Education Program (MEP) allocations; and suggestions for alternatives to the priority.

Purpose of the Priority

Comment: Three commenters questioned the purpose of the proposed priority. For the most part, these commenters criticized the priority as not addressing the particular problems that States receiving very small MEP allocations have in operating their migrant programs. In this regard, two commenters expressed opinions that the notice of proposed priority inaccurately claimed that the proposal had been approved by the meeting in December, 1991, of the National Association of State Directors on Migrant Education (NASDME), and that NASDME had approved a more general project to address MEP funding inequities faced by small allocation States. In addition, one commenter thought that activities to identify eligible, but previously unidentified, children would probably not increase a State's funding sufficiently to provide meaningful educational services to the newly identified children. Finally, one commenter expressed concern that the proposed priority completely prohibited the use of project funds to recruit formerly migratory children.

Discussion: This priority was discussed publicly with State officials at the 1991 meeting of NASDME. The written proposal that the Office of Migrant Education provided to all State officials at that meeting, and that NASDME overwhelmingly approved, outlined the same project purpose and basic requirements as the proposed priority published in the **Federal Register** on June 16, 1992. The priority is intended to assist States to conduct more comprehensive Statewide identification and recruitment in order to locate and provide services to previously unidentified currently migratory children. The purpose of the priority is not to alleviate the special needs of States with relatively small MEP allocations. That can only be done through a change in the formula for allocating MEP funds found in section 1201 of the Chapter 1 statute. The Secretary has reserved up to two-thirds of the funds available for this priority for States with relatively small allocations in the belief that, because of the costs of required administrative activities and myriad demands placed upon their small MEP budgets, these States may have particular problems finding adequate MEP resources with which to conduct Statewide identification and recruitment activities.

In addition, the priority permits the recruitment of formerly migratory children provided that these children are identified and recruited only in the process of identifying and recruiting currently migratory children. The priority does not permit States to target their identification and recruitment activities on formerly migratory children because doing so would be inconsistent with the purposes of the Migrant Education Coordination Program, which is to promote interstate or intrastate coordination of migrant education programs and projects. There are no interstate or intrastate issues involved with the education of formerly migratory children.

Changes: None.

Usefulness of the Priority

Comment: Two commenters expressed doubts about the usefulness and cost-effectiveness of targeting supplemental Federal funds for additional identification and recruitment in States with small MEP allocations. They argued that the identification and recruitment of few migratory children in those States are due to factors such as small migrant populations, short growing seasons, and poor State leadership, that are beyond the scope of the project. In addition, the commenters expressed the opinion that reserving the majority of funding for States with small MEP allocations would result in projects focused on interstate rather than intrastate migratory children. Finally, one commenter expressed concern that many grantees would be likely to focus their efforts on recruiting children from families employed in less mobile agricultural activities such as food processing and dairy farming.

Discussion: The Secretary agrees that the inability of small allocation States, to date, to identify and recruit more currently migratory children may be due to the factors that the commenters suggests rather than to difficulties associated with the small size of their MEP grants. This is why the Secretary, in evaluating project applications, will consider only those State applications that establish the likelihood that funded activities will increase the number of identified currently migratory children who reside in those States, beyond the level identified with their regular MEP allocations. States that cannot demonstrate a legitimate basis for conducting these activities will not be eligible for awards. However, the Secretary does not believe that any State's agricultural growing season is so short that migratory children who reside for short periods in those States cannot benefit from the availability of needed MEP services.

Moreover, while ineffective State leadership may contribute to inadequate identification and recruitment efforts in certain States, unidentified migratory children still suffer from a lack of access to MEP services. The Secretary does not believe that these children should be denied those services merely because States in which they reside have not been sufficiently aggressive in identifying and recruiting them. To the extent that these project funds can stimulate those States both to recruit and serve more migratory children and to focus more attention on previously unidentified children, the projects will have addressed the intent of the priority. The selection criteria in 34 CFR 205.31 and the competitive preference announced as part of this priority provide the Secretary with an adequate basis to evaluate whether a State's application is well considered and has a sound plan of operation. If the Secretary is not satisfied with the quality of a State's application, the application will not be funded.

The Secretary finds no reason to distinguish in this project between interstate and intrastate migratory children. The two groups of unidentified but eligible migratory children suffer from the same lack of MEP services. Similarly, the Secretary finds no reason to exclude from the project efforts to recruit previously unidentified migratory children whose parents or guardians work in less mobile activities like food processing and dairy farming. If that employment is properly

determined to be temporary or seasonal, and children have moved with family members employed in these industries, the children are migratory and warrant the program's attention.

Changes: None.

Supplemental Nature of Project Funds

Comment: Two commenters raised questions about the requirement that identification and recruitment activities supported with project funds would have to supplement activities supported by the States' MEP allocation. One of the commenters also requested that the final priority include language that would allow a State to borrow from their regular MEP allocation to finance additional identification and recruitment activities, and then reimburse its MEP account for the cost of those additional activities out of a grant awarded under this priority.

Discussion: The purpose of this priority is to provide one-time financial assistance to States that can demonstrate that they can use these funds for a special effort to identify, recruit, and serve significant numbers of previously unidentified migratory children. Accordingly, grants awarded under this priority must be used only to supplement a State's regularly planned identification and recruitment efforts. States that, in the past year, have spent disproportionate amounts of their section 1201 funds on additional one-time identification and recruitment efforts would not be expected to continue to spend those additional sums in developing their overall plans for use of project funds. The Secretary anticipates that potential grantees will fully understand and accept the scope of the priority and expects that, except in situations described in the preceding sentence, they will not diminish their planned section 1201 identification and recruitment activities in anticipation of receiving an award under this priority. Moreover, since the section 1203 funds that will support these projects must be expended for interstate and intrastate coordination activities, they also cannot be used, as the commenter proposed, to replace section 1201 funds that a State had planned to expend to augment its identification and recruitment efforts.

Changes: None.

Alternative Suggestions

Comment: Some commenters suggested several alternatives to the proposed priority. These alternatives included a priority for activities to improve the recruitment of currently migratory intrastate children only, and a priority for establishment of a migrant child identification network that would rely on electronic technology and multi-State staff efforts.

Discussion: The Secretary believes that the priority announced in this notice is preferable to both proposals. The purpose of these grants is to increase and serve as many previously unidentified currently migratory children as possible. As noted in response to a comment on the usefulness of the priority, the Secretary sees no reason to differentiate between unidentified interstate and intrastate migratory children. With regard to the proposal for a multi-State migrant child identification network, the technological aspects of the proposal appear to be partially duplicative of the Migrant Student Record Transfer System (MSRTS), a computerized database that maintains detailed information on identified migrant children nationwide and serves to facilitate the transfer of those children's records from school to school. Other portions of the suggested network would appear to rely upon the collective commitments and efforts of individuals throughout the Nation, and would require further study to determine their efficiency and potential usefulness. While the Secretary welcomes bi-State or multi-State proposals that might advance the goals of this priority more efficiently than would single State proposals, activities to support this priority should not be delayed while that study occurs.

Changes: None.

BILLING CODE 4000-01-M

[CFDA No.: 84.144A-3]

Chapter 1—Migrant Education Coordination Program for State Educational Agencies; Notice Inviting Applications for New Awards for Fiscal Year (FY) 1993

Purpose of Program: Provide financial assistance for projects designed to improve interstate and intrastate coordination of migrant education program activities among State educational agencies and local educational agencies. This program seeks to help States to provide appropriate supplemental assistance to currently migratory children, thereby helping to ensure that those children reach the higher levels of achievement called for in AMERICA 2000, the President's strategy to help the Nation move itself toward the six National Education Goals.

Eligible Applicants: State educational agencies.

Deadline for Transmittal of Applications: February 12, 1993.

Deadline for Intergovernmental Review: April 13, 1993.

Applications Available: December 21, 1992.

Available Funds: $1,200,000.

Estimated Range of Awards: $60,000–$250,000.

Estimated Average Size of Awards: $85,000.

Estimated Number of Awards: 14.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 15 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 75, 77, 79, 80, 81, 82, 85, and 86; and (b) the regulations in 34 CFR part 205.

Priority: The absolute priority in the notice of final priority for this program, as published elsewhere in this issue of the **Federal Register**, applies to this competition.

For Applications or Information Contact: Dr. Ann Weinheimer, U.S. Department of Education, 400 Maryland Avenue, SW., room 2149, FOB #6, Washington, DC 20202–6135. Telephone (202) 401–0744. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 20 U.S.C. 2783

Dated: December 14, 1992.

John T. MacDonald,

Assistant Secretary Elementary and Secondary Education.

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $620.00 domestic, $155.00 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250–7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, or Master Card). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at (202) 783–3238 from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to (202) 512-2233.

Title	Stock Number	Price	Revision Date

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[3] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

[4] No amendments to this volume were promulgated during the period Jan. 1, 1987 to Dec 31, 1991. The CFR volume issued January 1, 1987, should be retained.

[5] No amendments to this volume were promulgated during the period Apr. 1, 1990 to Mar 31, 1991. The CFR volume issued April 1, 1990, should be retained.

[6] No amendments to this volume were promulgated during the period Apr. 1, 1991 to Mar 30, 1992. The CFR volume issued April 1, 1991, should be retained.

[7] No amendments to this volume were promulgated during the period July 1, 1989 to June 30, 1992. The CFR volume issued July 1, 1989, should be retained.

[8] No amendments to this volume were promulgated during the period July 1, 1991 to June 30, 1992. The CFR volume issued July 1, 1991, should be retained.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended, 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche format and magnetic tape. The annual subscription price for the **Federal Register** paper edition is $375, or $415 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $353; and magnetic tape is $37,500. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $4 50 for each issue, or $4.50 for each group of pages as actually bound, or $1.50 for each issue in microfiche form, or $175.00 per magnetic tape. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

Rules and Regulations

Federal Register
Vol. 57, No. 246
Tuesday, December 22, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Parts 430, 432, and 540

RIN 3206–AE76

Performance Management and Recognition System

AGENCY: Office of Personnel Management.

ACTION: Final rulemaking.

SUMMARY: The Office of Personnel Management (OPM) is issuing final regulations on the Performance Management and Recognition System (PMRS) reflecting changes authorized by the "Performance Management and Recognition System Amendments of 1991," Public Law 102–22, dated March 28, 1991, which extends the PMRS to September 30, 1993. This Act also made two changes that authorized agencies to use work objectives in addition to, or in lieu of, critical elements and standards and deleted the required 2 percent of basic pay performance award for PMRS employees rated at level 5. In issuing this regulation, OPM emphasizes that agency adoption of these two changes is optional. However, if agencies choose to implement either or both of these changes, their revised performance management plans must be submitted to OPM for approval.

EFFECTIVE DATE: April 1, 1991.

FOR FURTHER INFORMATION CONTACT: Rachel Steed (202) 606–2720, concerning questions about the changes in 5 CFR parts 430 and 540; and Sharon C. Snellings (202) 606–1259, concerning questions about the changes in 5 CFR part 432.

SUPPLEMENTARY INFORMATION: On June 1, 1992, at 57 FR 23043, OPM published interim regulations with a 30-day comment period that (1) extended the PMRS to September 30, 1993; (2) allowed agencies to use statements of work objectives for an employee's position to evaluate job performance instead of, or in addition to, critical elements and standards; and (3) deleted the mandatory performance award for employees rated at level 5. Consistent with the deletion of the required 2 percent performance award for a level 5 performance rating and in an effort to provide agencies with greater flexibility, the interim regulations deleted the requirement that stipulates higher awards for higher performance ratings with respect to employees in the same grade and pool.

During the comment period, which ended July 1, 1992, OPM received nine comments: Four from Federal agencies and five from a group of individual employees from one Federal agency. Two Federal agencies asked for clarification regarding several aspects of work objectives. One agency expressed concern over removing the requirement that higher rated employees in the same grade receive higher awards, while two other agencies expressed their support for the elimination of this requirement. The individuals responding expressed concern about the performance management system at their agency and, for the most part, did not address the changes published in the interim regulations.

An editorial change is being made at § 540.109 (b)(1)(i) to correct an erroneously designated paragraph published in the interim regulations.

Following are the identification of the major issues raised, a summary of comments, and a discussion of OPM rationale for any changes being made.

1. The use of work objectives in addition to, or in lieu of, critical elements and standards.

Summary of Comments: Two agencies asked about the definition of all work objectives as being critical in the same way as critical elements. One agency expressed concern over the additional regulatory language that requires agencies to describe work objectives in two parts: Performance requirements and performance objectives. One agency also suggested that additional references to work objectives be included in several sections of Part 540 for consistency.

Discussion: The questions regarding whether all work objectives must be critical in the same way that critical elements are caused OPM to re-examine this issue. This question stems from the legislative language which states that an agency performance appraisal system may utilize a written statement of the work objectives of the employee's position to establish performance requirements related to the position and to evaluate job performance against such requirements. Such statement of work objectives may be used in lieu of, or in addition to, critical elements and performance standards, thus implying that agencies may not establish non-critical work objectives. However, this language does not preclude an agency from establishing non-critical work objectives. Just as they may establish non-critical elements and performance standards, even though non-critical elements and performance standards are not specifically provided for in law, so may they establish non-critical work objectives. The interim regulations do not make clear that agencies may establish both critical and non-critical work objectives. Therefore, we are providing in the final regulations that agencies may do so.

One agency noted that although the interim regulations state how work objectives are the same as critical elements and standards, they do not state how they differ. By allowing agencies to use work objectives in addition to, or in lieu of, critical elements and standards to describe work, Congress clearly intended agencies to have increased flexibility in the methods used to describe work. Therefore, OPM believes it inappropriate to restrict this flexibility by adding additional regulatory language. The same agency also noted that Congress may have intended to simplify the process of developing performance standards by allowing agencies to use work objectives describing the Fully Successful level without necessarily describing the performance requirements at other levels. For clarification, agencies currently have the flexibility to describe performance only at the Fully Successful level for all critical and non-critical elements (5 CFR 430.405(e)).

In response to one agency's suggestion that additional references to work objectives be included in part 540, we have adopted this suggestion and have added the appropriate references.

One agency objected to being bound by regulatory language in the interim

regulations that require work objectives to be composed of two identifiable parts—*performance requirements and performance objectives*. However, OPM believes that the regulatory language tracks the legislative language which states work objectives must establish what the major duties are (performance requirements) as well as the expectations management will establish to evaluate job performance of those duties (performance objectives). Consequently, OPM believes that these regulations should clearly provide that work objectives are composed of two identifiable parts—what the performance requirements (duties and responsibilities) of an employee's job are and what the performance objectives (expectations) are that will be used to evaluate performance.

Change: Sections 430.404, 430.405, 430.406, 430.407, 432.103, 432.105, 432.107, and 540.102 have been revised to include references to both critical and non-critical work objectives. Sections 540.108 (a)(1) and (a)(1)(i), which were not included in the interim regulations, have been revised to include additional references to work objectives.

2. Deletion of the requirement that stipulates higher awards for higher performance ratings with respect to employees in the same grade and pool.

Summary of Comments: One agency expressed concern with removing the requirement that agencies must pay higher awards for higher performance ratings to employees in the same grade and pool. They felt that the requirement should be left in place to ensure that the system continues to reward higher ratings with larger awards in keeping with the philosophy of pay-for-performance. Another agency commented that they support the elimination of the requirement that higher awards be paid for higher performance ratings because they believe this change will provide more flexibility to adjust awards based on management needs. Several individual commentors also felt that employees with higher performance ratings should receive higher awards.

Discussion: OPM supports the policy that higher performance should normally receive higher awards and expects agencies to follow this course in most cases. As stated in the supplementary information accompanying the interim regulations, "* * * we expect that agencies will, in most cases, continue to give higher awards to employees in the same grade level receiving higher performance ratings." Many agencies have indicated they will continue the policy of awarding higher performance with higher awards but, at the same time, have commended the additional flexibility this change provides. In addition, this policy is consistent with the performance award policy for non-PMRS employees, whereby any employee rated Fully Successful and above is eligible for a performance award, with no requirement that higher ratings require larger awards.

Change: No change.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because the regulations will only affect Government employees and agencies.

List of Subjects

5 CFR Part 430

Decorations, medals, awards; Government employees.

5 CFR Part 432

Administrative practice and procedure; Government employees.

5 CFR Part 540

Government employees; Wages.

U.S. Office of Personnel Management.

Douglas A. Brook,

Acting Director.

Accordingly, the interim rule amending 5 CFR parts 430, 432, and 540 published on June 1, 1992, at 57 FR 23043 is adopted as final with the following changes:

PART 430—PERFORMANCE MANAGEMENT

1. The authority citation for part 430 continues to read as follows:

Authority: 5 U.S.C. chapter 43, 45, 53, and 54.

2. In § 430.404, the definitions of appraisal, appraisal system, performance, performance plan, and summary rating are revised, the definition of work objective is removed, and the new definitions of critical work objective and non-critical work objectives are added to read as follows:

§ 430.404 Definitions.

* * * * *

Appraisal means the act or process of reviewing and evaluating the performance of an employee against the described performance standard(s) and/or performance objective(s).

* * * * *

Appraisal system means a performance appraisal system established by an agency or component of an agency under subchapter I of chapter 43 of title 5, U.S.C., and this subpart which provides for identification of critical and non-critical elements, and/or critical and non-critical work objectives; establishment of performance standards; communication of elements, standards, and/or work objectives to employees; establishment of methods and procedures to appraise performance against established standards and/or performance objectives; and appropriate use of appraisal information in making personnel decisions.

* * * * *

Critical work objective means a component of a position consisting of one or more performance requirements of such importance that unacceptable performance on the work objective would result in unacceptable performance in the position. Work objectives are written statements that contain one or more performance requirements of a PMRS employee's position and one or more performance objectives used to evaluate job performance against such requirements.

* * * * *

Non-critical work objective means a component of an employee's position that does not meet the definition of a critical work objective, but is of sufficient importance to warrant written appraisal. Non-critical work objectives are written statements that contain one or more performance requirements of a PMRS employee's position and one or more performance objectives used to evaluate job performance against such requirements. Non-critical work objectives are optional and may be used at agency discretion.

Performance means an employee's accomplishment of assigned work as specified in the critical and non-critical elements and/or critical and non-critical work objectives of the employee's position.

* * * * *

Performance plan means the aggregation of all of an employee's written critical elements, non-critical elements, performance standards, and/or critical and non-critical work objectives.

* * * * *

Summary rating means the written record of the appraisal of each critical and non-critical element, and/or critical and non-critical work objective and the assignment of a summary rating level (as specified in § 430.405(h) of this subpart).

3. In § 430.405, paragraphs (b), (e), (g), (i) introductory text, (i)(1), and (j)(1) are revised to read as follows:

§ 430.405 Agency performance appraisal systems.

* * * * *

(b) Under each appraisal system, critical elements and/or critical work objectives must be included, and non-critical elements and/or non-critical work objectives may be included in individual performance plans. An employee must be appraised on each critical element, non-critical element, critical work objective, and non-critical work objective in the employee's performance plan, unless the employee has had insufficient opportunity to demonstrate performance on the element/work objective. A summary rating level, as specified in § 430.405(h), must be assigned.

* * * * *

(e) Each appraisal system shall provide for a minimum of three rating levels for each critical element or critical work objective. Performance standards must be written at the "Fully Successful" level for all critical and non-critical elements and may be written at other levels. Performance objectives must be written at the "Fully Successful" level for each performance requirement of each critical and non-critical work objective and may be written at other levels. The absence of a written standard or performance objective at a given rating level should not preclude the assignment of a rating at that level.

* * * * *

(g) Each appraisal system shall include a method for deriving a summary rating level from performance appraisals of critical elements and/or critical work objectives and, at agency discretion, appraisals of non-critical elements and/or non-critical work objectives. If appraisals of non-critical elements and/or non-critical work objectives are considered in deriving summary rating levels, the derivation method must show that more weight will be given to critical elements and critical work objectives than to critical elements and non-critical work objectives.

* * * * *

(i) Each appraisal system shall provide for a performance improvement plan (PIP) for each employee whose performance has been determined to be below fully successful on one or more critical elements or critical work objectives. The PIP must:

(1) Notify the employee of the critical element(s) and/or critical work objective(s) in which he or she is performing below the fully successful level;

* * * * *

(j) * * *

(l) Each appraisal system shall provide for reassigning, reducing in grade, or removing any employee who fails to attain at least the fully successful level, but only after affording the employee a reasonable period to improve performance to at least the fully successful level on the critical element(s) and/or critical work objective(s) determined to be below fully successful, as required in 5 U.S.C. 4302a(b)(6).

* * * * *

4. Section 430.406 is amended by revising paragraphs (c) and (d) (1) to read as follows:

§ 430.406 Appraisal of performance.

* * * * *

(c) *Appraisal of each element/work objective.* An employee must be appraised on each critical element, non-critical element, critical work objective, and non-critical work objective in the employee's performance plan, unless the employee has had insufficient opportunity to demonstrate performance on the element or work objective.

(d) * * *

(1) When employees are detailed or temporarily promoted within the same agency, and the detail or temporary promotion is expected to last 120 days or longer, agencies shall provide written critical elements and performance standards and/or critical work objectives to the employees as soon as possible but no later than 30 calendar days after the beginning of a detail or temporary promotion. Ratings on critical elements and/or critical work objectives must be prepared for these details and temporary promotions and must be considered in deriving an employee's next rating of record.

* * * * *

5. Section 430.407 is amended by revising paragraph (b) to read as follows:

§ 430.407 Ratings.

* * * * *

(b) *Appraisal of each critical element, non-critical element, critical work objective, and non-critical work objective.* Employees must be appraised on each critical element, non-critical element, critical work objective, and non-critical work objective of the performance plan(s) on which the employee has had a chance to perform.

* * * * *

PART 432—PERFORMANCE BASED REDUCTION IN GRADE AND REMOVAL ACTIONS

6. The authority citation for part 432 continues to read as follows:

Authority: 5 U.S.C. 4302a, 4303, and 4305

7. Section 432.103 is amended as follows:

a. Paragraph (j) is removed;

b. Paragraphs (c) through (i) are redesignated (d) through (j) respectively;

c. Paragraphs (a), newly redesignated (e), (f), and (j), are revised; and

d. A new paragraph (c) is added.

§ 432.103 Definitions.

* * * * *

(a) *Acceptable performance* means performance that meets an employee's performance requirement(s) or standard(s) at a level of performance above "unacceptable" in the critical element(s) at issue where the employee is not covered by the Performance Management and Recognition System (PMRS). For those employees covered by the PMRS, acceptable performance is performance determined to be at the fully successful level or above in the critical element(s) and/or critical work objective(s) at issue.

* * * * *

(c) *Critical work objective* means a component of a position consisting of one or more performance requirements of such importance that unacceptable performance on the work objective would result in unacceptable performance in the position. Work objectives are written statements that contain one or more performance requirements of a PMRS employee's position and one or more performance objectives used to evaluate job performance against such requirements.

* * * * *

(e) *Opportunity to demonstrate acceptable performance* means a reasonable chance for the employee whose performance has been determined to be unacceptable in one or more critical elements or in one or more critical work objectives to demonstrate acceptable performance in the critical element(s) and/or critical work objective(s) at issue.

(f) *Performance improvement plan* means the plan agencies are required to provide to a PMRS employee whose performance in one or more critical elements or in one or more critical work objectives has been determined to be below the fully successful level. As part of the plan, agencies shall notify the employee of the critical element(s) and/or critical work objective(s) in which he or she is performing below the fully

successful level; describe the types of improvements that the employee must demonstrate to attain fully successful performance; offer assistance to the employee in attaining fully successful performance; and provide the employee with a reasonable period of time, commensurate with the duties and responsibilities of the employee's position, to demonstrate fully successful performance. The agency may include, as part of the performance improvement plan, other information and matters that the agency considers appropriate.

* * * *

(j) *Unacceptable performance* means performance of an employee that fails to meet established performance standards in one or more critical elements or fails to meet the performance objectives in one or more critical work objectives of such employee's position.

8. Section 432.105 is revised to read as follows:

§ 432.105 Addressing below fully successful performance by PMRS employees.

At any time during the performance appraisal cycle that a PMRS employee's performance is determined to be below fully successful in one or more critical elements or in one or more critical work objectives, the agency shall afford the employee an opportunity to improve through a performance improvement plan. As part of the plan, the agency shall notify the employee of the critical element(s) and/or critical work objective(s) in which he or she is performing below the fully successful level; describe the types of improvements that the employee must demonstrate to attain fully successful performance; offer assistance to the employee in attaining fully successful performance; and provide the employee with a reasonable period of time, commensurate with the duties and responsibilities of the employee's position, to demonstrate fully successful performance. The agency may include, as part of the performance improvement plan, other information and matters that the agency considers appropriate. The agency should also inform the employee that, unless his or her performance in the critical element(s) and/or critical work objective(s) improves to and is sustained at a fully successful level, the employee may be reduced in grade or removed.

9. In § 432.107, paragraphs (a)(1), (a)(2), and (a)(4)(i)(A), are revised to read as follows:

§ 432.107 Proposing and taking action based on performance below the fully successful level for PMRS employees.

(a) * * *

(1) Once an employee has been afforded an opportunity to improve performance to the fully successful level through a performance improvement plan pursuant to § 432.105, an agency may propose a reduction in grade or removal action if the employee's performance during or following the performance improvement plan is below fully successful in one or more critical elements or one or more critical work objectives for which the employee was afforded an opportunity to improve through a performance improvement plan.

(2) If an employee has performed at the fully successful level for 1 year from the beginning of a performance improvement plan in the critical element(s) and/or critical work objective(s) for which the employee was afforded a performance improvement plan and the employee's performance again is determined to be below fully successful, the agency shall afford the employee an additional performance improvement plan before determining whether to propose a reduction in grade or removal under this part.

* * * * *

(4) * * *

(i) *Advance notice.* (A) The agency shall afford the employee a 30-day advance notice of the proposed action that identifies both the specific instances of below fully successful performance by the employee on which the proposed action is based and the critical element(s) and/or critical work objective(s) of the employee's position involved in each instance of below fully successful performance.

* * * * *

PART 540—PERFORMANCE MANAGEMENT AND RECOGNITION SYSTEM

10. The authority citation for part 540 continues to read as follows:

Authority: 5 U.S.C. chapters 43 and 54.

11. In § 540.102, the definitions of rating and summary rating, are revised:

§ 540.102 Definitions.

* * * * *

Rating (See *Summary rating*).

* * * * *

Summary rating means the written record of the appraisal of each critical and non-critical element, and/or critical and non-critical work objective and the assignment of a summary rating level (as specified in § 430.405(h) of this chapter).

12. In § 540.108, paragraphs (a)(1) and (a)(1)(i) are revised to read as follows:

§ 540.108 Special provisions for pay administration.

(a)(1) This paragraph applies when an employee cannot be rated for the current appraisal period under elements and standards and/or work objectives established under 5 U.S.C. 4302a, under the following circumstances:

(i) An employee who is not under elements and standards and/or work objectives, established under 5 U.S.C. 4302a, for the agency's minimum appraisal period, except as provided in § 540.107 (d) and (e) of this part; or

* * * * *

13. Section 540.109 is amended by removing the two current paragraphs designated as (b)(1)(i) and adding a new paragraph (b)(1)(i) to read as follows:

§ 540.109 Performance awards.

* * * * *

(b)(1) * * *

(i) In accordance with 5 U.S.C. chapter 54, each agency is required to pay a minimum of 1.15 percent of the estimated aggregate amount of PMRS employees' basic pay for each fiscal year during which this section is in effect for performance awards.

* * * * *

[FR Doc. 92–30908 Filed 12–21–92; 8:45 am]
BILLING CODE 6325–01–M

FEDERAL RESERVE SYSTEM

12 CFR Parts 208 and 225

[Regulations H and Y; Docket No. R–0776]

Capital; Capital Adequacy Guidelines

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board is modifying its risk-based capital guidelines for state member banks and bank holding companies to include the European Bank for Reconstruction and Development (EBRD), the International Finance Corporation (IFC), and the Nordic Investment Bank (NIB) in the list of named multilateral lending institutions that are eligible for a 20 percent risk weight. This modification would conform the Board's risk-based capital guidelines more closely to interpretive guidance adopted by the other G-10 countries that are signatories to the Basle Accord.

EFFECTIVE DATE: The final rule is effective as of December 22, 1992.

FOR FURTHER INFORMATION CONTACT: Norah Barger, Manager, Policy Development (202/452-2402), Ali Emran, Financial Analyst (202/452-2208), Division of Banking Supervision and Regulation; and Brian E. J. Lam, Attorney (202/452-2067), Legal Division, Board of Governors of the Federal Reserve System. For the hearing impaired *only*, Telecommunication Device for the Deaf (TDD), Dorothea Thompson (202/452-3544) Board of Governors of the Federal Reserve System, 20th and C Streets, NW., Washington, DC 20551.

SUPPLEMENTARY INFORMATION: Under the risk-based capital framework established by the Basle Accord, claims on, and claims guaranteed by, multilateral lending institutions and regional development banks in which G-10 countries are shareholding members may be accorded, at national discretion, a 20 percent risk weight. Like the Basle Accord, the Board's risk-based capital guidelines specify five multilateral lending institutions and regional development banks[1] that are eligible for the 20 percent risk weight. The guidelines further state that other multilateral lending institutions and regional development banks may be accorded a 20 percent risk weight if the U.S. government is a shareholder or contributing member.

On September 16, 1992, the Board proposed clarifying that bank holding companies and state member banks may assign a 20 percent risk weight to claims on, or guaranteed by, the EBRD, the IFC, or the NIB. The U.S. is a contributing shareholder of the EBRD, but this organization was established after the original publication of the capital adequacy guidelines. Since the IFC is a subsidiary of the World Bank, an organization that the guidelines specifically names as an institution eligible for the 20 percent risk weight, it implicitly is included in the 20 percent risk category. Although the U.S. is neither a shareholder nor a contributing member of the NIB, the Basle Committee on Banking Supervision has interpreted the criteria in the Basle Accord for assigning a multilateral lending institution to the 20 percent risk category to mean that any country may include the NIB in this preferential risk category since Sweden, a G-10 country, is a shareholder in the NIB. Thus, adding the NIB to the list of named multilateral lending institutions eligible for a 20 percent risk weight would serve to conform the Board's risk-based capital guidelines more closely to the interpretative guidance adopted by the other G-10 countries that are signatories to the Basle Accord.

The proposed modifications to the risk-based capital guidelines would have the effect of also including in the 20 percent risk category portions of claims collateralized by securities issued by the EBRD, IFC, and NIB.

The Board's proposal on multilateral lending institutions took the form of an interim rule that was effective immediately. The comment period ended October 23, 1992. The Board received no public comments and, thus, is now issuing in final form an amendment to the risk-based capital guidelines to include in the 20 percent category claims on and claims guaranteed by the EBRD, IFC, and NIB as well as portions of claims collateralized by securities issued by those multilateral lending institutions.

Regulatory Flexibility Act Analysis

The Federal Reserve Board does not believe adoption of this proposal would have a significant economic impact on a substantial number of small business entities (in this case, small banking organizations), in accord with the spirit and purposes of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). In this regard, the proposed revision would reduce certain regulatory burdens on bank holding companies as it would reduce the capital charge on certain transactions. In addition, because the risk-based capital guidelines generally do not apply to bank holding companies with consolidated assets of less than $150 million, this proposal will not affect such companies.

List of Subjects

12 CFR Part 208

Accounting, Agriculture, Banks, banking, Confidential business information, Currency, Federal Reserve System, Reporting and recordkeeping requirements, Securities.

12 CFR Part 225

Administrative practice and procedure, Banks, banking, Federal Reserve System, Holding companies, Reporting and recordkeeping requirements, Securities.

For the reasons set forth in the preamble, and pursuant to the Board's authority under section 5(b) of the Bank Holding Company Act of 1956 (12 U.S.C. 1844 (b)), and section 910 of the International Lending Supervision Act of 1983 (12 U.S.C. 3909), the Board is amending 12 CFR parts 208 and 225 as follows:

PART 208—MEMBERSHIP OF STATE BANKING INSTITUTIONS IN THE FEDERAL RESERVE SYSTEM

1. The authority citation for part 208 is revised to read as follows:

Authority: Sections 9, 11(a), 11(c), 19, 21, 25, and 25(a) of the Federal Reserve Act, as amended (12 U.S.C. 321-338, 248(a), 248(c), 461, 481-486, 601 and 611, respectively); sections 4, 13(j), and 18(o) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1814, 1823(j), and 1828(o), respectively); section 7(a) of the International Banking Act of 1978 (12 U.S.C. 3105); sections 907-910 of the International Lending Supervision Act of 1983 (12 U.S.C. 3906-3909); sections 2, 12(b), 12(g), 12(i), 15B(c)(5), 17, 17A, and 23 of the Securities Exchange Act of 1934 (15 U.S.C. 78b, 78l(b), 78l(g), 78l(i), 78o-4(c)(5), 78q, 78q-1, and 78w, respectively); section 5155 of the Revised Statutes (12 U.S.C. 36) as amended by the McFadden Act of 1927; and sections 1101-1122 of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (12 U.S.C. 3310 and 3331-3351).

2. Appendix A to part 208 is amended by revising the second sentence of the second paragraph in III.C.2 to read as follows:

Appendix A to Part 208—Capital Adequacy Guidelines For State Member Banks: Risk-Based Measure

* * * * *

III. * * *

C. * * *

2. * * * In addition, this category also includes claims on, and the portions of claims that are guaranteed by, U.S. government-sponsored[32] agencies and claims on, and the portions of claims guaranteed by, the International Bank for Reconstruction and Development (World Bank), the International Finance Corporation, the Interamerican Development Bank, the Asian Development Bank, the African Development Bank, the European Investment Bank, the European Bank for Reconstruction and Development, the Nordic Investment Bank, and other multilateral lending institutions or regional development banks in which the U.S. government is a shareholder or contributing member.* * *

* * * * *

[1] International Bank for Reconstruction and Development (World Bank), Interamerican Development Bank, Asian Development Bank, African Development Bank, and the European Investment Bank.

[32] For this purpose, U.S. government-sponsored agencies are defined as agencies originally established or chartered by the Federal government to serve public purposes specified by the U.S. Congress but whose obligations are *not explicitly* guaranteed by the full faith and credit of the U.S. government. These agencies include the Federal Home Loan Mortgage Corporation (FHLMC), the Federal National Mortgage Association (FNMA), the Farm Credit System, the Federal Home Loan Bank System, and the Student Loan Marketing Association (SLMA). Claims on U.S. government-sponsored agencies include capital stock in a Federal Home Loan Bank that is held as a condition of membership in that Bank.

PART 225—BANK HOLDING COMPANIES AND CHANGE IN BANK CONTROL

1. The authority citation for part 225 is revised to read as follows:

Authority: 12 U.S.C. 1817(j) (13), 1818(b), 1828(o), 18311, 1843(c) (8), 1844(b), 1972(l), 3106, 3108, 3907, 3909, 3310, 3331-3351, and sec. 306 of the Federal Deposit Insurance Corporation Improvement Act of 1991 (Pub. L. 102-242, 105 Stat. 2236 (1991)).

2. Appendix A to part 225 is amended by revising the second sentence of the second paragraph in III.C.2 to read as follows:

Appendix A to Part 225—Capital Adequacy Guidelines for Bank Holding Companies: Risk-Based Measure

* * * * *

III. * * *

C. * * *

2. * * * In addition, this category also includes claims on, and the portions of claims that are guaranteed by, U.S. government-sponsored[38] agencies and claims on, and the portions of claims guaranteed by, the International Bank for Reconstruction and Development (World Bank), the International Finance Corporation, the Interamerican Development Bank, the Asian Development Bank, the African Development Bank, the European Investment Bank, the European Bank for Reconstruction and Development, the Nordic Investment Bank, and other multilateral lending institutions or regional development banks in which the U.S. government is a shareholder or contributing member. * * *

BILLING CODE 6210-01-F

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 702

Reserves

AGENCY: National Credit Union Administration (NCUA).

[38] For this purpose, U.S. government-sponsored agencies are defined as agencies originally established or chartered by the Federal government to serve public purposes specified by the U.S. Congress but whose obligations are *not explicitly* guaranteed by the full faith and credit of the U.S. government. These agencies include the Federal Home Loan Mortgage Corporation (FHLMC), the Federal National Mortgage Association (FNMA), the Farm Credit System, the Federal Home Loan Bank System, and the Student Loan Marketing Association (SLMA). Claims on U.S. government-sponsored agencies include capital stock in a Federal Home Loan Bank that is held as a condition of membership in that Bank.

ACTION: Final rule.

SUMMARY: The NCUA is amending its regulations to modify the valuation of the allowance for loan losses to better conform with generally accepted accounting principles (GAAP). This change will require credit unions to provide an allowance for loan losses sufficient to cover specifically identified loans, as well as estimated losses inherent in the loan portfolio, such as loans and pools of loans for which losses are probable, but not identifiable on a specific loan-by-loan basis.

EFFECTIVE DATE: January 21, 1993.

ADDRESSES: National Credit Union Administration, 1776 G Street, NW., Washington, DC 20456.

FOR FURTHER INFORMATION CONTACT: Karen Kelbly, Accounting Officer, Office of Examination and Insurance (202) 682–9640, or Michael McKenna, Staff Attorney, Office of General Counsel (202) 682–9630, at the above address.

SUPPLEMENTARY INFORMATION:

Discussion

Section 116 of the FCU Act (12 U.S.C. 1762) sets forth reserve requirements for federal credit unions. Section 702.3 of the NCUA Rules and Regulations addresses full and fair disclosure concerning reserves. Section 741.9(a)(1) of the Rules and Regulations requires that federally insured state-chartered credit unions comply with statutory reserves (Section 116 of the Federal Credit Union Act) and with full and fair disclosure requirements of the Rules and Regulations (§ 702.3). Therefore this final amendment applies to all federally insured credit unions.

Section 116(a) of the Federal Credit Union Act requires that federal credit unions set aside a certain percentage of gross income at the end of each accounting period as a Regular Reserve. According to § 702.2(a) of the Rules and Regulations, the totals of the Regular Reserve, the Allowance for Loan Losses account and the Allowance for Investment Losses are combined for determining the applicable percentage of gross income to be transferred to the Regular Reserve.

Historically, credit unions have established a valuation for the allowance for loan losses based strictly on nonperforming or delinquent loans. This practice, however, is inconsistent with generally accepted accounting principles (GAAP). The NCUA Board believes that greater emphasis needed to be placed upon complying with GAAP through estimating probable losses inherent in the total loan portfolio when calculating a valuation of the allowance for loan losses. This modified valuation would present a more accurate reflection of the expected loan losses.

In light of this concern, in September 1991, NCUA issued *Letter to Credit Unions No. 126*, and in July 1992, issued *Accounting Bulletin No. 92–1*, to provide interim guidance on how examiners would test the adequacy of a credit union's allowance for loan losses. On June 23, 1992, the NCUA Board issued a proposed amendment (57 F.R. 29050, 6/30/92) to § 702.3(c)(2) to require credit unions to provide an allowance for loan losses sufficient to cover specifically identified loans, as well as estimated losses inherent in the loan portfolio, such as loans and pools of loans for which losses are probable, but not identifiable on a specific loan-by-loan basis.

Presently, § 702.3(c)(2) reads in part that the:

> Valuation allowance established fairly presents the value of loans and anticipated losses resulting from (i) uncollectable loans and notes and contracts receivable including, where applicable, any uncollectable accrued interest receivable thereon, (ii) assets acquired in liquidation of loans, and (iii) loans purchased from other credit unions.

NCUA proposed three changes to the above-cited provisions. First, the phrase "the value of loans and anticipated losses" was proposed to read "the value of loans and probable losses" since the term "probable" is the term used and understood under GAAP. Second, the three sub-points setting forth what the allowance must encompass are changed to read simply, "the value of loans and probable losses for all categories of loans." The change shifts the emphasis from nonperforming or classified loans only to categories of loans within the total portfolio, classified or unclassified. The third change provides additional guidance as to the necessary components of the allowance to meet the "all categories of loans" standard, i.e., estimates of probable losses consistent with guidance adopted from the American Institute of Certified Public Accountants (AICPA) "*Exposure Draft to the Audit and Accounting Guide, Audits of Credit Unions*"

Comments

Sixty-one comment letters were received. Thirty-six comments were received from federal credit unions, thirteen comments from state-charted credit unions, seven comments from state credit union leagues, and two comments from national credit union trade associations. Comments were also received from a state regulatory agency, an accounting firm, and a national accounting trade association.

In general, the commenters disapproved of the proposed amendment. Although many commenters stated that they objected to the amendment, the substance of their remarks indicated that they were really objecting to the examination testing methodology set forth in Letter to Credit Unions No. 126, and more recently, Accounting Bulletin No. 92–1. Eight commenters approved of the amendment as proposed although two of these commenters did have concerns about the examination testing portion of Accounting Bulletin 92–1 which would implement the proposed amendment. Fifty-three commenters objected to the amendment in part or in its entirety.

Sixteen commenters believe the amendment is overly conservative because it provides for the double counting of anticipated losses on delinquent and nonperforming loans. The Board disagrees. The amendment, which adopts GAAP language, does not provide for double counting. It simply requires estimating probable losses in the total loan portfolio. In a similar vein, nine commenters object to the amendment because they believe it will grossly overstate the allowance for loan losses (ALL) account. The Board believes, as does the accounting standards-setters who also commented on the amendment, if properly applied, the amendment should not overstate the allowance.

Nine commenters believe the amendment will have a detrimental effect on small credit unions. Some of these commenters believe small credit unions will have to spend a substantial amount of time setting up the listed loan classifications, as well as modifying their loan review timelines to conform to the amendment. Again, the Board disagrees. The amendment allows great latitude to large and small credit unions alike to develop their own methodology for estimating probable losses in the total loan portfolio.

Another commenter believes that credit unions most likely to require significant increases in the ALL account may not have significant bad loans in relation to their total portfolio. The Board takes exception to this argument. If a credit union does not have significant bad loans in relation to their total portfolio, the assessment of probable loss will reflect this and, correspondingly, the ALL will also.

Two commenters believe the amendment would result in a decrease in dividends. The Board recognizes the amendment may affect a credit union's ability to pay dividends, but only to the extent that a credit union does not have current or accumulated earnings to cover declared dividends. Again, GAAP requires the periodic recognition of estimated "bad debts" expense relative to loans and this does effect net income. Still, NCUA believes GAAP reporting must be the priority.

Three commenters believe the amendment takes authority away from credit union management and the board of directors. Again, the Board believes the amendment, as written, allows a great deal of latitude to large and small credit unions alike to develop their own methodology for estimating probable losses in the total loan portfolio under the umbrella of GAAP. It does not set forth a required methodology for estimating the allowance.

Nine commenters believe the amendment lacks specificity and will subject credit unions to the whims and interpretations of the examiner. This is not the Board's intent. Examiners have been instructed to first, examine the credit union's methodology for estimating the allowance, apply a test check, and only take exception if there are material differences. If a licensed independent accountant has rendered an opinion, examiners are encouraged not to take exception, except in rare circumstances. One commenter recommends that the credit union's historical trends in delinquency ratios, charge-offs and recoveries be considered when there is a difference between the credit union's valuation and that of the examiner. The Board intends that the examiner would consider these factors in their evaluation.

Transition Issues

Five commenters suggested a reasonable transition period for credit unions to bring their reserves into compliance. One of these commenters suggests credit unions make partial transfers to the ALL account until an acceptable balance is attained. Another commenter suggests that credit unions should be allowed to make a one-time accounting adjustment to their reserve account. Another commenter requests that credit unions required to increase the ALL due to the initial application of this amendment be given the option of charging the initial increase against retained earnings. One commenter recommends that credit unions be allowed to make transfers for up to 3 years after the effective date of the amendment to level out any year with unusually large charge-offs, as well as to fine-tune the valuation process. One commenter suggests that NCUA find a way to increase the ALL account without requiring a quarterly review of the total loan portfolio. Again, the Board will look to GAAP and encourage credit unions to do the same. However, the Board has instructed examiners to be lenient in the initial periods of application, i.e., to consider the affects of this NCUA change. Examiners have been instructed to be reasonable.

Proposal in Relation to GAAP

One commenter was concerned about the "pools of loans" wording in proposed § 702.3(c)(2)(ii). The commenter believes that this wording implies that a credit union would have to perform as many calculations of pools as it has loan classifications. The commenter believes that this would not only be time consuming, but that it would be nearly impossible to develop historic loss ratios. The commenter states that if these pools and losses on the pools have not been tracked in the past, an accurate loss ratio would be difficult to determine. One commenter objects to the inclusion of commitments to lend or letters of credit as a component of the valuation estimate in proposed § 702(c)(2)(iii). This commenter believe the valuation should be based on the balance of the loan portfolio without consideration of the aggregate lines of credit that can be accessed.

One commenter believes the proposal exceeds GAAP requirements and suggests that instead credit unions should use an individual classification of delinquent loans and pools of loans for possible losses. This commenter believes that this would be adequate under GAAP. Another commenter recommends that NCUA withdraw this proposed amendment and instead require credit unions to conform to GAAP, to conduct an annual audit by a licensed independent accountant, and to obtain an opinion on the credit union's financial statements.

The language used in the regulation has been adopted from the AICPA. The Board can not agree, therefore, that the amendment exceeds GAAP requirements. The "pools of loans" language is very general and allows credit unions flexibility in determining how to pool loans, develop trending information, assess risk, estimate probable loss, etc.—in other words, develop their own methodology within the framework of GAAP. And GAAP requires the inclusion of commitments to lend and letters of credit in probable loss estimates. The Board is not prepared, at this time, to require credit unions to obtain an opinion audit because such a requirement would be overly burdensome for many credit unions.

One commenter believes if credit unions are required to adjust the

valuation account based upon end-of-period balances and prior to distribution of dividends, a major change in the data processing software and processing schedules would be required. The Board does not agree. This does not represent a change from current practice. Another commenter believes the amendment would force credit unions to delay the posting of dividends to the beginning of the next period. To avoid this result, the commenter recommends that the phrase "prior to the distribution or posting of any dividend to the accounts of members" be deleted in the final amendment. Again, the Board is not swayed—under GAAP estimated bad debts must be expensed before the determination of earnings available for the payment of dividends, thus the amendment's wording. Another commenter foresees unnecessary work and calculations in converting to the requirements of the proposal. The Board believes this is an overstatement. GAAP reporting must be the priority.

Examination Testing of the ALL

The balance of the comments received referred specifically to a related, but different topic—the examination approach used by NCUA examiners to test the adequacy of the credit union's allowance, as initially set forth in Letter to Credit Unions No. 126 and as incorporated in Accounting Bulletin 92–1. While we welcome these comments and accept that they are valuable for our consideration in possibly amending our ALL examination testing approach, the comments really do not relate to the reserve regulation itself, or to the advisability or inadvisability of adopting the regulation. We have not specifically addressed those comments here but the Board intends to ensure consideration is given to these comments in NCUA deliberations leading to the setting of/revision to, examination policies and procedures.

Additionally, the wording of the final amendment has been changed slightly to reflect recent changes in the AICPA's proposed wording in the *Exposure Draft to the Industry Audit and Accounting Guide, "Audits of Credit Unions."* The intent and meaning of the amendment remains unchanged as a result.

Paperwork Reduction Act

The amendment does not change the paperwork requirements.

Regulatory Flexibility Act

The Regulatory Flexibility Act requires NCUA to prepare an analysis to describe any significant economic impact a regulation may have on a substantial number of small credit unions (primarily those under $1 million in assets).

The NCUA Board has determined that the amendment is necessary to meet existing requirements for full and fair disclosure although it could significantly impact some small credit unions.

Of the items required to be contained in the final regulatory flexibility analysis by 5 U.S.C. 604(a), the first ("a succinct statement of the need for, and the objectives of, the rule") and the second ("a summary of the issues raised by the public comments in response to the initial regulatory flexibility analysis, a summary of the assessment of the agency of such issues and a statement of any changes made in the proposed rule of such comments") are found elsewhere in the supplementary information.

The modified definition will be applicable to all federally insured credit unions regardless of size. Approximately 3,059 small credit unions could be affected by this amendment. An exemption for small credit unions from this definition would provide for an inaccurate reflection of the true financial condition of small credit unions. While the generally accepted accounting principles (GAAP) governing the establishment of an allowance for loan losses have remained constant, as a result of the savings and loan and banking industry crises, there has grown in accounting practice a greater emphasis on the allowance for loan losses representing inherent losses in the entire portfolio. This amendment must be applied to all federally insured credit unions regardless of size, because it ensures that the allowance for loan losses will be within the framework established by GAAP and, therefore, within the requirements of full and fair disclosure.

The only alternative to the amendment is to retain the present method of valuing the allowance for loan losses. This alternative is unacceptable considering the shifting emphasis in accounting practice. No other method, including the current method of valuation, is within the GAAP framework or meets the complete requirements for full and fair disclosure.

Executive Order 12612

Executive Order 12612 requires NCUA to consider the effect of its actions on state interest. Section 702.3 already applies to federally insured state-chartered credit unions. The amendment will affect the way these credit unions account for loan losses. The fact that the change will bring credit unions closer to GAAP ameliorates any minimal effect on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

List of Subjects in 12 CFR Part 702

Credit unions, Reporting and recordkeeping requirements, Reserves.

By the National Credit Union Administration Board on December 15, 1992.

Becky Baker,

Secretary of the Board.

Accordingly, NCUA to amends 12 CFR part 702 follows:

PART 702—RESERVES

1. The authority citation for part 702 continues to read as follows:

Authority: 12 U.S.C. 1762 and 1766.

2. Section 702.3(c)(2) is revised to read as follows:

§ 702.3 Full and fair disclosure required.

* * * * *

(c) * * *

(2) As a minimum, adjustments to the valuation allowance for loan losses shall be made prior to the distribution or posting of any dividend to the accounts of members so that the valuation allowance established fairly presents the value of loans and probable losses for all categories of loans. The valuation allowance must encompass:

(i) Specifically identified doubtful or troubled loans;

(ii) Pools of classified loans;

(iii) Pools of loans (e.g., consumer, credit card, etc.); and

(iv) A general portion for all other loans.

BILLING CODE 7535–01–M

FEDERAL FINANCIAL INSTITUTIONS EXAMINATION COUNCIL

12 CFR Part 1102

[Docket No. AS92–4]

Appraisal Subcommittee; Appraisal Regulation; Freedom of Information Act Implementation

AGENCY: Appraisal Subcommittee, Federal Financial Institutions Examination Council.

ACTION: Final rule.

SUMMARY: The Appraisal Subcommittee ("ASC") of the Federal Financial Institutions Examination Council ("FFIEC") today announced the adoption of 12 CFR part 1102, subpart

D ("subpart" or "subpart D"), implementing the ASC's separate procedures pertaining to compliance with the Freedom of Information Act ("FOIA").

EFFECTIVE DATE: December 22, 1992.

FOR FURTHER INFORMATION CONTACT: Edwin W. Baker, Executive Director, or Marc L. Weinberg, General Counsel, at (202) 634–6520, Appraisal Subcommittee, 2100 Pennsylvania Avenue NW., suite 200, Washington, DC 20037.

SUPPLEMENTARY INFORMATION:

I. Introduction and Background

On August 9, 1989, Congress adopted Title XI of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 [1] ("FIRREA"), including section 1102 [2] of Title XI, which established the ASC and placed it within the FFIEC. The ASC consists of representatives appointed by the heads of the Federal Financial Institutions Regulatory Agencies ("regulatory agencies") [3] and the Department of Housing and Urban Development. Congress intended Title XI of FIRREA and the ASC, the regulatory agencies and the Resolution Trust Corporation ("RTC") (collectively, "Agencies") to protect federal financial and public policy interests [4] in real estate-related financial transactions [5] requiring the services of an appraiser.[6]

The ASC has several statutory duties under Title XI. First, it must monitor the appraisal regulations adopted by the Agencies. Those regulations set out appraisal standards for federally related transactions [7] and define those federally related transactions requiring the services of a State certified or State licensed appraiser. Second, the ASC must monitor and review the practices, procedures, activities, and organizational structure of the Appraisal Foundation. Third, the ASC must monitor the certification and licensing programs for real estate appraisers in each State, territory, commonwealth, and the District of Columbia (collectively "States") [8] and must review the State's compliance with the requirements of title XI. It also is authorized by title XI to take action against non-complying States.[9] And lastly, each State with an appraiser certifying and licensing agency is responsible for transmitting to the ASC a roster of State certified and licensed appraisers who are eligible to perform appraisals in federally related transactions, along with an annual registry fee, and the ASC must maintain a national registry of these appraisers.[10]

II. Statutory Authority

FOIA [11] generally requires each Federal agency to make available to the public information regarding its organization and operation and rules of procedure and all substantive rules and interpretations of general applicability and statements of general policy.[12]

In addition, each agency, in accordance with published rules, must "make available for public inspection and copying—(A) final opinions * * * as well as orders, made in the adjudication of cases; (B) those statements of policy and interpretations which have been adopted by the agency and are not published in the **Federal Register**; and (C) administrative staff manuals and instructions to staff that affect a member of the public. * * *"[13] Certain documents and portions thereof, however, can be withheld from disclosure under one or more statutory exemptions set out in FOIA.[14]

Even though the ASC is within the FFIEC, the ASC is separately subject to FOIA as an "agency" of the Federal Government. In 5 U.S.C. 552(e), an "agency" is defined, in pertinent part, as "any * * * establishment in the executive branch of the Government * * *, or any independent regulatory agency." This definition supplements the definition of "agency" in 5 U.S.C. 551(1), which includes "each authority of the Government of the United States, whether or not it is within or subject to review by another agency * * *, includ[ing] any * * * establishment in the executive branch of the Government * * *, or any independent regulatory agency." There is no doubt of the ASC's status, especially because the ASC is funded independently from the FFIEC as an appropriated entity of the Federal Government, has its own facilities and staff and has its own unique statutory mission and purpose under Federal law.

III. Description of the Subpart

In general, the ASC has determined to adopt by incorporation by reference the FFIEC's FOIA regulations set out in 12 CFR 1101.4 and 1101.5. These regulations were initially adopted by the FFIEC in 1980 and were amended by the FFIEC in 1988.[15] On both occasions, the FFIEC's FOIA regulations were adopted after full exposure to public comment. The ASC is not incorporating by reference 12 CFR 1101.1, 1101.2 and 1101.3, which pertain respectively to the FFIEC's regulations' scope and purpose, authority and functions and organization and methods of operation. Instead, in compliance with 5 U.S.C. 552(a), the ASC is adopting 12 CFR 1102.300, 1102.301, 1102.302 and 1102.303, which are specifically tailored to the ASC.

The FFIEC's FOIA regulations which are being incorporated are unremarkable and provide the expected features of FOIA compliance. For example, 12 CFR 1101.4(a), which is incorporated by reference in new 12 CFR 1102.304(a), implements the general rule of document availability to the public in 5 U.S.C. 552 (a)(1) and (a)(2), and 12 CFR 1101.4(b), which is incorporated by reference in new 12 CFR 1102.304(a), implements FOIA's:

(1) Exemptions from general availability;

(2) Procedures for requesting and obtaining copies of documents and appealing initial adverse FOIA decisions; and

(3) Fee schedule for FOIA services.

New § 1102.304(a) also incorporates by reference 12 CFR 1101.5, which is entitled "Testimony and production of

[7] *See* section 1121(4) of Title XI, 12 U.S.C. 3350(4), which defines a "federally related transaction."

[8] The ASC is required to "monitor State appraiser certifying and licensing agencies for the purpose of determining whether the * * * agency's policies, practices, and procedures are consistent with [Title XI]." Section 1118(a) of title XI, 12 U.S.C. 3347(a)(1990). *See also*, section 1103(a)(1) of title XI, 12 U.S.C. 3332(a)(1).

[9] *See* section 1118 of title XI, 12 U.S.C. 3347.

[10] Sections 1103(a)(3) and 1109(a) of title XI, 12 U.S.C. 3332(a)(1) and 3338(a), respectively.

[11] 5 U.S.C. 552.

[12] 5 U.S.C. 552(a)(1).

[13] 5 U.S.C. 552(a)(2).

[14] *See* 5 U.S.C. 552(b).

[15] *See* 45 FR 46794 (July 11, 1980), as amended at 53 FR 7341 (March 8, 1988).

documents in response to subpoena, order, etc." This section generally provides that only persons with written authorization of the ASC: (1) Can testify, in court or otherwise (except before Congress in official matters), as a result of activities on behalf of the agency; or (2) can provide documents in compliance with judicial process. Persons not authorized to testify or produce documents must appear in court and respectfully state that he or she is unable to comply further with the subpoena or order by reason of this provision.

New § 1102.304(b) generally contains conforming, non-substantive changes designed to tailor 12 CFR 1101.4 and 1101.5, as incorporated by reference into subpart D of part 1102, to the ASC's separate administration and organizational structure. The only arguably substantive amendment to the FFIEC's rules, as incorporated into new § 1102.304(b), is a reduction of the per page copying fee from $.25 to $.15. The ASC believes that this $.15 fee will be sufficient to recover its direct per page copying costs.

IV. Adoption Without Public Comment and Immediate Effectiveness

The ASC is adopting subpart D to provide the public with its disclosure rights under FOIA, as required by FOIA, with as little delay as possible. In that regard, the ASC has determined that good cause exists for the immediate effectiveness of subpart D without notice and public procedure ordinarily required by 5 U.S.C. 553 because such notice and public procedure and the usual 30-day delay of effectiveness is impracticable, unnecessary, or contrary to the public interest. By adopting subpart D and making it effective immediately, the ASC will put in place definitive ways for the public to obtain information from the ASC, an agency of the U.S. Government, as contemplated by FOIA. Moreover, the ASC believes that notice and public procedure is unnecessary because new subpart D's significant portions and features are identical to those in 12 CFR 1101.4 and 1101.5, which, as noted above, have been fully exposed to notice and public procedure by the FFIEC, of which the ASC is a part.

V. Conclusion

The ASC is adopting subpart D of part 1102 to implement FOIA without public comment, and subpart D is immediately effective upon publication of this release in the **Federal Register.**

VI. Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980,[16] forms, reporting and recordkeeping requirements included in 12 CFR part 1102, subpart D, were submitted for review and approval to the Office of Management and Budget for review and approval on October 6, 1992.[17] OMB approved subpart D on December 3, 1992, through December 31, 1995, and assigned it control number 3139–0006. Subpart D will fully implement FOIA at the ASC. The estimated number of respondents is 11, each submitting one response per year, with an estimated average reporting burden of .33 hour per response and an estimated annual reporting burden of 3.67 hours.

VII. Regulatory Flexibility Act Statement

Pursuant to section 605(b) of the Regulatory Flexibility Act, the ASC certifies that part 1102, subpart D, is not expected to have a significant economic impact on a substantial number of small entities. The subpart implements FOIA, which provides a general right to the public to obtain copies of certain records of a Federal agency. FOIA does not address business or corporate entities. Accordingly, a regulatory flexibility analysis is not required.

VIII. Executive Order 12291 Statement

The ASC has determined that subpart D does not constitute a "major rule" within the meaning of Executive Order 12291. Accordingly, a Regulatory Impact Analysis is not required on the grounds that this subpart:

(1) Would not have an annual effect on the economy of $100 million or more;

(2) Would not result in a major increase in the cost of financial institution operations or governmental supervision; and

(3) Would not have a significant adverse effect on competition (foreign or domestic), employment, investment, productivity or innovation, within the meaning of the Executive Order.

List of Subjects in 12 CFR Part 1102

Administrative practice and procedure, Appraisers, Banks, Banking, Freedom of information, Mortgages, Reporting and recordkeeping requirements.

Text of the Rule

Chapter XI, title 12, part 1102 of the Code of Federal Regulations is amended as set forth below:

[16] 44 U.S.C. 35.

[17] 57 FR 46855 (October 13, 1992).

1. New subpart D is added to read as follows:

PART 1102—APPRAISAL REGULATION

Subpart D—Description of Office, Procedures, Public Information

Sec.

1102.300 Authority, scope and purpose.
1102.301 Definitions.
1102.302 ASC authority and functions.
1102.303 Organization and methods of operation.
1102.304 General requirements, exemptions, procedures and other matters.

Subpart D—Description of Office, Procedures, Public Information

Authority: 12 U.S.C. 552.

§ 1102.300 Authority, scope and purpose.

This subpart implements the Freedom of Information Act ("FOIA"), 5 U.S.C. 552, with respect to the Appraisal Subcommittee of the Federal Financial Institutions Examination Council and establishes related information disclosure procedures and fees.

§ 1102.301 Definitions.

(a) *ASC* means the Appraisal Subcommittee of the Federal Financial Institutions Examination Council.

(b) *FFIEC* means the Federal Financial Institutions Examination Council.

§ 1102.302 ASC authority and functions.

(a) *Authority.* The ASC was established on August 9, 1989, pursuant to title XI of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989, as amended ("FIRREA"), 12 U.S.C. 3331 and 3310 through 3351. Title XI is intended "to provide that Federal financial and public policy interests in real estate related transactions will be protected by requiring that real estate appraisals utilized in connection with federally related transactions are performed in writing, in accordance with uniform standards, by individuals whose competency has been demonstrated and whose professional conduct will be subject to effective supervision." 12 U.S.C. 3331.

(b) *Functions.* The ASC's statutory functions are generally set out in 12 U.S.C. 3332. In summary, the ASC must:

(1) Monitor the requirements established by the States for the certification and licensing of individuals who are qualified to perform appraisals in connection with federally related transactions, including a code of professional responsibility;

(2) Monitor the requirements of the Federal financial institutions regulatory agency and Resolution Trust

Corporation with respect to appraisal standards for federally related transactions and determinations as to which federally related transactions require the services of a State certified appraiser and which require the services of a State licensed appraiser;

(3) Monitor and review the practices, procedures, activities and organizational structure of the Appraisal Foundation; and

(4) Maintain a national registry of State certified and licensed appraisers eligible to perform appraisals in federally related transactions.

§ 1102.303 Organization and methods of operation.

(a) *Statutory and other guidelines.* Statutory requirements relating to the ASC's organization are stated in 12 U.S.C. 3310, 3333 and 3334. The ASC has adopted and published Rules of Operation guiding its administration, meetings and procedures. These Rules of Operation were published at 56 FR 28561 (June 21, 1991) and 56 FR 33451 (July 22, 1991).

(b) *ASC members and staff.* The ASC is composed of six members, each being designated by the head of their respective agencies: the Board of Governors of the Federal Reserve System, Federal Deposit Insurance Corporation, Office of the Comptroller of the Currency, National Credit Union Administration, Office of Thrift Supervision, and the Department of Housing and Urban Development. Administrative support and substantive program, policy and legal guidance for ASC activities are provided by a small, full-time, professional staff supervised by the Executive Director, Associate Director for Administration, Associate Director for Policy and Programs and the General Counsel.

(c) *FFIEC.* Title XI placed the ASC within FFIEC as a separate, appropriated agency of the United States Government with specific statutory responsibilities under Federal law.

(d) *ASC Address.* ASC offices are located at 2100 Pennsylvania Avenue NW., suite 200, Washington, DC 20037.

§ 1102.304 General requirements, exemptions, procedures and other matters.

(a) *In general.* The ASC, as part of the FFIEC, has determined that the FFIEC's regulations at 12 CFR 1101.4 and 1101.5 pertaining to the implementation of FOIA will guide the ASC's implementation of, and compliance with, FOIA. Therefore, the ASC is incorporating by reference into this subpart the FFIEC's regulations at 12 CFR 1101.4 and 1101.5, subject to the following conforming changes.

(b) *Exceptions.* Because the ASC is an appropriated U.S. Government agency with specific statutory responsibilities, the FFIEC's regulations at 12 CFR 1101.4 and 1101.5, as incorporated by reference into this subpart, are amended as follows:

(1) All references to the term "Council" in 12 CFR 1101.4 and 1101.5 shall be deleted, and the term "ASC" shall be inserted;

(2) All references to the term "Executive Secretary" in 12 CFR 1101.4 and 1101.5 shall be deleted, and the term "Executive Director" shall be inserted;

(3) All references to "§ 1101.3(e)" in 12 CFR 1101.4 (a) and (b)(3) (i) and (iii) shall be deleted, and new references to "§ 1102.303(d)" shall be inserted; and

(4) The reference to "$.25" in 12 CFR 1101.4(b)(5)(ii)(C)(1) shall be deleted and "$.15" shall be inserted.

By the Appraisal Subcommittee of the Federal Financial Institutions Examination Council.

Dated: December 14, 1992.

Fred D. Finke,

Chairman.

RIN No. 2105-AB88

Removal of Obsolete and Redundant Regulations

AGENCY: Office of the Secretary, Federal Aviation Administration, Federal Highway Administration, Federal Transit Administration, National Highway Traffic Safety Administration, Maritime Administration, Unites States Coast Guard, and Research and Special Programs Administration, DOT.

ACTION: Final rule.

SUMMARY: In connection with the President's Regulatory Moratorium and Review, the Department of Transportation has reviewed all its existing regulations. This review identified numerous regulations that are obsolete, redundant, or can be reissued as non-regulatory guidance. This document removes these rules from the Code of Federal Regulations.

DATES: This final rule is effective on December 22, 1992. Petitions for reconsideration of the final rule must be received by January 21, 1993.

ADDRESSES: Petitions for reconsideration should be sent to Docket Clerk, Att: Docket No. 48146, Department of Transportation, 400 7th Street, SW., room 4107, Washington, DC 20590. For

the convenience of persons who wish to review the docket, it is requested that petitions be sent in duplicate. Persons who wish to receive acknowledgment of their petitions should enclose a stamped, self-addressed postcard with their petition. The docket clerk will date-stamp the postcard and return it to the sender. Petitions may be reviewed at the above address from 9 a.m. through 5:30 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Robert C. Ashby, Deputy Assistant General Counsel for Regulation and Enforcement, Department of Transportation, 400 7th Street, SW., room 10424, Washington, DC 20590, 202–366–9306.

SUPPLEMENTARY INFORMATION: The Department published a notice of proposed rulemaking (NPRM) in the **Federal Register** on May 20, 1992 (57 FR 21362) in which it proposed these removals, with a 45-day comment period that closed on July 6, 1992. The Department received nineteen comments in response to the NPRM.

Background

On January 28, 1992, President Bush directed all Federal agencies to review their existing regulations, in order to determine whether changes should be made to promote economic growth, create jobs, or eliminate unnecessary costs or other burdens on the economy. The Department of Transportation has done so. In the course of this review, the Department identified various regulations that were obsolete (e.g., referred to organizations, programs, or requirements that no longer exist), redundant (e.g., duplicate other DOT regulations), or that can be deleted and reissued as non-regulatory guidance. By removing these unnecessary regulations, the Department substantially reduces the size of its portion of the Code of Federal Regulations, and thus reduces the administrative burdens on the public.

Discussion of Comments

Virtually all of the comments received by the Department concerned proposed deletions of Federal Highway Administration (FHWA) regulations. Several commenters, including the U.S. Department of Labor (DOL), opposed removal of the Transportation of Migrant Workers regulations contained in 49 CFR part 398. They commented that the standards in part 398 are important to the welfare of tens of thousand of migrant farm workers. DOL enforces the Migrant and Seasonal Agricultural Protection Act, and has promulgated regulations concerning the transportation of migrant farm workers. However, the Department agrees with the commenters that not all of the standards in 49 CFR part 398 are contained in the DOL regulations and that the Department's continued guidance in this area is necessary to ensure the maximum protection for migrant workers. Therefore, the Department will not remove part 398.

The FHWA proposal that attracted the greatest number of comments was the proposed removal of a number of rules from the Federal Motor Carrier Safety (FMCS) regulations. Many of the rules listed in the NPRM for removal are related to a rulemaking currently under development concerning a proposed change to the jurisdictional weight threshold for a "commercial motor vehicle" (CMV) from a gross vehicle weight rating (GVWR) of 10,001 pounds or more to a GVWR of 26,001 pounds or more. If this definition were adopted, many of the current rules, which were proposed for deletion in the NPRM, would be obsolete, redundant, or otherwise unnecessary. The draft regulation redefining CMV is not yet ready for publication, however. Since that rulemaking provides the factual and legal context for most of the proposed FHWA deletions from Title 49 listed in the NPRM, the Department is not now taking final action with respect to all of the FHWA proposed deletions from Title 49. FHWA will address the comments concerning specific FMCS provisions as necessary in the planned rule redefining CMV. The Department may delete the FMCS rules in question simultaneous with or following the issuance of a formal CMV rule.

In addition to commenting on the FHWA proposals, one commenter expressed concern about the proposed deletion of the Federal Transit Administration (FTA) rule in 49 CFR part 603 regarding claims under the Federal Claims Collection Act. The FTA rule duplicates the Department's regulation on the same topic at 48 CFR part 89, which became effective in early 1989. Accordingly, the FTA rule is redundant and is removed. Two commenters objected to the proposed removal of 49 CFR part 590, the Motor Vehicle Emission Inspections rule and 49 CFR 571.100, the Controls and Displays rule. The National Highway Traffic Safety Administration intended part 590 to be used by State diagnostic inspection demonstration projects. Since the demonstration program has now ended, this part currently has no effect and therefore is removed. The Controls and Displays rule also is removed because it is obsolete. Prior to July 1, 1989, vehicle manufacturers had the option to comply with the controls and displays requirements contained in either 49 CFR 571.100 or 49 CFR 571.101. Effective July 1, 1989, however, manufacturers are required to comply with the controls and display requirements contained in 49 CFR 597.101. Thus, § 571.100 no longer has any relevance.

One commenter expressed concern about the proposed removal of 49 CFR part 101, the Research and Special Programs Administration's Cargo Security Advisory Standards. As the commenter noted, these standards are guidelines and not binding regulatory requirements. Publication of these guidelines in the Code of Federal Regulations gives the impression that they are binding, which could burden businesses that are attempting to comply with the standards. Accordingly, the Department is removing this section from the regulations.

Several commenters noted that the NPRM did not explain the precise reason for the proposed removal of each regulation listed in the NPRM. As the Department explained in the NPRM and above, only those regulations that are obsolete, redundant or can be published in a non-regulatory format are being deleted. Since the Department has accommodated all of the comments filed by the public in response to the NPRM, it has decided to proceed with the removal of those rules which were not the subject of public comment based on the general rationale provided above.

The following is a list, by DOT operating administration, of the regulations the Department hereby removes:

Office of the Secretary

Reinvestment of gains derived from the sale or other disposition of flight equipment (14 CFR part 235)
Criteria for designating eligible EAS points (14 CFR part 270)
Classification and exemption of Alaskan air carriers (14 CFR part 292)
Cross-reference to Privacy Act for Aviation Proceedings. (14 CFR part 310a)
Japanese charter authorization proceedings (14 CFR part 320)
Procedures for bumping subsidized air carriers from eligible points (14 CFR part 326)
CAB rules of internal organization (14 CFR part 384)
CAB operations during emergencies (14 CFR part 387)
Recommendations to the President under section 801 of the Federal Aviation Act (49 CFR part 81)

Federal Aviation Administration

SFAR 21, which provides sanctions and recordkeeping requirements for persons operating to Southern Rhodesia
SFAR 44–5 and 44–6, which responded to the air traffic controllers' strike in 1981
SFAR 47, which prescribes rules for special authorization to fly certain noise-restricted aircraft
SFAR 57, which barred the transport of the remains of Ferdinand Marcos from the United States to the Philippines
SFAR 61, which formerly restricted certain cargo flights between the United States and Iraq or Kuwait
SFAR 34, which established procedures to apply for compensation for required security measures in foreign air transportation
Conversion to New System of Flight Instructor Ratings (14 CFR 61.201(b)–(g))
Parachute Lofts (14 CFR part 149)
Acquisition of U.S. Land for Public Airports (14 CFR part 153)
Acquisition of U.S. land for public airports under the Airport and Airway Development Act of 1970 (14 CFR part 154)
Aircraft Loan Guarantee Program (14 CFR part 199)

Federal Highway Administration

General Management (23 CFR 1.4, 1.11(d), 1.31, 1.34, 1.37, and 1.38)
Single Audit Requirements (23 CFR part 12)
Recordkeeping and Retention Requirements for Federal-Aid Highway Records of State Highway Agencies (23 CFR part 17)
Reimbursement Vouchers (23 CFR part 140, subpart A)
Priority Primary Route Selection (23 CFR part 470, subpart C)
Special Programs; Economic Growth Center Development Highways (23 CFR part 490)
Secondary Road Plan (23 CFR part 642)
Water Supply and Sewage Treatment at Safety Rest Areas (23 CFR part 650, subpart E)
Concrete Bridge Decks (23 CFR part 650, subpart F)
Topics (23 CFR part 655, subpart A)
Motorist Aid Systems (23 CFR part 655, subpart G)
Great River Road (23 CFR part 661)
Defense Bridges and Critical Highway Facilities (23 CFR part 666)
Air Quality, Conformity, and Priority Procedures (23 CFR part 770)
Pavement Marking Demonstration Program (23 CFR part 920)
Safer Off-System Roads Program (23 CFR part 922)

National Highway Traffic Safety Administration

Reduction of Passenger Automobile Average Fuel Economy Standards (49 CFR part 527)
Controls and displays (49 CFR part 571.100)
Motor Vehicle Emission Inspections (49 CFR part 590)

Maritime Administration

Repairs to Vessels Under Bareboat Charter (46 CFR part 237)
Participation By Vessels Built With Construction-Differential Subsidy in the Carriage of Domestic Trade (46 CFR part 250)
Minimum-wage, Minimum Manning and Reasonable Working Conditions (46 CFR part 262)
Employment in the Foreign Trade of Liquid and Dry Bulk Vessels Constructed With the Aid of Construction-Differential Subsidy (CDS) (46 CFR part 278)
Operating-Differential Subsidy for Bulk Cargo Vessels in United States Foreign Commerce with Great Lakes, Connecting Rivers, St. Lawrence River, and Gulf of St. Lawrence (46 CFR part 279)
Procedure to be followed by Operators in the Rendition to the Maritime Administration of Annual and Final Accountings (46 CFR part 292)
Operating-Differential Subsidy for Bulk Cargo Vessels Engaged in Carrying Bulk Raw and Processed Agricultural Commodities from the United States to the Union of Soviet Socialist Republics (46 CFR part 294)
Regulations for the Government of the U.S. Maritime Service (46 CFR part 310, subpart B)
Application Procedures for Agents (46 CFR part 316)
Compensation Payable to Agents, General Agents and Berth Agents (46 CFR part 318)
Duties of Berth Agents and General Agents (46 CFR part 319)
Certificate of Ownership and Operation for General Agency Vessels (46 CFR part 320)
Authority of General Agents to Provide for American Merchant Marine Library Service (46 CFR part 321)
Applicability of Regulations of Former Maritime Commission and War Shipping Administration to National Shipping Authority and Allowability of Expenses Under Service Agreements with NSA (46 CFR part 322)
Maximum Brokerage Commission Applicable to NSA Vessels (46 CFR part 323)
Authority and Responsibility of General Agents to Decommission Tankers to be Withdrawn from Operation and Placed in the Reserve Fleet (46 CFP part 333)
Radar Observer Certificates, Ship's Safety and Use of Radar (46 CFR part 334)

United States Coast Guard

Nondiscrimination in Federally Assisted Programs of the United States Coast Guard—Effectuation of Title VI of the Civil Rights Act of 1964. (33 CFR part 24)
North Atlantic Passenger Routes. (33 CFR part 105)
Special Interim Regulations for Issuance of Letters of Compliance to Barges and Existing Liquefied Gas Vessels. (46 CFR part 154a)

Research and Special Programs Administration

Embargoes on Property (14 CFR part 228)
Cargo Security Advisory Standards (49 CFR part 101)

Federal Transit Administration

Federal Claims Collection Act (49 CFR part 603)
Joint FTA/FHWA Air Quality Requirements (49 CFR part 623)
Section 5 Requirements (49 CFR part 635)
Transfer Commuter Services (49 CFR part 670)

Regulatory Analyses and Notices

Effective Date

Because this final rule eliminates unnecessary rules that could be confusing to the public, the Department has determined that good cause exists under 5 U.S.C. 553(d) for making this rule effective in less than 30 days after publication.

This final rule is not major under the terms of Executive Order 12291 or significant under the Department of Transportation's Regulatory Policies and Procedures. It does not impose costs on anyone, and further regulatory evaluation is not needed. This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612 and it has been determined this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism assessment. Because there are no costs involved and the benefits are not significant, the Department certifies that the final rule will not have a significant economic effect on a substantial number of small entities.

issued this 23rd day of Nov., 1992, at Washington DC.

Andrew H. Card, Jr.,

Secretary of Transportation.

For the reasons set forth in the preamble, the Department of Transportation is taking the following actions:

1. The authority for the final action is 49 CFR part 322.

1a. The authority for 14 CFR part 61 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1355, 1421, 1422, and 1427; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449; Jan 12, 1983).

1b. The authority for 23 CFR part 1 continues to read as follows:

Authority: 23 U.S.C. 315; 49 CFR part 1.48(b.)

1c. The authority for 23 CFR part 140 continues to read as follows:

Authority: 23 U.S.C. 101(e), 114(a), 120, 121, 122 and 315; and 49 CFR 1.48(b).

1d. The authority for 23 CFR part 470A continues to read as follows:

Authority: 23 U.S.C. 103(b)(2), (103(c)(2), 103(d)(2), 103(e)(1), (103(e)(3), 103(f), and 315; 49 CFR 1.48(b)(2) and (b)(35), unless otherwise noted.

1e. The authority for 23 CFR part 470C continues to read as follows:

Authority: 23 U.S.C. 147 and 315; 49 CFR 1.48(b)(28) and (35).

1f. The authority for 23 CFR part 650 continues to read as follows:

Authority: 23 U.S.C.; 109(a) and (h), 144, 151, 351, 23 CFR 1.32; 49 CFR 1.48(b); E.O. 11988-Floodplan Management, May 24, 1977 (42 FR 26951); Department of Transportation Order 5650.2 dated April 23, 1979 (44 FR 24678); sec. 161 of Public Law 97–424, 96 Stat. 2097, 3135; Public Law 97–134, 95 Stat. 1699; and 33 U.S.C. 401, 491 et seq., 511 et seq.

1g. The authority for 23 CFR part 655 continues to read as follows:

Authority: 23 U.S.C. 101(a) 104, 105, 109(d), 114(a), 135, 217, 307, 315, and 402(a); 23 CFR 1.32 and 1204.4; and 48 CFR 1.48(b).

1h. The authority for 46 CFR part 310 is revised to read as follows:

Authority: 46 App. U.S.C. 1295; 49 CFR 1.66.

1. The authority for 49 CFR part 571 continues to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

TITLE 14

PARTS 61, 91, 121—[AMENDED]

PARTS 149, 153, 154, 199, 228, 235, 270, 292, 310a, 320, 326, 384, 387 AND SUBCHAPTER O—[REMOVED]

2. In title 14 of the Code of Federal Regulations, remove parts 149, 153, 154, 199 and subchapter O of chapter I, 228, 235, 270, 292, 310a, 320, 326, 384, and 387; paragraphs (b) through (g) and the designation for paragraph (a) in § 61.201; and Special Federal Aviation Regulations 21, 44–5, 44–6, 47, 57, and 61 in 14 CFR part 91 and Special Federal Aviation Regulation 34 in 14 CFR part 121.

TITLE 23

PARTS 12, 17, 490, 642, 661, 666, 770, 920, 922—[REMOVED]

PARTS 1, 140, 470, 650, 655—[AMENDED]

3. In title 23 of the Code of Federal Regulations, remove and reserve subpart A of part 140, subpart C of part 470, subparts E and F of part 650, subparts A and G of part 655, and remove parts 12, 17, 490, 642, 661, 666, 770, 920, and 922.

§§ 1.4, 1.31, 1.34, 1.37, 1.38 [Removed and Reserved]

§ 1.11 [Amended]

4. In title 23 of the Code of Federal Regulations, in part 1, remove §§ 1.4, 1.31, 1.34, 1.37, and 1.38, and remove and reserve § 1.11(d).

TITLE 33

PARTS 24, 105—[REMOVED]

5. In title 33 of the Code of Federal Regulations, remove parts 24 and 105 and remove and reserve subchapter H of chapter I.

TITLE 46

PARTS 154a, 237, 250, 262, 278, 279, 292, 294, 316, 318, 319, 320, 321, 322, 323, 333, 334—[REMOVED]

PART 310—[AMENDED]

6. In title 46 of the Code of Federal Regulations, remove parts 154a, 237, 250, 262, 278, 279, 292, 294, 316, 318, 319, 320, 321, 322, 323, 333, and 334, and remove and reserve subpart B of part 310.

TITLE 49

PARTS 81, 101, 527, 590, 603, 623, 635, 670—[REMOVED]

PART 571—[AMENDED]

CHAPTER I, SUBCHAPTER A—[REMOVED AND RESERVED]

7. In title 49 of the Code of Federal Regulations, remove parts 81, 101, 527, 590, 603, 623, 635, and 670 and remove and reserve Subchapter A of Chapter I.

§ 571.100 [Removed]

8. In title 49 of the Code of Federal Regulations, part 571, remove § 571.100.

BILLING CODE 4910-62-M

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 92–AEA–02]

Alteration of Transition Area; College Park, MD

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; correction.

SUMMARY: This document contains a correction to the final rule published in the **Federal Register** on August 25, 1992. The final rule modifies the 700 foot Transition Area established at College Park, MD, due to the development of a new instrument approach procedure to College Park Airport, College Park, MD. This correction updates the coordinates and altitude used for the base of the Transition Area in the description.

EFFECTIVE DATE: 0901 u.t.c. December 10, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Curtis L. Brewington, Designated Airspace Specialist, System Management Branch, AEA–530, F.A.A. Eastern Region, Fitzgerald Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone: (718) 553–0857

SUPPLEMENTARY INFORMATION:

History

Federal Register Document 92–20346, Airspace Docket No. 92–AEA–02, published on August 25, 1992 (57 FR 38436), revised the 700 foot Transition Area at College Park, MD. The coordinates used in the description were based upon old geographic data (NAD 27 instead of NAD 83) and the base of the Transition Area was incorrectly stated. This action corrects that error.

Correction to Final Rule

Accordingly, pursuant to the authority delegated to me, the publication on August 25, 1992 (Federal Register Document 92–20346) and the description in FAA Order 7400.7A, dated November 2, 1992, and effective November 27, 1992, which is incorporated by reference in 14 CFR 71.1, are corrected as follows:

§71.1 [Corrected]

1. On page 38436, column 3, and page 38437, column 1, the description for the College Park, MD, Control Zone is corrected to read as follows:

Section 71.181 Designation of Transition Areas

* * * * *

AEA MD TA College Park, MD [Revised]
College Park Airport, MD (lat. 38°58'50" N., long. 76°55'21" W.)

That airspace extending upward from 700 feet above the surface within a 6.4-mile radius of the College Park Airport and within 2 miles either side of a 303° (T) 313° (M) bearing extending from a point located at lat. 38°58'56" N., long. 76°55'28" W., extending northwest from said point and the 6.4-mile radius to 9.1 miles northwest of said point.

* * * * *

Issued in Jamaica, New York, on December 8, 1992.

Gary W. Tucker,

Manager, Air Traffic Division.

14 CFR Part 71

[Airspace Docket No. 90–AEA–03]

Alteration of Control Zone and Transition Area; Du Bois, PA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action modifies the Control Zone and 700 foot Transition Area established at Du Bois, PA. This action is due to unsuccessful flight checks of a relocated Nondirectional Radio Beacon (NDB) and reflects the actual amount of controlled airspace needed by the FAA to contain aircraft operating under instrument flight rules.

EFFECTIVE DATE: 0901 u.t.c. February 4, 1993.

FOR FURTHER INFORMATION CONTACT: Mr. Curtis L. Brewington, Designated Airspace Specialist, System Management Branch, AEA–530, F.A.A. Eastern Region, Fitzgerald Federal Building # 111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone: (718) 553–0857.

SUPPLEMENTARY INFORMATION:

History

On September 19, 1992, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to revise the control zone and 700 foot transition area located at Du Bois, PA, due to unsuccessful flight checks of a relocated NDB (57 FR 44713). The proposed action was to modify the controlled airspace needed for aircraft operations conducted under instrument flight rules.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments were received on the proposal. Except for editorial changes, this amendment is the same as that proposed in the notice. The coordinates for this airspace docket are based on North American Datum 83. Control Zones and Transition Areas are published in §§ 71.171 and 71.181, respectively, of FAA Order 7400.7A dated November 2, 1992, and effective November 27, 1992, which is incorporated by reference in 14 CFR 71.1. The Control Zone and Transition Area listed in this document will be published subsequently in the Handbook.

The Rule

This amendment to part 71 of the Federal Aviation Regulations revises the Control Zone and 700 foot Transition Area located at Du Bois, PA, due to unsuccessful flight checks of a relocated NDB.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zones, Incorporation by reference, Transition areas.

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. App. 1348(a), 1354(a), 1510; E.O. 10854; 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

§71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.7A, Compilation of Regulations, dated November 2, 1992, and effective November 27, 1992, is amended as follows:

Section 71.171 Designation of Control Zones

* * * * *

AEA PA CZ Du Bois, PA [Revised]
Du Bois-Jefferson County Airport, Du Bois, PA (lat. 41°10'42" N., long. 78°53'55" W.)
Clarion, PA, VORTAC (lat. 41°08'47" N., long. 79°27'29" W.)
Du Bois ILS northeast course OM (lat. 41°13'11" N., long. 78°48'08" W.)

That airspace extending upward from the surface within a 4-mile radius of the Du Bois-Jefferson County Airport and within 2.6 miles each side of the Du Bois-Jefferson County Airport ILS localizer northeast course, extending from the 4-mile radius to 7.4 miles northeast of the OM and within 2.2 miles each side of the Clarion, PA, VORTAC 086° (T) 092° (M) radial, extending from the 4-mile radius zone to 20 miles east of the VORTAC and within 2.2 miles each side of a 242° (T) 248° (M) bearing from a point at lat. 41°10'30" N., long. 78°54'29" W., extending from said point to 4.8 miles southwest of said point.

14 CFR Part 71

[Airspace Docket No. 91-ASW-25]

Revision of Transition Area; Gruver, TX; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to final rule.

SUMMARY: This action amends the legal description of the Transition Area located at Gruver, TX, by converting the mileages from statute to nautical and by updating the Gruver Municipal Airport coordinates from North American Datum 27 to North American Datum 83.

EFFECTIVE DATE: February 4, 1993.

FOR FURTHER INFORMATION CONTACT: Alvin E. DeVane, System Management Branch, Air Traffic Division, Southwest Region, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76 193-0530, telephone (817) 624-5535.

SUPPLEMENTARY INFORMATION:

History

Since the final rule establishing a transition area at Gruver, Texas, was published in the **Federal Register** on August 25, 1992 (57 FR 38437), the criteria used in the development of transition areas have changed. The new criteria became effective on October 15, 1992. As a result of these changes, mileage will be expressed in terms of nautical miles rather than statute miles. This action amends the legal description of the Gruver, Texas, transition area in this final rule to conform to this new standard. Additionally, the Gruver Municipal Airport coordinates in the proposal were North American Datum 27. This action revises these coordinates to North American Datum 83.

Correction of Publication

Accordingly, the publication on August 25, 1992, of the final rule that was the subject of Federal Register Docket 92-19112, is corrected as follows:

§71.1 [Corrected]

1. On page 38437, in the second column, the paragraph beneath the heading "Gruver, TX [Revised]" is corrected to read as follows:

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the Gruver Municipal Airport (latitude 36°14'01" N., longitude 101°25'56" W.), excluding that airspace within the Spearman, TX, transition area.

Issued in Fort Worth, TX, on December 9, 1992.

Larry L. Craig,

Manager, Air Traffic Division Southwest Region.

14 CFR Part 71

[Airspace Docket No. 92-ASO-3]

Alteration of VOR Federal Airways and Revocation of V-515; TN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action alters the descriptions of six Very High Frequency Omnidirectional Range (VOR) Federal airways and revokes one VOR Federal airway located in the vicinity of Nashville, TN. The Nashville VOR has been relocated north of its former location and the airway structure in the Nashville area has been realigned to reduce congestion within the terminal area and to decrease the en route traffic in the arrival and departure areas. This amendment also reflects the action taken in Airspace Docket Nos. 92-ASO-6 and 92-ASO-7, which changes the names of the Knoxville, TN, VOR to the Volunteer, TN, VOR and the Chattanooga, TN, VOR to the Choo Choo, GA, VOR, respectively.

EFFECTIVE DATE: 0901 u.t.c., February 4, 1993.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace and Obstruction Evaluation Branch (ATP-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Rules and Procedures Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267-9250.

SUPPLEMENTARY INFORMATION:

History

On September 2, 1992, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to alter the descriptions of six VOR Federal airways and to revoke one airway located in the vicinity of Nashville, TN (57 FR 40151). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, the removal of the airspace exclusion in V-136 concerning the Gamecock A Military Operations Area (MOA), and the inclusion of the name changes to the Chattanooga, TN, VOR to the Choo Choo, GA, VOR and the Knoxville, TN, VOR to the Volunteer, TN, VOR, this amendment is the same as that proposed in the notice. Domestic VOR Federal Airways are published in § 71.123 of FAA Order 7400.7A dated November 2, 1992, and effective November 27, 1992, which is incorporated by reference in 14 CFR 71.1. The airways listed in this document will be published subsequently in the Order.

The Rule

This amendment to part 71 of the Federal Aviation Regulations alters the descriptions of six VOR Federal airways and revokes one airway located in the vicinity of Nashville, TN. The Nashville VOR has been relocated north of its former location. The airway structure in the Nashville area will be realigned to reduce congestion within the terminal area and to decrease the en route traffic in the arrival and departure areas. The description of V-136 no longer contains the airspace exclusion concerning the Gamecock A MOA. The airspace for the airway remains in existence even if the Gamecock A MOA is activated, air traffic control may be unable to clear nonparticipating aircraft through the airspace when the MOA is activated.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter than will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Domestic VOR Federal airways, Incorporation by reference.

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. app. 1348(a), 1354(a), 1510; E.O.10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

§71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.7A, Compilation of Regulations, dated November 2, 1992, and effective November 27, 1992, is amended as follows:

BILLING CODE 4910–13–M

DEPARTMENT OF COMMERCE

Bureau of Economic Analysis

15 CFR Part 806

[Docket No. 921100–2300]

RIN 0691–AA08

Direct Investment Surveys: BE–12, Benchmark Survey of Foreign Direct Investment in the United States—1992

AGENCY: Bureau of Economic Analysis, Commerce.

ACTION: Final rule.

SUMMARY: These final rules revise 15 CFR 806.17 to set forth reporting requirements for the BE–12, Benchmark Survey of Foreign Direct Investment in the United States—1992, and to delete the rules now in § 806.17, which were for the last benchmark survey covering 1987. Section 4(b) of the International Investment and Trade in Services Survey Act requires that a benchmark survey of foreign direct investment in the United States be conducted covering 1980, 1987, and every fifth year thereafter.

Forms for the 1992 benchmark survey are scheduled to be mailed out at the end of February 1993. Completed reports will be due to BEA on May 31, 1993.

EFFECTIVE DATE: These rules will be effective January 21, 1993.

FOR FURTHER INFORMATION CONTACT: Betty L. Barker, Chief, International Investment Division (BE–50), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; telephone (202) 523–0659.

SUPPLEMENTARY INFORMATION: In the September 18, 1992 **Federal Register**, Volume 57, No. 182, 57 FR 43158, the Bureau of Economic Analysis published a notice of proposed rulemaking to revise 15 CFR 806.17 to set forth reporting requirements for the BE–12, Benchmark Survey of Foreign Direct Investment in the United States—1992. No comments on the proposed rule were received. Thus, this final rule is the same as the proposed rule.

The benchmark survey is to be conducted by the Bureau of Economic Analysis, U.S. Department of Commerce, under the International Investment and Trade in Services Survey Act, hereinafter, "the Act." Section 4(b) of the Act, as amended, requires that "With respect to foreign direct investment in the United States, the President shall conduct a benchmark survey covering year 1980, a benchmark survey covering year 1987, and benchmark surveys covering every fifth year thereafter * * *" Reporting in the survey is mandatory. The responsibility for conducting benchmark surveys of foreign direct investment in the United States has been delegated to the Secretary of Commerce, who has redelegated it to the Bureau of Economic Analysis (BEA).

The benchmark surveys are BEA's censuses, intended to cover the universe of foreign direct investment in the United States in value terms. Foreign direct investment in the United States is defined as the ownership or control, directly or indirectly, by one foreign person of 10 percent or more of the voting securities of an incorporated U.S. business enterprise or an equivalent interest in an unincorporated U.S. business enterprise, including a branch.

The purpose of the benchmark survey is to obtain data on the amount, types, and financial and operating characteristics of foreign direct investment in the United States. The data from the survey will be used to measure the economic significance of such investment and to analyze its effects on the U.S. economy. They will also be used in formulating, and assessing the impact of, U.S. policy on foreign direct investment. They will provide benchmarks for deriving current universe estimates of direct investment from sample data collected in other BEA surveys. In particular, they will serve as benchmarks for the quarterly direct investment estimates included in the U.S. international transactions and

national income and product accounts, and for annual estimates of the foreign direct investment position in the United States and of the operations of the U.S. affiliates of foreign companies.

The benchmark surveys are also the most comprehensive of BEA's surveys in terms of subject matter in order that they obtain the detailed information on foreign direct investment needed for policy purposes. As specified in the Act, policy areas of particular interest that should be addressed by the survey include, among other things, trade in both goods and services, employment and employee compensation, taxes, and technology.

The survey consists of an instruction booklet, a claim for not filing the BE–12, and the following report forms:

1. Form BE–12(LF) (Long Form) for reporting by nonbank U.S. affiliates with assets, sales, or net income of more than $50 million (positive or negative);

2. Form BE–12(SF) (Short Form) for reporting by nonbank U.S. affiliates with assets, sales, or net income of more than $1 million, but not more than $50 million (positive or negative);

3. Form BE–12 Bank for reporting by U.S. affiliates that are banks with assets, sales, or net income of more than $1 million (positive or negative).

Although the survey is intended to cover the universe of foreign directinvestment in the United Sates, in order to minimize the reporting burden, U.S. affiliates with assets, sales, and net income each equal to or less than $1 million (positive or negative) are exempt from reporting on Forms BE–12(LF), BE–12(SF), and BE–12 Bank, but are required to file, on Form BE–12(X), a claim for exemption from filing in the benchmark survey.

Two changes from the last (1987) survey have been made to the 1992 survey, primarily to minimize reporting burden on respondents. They are:

1. Nonbank affiliates with assets, sales, or net income greater than $50 million (positive or negative) are required to file the BE–12 long form; all other nonbank affiliates file the BE–12 short form. In the 1987 benchmark survey, the long-form exemption level was $20 million. This change shifts approximately 1,600 affiliates from the long form to the short form, reducing both reporting and editing burden from what it would otherwise be. Because of growth in the foreign direct investment universe since 1987, however, the total number of long forms to be filed should remain roughly the same as in the 1987 survey.

2. A new BE–12 Bank form was designed for reporting by all foreign-owned U.S. banks. In the 1987 benchmark survey, bank affiliates reported on the BE–12 short form, as did nonbank affiliates below a certain size. This approach did not work well because short form questions were not written with banks in mind. The new, separate bank form has questions that are specifically targeted at banks, which should substantially reduce the need for follow-up contact with bank reporters. In addition, BEA has broadened the definition of "banking" to include savings institutions and credit unions, to be consistent with the 1987 revision of the Standard Industrial Classification System.

Paper Reduction Act

The collection of information required in these final rules has been approved by OBM (OMB No. 0608–0042).

The public reporting burden for this collection of information is estimated to vary from 2 to 750 hours per response, with an average of 15.5 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Comments regarding the burden estimate, including suggestions for reducing this burden, may be sent to the Director, Bureau of Economic Analysis (BE–1), U.S. Department of Commerce, Washington, DC 20230; and to the Office of Management and Budget, Paperwork Reduction Project 0608–0042, Washington, DC 20503.

Executive Order 12291

BEA has determined that these final rules are not "major" as defined in E.O. 12291 because they are not likely to result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Executive Order 12612

These final rules do not contain policies with Federalism implications sufficient to warrant preparation of a Federalism assessment under E.O. 12612.

Regulatory Flexibility Act

The General Counsel, Department of Commerce, has certified to the Chief Counsel for Advocacy, Small Business Administration, under provisions of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this final rulemaking will not have a significant economic impact on a substantial number of small entities. Most small businesses are not foreign owned, and many that are will not be required to report in the benchmark survey because their assets, sales, and net income are each equal to or less than the $1 million exemption level below which reporting is not required. Also, companies with assets, sales, or net income above $1 million, but not above $50 million (positive or negative), will report on the abbreviated BE–12 short form, rather than on the BE–12 long form. This provision significantly reduces the reporting burden on smaller companies.

List of Subjects in 15 CFR Part 806

Balance of payments, Economic statistics, Foreign investment in the United States, Reporting requirements.

Dated: November 9, 1992.

Carol S. Carson,

Director, Bureau of Economic Analysis.

For the reasons set forth in the preamble, 15 CFR part 806 is amended as follows:

PART 806—DIRECT INVESTMENT SURVEYS

1. The authority citation for 15 CFR part 806 continues to read as follows:

Authority: 5 U.S.C. 301, 22 U.S.C. 3101–3108, and E.O. 11961, as amended.

2. Section 806.17 is revised to read as follows:

§ 806.17 Rules and regulations for BE–12, Benchmark Survey of Foreign Direct Investment in the United States—1992.

A BE–12, Benchmark Survey of Foreign Direct Investment in the United States will be conducted covering 1992. All legal authorities, provisions, definitions, and requirements contained in §§ 806.1 through 806.13 and § 806.15(a) through (g) are applicable to this survey. Specific additional rules and regulations for the BE–12 survey are given below.

(a) *Response required.* A response is required from persons subject to the reporting requirements of the BE–12, Benchmark Survey of Foreign Direct Investment in the United States—1992, contained herein, whether or not they are contacted by BEA. Also, a person, or their agent, contacted by BEA concerning their being subject to reporting, either by sending them a report form or by written inquiry, must respond in writing pursuant to § 806.4. This may be accomplished by

completing and returning either Form BE–12(X) within 30 days of its receipt if Form BE–12(LF), Form BE–12(SF), or Form BE–12 Bank do not apply, or by completing and returning Form BE–12(LF), Form BE–12(SF), or Form BE–12 Bank, whichever is applicable, by May 31, 1993.

(b) *Who must report.* A BE–12 report is required for each U.S. affiliate, i.e., for each U.S. business enterprise in which a foreign person owned or controlled, directly or indirectly, 10 percent or more of the voting securities if an incorporated U.S. business enterprise, or an equivalent interest if an unincorporated U.S. business enterprise, at the end of the business enterprise's 1992 fiscal year. A report is required even though the foreign person's ownership interest in the U.S. business enterprise may have been established or acquired during the reporting period. Beneficial, not record, ownership is the basis of the reporting criteria.

(c) *Forms to be filed.* (1) Form BE–12(LF)—Benchmark Survey of Foreign Direct Investment in the United States—1992 (Long Form) must be completed and filed by May 31, 1993, by each U.S. business enterprise that was a U.S. affiliate of a foreign person at the end of its 1992 fiscal year, if:

(i) It is not a bank, and

(ii) On a fully consolidated, or, in the case of real estate investment, an aggregated basis, one or more of the following three items for the U.S. affiliate (not just the foreign parent's share) exceeded $50 million (positive or negative) at the end of, or for, its 1992 fiscal year:

(A) Total assets (do not net out liabilities)

(B) Sales or gross operating revenues, excluding sales taxes, or

(C) Net income after provision for U.S. income taxes.

(2) Form BE–12(SF)—Benchmark Survey of Foreign Direct Investment in the United States—1992 (Short Form) must be completed and filed by May 31, 1993, by each U.S. business enterprise that was a U.S. affiliate of a foreign person at the end of its 1992 fiscal year, if:

(i) It is not a bank, and

(ii) On a fully consolidated, or, in the case of real estate investments, an aggregated basis, one or more of the following three items for the U.S. affiliate (not just the foreign parent's share) exceeded $1 million, but no one item exceeded $50 million (positive or negative) at the end of, or for, its 1992 fiscal year:

(A) Total assets (do not net out liabilities)

(B) Sales or gross operating revenues, excluding sales taxes, or

(C) Net income after provision for U.S. income taxes.

(3) Form BE–12 Bank—Benchmark Survey of Foreign Direct Investment in the United States—1992 BANK must be completed and filed by May 31, 1993, by each U.S. business enterprise that was a U.S. affiliate of a foreign person at the end of its 1992 fiscal year, if:

(i) The U.S. affiliate is a bank or a bank holding company, and

(ii) On a fully consolidated basis, one or more of the following three items for the U.S. affiliate (not just the foreign parent's share) exceeded $1 million (positive or negative) at the end of, or for, its 1992 fiscal year:

(A) Total assets (do not net out liabilities)

(B) Sales or gross operating revenues, excluding sales taxes, or

(C) Net income after provision for U.S. income taxes.

(4) Form BE–12(X)—Benchmark Survey of Foreign Direct Investment in the United States—1992, Claim for Exemption from Filing BE–12(LF), BE–12(SF), and BE–12 Bank must be completed and filed within 30 days of the date it was received, or by May 31, 1993, whichever is sooner, by:

(i) Each U.S. business enterprise that was a U.S. affiliate of a foreign person at the end of its 1992 fiscal year (whether or not the U.S. affiliate, or its agent, is contacted by BEA concerning its being subject to reporting in the 1992 benchmark survey), but is exempt from filing Form BE–12(LF), Form BE–12(SF), and Form BE–12 Bank; and

(ii) Each U.S. business enterprise, or its agent, that is contacted, in writing, by BEA concerning its being subject to reporting in the 1992 benchmark survey but that is not otherwise required to file the Form BE–12(LF), Form BE–12(SF), or Form BE–12 Bank.

(d) *Aggregation of real estate investments.* All real estate investments of a foreign person must be aggregated for the purpose of applying the reporting criteria. A single report form must be filed to report the aggregate holdings, unless written permission has been received from BEA to do otherwise. Those holdings not aggregated must be reported separately.

(e) *Exemption.* (1) A U.S. affiliate as consolidated, or aggregated in the case of real estate investments, is not required to file a Form BE–12(LF), Form BE–12(SF), or Form BE–12 Bank if each of the following three items for the U.S. affiliate (not just the foreign parent's share) did not exceed $1 million (positive or negative) at the end of, or for, its 1992 fiscal year:

(i) Total assets (do not net out liabilities)

(ii) Sales or gross operating revenues, excluding sales taxes, and

(iii) Net income after provision for U.S. income taxes.

(2) If a U.S. business enterprise was a U.S. affiliate at the end of its 1992 fiscal year but is exempt from filing a completed Form BE–12(LF), BE–12(SF), or Form BE–12 Bank, it must nevertheless file a completed and certified Form BE–12(X).

(f) *Due date.* A fully completed and certified Form BE–12(LF), Form BE–12(SF), or BE–12 Bank is due to be filed with BEA not later than May 31, 1993. A fully completed and certified Form BE–12(X) is due to be filed with BEA within 30 days of the date it was received, or by May 31, 1993, whichever is sooner.

BILLING CODE 3510–EA–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

Other Assessable Penalties with Respect to the Preparation of Income Tax Returns for Other Persons

CFR Correction

In title 26 of the Code of Federal Regulations, part 1, section 1.1401 to end, revised as of April 1, 1992, on page 794 paragraph (f) was inadvertently removed from section 1.6695-1. As reinstated the text of paragraph (f) reads as follows:

§ 1.6695-1 Other assessable penalties with respect to the preparation of income tax returns for other persons.

* * * * *

(f) *Negotiation of check.* (1) No person who is an income tax return preparer may endorse or otherwise negotiate, directly or through an agent, a check for the refund of tax under subtitle A of the Internal Revenue Code of 1954 which is issued to a taxpayer other than the preparer if the person was a preparer of the return or claim for refund which gave rise to the refund check.

(2) Section 6695(f) and paragraph (f)(1) and (3) of this section do not apply to a preparer-bank which–

(i) Cashes a refund check and remits all of the cash to the taxpayer or accepts a refund check for deposit in full to a taxpayer's account, so long as the bank does not initially endorse or negotiate the check (unless the bank has made a

loan to the taxpayer on the basis of the anticipated refund); or

(ii) Endorses a refund check for deposit in full to a taxpayer's account pursuant to a written authorization of the taxpayer (unless the bank has made a loan to the taxpayer on the basis of the anticipated refund).

A preparer-bank may also subsequently endorse or negotiate a refund check as a part of the check-clearing process through the financial system after initial endorsement or negotiation.

(3) The preparer shall be subject to a penalty of $500 for each endorsement or negotiation of a check prohibited under section 6695(f) and paragraph (f)(1) of this section.

BILLING CODE 1505-01-D

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 3

RIN 2900-AG02

Active Military Service Certified Under Section 401 of Public Law 95-202

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs (VA) has amended its regulations concerning persons who are included as having served on active duty. The need for this action results from recent decisions of the Secretary of the Air Force that the World War II service of members of U.S. Civilian Flight Crew and Aviation Ground Support Employees of Consolidated Vultree Aircraft Corporation (Consairway Division) Who Served Overseas as a Result of a Contract With the Air Transport Command; members of U.S. Civilian Flight Crew and Aviation Ground Support Employees of Pan American World Airways and Its Subsidiaries and Affiliates, Who Served Overseas as a Result of Pan American's Contract With the Air Transport Command and Naval Air Transport Service; and Honorably Discharged Members of the American Volunteer Guard, Eritrea Service Command constitutes active military service in the Armed Forces of the United States for purposes of all laws administered by VA. The effect of this action is to confer veteran status for VA benefit purposes on former members of these groups who were discharged under honorable conditions.

EFFECTIVE DATES: The effective date for § 3.7(x)(24) and (26) is June 29, 1992, the date on which the Secretary of the Air Force determined that such service constitutes active duty. The effective date for § 3.7(x)(25) is July 16, 1992, the date on which the Secretary of the Air Force determined that such service constitutes active duty.

FOR FURTHER INFORMATION CONTACT: Lance Peterson, Consultant, Regulations Staff (211B), Compensation and Pension Service, Veterans Benefits Administration, 810 Vermont Avenue NW., Washington, DC 20420, telephone (202) 233-3005.

SUPPLEMENTARY INFORMATION: Section 401 of Public Law 95-202 authorized the Secretary of Defense to determine whether the service of members of civilian or contractual groups shall be considered active duty for the purposes of all laws administered by VA.

A notice of certification of the following group by the Secretary of the Air Force appeared in the **Federal Register** of August 6, 1992, 57 FR 34765: U.S. Civilian Flight Crew and Aviation Ground Support Employees of Consolidated Vultree Aircraft Corporation (Consairway Division) Who Served Overseas as a Result of a Contract With the Air Transport Command During the Period December 14, 1941, through August 14, 1945.

A notice of certification of the following group by the Secretary of the Air Force also appeared in the **Federal Register** of August 6, 1992, 57 FR 34765-66: U.S. Civilian Flight Crew and Aviation Ground Support Employees of Pan American World Airways and Its Subsidiaries and Affiliates, Who Served Overseas as a Result of Pan American's Contract With the Air Transport Command and Naval Air Transport Service During the Period December 14, 1941 through August 14, 1945.

A notice of certification of the following group by the Secretary of the Air Force also appeared in the **Federal Register** of August 6, 1992, 57 FR 34766: Honorably Discharged Members of the American Volunteer Guard, Eritrea Service Command During the Period June 21, 1942 to March 31, 1943.

VA is issuing a final rule to amend the provisions of 38 CFR 3.7(x). Because this change implements determinations of the Secretary of the Air Force in accordance with Pub. L. 95-202, which are binding on VA, publication as a proposal for public notice and comment is unnecessary.

Since a notice of proposed rulemaking is unnecessary and will not be published, this amendment is not a "rule" as defined in and made subject to the Regulatory Flexibility Act (RFA), 5 U.S.C., 601-612. This amendment will not directly affect any small entity.

In accordance with Executive Order 12291, Federal Regulation, the Secretary has determined that this regulatory amendment is non-major for the following reasons:

(1) It will not have an annual effect on the economy of $100 million or more.

(2) It will not cause a major increase in costs or prices.

(3) It will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

There is no affected Catalog of Federal Domestic Assistance program number.

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Handicapped, Health care, Pensions, Veterans.

Approved: November 4, 1992.

Anthony J. Principi,

Acting Secretary of Veterans Affairs.

For the reasons set forth in the preamble, 38 CFR part 3 is amended as follows:

PART 3—ADJUDICATION

Subpart A—Pension, Compensation, Dependency and Indemnity Compensation

1. The authority citation for part 3, subpart A continues to read as follows:

Authority: 38 U.S.C. 501(a).

2. In § 3.7, paragraphs (x)(24), (25), and (26) are added to read as follows:

§ 3.7 Persons included.

* * * * *

(x) *Active military service certified as such under section 401 of Pub. L. 95-202.* * * *

* * * * *

(24) U.S. Civilian Flight Crew and Aviation Ground Support Employees of Consolidated Vultree Aircraft Corporation (Consairway Division) Who Served Overseas as a Result of a Contract With the Air Transport Command During the Period December 14, 1941, through August 14, 1945.

(25) U.S. Civilian Flight Crew and Aviation Ground Support Employees of Pan American World Airways and Its Subsidiaries and Affiliates, Who Served Overseas as a Result of Pan American's Contract With the Air Transport Command and Naval Air Transport Service During the Period December 14, 1941 through August 14, 1945.

(26) Honorably Discharged Members of the American Volunteer Guard,

Eritrea Service Command During the Period June 21, 1942 to March 31, 1943.

BILLING CODE 6320-01-M

38 CFR Part 21

RIN 2900-AF91

Dependents' Education; Determining the Eligibility Period

AGENCY: Department of Veterans Affairs.

ACTION: Final regulations.

SUMMARY: Eligible surviving spouses have a ten-year period during which they must use their Dependents' Educational Assistance. After a review of the Department of Veterans Affairs' (VA's) administrative experience and a careful reading of the governing statute, VA is revising the criteria for determining the beginning of surviving spouses' eligibility periods.

EFFECTIVE DATE: December 22, 1992.

FOR FURTHER INFORMATION CONTACT: June C. Schaeffer (225), Assistant Director for Policy and Program Administration, Education Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233-2092.

SUPPLEMENTARY INFORMATION: On pages 33473 and 33474 of the **Federal Register** of July 29, 1992, there was published a Notice of Intent to amend 38 CFR part 21 in order to change the criteria for determining the beginning of surviving spouses' eligibility periods for Dependents' Educational Assistance. Interested people were given 30 days to submit comments, suggestions or objections. VA received no comments, suggestions or objections. Accordingly, VA is making the proposal final.

The Department of Veterans Affairs has determined that this amended regulation does not contain a major rule as that term is defined by E.O. 12291, entitled Federal Regulation. The regulation will not have a $100 million annual effect on the economy, and will not cause a major increase in costs or prices for anyone. It will have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Secretary of Veterans Affairs has certified that this amended regulation will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601-612. Pursuant to 5 U.S.C. 605(b), the amended regulation, therefore, is exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

This certification can be made because the amended regulation directly affects only individuals. It will have no significant economic impact on small entities, i.e., small business, small private and nonprofit organizations and small governmental jurisdictions.

The Catalog of Federal Domestic Assistance number for the program affected by this proposal is 64.117.

List of Subjects in 38 CFR Part 21

Civil rights, Claims, Education, Grant programs-education, Loan programs-education, Reporting and recordkeeping requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: November 5, 1992.

Anthony J. Principi,

Acting Secretary of Veterans Affairs.

For the reasons set out in the preamble, 38 CFR part 21, subpart C is amended as set forth below.

PART 21-VOCATIONAL REHABILITATION AND EDUCATION

Subpart C-Survivors' and Dependents' Educational Assistance Under 38 U.S.C. Chapter 35

1. The authority citation for part 21, subpart C is revised to read as follows:

Authority: 38 U.S.C. 501(a), 3500-3566.

2. In § 21.3046 paragraph (b)(5) is revised and its authority citation is added to read as follows.

§ 21.3046 Periods of eligibility; spouses and surviving spouses.

* * * * *

(b) *Beginning date of eligibility period-surviving spouses.* * * *

* * * * *

(5) If the veteran's death occurred after November 30, 1968, and VA makes a final decision concerning the surviving spouse's eligibility for dependents educational assistance after October 27, 1986, VA will determine the beginning date of the 10-year period as follows.

(i) If the surviving spouse's eligibility is based on the veteran's death while a total, service-connected disability evaluated as permanent in nature was in existence, the beginning date of the 10-year period is the date of death.

(ii) If the surviving spouse's eligibility is based on the veteran's death from a service-connected disability, the surviving spouse will choose the beginning date of the 10-year period. That date will be no earlier than the date of death and no later than the date of the VA determination that the veteran's death was due to a service-connected disability.

(Authority: 38 U.S.C. 3512(b); Pub. L. 99-576)

BILLING CODE 6320-01-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 61

[CC Docket No. 92-13; FCC 92-494; FCC 92-524]

Tariff Filing Requirements for Interstate Common Carriers

AGENCY: Federal Communications Commission [FCC].

ACTION: Final rule; delay of effective date.

SUMMARY: The Commission is amending its rules to provide that a domestic carrier classified as nondominant that is subject to forbearance is not required to file tariffs. The Report and Order in this proceeding reaffirms the Commission's prior conclusions that its permissive detariffing rules are lawful and serve the public interest. However, the Report and Order is stayed until further notice as a result of the decision by the U.S. Court of Appeals for the District of Columbia Circuit in *AT&T* v. *FCC*, No. 92-1053 (D.C. Cir Nov. 13, 1992) (*AT&T* v. *FCC*).

EFFECTIVE DATE: The effective date of the Report and Order is stayed until further notice.

FOR FURTHER INFORMATION CONTACT: Donna N. Lampert, (202) 632-6365, or John S. Morabito, (202) 632-1290, Policy and Program Planning Division, Common Carrier Bureau.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The proposals have been analyzed with respect to the Paperwork Reduction Act of 1980, as amended, 44 U.S.C. 3501-20, and found to impose no new or modified form, information collection and/or recordkeeping, labeling, disclosure or record retention requirements; and will not increase burden hours imposed on the public. Implementation of any new or modified requirement will be subject to approval by the Office of Management and Budget as prescribed by that Act.

Background

Common Carrier Docket 92–13: Tariff Filing Requirements for Interstate Common Carriers, Notice of Proposed Rulemaking, 7 FCC Rcd 804 (1992) (57 FR 6487 (2/25/92)).

Summary

1. This is a summary of a Report and Order in Common Carrier Docket 92–13, Tariff Filing Requirements for Interstate Common Carriers, adopted November 5, 1992 and released November 25, 1992 (FCC 92–494), and a summary of an Order staying the effectiveness of the Report and Order, Tariff Filing Requirements for Interstate Common Carriers, adopted November 25, 1992 and released November 25, 1992 (FCC 92–524). The full texts of the Commission's decisions are available for inspection and copying, Monday through Friday, 9 a.m.–4:30 p.m., in the FCC Reference Room (room 239), 1919 M Street, N.W., Washington, DC 20554. The complete text of the Report and Order may also be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452–1422, 1114 21st Street, NW., Washington, DC 20036.

2. The Commission initiated this rulemaking proceeding in response to a complaint filed by AT&T challenging, in effect, the lawfulness and future application of the tariff forbearance rules adopted nearly a decade ago in the Competitive Carrier proceeding. In the Competitive Carrier proceeding, the Commission concluded that because nondominant domestic carriers lacked market power, they would be unable to charge unjust and unreasonable rates in violation of section 201(b) of the Communications Act, or to discriminate unreasonably in violation of section 202(a) of the Communications Act. Under these circumstances, the Commission determined that traditional tariff regulation of nondominant carriers was not necessary and thus that it should no longer require nondominant carriers to file tariffs. After soliciting and reviewing comments on this matter, the Commission concludes that its policy of not requiring domestic nondominant carriers to file tariffs is both lawful and in the public interest.

3. Section 203(a) of the Communications Act generally requires every common carrier, except connecting carriers, to file tariffs with the Commission. Section 203(b)(2) of the Communications Act, however, authorizes the Commission to modify any requirement of that section except the notice period. Because Congress intended for the FCC to have broad powers in its implementation of the Communications Act and the statutory language does not specifically limit the FCC's authority in this respect, the Commission finds that it may lawfully allow carriers to engage in permissive detariffing so long as doing so serves the public interest. The Commission also notes that Congress is aware of, and several times has referred to, the FCC's forbearance rules, without repealing, altering or expressing any reservations about them.

4. In addition, the Report and Order determines that permissive detariffing has served its intended purpose in promoting the goals of the Communications Act. Under forbearance, the FCC remains committed to enforcing the requirements of the Communications Act that carriers' rates and practices be just, reasonable and not unreasonably discriminatory. The Commission reaffirmed that because nondominant carriers do not have market power, competitive market forces will serve to ensure compliance with these substantive requirements. Moreover, the section 208 complaint process remains available to enforce sections 201(b) and 202(a) of the Communications Act.

5. The Report and Order explains that without forbearance the goals of the Communications Act would be frustrated due to the burdens imposed upon nondominant carriers. It states that permissive detariffing has stimulated competition and given consumers more flexibility with respect to the price and type of services available and greater choice regarding the selection of carriers.

6. On November 13, 1992, the U.S. Court of Appeals for the District of Columbia Circuit vacated our permissive detariffing rules as applied in the Fourth Report and Order in the Competitive Carrier proceeding, 95 FCC 2d 554 (1983); *AT&T* v. *FCC*. In light of the court's decision, the Commission has determined that it will stay the Report and Order, pending any further litigation of the matters decided in *AT&T* v. *FCC*.

Final Regulatory Flexibility Analysis Statement

7. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 601–12, the Commission's final analysis with respect to the Report and Order is as follows:

Need and purpose of this action

This rulemaking proceeding was initiated to review the continuing lawfulness of the Commission's existing permissive detariffing rules in light of a complaint filed by AT&T alleging, in effect, that these rules violate the Communications Act. This Report and Order sustains those rules as being consistent with the Communications Act and the public interest.

Summary of issues raised by the public comments in response to the Initial Regulatory Flexibility Act Analysis

The Initial Regulatory Flexibility Analysis stated that any change in existing rules could have a significant impact on a broad range of telecommunications common carriers. We did not receive any comments that specifically addressed our Initial Regulatory Flexibility Analysis.

Significant alternatives considered and rejected

The Notice of Proposed Rulemaking did not propose new rules or alternative policies, but sought comment on the lawfulness of our existing permissive detariffing rules and on how they should be changed in the event they are found unlawful. This item reaffirms and codifies our existing rules that minimize regulatory burdens on nondominant carriers.

8. Copies of the final regulatory flexibility analysis are available for inspection and copying, Monday through Friday, 9 a.m.–4:30 p.m., in the FCC Dockets Reference Room (room 239), 1919 M Street, NW., Washington, DC 20554. The final regulatory flexibility analysis may also be purchased, as part of the Report and Order, from the Commission's copy contractor, Downtown Copy Center, (202) 452–1422, 1114 21st Street, NW., Washington, DC 20036. See 5 U.S.C. 604(b).

Ordering Clause

9. *It is ordered* that, pursuant to the authority contained in sections 1, 4, and 201–05 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154 and 201–05, the Report and Order is adopted amending part 61 of the Commission's Rules, 47 CFR part 61.

10. *It is further ordered* that, the Report and Order in this proceeding, FCC 92–494, adopted November 5, 1992, is stayed until further notice.

List of Subjects in 47 CFR Part 61

Communications common carriers, Radio, Reporting and recordkeeping requirements, Telegraph, and Telephone.

Federal Communications Commission.
William F. Caton,
Acting Secretary.

Final Rule Changes

Part 61 of title 47 of the Code of Federal Regulations is amended as follows:

PART 61—TARIFFS

1. The authority citation for part 61 continues to read as follows:

Authority: Sec. 4, 48 Stat. 1066, as amended; 47 U.S.C. 154. Interpret or apply sec. 203, 48 Stat. 1070; 47 U.S.C. 203.

2. Section 61.50 is added to read as follows:

§ 61.50 Carriers subject to forbearance.

Notwithstanding the rules set forth herein, no domestic carrier classified as nondominant that is subject to forbearance is required to file tariffs.

BILLING CODE 6712-01-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 1804

Changes to Contractor Performance Summary Guidance

AGENCY: Office of Procurement, Procurement Policy Division, National Aeronautics and Space Administration (NASA).
ACTION: Interim rule with request for comments.

SUMMARY: This rule amends the NASA Federal Acquisition Regulation Supplement (NFS), chapter 18 of the Federal Acquisition Regulation System in title 48 of the Code of Federal Regulations. This rule sets forth NASA's policy on Contractor Performance Summaries and revises the rating system on NASA Form 1651, Contractor Performance Summary (CPS).

DATES: Comments must be received on or before February 22, 1993.

ADDRESSES: Submit comments to the Assistant Administrator for Procurement, NASA, Code HP, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas Deback, Code HP, Telephone: (202) 358-0431.

SUPPLEMENTARY INFORMATION:

Background

The Contractor Performance Summary System was initiated by Procurement Notice (PN) 89-27, dated January 28, 1992, and subsequently incorporated into the NASA FAR Supplement. The changes to the system initiated by this rule result from center comments following the preparation of the initial series of reports and a change to the Award Fee adjectival rating system.

Impact

The Director, Office of Management and Budget (OMB) by memorandum, dated December 14, 1984, exempted certain agency procurement regulations from Executive Order 12291. This regulation falls in this category. NASA certifies that this regulation will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. *et seq.*) because most of the changes impact internal procedures. This rule does not impose any reporting or recordkeeping requirements subject to the Paperwork Reduction Act.

List of Subjects in 48 CFR Part 1804

Government procurement.
Don G. Bush,
Assistant Administrator for Procurement.

PART 1804—ADMINISTRATIVE MATTERS

1. The authority citation for 48 CFR part 1804 continues to read as follows:

Authority: 42 U.S.C. 2473(c)(1).

1804.677-1 [Amended]

2. In section 1804.677-1, paragraph (c) is revised to read as follows:

1804.677-1 Applicability and coverage.

* * * * *

(c) The CPS will be completed once annually for award fee contracts in excess of $25M (total contract value including options) and for award fee contracts awarded after January 1, 1992, regardless of dollar value, for which at least one award fee evaluation has been completed during the year prior to January 1 of the year in which the report is due. CPS's may also be submitted for significant non-award fee contracts at the center's discretion.

3. In section 1804.677-4, paragraph (b) is revised to read as follows:

1804.677-4 Distribution of CPS's and interagency requests.

* * * * *

(b) The Assistant Administrator for Procurement (Code HK) is the agency focal point for processing CPS requests from Government activities outside the agency. All such requests are to be forwarded to Code HK for action.

4. In section 1804.677-6, paragraphs (n)(2), (n)(4), and (q) are revised to read as follows:

1804.677–6 Instructions for completing NASA Form 1651, Contractor Performance Summary Report—CPS.

* * * * *

(n) * * *

(2) Each applicable evaluation area will be evaluated as Excellent, Very Good, Good, Satisfactory, or Poor/Unsatisfactory. The following definitions are provided as guidance in determining the appropriate rating:

Excellent: Of exceptional merit; exemplary performance in a timely, efficient, and economical manner; very minor (if any) deficiencies with no adverse effect on overall performance (Point Range: 91–100).

Very Good: Very effective performance, fully responsive to contract requirements accomplished in a timely, efficient, and economical manner for the most part. Only minor deficiencies (Point Range: 81–90).

Good: Effective performance; fully responsive to contract requirements; reportable deficiencies, but with little identifiable effect on overall performance (Point Range: 71–80).

Satisfactory: Meets or slightly exceeds minimum acceptable standards; adequate results. Reportable deficiencies with identifiable, but not substantial, effects on overall performance (Point Range: 61–70).

Poor/Unsatisfactory: Does not meet minimum acceptable standards in one or more areas; remedial action required in one or more areas; deficiencies in one or more areas which adversely affect overall performance (Point Range: 0–60).

"N/A" will be indicated for any area clearly not evaluated by the PEB.

* * * * *

(4) If any area is rated "Satisfactory" or below, the contracting officer will provide a brief explanation of each such rating in Item 16.

* * * * *

(q) Item 16, Contracting Officer Comments. The contracting officer will briefly discuss the causes and rationale for any ratings of "Satisfactory" or below.

* * * * *

BILLING CODE 7510–01–M

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Part 171

[Docket No. HM–215; Amdt. No. 171–117]

International Maritime Dangerous Goods Code and ICAO Technical Instructions; Matter Incorporated by Reference

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Interim final rule; request for comments.

SUMMARY: This interim final rule updates a reference in the Hazardous Materials Regulations to the International Maritime Dangerous Goods Code (IMDG Code) to include the most recent amendment to the Code. This rule also implements the most recent edition of the International Civil Aviation Organization's (ICAO) Technical Instructions for the Safe Transport of Dangerous Goods by Air (ICAO Technical Instructions). These amendments are necessary to facilitate the continued transport of hazardous materials in international commerce by vessel and aircraft when these two international regulations become effective.

DATES: January 1, 1993.

The incorporation by reference of certain publications listed in this final rule is approved by the Director of the Office of the Federal Register as of January 1, 1993.

ADDRESSES: Address comments to the Dockets Unit (DHM–30), Research and Special Programs Administration, U.S. Department of Transportation, Washington, DC 20590–0001. Comments should identify the docket and be submitted in five copies. Persons wishing to receive confirmation of receipt of their comments should include a self-addressed stamped post card. The Dockets Unit is located in room 8421 of the Nassif Building, 400 Seventh Street, SW., Washington, DC. Public dockets may be reviewed between the hours of 8:30 a.m. and 5 p.m. Monday through Friday, except for legal Federal holidays.

FOR FURTHER INFORMATION CONTACT: Beth Romo, telephone (202) 366–4488, Office of Hazardous Materials Standards, Research and Special Programs Administration, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590–0001.

SUPPLEMENTARY INFORMATION: The Research and Special Programs Administration (RSPA) is revising the regulations in 49 CFR 171.7 to recognize Amendment 26 to the IMDG Code, which has recently been published by the International Maritime Organization (IMO). This amendment promulgates numerous miscellaneous changes to the IMDG Code and addresses such matters as classification, labeling, packaging, and documentation. IMO has established January 1, 1993, as the implementation date for these amendments. In § 171.12, the Hazardous Materials Regulations (HMR) authorize shipments prepared in accordance with the IMDG Code if all or part of the transportation is by vessel, subject to certain conditions and limitations.

This rule also incorporates by reference the 1993–1994 edition of the ICAO Technical Instructions, which becomes effective on January 1, 1993, pursuant to decisions taken by the ICAO Council regarding implementation of Annex 18 to the Convention on International Civil Aviation. The offering, acceptance and transportation of hazardous materials by aircraft, and by motor vehicle either before or after being transported by aircraft, is authorized in § 171.11 as fully equivalent to the HMR (with certain exceptions) if in conformance with the ICAO Technical Instructions. RSPA is considering certain other amendments to part 175 to improve consistency between 49 CFR and the ICAO Technical Instructions under a separate rulemaking action, Docket HM–184.

This rule is intended to facilitate the international transportation of hazardous materials by aircraft and vessel by ensuring a basic consistency between the HMR and the international regulations. Because this rule provides for the continued use of international standards without adversely affecting safety or imposing additional requirements on persons subject to the HMR, notice and public procedure are considered unnecessary. For these same reasons, these amendments are being made effective without the customary 30-day delay following publication. This will allow use of these two international regulations when they become effective on January 1, 1993. Because this final rule is published without prior notice, RSPA is requesting comments by February 15, 1993. If warranted, a future notice will be published in the Federal Register addressing substantive comments.

Rulemaking Analyses and Notices

A. Executive Order 12291

This interim final rule does not meet the criteria specified in section 1(b) of Executive Order 12291 and is, therefore, not a major rule and is not a significant rule under the regulatory procedures of the Department of Transportation (44 U.S.C. 11034). This interim final rule does not require a Regulatory Impact Analysis, or an environmental assessment or impact statement under the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*). It also imposes no additional requirements on any person; therefore, a regulatory evaluation was not prepared.

B. Executive Order 12612

This interim final rule has been analyzed in accordance with Executive Order 12612. This final rule does not have sufficient Federalism implications to warrant the preparation of a Federalism Assessment.

The Hazardous Materials Transportation Act contains an express preemption provision (49 App. U.S.C. 1804(a)(4)) that preempts State and local requirements on certain covered subjects (including the designation, description, and classification of hazardous materials) unless the State or local requirement is substantively the same in the Federal requirement on that subject. Thus, RSPA lacks discretion in this area.

C. Impact on Small Entities

Based on limited information concerning size and nature of entities likely to be affected by this rule, I certify this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 49 CFR Part 171

Exports, Hazardous materials transportation, Hazardous waste, Imports, Incorporation by reference, Reporting and recordkeeping requirements.

In consideration of the foregoing, 49 CFR part 171 is amended as follows:

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

1. The authority citation for part 171 continues to read as follows:

Authority: 49 App. U.S.C. 1802, 1803, 1804, 1805, 1808, 1815, 1818; 49 CFR part 1.

§ 171.7 [Amended]

2. In § 171.7, in the table in paragraph (a)(3), the following changes are made:

a. The entry "International Maritime Dangerous Goods (IMDG) Code, 1990 Consolidated Edition" is amended by adding the wording ", as amended by Amendment 26 thereto" immediately after the word "Edition".

b. For the entry "Technical Instructions for the Safe Transport of Dangerous Goods" under ICAO, the date "1991–1992" is revised to read "1993–1994".

Issued in Washington, DC on December 15, 1992 under authority delegated in 49 CFR part 1.

Douglas B. Ham,

Acting Administrator, Research and Special Programs Administration.

Proposed Rules

Federal Register
Vol. 57, No. 246
Tuesday, December 22, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF JUSTICE

8 CFR Part 3

[AG Order No. 1639–92]

Executive Office for Immigration Review; Criminal Conviction Records

AGENCY: Department of Justice.

ACTION: Proposed rule with request for comments.

SUMMARY: The proposed rule outlines the types of documentary evidence and records which will be admissible in proceedings before an Immigration Judge to prove a criminal conviction. It expands the class of documents and records which will be accepted by an Immigration Judge, and includes the use of abstracts of convictions and records which are electronically transferred by individual states to the Immigration and Naturalization Services (INS). These proposed changes are necessary to implement section 507 of the Immigration Act of 1990 (IMMACT).

DATES: Written comments must be submitted on or before January 21, 1993.

ADDRESSES: Please submit written comments to Gerald S. Hurwitz, Counsel to the Director, Executive Office for Immigration Review, suite 2400, 5107 Leesburg Pike, Falls Church, Virginia 22041.

FOR FURTHER INFORMATION CONTACT: Gerald S. Hurwitz, Counsel to the Director, Executive Office for Immigration Review, suite 2400, 5107 Leesburg Pike, Falls Church, Virginia 22041, telephone (703) 305–0470.

SUPPLEMENTARY INFORMATION: Section 507 of IMMACT amended the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3753(a)(11)) by requiring individual states which receive grants under the Omnibus Act to provide, without fee to the INS, certified records of conviction of aliens who have been convicted of violating the criminal laws of the state. The records provided to the INS to prove a criminal conviction may vary from state to state; therefore, the proposed rule sets forth provisions which will recognize and allow different types of conviction records to be admitted in immigration proceedings.

The proposed rule will expand the types of documents and records admissible to prove a criminal conviction. Those documents and records which are most frequently provided to the INS by the states to prove a criminal conviction will continue to be accepted, *i.e.*, a record of judgment and conviction, and a plea, verdict and sentence record. Additionally, docket entry records, court transcripts and minutes of court proceedings will be admissible if the document or record evidences a criminal conviction. The list of admissible documents and records specified in the proposed rule will not be exclusive; it will merely identify those most commonly available to the INS at present.

Additionally, the states may electronically transfer records of convictions and abstracts of records to the INS from the state record repositories. However, before these electronic records may be used, they must be certified as official records by a state official associated with the state's repository of criminal justice records. Further, the INS official who receives the record must certify in writing that such record has been received electronically from the state's record repository. These procedures will assure the accuracy and reliability of the records admitted into the proceedings by the Immigration Judge. The proposed rule anticipates that other evidence may be used to demonstrate a criminal conviction, if in the discretion of the Immigration Judge, it is deemed probative and relevant.

The proposed rule provides that a document or record which is offered into evidence must be a certified copy of an official document or record, or a photocopy certified by an immigration official to be a true and correct copy of the original record. This provision will allow the INS to offer photocopies of records into evidence when it is too costly or burdensome to obtain certified records.

In addition to the safeguards built into this proposed rule concerning the accuracy of documents and records, the hearing process offers additional safeguards. An individual will have an opportunity to challenge the accuracy of any document or record presented. The proposed rule speaks to admissibility only; it does not state that the document or record is dispositive of the existence of a criminal conviction. Furthermore, when the record of a criminal conviction is not dispositive of the deportation or exclusion ground or of the underlying issue, the Immigration Judge may require the submission of additional evidence.

In accordance with 5 U.S.C. 605(b), the Attorney General certifies that this proposed rule does not have a significant adverse economic impact on a substantial number of small entities. This proposed rule is not a major rule within the meaning of section 1(b) of E.O. 12291, nor does this proposed rule have Federalism implications warranting the preparation of a Federal Assessment in accordance with E.O. 12612. The proposed rule meets the applicable standards provided in sections 2(a) and 2(b)(2) of E.O. 12778.

List of Subjects in 8 CFR Part 3

Administrative practice and procedure, Immigration, Organization and functions (Government agencies).

Accordingly, title 8, chapter I of the code of Federal Regulations is proposed to be amended as follows:

PART 3—EXECUTIVE OFFICE FOR IMMIGRATION REVIEW

1. The authority citation for part 3 continues to read as follows:

Authority: 5 U.S.C. 301; 8 U.S.C. 1103, 1252 note, 1252b, 1362; 28 U.S.C. 509, 510, 1746; Sec. 2 Reorg. Plan No. 2 of 1950, 3 CFR 1949–1953 Comp., p. 1002.

2. Section 3.41 is added to part 3 as follows:

§ 3.41 Record of conviction.

In any proceeding before an Immigration Judge,

(a) Any of the following documents or records shall be admissible as evidence in providing a criminal conviction:

(1) A record of judgment and conviction;

(2) A record of plea, verdict and sentence;

(3) A docket entry from court records that indicates the existence of a conviction;

(4) Minutes of a court proceeding or a transcript of a hearing that indicate the existence of a conviction;

(5) An abstract of a record of conviction prepared by the court in which the conviction was entered, or by a state law enforcement official associated with the state's repository of criminal justice records, that indicates the following: the charge or section of law violated, the disposition of the case, the existence and date of conviction, and the sentence;

(6) Any document or record prepared by, or under the direction of, the court in which the conviction was entered that indicates the existence of a conviction.

(b) Any document or record of the types specified in paragraph (a) of this section may be submitted if it complies with the requirements of § 287.6(a) of this chapter, or a copy of any such document or record may be submitted if it is attested in writing by an immigration officer to be a true and correct copy of the original.

(c) Any record of conviction or abstract that has been submitted by electronic means to the INS from a state shall be admissible as evidence to prove a criminal conviction if it:

(1) Is certified by a state law enforcement official associated with the state's repository of criminal justice records as an official record from its repository; and,

(2) Is certified in writing by an INS official as having been received electronically from the state's record repository.

(d) Any other evidence that reasonably indicates the existence of a criminal conviction may be admissible as evidence thereof.

Dated: December 14, 1992.

William P. Barr,

Attorney General.

[FR Doc. 92-30952 Filed 12-21-92; 8:45 am]

BILLING CODE 1531-29-GF

Immigration and Naturalization Service

8 CFR Part 235

[INS No. 1512-92]

RIN 1115-AD17

Inspection of Persons Applying for Admission

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Proposed rule.

SUMMARY: This rule provides for the reimbursement to the Immigration and Naturalization Service (Service) for certain direct salary costs and administrative overhead charges in its overtime billing for arriving trains and vessels under 8 U.S.C. 1353b, for all immigration inspection services rendered to crews, and for those services rendered to passengers that are not exempt under 8 U.S.C. 1353b or 8 U.S.C. 1356(q). This change is proposed in order to comply with the provisions of 31 U.S.C. 9701, the User Charges Statute, which requires that the cost, both direct and indirect, of providing special services be recovered from the benefitting parties. This rule will help ensure that the Service can provide sufficient administrative support to its overtime billing function.

DATES: Written comments must be submitted on or before January 21, 1993.

ADDRESSES: Please submit comments in triplicate to the Records Systems Division, Director, Policy Directives and Instructions Branch, Immigration and Naturalization Service, 425 I Street, NW., room 2001D, Washington, DC 20536. To ensure proper and timely handling please reference the INS No. 1512-92 on your correspondence.

FOR FURTHER INFORMATION CONTACT: Jeff Cohen, Systems Accountant, Financial Policy and Special Projects Section, Immigration and Naturalization Service, 425 I Street, NW., room 6321, Washington, DC 20536, telephone (202) 376-2804.

SUPPLEMENTARY INFORMATION: On October 30, 1986, Congress passed section 205 of the Department of Justice Appropriation Act, 1987 (codified at 8 U.S.C. 1356 (d) through (p)), which provides for the collection of a user fee from arriving air and sea passengers. On July 3, 1991, the Immigration and Naturalization Service published a notice at 56 FR 30597 announcing the resumption of overtime billing on September 3, 1991, for arriving aircraft, trains, and vessels under 8 U.S.C. 1353b.

This proposed rule clarifies those costs that are billable by including direct Medicare and Social Security (FICA) costs of inspection overtime of 6 percent and an administrative overhead charge of 15 percent.

In Comptroller General Decision B-114898 dated November 13, 1975, (55 Comp. Gen. 456), the propriety of charging for administrative overhead costs on inspectional extra compensation bills was addressed and affirmed. This decision states that in the absence of a provision in an agency's accounting system for determining administrative overhead, a charge of 15 percent of the identified costs of providing the service should be included in its charges for reimbursable services. Paragraph (e)(1) of 49 app. U.S.C. 1741 precludes adding an administrative overhead charge for inspections of arriving aircraft.

With regard to employees hired before January 1, 1984, the Service pays 1.45 percent of their gross income up to $130,200 for the Medicare portion of the social security tax. With regard to employees hired after December 31, 1983, the Service pays 6.2 percent of their gross income up to $55,500 for FICA, and 1.45 percent for Medicare on gross income up to $130,200. Based on our analysis, six percent represents an average rate that will recoup the expenses for social security tax on billable inspectional extra compensation assignments.

In accordance with 5 U.S.C. 605(b), the Commissioner of the Immigration and Naturalization Service certifies that this rule will not have a significant adverse economic impact on a substantial number of small entities. This rule is not considered to be a major rule within the meaning of section 1(b) of E.O. 12291, nor does this rule have federalism implications warranting the preparation of a Federal Assessment in accordance with E.O. 12612.

List of Subjects in 8 CFR Part 235

Administrative practice and procedure, Inspections, Ports of entry, Transportation.

Accordingly, part 235 of chapter I of title 8 of the Code of Federal Regulations is proposed to be amended as follows:

PART 235—INSPECTION OF PERSONS APPLYING FOR ADMISSION

1. The authority citation for part 235 is revised to read as follows:

Authority: 8 U.S.C. 1101, 1103, 1182, 1183, 1201, 1224, 1225, 1226, 1227, 1228, 1252, 1353a and 1353b; 31 U.S.C. 9701.

2. A new § 235.13 is added to read as follows:

§ 235.13 Billing for inspection services.

(a) *Reimbursement for Inspection Services.* (1) Owners, operators, and agents of vessels and railroad trains arriving from foreign ports, except when they are operating on regular schedules at designated ports of entry, will be liable for extra compensation paid under 8 U.S.C. 1353b to immigration officers when inspections of the passengers and crews of those conveyances are performed on Sundays and holidays, or between 5 p.m. and 8 a.m. on days other than Sundays and holidays.

(2) Owners operators, and agents of aircraft operating on a schedule which was not approved by the Immigration and Naturalization Service thirty (30)

days prior to arrival will be liable for extra compensation paid, under 8 U.S.C. 1353b, to immigration officers when inspections of the passengers and crews are performed between the hours of 5 p.m. and 8 a.m. The Service shall provide required immigration services, at no expense to airlines or its passengers (except those fees imposed by 8 CFR part 286), to those passengers arriving on scheduled U.S. flights at immigration serviced airports and other ports of entry.

(b) *Recovery of administrative overhead and Social Security Tax on reimbursable inspection services.* In computing extra compensation bills, a rate of 25 percent will be applied to the extra compensation paid to immigration officers performing inspections for arriving trains and vessels to recover the cost of administrative overhead associated with the inspection services. An additional six percent will be applied to the extra compensation to recover the Service's contribution for social security tax for arriving aircraft, trains, and vessels.

Dated: November 17, 1992.

Gene McNary,

Commissioner, Immigration and Naturalization Service.

[FR Doc. 92-30964 Filed 12-21-92; 8:45 am]

BILLING CODE 4410-01-M

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

12 CFR Part 9

[Docket No. 92-26]

Fiduciary Powers of National Banks and Collective Investment Funds

AGENCY: Comptroller of the Currency, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Office of the Comptroller of the Currency ("OCC") is proposing to amend its regulations governing the exercise of fiduciary powers by national banks. The intent of this amendment is to clarify the requirement at 12 CFR 9.18(b)(6), consistent with the long established interpretation of the OCC, that all in-kind distributions of collective investment fund assets must be made on a ratable basis. This action is necessary in light of a recent Federal district court decision that has called into question the clarity of this current requirement.

DATES: Written comments must be submitted on or before February 22, 1993.

ADDRESSES: Comments should be directed to: Communications Division, 9th Floor, 250 E Street SW., Washington, DC 20219; Attention: Karen Carter; Docket No. 92-26. Comments will be available for public inspection and photocopying at the same location.

FOR FURTHER INFORMATION CONTACT: Dean E. Miller, Senior Adviser, Fiduciary Activities, (202) 874-4810; Donald W. Lamson, Assistant Director, Securities, Investments, and Fiduciary Practices Division, (202) 874-5210; Office of the Comptroller of the Currency.

SUPPLEMENTARY INFORMATION: The OCC is proposing to amend 12 CFR 9.18,[1] which governs the administration of collective investment funds[2] by national banks.[3]

Background

Collective investment funds held by national banks as trustee or otherwise consist of assets of retirement, pension, profit-sharing, stock bonus or other trusts exempt from taxation under the IRC. A trustee acting pursuant to a declaration of trust invests collective investment fund assets for the benefit of participants in liquid and illiquid assets. Illiquid assets can include real estate and other assets that are not readily marketable. Participants in collective investment funds own a pro rata interest in each asset held by the fund, thus gaining the benefit of investment diversification. Twelve CFR 9.18(b)(3) provides that the interests of all participants "* * * shall be on the basis of a proportionate interest in all the assets."

Distributions from collective investment funds are governed in part by 12 CFR 9.18(b)(6). That section allows fund distributions to be made "* * * in cash or ratably in kind, or partly in cash and partly in kind." The OCC has interpreted this provision to require that all types of distributions must be made ratably, whether all in kind or partly in kind, to give effect to the requirement that participants' pro rata interests in the trust corpus shall reflect a proportionate interest in all the fund assets.

Current § 9.18(b)(6) was adopted in 1963. Previously, the regulation allowed distributions to be made "* * * in cash or ratably in kind, or partly in cash and partly ratably in kind." The word "ratably" in the second clause was redundant. In 1963 the OCC deleted this word. 28 FR 3309 (Apr. 5, 1963). The word "partly" in the second clause could be mistakenly read to modify the word "ratably." The second clause then could be misinterpreted to mean that some portion of an in-kind distribution must be made ratably and some portion of the in-kind distribution need not be made ratably. Although the OCC changed the language of § 9.18(b)(6) in this manner, its interpretation of the ratability requirement for total and partial in-kind distributions has remained constant throughout this period.

A recent decision of the United States District Court for the Northern District of Illinois has called into question the clarity of § 9.18(b)(6). In *First National Bank of Chicago* v. *Robert L. Clarke and the Office of the Comptroller of the Currency*, Civil Action No. 90-C-5963, the district court held that § 9.18(b)(6) did not require the in-kind portion of combined cash and in-kind distributions to be made on a ratable basis. As a result, participants in collective investment funds holding real estate or other illiquid assets could receive in-kind distributions of whole real estate parcels and other illiquid assets scattered throughout the country, rather than distributions of cash and other instruments reflecting their proportionate interests in the entire asset base of the fund.

This decision was overturned by the U.S. Court of Appeals for the Seventh Circuit. *First National Bank of Chicago* v. *Robert L. Clarke and the Office of the Comptroller of the Currency*, 956 F.2d 1360 (7th Cir. 1992) In turn, the U.S. Supreme Court has declined to review this case on appeal by denying certiorari. _____U.S. _____(October 5, 1992). Although the Comptroller's longstanding interpretation of this regulation was upheld, this litigation

[1] The OCC previously issued a separate notice of proposed rulemaking concerning the fiduciary activities of national banks and collective investment funds. Docket No. 90-3, 55 FR 4184 (February 7, 1990) (covering several provisions of 12 CFR 9.18). Although the comment period for Docket No. 90-3 has closed, the OCC has not yet taken action concerning that proposal. This rulemaking proposal is unrelated to and does not purport to affect Docket No. 90-3.

[2] The term "collective investment fund" is used throughout this preamble to denote both common trust funds for private trusts and collective trusts for pension, profit-sharing, and other tax-exempt accounts. The latter collective trusts, also referred to as "employee benefit funds", are established under the authority of 12 CFR 9.18(a)(2). Accounts eligible for commingling in employee benefit funds may, if held in trust, alternatively be commingled with private trusts in a common trust fund. See 12 CFR 9.18(b)(2).

[3] This proposal would also affect collective investment activities undertaken by federally-chartered savings and loan associations, under existing regulations of the Office of Thrift Supervision ("OTS"). Similarly, the proposal would affect state-chartered banks, since common trusts funds of state-chartered banks qualifying for tax-exempt status are required by section 584 of the International Revenue Code of 1986, as amended ("IRC"), to comport with 12 CFR 9.18.

has demonstrated that it is appropriate to clarify the provision to prevent further confusion.

Should the district court's decision be adopted in subsequent litigation, situations could arise where trustees could evade the ratability requirement of § 9.18(b)(6) by combining a minimal amount of cash with in-kind distributions of fund assets. The OCC believes that a distribution of unmarketable stock or real estate to a participant conflicts with the § 9.18(b)(3) requirement that participants share on a proportionate basis in the assets of a fund. Nonratable in-kind distributions made in reliance on the court's reading of § 9.18(b)(6) may create hardships on participants who are not prepared to manage or sell real estate or other distributed assets. Non-ratable in-kind distributions would defeat the goal of diversification that participation in a collective investment fund is intended to achieve.

Distributions to participants of illiquid or unmarketable assets, such as parcels of real estate, which by their very nature are unique, can lead to instances where participants' distributions could appreciate or depreciate at markedly different rates. In such cases, some participants who believe they are harmed by the type and manner of distributions might sue the trustee. Clarification of the requirement in § 9.18(b)(6) that all in-kind distributions must be made ratably would help insure that all fund participants share proportionately in fund assets.

Proposal

The OCC is proposing to revise § 9.18(b)(6) to clarify that all in-kind distributions of fund assets, including those that are combined with cash distributions, must be made on a ratable basis. This proposal is consistent with the OCC's long-held interpretation that distributions of fund assets limited solely to in-kind assets, rather than cash, be made on a ratable basis.[4]

The OCC is aware that the ratability requirement can result in a property being distributed to and held by multiple owners. The OCC also is aware that multiple ownership of real property or other illiquid assets can adversely affect a property's marketability. The OCC believes, however, that this effect is outweighed by the requirement that all participants must share proportionately in fund assets. Moreover, the potentially adverse effect of multiple ownership is one with which trustees have been confronted for nearly thirty years. Thus, this proposal does not increase the burden that trustees face when required to dispose of assets with limited marketability.

The OCC believes that this proposal is necessary to prevent a trustee from making an in-kind distribution rather than devoting the effort necessary to manage properly the properties and other illiquid assets with which it has been entrusted for the benefit of fund participants. As a matter of prudence, trustees traditionally have disposed of assets with limited marketability rather than make in-kind distributions. This proposal merely requires trustees to continue observing this practice.

Comment

In connection with this proposal, the OCC requests comments from any interested party.

Executive Order 12291

It has been determined that this document is not a major regulation as defined in E.O. 12291 and a regulatory impact analysis is not required. This proposal clarifies an OCC regulation and merely requires trustees to continue observing a long-established practice.

Regulatory Flexibility Act

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. No. 96–354–94 Stat. 1164, 5 U.S.C. 601–612), it is certified that the proposed amendments, if adopted, will not have a significant economic impact on a substantial number of small entities. The effect of this proposal is minimal. This proposal clarifies an OCC regulation and merely requires trustees, regardless of size, to continue observing a long-established practice.

Lists of Subjects in 12 CFR Part 9

Collective investment funds, Estates, Fiduciary powers, Investments, National banks, Reporting and recordkeeping requirements; Trusts and trustees.

Authority and Issuance

For the reasons set out in the preamble, part 9 of chapter I of title 12 of the Code of Federal Regulations is proposed to be amended as follows:

PART 9—FIDUCIARY POWERS OF NATIONAL BANKS AND COLLECTIVE INVESTMENT FUNDS

1. The authority citation for 12 CFR part 9 is revised to read as follows:

Authority: 12 U.S.C. 92a, 93a, and 481.

2. Section 9.18 is amended by revising paragraph (b)(6) to read as follows:

§ 9.18 Collective investment.

* * * * *

(b) * * *

(6) When participations are withdrawn from a collective investment fund, distributions may be made in cash or ratably in kind, or partly in cash and partly in kind on a ratable basis: *Provided,* That all distributions as of any one valuation date shall be made on the same basis.

* * * * *

Dated: November 4, 1992.

Stephen R. Steinbrink,

Acting Comptroller of the Currency.

[FR Doc. 92–30937 Filed 12–21–92; 8:45 am]

BILLING CODE 4810–33–M

[4] The OCC for nearly thirty years has interpreted the current language of § 9.18(b)(6) governing combined in-kind and cash distributions in this manner. For example the OCC stated in letter (unpublished) of April 1, 1986:

Units of participation in a collective investment fund are based upon a proportionate interest in all the assets of the Fund . . . If there is insufficient cash and liquid assets to satisfy all withdrawals, the available cash and/or assets should be distributed to withdrawing accounts based upon their proportionate interest in such cash and/or assets.

Therefore, any distributions made as of March 31 should be made on a pro rata basis in accordance with 12 CFR 9.18.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92–NM–44–AD]

Airworthiness Directives; Airbus Industrie Model A300–600 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Supplemental notice of proposed rulemaking; reopening of comment period.

SUMMARY: This document revises an earlier proposed airworthiness directive (AD), applicable to all Airbus Industrie Model A300–600 series airplanes, that would have required repetitive high frequency eddy current (HFEC) inspections to detect cracks in the center spar sealing angles adjacent to the pylon rear attachment, cold work, and replacement of any cracked parts. That proposal was prompted by reports of cracks in the vertical web of the center spar sealing angles of the wing. This action revises the proposed rule by reducing the compliance time for the initial HFEC inspection for certain airplanes; extending the grace period for the initial HFEC inspection for certain airplanes; and adding inspections of the adjacent butt strap and skin panel, and repair, if necessary. The actions specified by this proposed AD are

intended to prevent crack formation in the sealing angles; such cracks could rupture and lead to subsequent crack formation in the bottom skin of the wing, resulting in reduced structural integrity of the center spar section.

DATES: Comments must be received by February 2, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–44–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Greg Holt, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2140; fax (206) 227–1320.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92–NM–44–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–44–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

A proposal to amend part 39 of the Federal Aviation Regulations to add an airworthiness directive (AD), applicable to all Airbus Industrie Model A300–600 series airplanes, was published as a notice of proposed rulemaking (NPRM) in the **Federal Register** on May 1, 1992 (57 FR 18840). That NPRM would have required repetitive high frequency eddy current (HFEC) inspections to detect cracks in the center spar sealing angles adjacent to the pylon rear attachment, cold work, and replacement of any cracked parts. That NPRM was prompted by reports of cracks in the vertical web of the center spar sealing angles of the wing. That condition, if not corrected, could result in crack formation in the sealing angles; such cracks could rupture and lead to subsequent crack formation in the bottom skin of the wing, resulting in reduced structural integrity of the center spar section.

Since the issuance of that NPRM, two commenters request that the compliance time for the initial HFEC inspection be reduced from the proposed 14,000 landings to 12,000 landings, except for those airplanes that have already exceeded 12,000 landings, in order to comply with the provisions of Airbus Industrie Service Bulletin No. A300–57–6027, dated October 8, 1991. The FAA concurs with this request. The FAA has determined that the compliance time for the initial inspection of the center spar sealing angles adjacent to Rib 8 must be reduced in order to ensure that (1) fatigue cracks are found, (2) the pair of sealing angles on the affected wing are replaced, and (3) the attachment holes are cold worked, prior to any significant reduction in the structural integrity of the center spar section. Paragraph (a) of this Supplemental NPRM has been changed to reflect the revised compliance time.

The manufacturer has provided additional crack growth data which substantiate an increase in the grace period currently proposed from 500 landings to 2,000 landings for airplanes that have accumulated fewer than 14,000 total landings. The FAA has evaluated this data and has determined that the increase in certain grace periods, as recommended by the manufacturer, may be made without adversely affecting safety. Paragraph (a) of this Supplemental NPRM has been changed accordingly.

The Air Transport Association (ATA) of America, on behalf of one of its members, requests that the repetitive inspection intervals be extended from the proposed 6,000 landings to 15,000 landings for airplanes that have already been modified in accordance with Airbus Repair Drawing R571–40588, since the referenced Airbus Service Bulletin contains this provision. The FAA concurs partially. The manufacturer has provided additional crack growth data substantiating that, for those airplanes that have been modified in accordance with Airbus Repair Drawing R571–40588, the initial inspection should be performed within 15,000 landings after accomplishment of the modification. The FAA has evaluated this data and has determined that the increase in the initial inspection interval for airplanes already modified in accordance with the Airbus repair drawing, as recommended by the manufacturer, may be made without adversely affecting safety. Therefore, the FAA now considers that 15,000 landings for the recommended initial inspection interval, followed by repetitive inspections at intervals of 6,000 landings thereafter, is warranted for those airplanes that have already been modified in accordance with the referenced Airbus repair drawing. Accordingly, paragraph (b) has been added to this Supplemental NPRM.

Since issuance of the proposal, the FAA has determined that if any sealing angle is found to be cracked through entirely, additional inspections must be performed, prior to further flight, to detect cracks in the adjacent butt strap and skin panel. If any cracks are found in the adjacent butt strap and skin panel, they must be repaired, prior to further flight, in accordance with Airbus Repair Drawing R571–40589. Accordingly, paragraph (d) has been added to this Supplemental NPRM.

Also since issuance of the proposal, the FAA has determined that an unnecessary reporting requirement was included in paragraph (c) of the notice. The reporting requirement has been omitted from this Supplemental NPRM.

Since these changes expand the scope of the originally proposed rule, the FAA has determined that it is necessary to reopen the comment period to provide additional opportunity for public comment.

The FAA estimates that 30 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 12 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $19,800, or $660 per airplane. This total cost figure assumes that no operator has yet accomplished the proposed requirements of this AD action.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES.**"

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Airbus Industrie: Docket 92–NM–44–AD.

Applicability: All Model A300–600 series airplanes, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent reduced structural integrity of the center spar section of the wing, accomplish the following:

(a) Perform a high frequency eddy current (HFEC) inspection to detect cracks in the center spar sealing angles adjacent to Rib 8, in accordance with Airbus Industrie Service Bulletin No. A300–57–6027, dated October 8, 1991, at the times specified in paragraph (a)(1), (a)(2), or (a)(3) of this AD, as applicable:

(1) For airplanes that have accumulated less than 12,000 total landings as of the effective date of this AD: Prior to the accumulation of 12,000 total landings or within 2,000 landings after the effective date of this AD, whichever occurs later; and thereafter at intervals not to exceed 6,000 landings.

(2) For airplanes that have accumulated 12,000 total landings or more, but less than 14,000 total landings as of the effective date of this AD: Prior to the accumulation of 14,000 total landings or within 2,000 landings after the effective date of this AD, whichever occurs later; and thereafter at intervals not to exceed 6,000 landings.

(3) For airplanes that have accumulated 14,000 total landings or more as of the effective date of this AD: Prior to the accumulation of 500 landings after the effective date of this AD; and thereafter at intervals not to exceed 6,000 landings.

(b) For those airplanes on which the modification described in Airbus Repair Drawing R571–40588 has been accomplished: Prior to the accumulation of 15,000 landings after accomplishing the modification, or within 500 landings after the effective date of this AD, whichever occurs later; and thereafter at intervals not to exceed 6,000 landings, perform a HFEC inspection to detect cracks in the center spar sealing angles adjacent to Rib 8, in accordance with Airbus Industrie Service Bulletin No. A300–57–6027, dated October 8, 1991.

(c) If any crack is found in the center spar sealing angles, including cracking entirely through the sealing angle, as a result of the inspections required by paragraph (a), (b), or (d) of this AD, prior to further flight, replace the pair of sealing angles on the affected wing and cold work the attachment holes, in accordance with Airbus Industrie Service Bulletin No. A300–57–6027, dated October 8, 1991; and perform the repetitive inspections required by paragraph (b) of this AD.

(d) If any sealing angle is found to be cracked through entirely as a result of the inspections required by paragraph (a) or (b) of this AD, prior to further flight, perform additional inspections to detect cracks in the adjacent butt strap and skin panel, in accordance with paragraph 2.B.(5) of Airbus Industrie Service Bulletin No. A300–57–6027, dated October 8, 1991. If any crack is found in the adjacent butt strap and skin panel, prior to further flight, repair it in accordance with Airbus Repair Drawing R571–40589.

(e) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(f) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on December 16, 1992.

Bill R. Boxwell,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 92–NM–189–AD]

Airworthiness Directives; British Aerospace Model ATP Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain British Aerospace Model ATP series airplanes. This proposal would require a one-time visual inspection to ensure that the bolt and nut assemblies on the flanged-coupling assembly on the right flap gearbox drive have split pins installed, and if split pins are missing, repetitive check tightening of the bolts until split pins are installed. This proposal is prompted by reports that during production, split pins may have been omitted from the bolt and nut assemblies on the flanged-coupling assembly. The actions specified by the proposed AD are intended to prevent possible loss of integrity and security of the flap drive system.

DATES: Comments must be received by February 18, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport

Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–189–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from British Aerospace, PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041–0414. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. William Schroeder, Standardization Branch, ANM–113, Transport Airplane Directorate, FAA, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2148; fax (206) 227–1320.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92–NM–189–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–189–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom, recently notified the FAA that an unsafe condition may exist on certain British Aerospace Model ATP series airplanes. The CAA advises that during production of these airplanes, split pins may have been omitted from the bolts and self-locking nuts installed on the splined flanged-coupling assembly of the primary drive torque tube located at station 0 on the right flap gearbox drive. This condition, if not corrected, could result in possible loss of integrity and security of the flap drive system.

British Aerospace has issued Service Bulletin ATP–27–55, dated August 14, 1992, which describes procedures for a one-time visual inspection to ensure that each of the four bolt and nut assemblies on the flanged-coupling assembly have split pins installed, and if split pins are missing, repetitive check tightening of the bolts until split pins are installed. The CAA classified this service bulletin as mandatory.

This airplane model is manufactured in the United Kingdom and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the CAA has kept the FAA informed of the situation described above. The FAA has examined the findings of the CAA, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require a one-time visual inspection to ensure that the bolt and nut assemblies on the flanged-coupling assembly have split pins installed, and if split pins are missing, repetitive check tightening of the bolts until split pins are installed. The actions would be required to be accomplished in accordance with the service bulletin described previously.

The FAA estimates that 10 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 0.5 work hour per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. The FAA has confirmed that split pins have been installed in the bolt and nut assemblies on the flanged-coupling assembly on all 10 airplanes of U.S. registry. Based on these figures, there will be no cost impact of the proposed AD on U.S. operators.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

British Aerospace: Docket 92–NM–189–AD.
Applicability: Model ATP series airplanes; serial numbers 2001 through 2049, inclusive; certificated in any category.
Compliance: Required as indicated, unless accomplished previously.

To prevent possible loss of integrity and security of the flap drive system, accomplish the following:

(a) Within 14 days after the effective date of this AD, perform a one-time visual inspection of the primary flap drive torque tubes to ensure that the four bolt and nut assemblies on the splined flanged-coupling assembly on the right gearbox drive at station 0 have split pins installed, in accordance with British Aerospace Service Bulletin ATP–27–55, dated August 14, 1992.

(1) If split pins are installed, no further action is necessary.

(2) If any split pin is missing, accomplish the requirements of both paragraphs (a)(2)(i) and (a)(2)(ii) of this AD:

(i) Prior to further flight, check tighten each of the four bolts to 8 to 10 foot pounds torque. Repeat this check tightening thereafter at intervals not to exceed 14 days.

(ii) Within 6 months after the effective date of this AD, install split pins in the bolt and nut assemblies in accordance with British Aerospace Service Bulletin ATP–27–55, dated August 14, 1992. Installation of these split pins constitutes terminating action for the inspections and check tightening requirements of this paragraph.

(b) Installation of split pins in the bolt and nut assemblies in accordance with British Aerospace Service Bulletin ATP–27–55, dated August 14, 1992, constitutes terminating action for the requirements of paragraph (a) of this AD.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, ANM–113.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on December 16, 1992.

Bill R. Boxwell,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 92–NM–180–AD]

Airworthiness Directives; Fokker Model F28 Mark 0100 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Fokker Model F28 Mark 0100 series airplanes. This proposal would require inspection of the end-cap of the horizontal stabilizer dual actuator servo valve manifold to detect moisture, and removal of moisture, if necessary; and modification of the end-cap of the servo valve of the horizontal stabilizer hydraulic actuator. This proposal is prompted by reports of water ingression in the end-cap of the dual actuator servo valve manifold. The actions specified by the proposed AD are intended to prevent jamming of the servo and to ensure that the stabilizer can be repositioned after an uncommanded trim movement.

DATES: Comments must be received by February 18, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–180–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Fokker Aircraft USA, Inc., 1199 North Fairfax Street, Alexandria, Virginia 22314. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Mark Quam, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2145; fax (206) 227–1320.

The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92–NM–180–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–180–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The Rijksluchtvaartdienst (RLD), which is the airworthiness authority for the Netherlands, recently notified the FAA that an unsafe condition may exist on certain Fokker Model F28 Mark 0100 series airplanes. The RLD advises that a small number of Model F28 Mark 0100 series airplane operators have reported that the manual stabilizer trim jammed and "STAB 1" and "2 FAULT" messages were displayed on the Multi Function Display Unit (MFDU) and the overhead panel. Investigation showed that this may have been caused by water collecting inside the end-cap of the servo valve, which subsequently froze and restricted the servo valve. However, in these incidents, stabilizer control was still possible with the use of the alternate electrical trim control.

In another incident, a significant nose down pitch occurred with the crew exerting pressure on the control column, after the "STAB 1" and "2 FAULT" messages displayed on the MFDU and the overhead panel. The crew reset the stabilizer switch and engaged the autopilot, which subsequently became disengaged. The stabilizer remained jammed, despite the crew's attempt to use the manual trim and the alternate electrical trim. The crew then received subsequent "STAB 1" and "2 FAULT" messages. Using "jammed-stabilizer" procedures, the crew declared an emergency and made an uneventful landing. The cause of the failure that precipitated the nose down trim has not been established. A jammed servo, if not detected and corrected, could prohibit

repositioning of the stabilizer after an uncommanded trim movement.

Fokker has issued Service Bulletin F100–27–029, dated January 29, 1991, that describes procedures for inspection of the end-cap of the horizontal stabilizer dual actuator servo valve manifold to detect and remove moisture. Fokker has also issued Service Bulletin F100–27–032, dated September 20, 1991, that describes procedures for modification of the end-cap of the servo valve of the horizontal stabilizer hydraulic actuator. This modification, which prevents the buildup of water in the end-cap, has been accomplished, prior to delivery, on airplanes having serial number 11357 and subsequent. Fokker has issued Service Bulletin Change Notification SBF100–27–032/01, dated October 19, 1992, that corrects part numbers referenced in that service bulletin. The RLD classified the service bulletins as mandatory and issued Netherlands Airworthiness Directive BLA 91–015, Issue 2, in order to assure the continued airworthiness of these airplanes in the Netherlands.

This airplane model is manufactured in the Netherlands and is type certificated for operation in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the RLD has kept the FAA informed of the situation described above. The FAA has examined the findings of the RLD, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require inspection of the end-cap of the horizontal stabilizer dual actuator servo valve manifold to detect moisture, and removal of moisture, if necessary; and modification of the end-cap of the servo valve of the horizontal stabilizer hydraulic actuator. The actions would be required to be accomplished in accordance with the service bulletins described previously.

The FAA estimates that 41 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 38 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. Required parts would be provided to the operators at no cost. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $85,690, or $2,090 per airplane. The FAA has been advised that the proposed requirements of this AD action have already been accomplished on 8 affected airplanes.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES."

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Fokker: Docket 92–NM–180–AD.

Applicability: Model F28 Mark 0100 airplanes, serial numbers 11244 through 11356, inclusive; certificated in any category.

Compliance: Required as indicated, unless accomplished previously. To prevent jamming of the servo and to ensure that the stabilizer can be repositioned after an uncommanded trim movement, accomplish the following:

(a) Within 400 hours time-in-service after the effective date of this AD, unless accomplished previously within the last 1,600 hours time-in-service, inspect the end-cap of the horizontal stabilizer dual actuator servo valve manifold to detect moisture in accordance with Fokker Service Bulletin F100–27–029, dated January 29, 1991. Prior to further flight, remove any moisture found in accordance with the service bulletin.

(b) Within 2,000 hours time-in-service or one year after the effective date of this AD, whichever occurs first, modify the end-cap of the servo valve of the horizontal stabilizer hydraulic actuator in accordance with Fokker Service Bulletin F100–27–032, dated September 20, 1991, as revised by Fokker Service Bulletin Change Notification SBF100–27–032/01, dated October 19, 1992.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on December 16, 1992.

Bill R. Boxwell,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[Airspace Docket No. 92–AEA–03]

Proposed Change of Operating Hours for Control Zone; Hagerstown, MD

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Proposed rule; withdrawal.

SUMMARY: This action withdraws the Notice of Proposed Rulemaking (NPRM) published in the **Federal Register** on August 5, 1992. The NPRM proposed to change the operating hours of the Hagerstown, MD, Control Zone to be effective via a Notice to Airmen. The NPRM is being withdrawn as a result of another regulatory airspace action which duplicates the purpose intended in this proposal.

DATES: The withdrawal of the proposed rule is effective on December 22, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Curtis L. Brewington, Designated Airspace Specialist, System Management Branch, AEA–530, F.A.A. Eastern Region, Fitzgerald Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone: (718) 553–0857.

SUPPLEMENTARY INFORMATION:

The Proposed Rule

On August 5, 1992 (57 FR 34531), a Notice of Proposed Rulemaking was published in the **Federal Register** to change the effective operating hours of the Hagerstown, MD, Control Zone to those established by a Notice to Airmen. A separate rulemaking action under Airspace Reclassification, effective October 15, 1992, has already made this change. This proposal is therefore unnecessary.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zones, Incorporation by reference.

Withdrawal of Proposed Rule

Accordingly, pursuant to the authority delegated to me, Airspace Docket No. 92–AEA–03, as published in the **Federal Register** on August 5, 1992 (57 FR 34531), is hereby withdrawn.

Authority: 49 U.S.C. App. 1348(a), 1354(a), 1510; E.O. 10854; 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

Issues in Jamaica, New York, on December 8, 1992.

Gary W. Tucker,

Manager, Air Traffic Division.

RIN 1545–AH46

Debt Instruments With Original Issue Discount; Imputed Interest on Deferred Payment Sales or Exchanges of Property; Hearing

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document contains notice of a public hearing on proposed regulations relating to the tax treatment of debt instruments with original issue discount and the imputation of interest on deferred payments under certain contracts for the sale or exchange of property.

DATES: The public hearing will be held on Tuesday, February 16, 1993, beginning at 10 a.m. Requests to speak and outlines of oral comments must be received by Tuesday, January 26, 1993.

ADDRESSES: The public hearing will be held in the Commissioner's Conference Room, room 3313, Internal Revenue Service Building, 1111 Constitution Avenue NW., Washington, DC. Requests to speak and outlines of oral comments should be submitted to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC:CORP:T:R, (FI–189–84), room 5228, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Carol Savage of the Regulations Unit, Assistant Chief Counsel (Corporate), 202–622–8452 or (202) 622–7180 (not toll-free numbers).

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under sections 483, 1271 through 1275 of the Internal Revenue Code. The proposed regulations appear elsewhere in this issue of the **Federal Register**.

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit not later than Tuesday, January 26, 1993, an outline of the oral comments/testimony to be presented at the hearing and the time they wish to devote to each subject.

Each speaker (or group of speakers representing a single entity) will be limited to 10 minutes for an oral presentation exclusive of the time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be permitted beyond the lobby of the Internal Revenue Service Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the persons testifying. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue.

Cynthia E. Grigsby,

Alternate Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

Proposed Regulations Under Section 382 of the Internal Revenue Code of 1986; Limitations on Corporate Net Operating Loss; Correction

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction to notice of proposed rulemaking.

SUMMARY: This document contains corrections to proposed regulations (CO–99–91), which were published Thursday, November 5, 1992 (57 FR 52798). The proposed regulations modify existing rules that require segregation of public groups following stock issuances for purposes of determining whether an ownership change has occurred.

FOR FURTHER INFORMATION CONTACT: Roberta F. Mann, 202–622–7550 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The notice of proposed rulemaking that is the subject of these corrections relates to section 382 of the Internal Revenue Code.

Need for Correction

As published, the proposed rulemaking contain errors which may prove to be misleading and are in need of clarification.

Correction of Publication

Accordingly, the publication of the proposed regulations (CO–99–91), which was the subject of FR Doc. 92–26159, is corrected as follows:

§ 1.382–3 [Corrected]

Paragraph. 1. On page 52741, column 2, in § 1.382–3, paragraph (j)(1), line 4, the language "*Introduction.* This section exempts, in" is corrected to read "*Introduction.* This paragraph (j) exempts, in". In line 9, the language "used in this section, and not otherwise" is corrected to read "used in this paragraph (j), and not otherwise".

Par. 2. On page 52741, column 3, in § 1.382–3, paragraph (j)(2)(iii)(D), line 3,

the language "on a per share basis if, during the" is corrected to read "on a class-by-class basis if, during the".

Par. 3. On page 52742, column 2, in § 1.382–3, paragraph (j)(7), line 4, the language "section, the transitory ownership of" is corrected to read "paragraph (j), the transitory ownership of".

Par. 4. On page 52742, column 2, in § 1.382–3, paragraph (j)(8), line 2, the language "purposes of this section, two or more" is corrected to read "purposes of this paragraph (j), two or more".

Par. 5. On page 52742, column 2, in § 1.382–3, paragraph (j)(8)(ii), last line, the language "this section." is corrected to read "this paragraph (j).".

Par. 6. On page 52742, column 2, in § 1.382–3, paragraph (j)(9), line 2, the language "principles of this section apply for" is corrected to read "principles of this paragraph (j) apply for".

Par. 7. On page 52742, column 2, in § 1.382–3, paragraph (j)(10), line 3, the language "section apply to issuances of stock by a" is corrected to read "paragraph (j) apply to issuances of stock by a".

Par. 8. On page 52742, column 2, in § 1.382–3, paragraph (j)(11), last line, the language "as stock for purposes of this section" is corrected to read "as stock for purposes of this paragraph (j).".

Par. 9. On page 52743, column 1, in § 1.382–3, paragraph (j)(13)(i), line 2, the language "This section applies to issuances of" is corrected to read "This paragraph (j) applies to issuances of".

Par. 10. On page 52743, column 1, in § 1.382–3, paragraph (j)(13)(ii), line 1, the language "(ii) *Election to apply this section*" is corrected to read "(ii) *Election to apply this paragraph (j)*". In line 3, the language *"Election to apply this section"* is corrected to read *"Election to apply this paragraph (j)"*. In line 5, the language "elect to apply this section to all" is corrected to read "elect to apply this paragraph (j) to all".

Par. 11. On page 52743, column 1, in § 1.382–3, paragraph (j)(13)(ii)(B), last line, the language "years applying this section." is corrected to read "years applying this paragraph (j).".

Dale D. Goode,

Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

Debt Instruments With Original Issue Discount; Imputed Interest on Deferred Payment Sales or Exchanges of Property

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to the tax treatment of debt instruments with original issue discount and the imputation of interest on deferred payments under certain contracts for the sale or exchange of property. The proposed regulations in this document revise some of the proposed regulations that were published in the **Federal Register** on April 8, 1986. The proposed regulations would provide needed guidance to holders and issuers of debt instruments with original issue discount and to buyers and sellers of property.

DATES: A public hearing on these proposed regulations is scheduled for 10 a.m. on February 16, 1993, in room 3313 at 1111 Constitution Avenue NW., Washington, DC. Requests to appear at the public hearing and outlines of oral comments must be received by January 26, 1993. Written comments must be received by January 26, 1993. See notice of hearing published elsewhere in this issue of the **Federal Register**.

ADDRESSES: Send comments, requests to appear, and outlines of oral comments to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC:CORP:T:R (FI–189–84), room 5228, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Frederick S. Campbell-Mohn, (202) 622–3940 (not a toll-free number), William E. Blanchard, (202) 622–3950 (not a toll-free number), or Andrew C. Kittler, (202) 622–3940 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information requirements contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments on the collection of information should be sent to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer T:FP, Washington, DC 20224.

The required collections of information in this regulation are in §§ 1.1272–(d)(2)(iii), 1.1272–3, 1.1273–2(f)(2), 1.1274–3(d), 1.1274–5(b), 1.1274A–1(c), and 1.1275–3(b). This information is required by the Internal Revenue Service in connection with tracking the accrual of original issue discount. This information will be used for audit and examination purposes. The likely respondents are businesses or other for-profit institutions.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require more or less time, depending on their particular circumstances.

Estimated total reporting burden: 289,500 hours.

The estimated burden per respondent varies from .3 to .5 hours, depending on individual circumstances, with an estimated average of .4 hours.

Estimated number of respondents: 750,000.

Estimated annual frequency of responses: 1.

Background

On April 8, 1986, the **Federal Register** published a notice of proposed rulemaking (51 FR 12022) relating to original issue discount (OID) under section 163(e) and sections 1271 through 1275, unstated interest under section 483, and the accrual of interest under section 446. The notice also included proposed amendments to the regulations under related provisions of the Internal Revenue Code. The proposed regulations were subsequently amended on September 7, 1989 (54 FR 37125), February 28, 1991 (56 FR 8308), May 7, 1991 (56 FR 21112) and July 12, 1991 (56 FR 31887). The proposed regulations that were issued in 1986, as amended in 1989 and 1991, are hereinafter referred to as the 1986 proposed regulations.

Explanation of Provisions

Numerous written comments were made on the 1986 proposed regulations. In addition, on November 17, 1986, the Internal Revenue Service held a public hearing on the 1986 proposed regulations. In general, commentators criticized the complexity and length of the 1986 proposed regulations, as well as the narrow definitions of certain terms, including the definitions of accrual period, qualified periodic

interest payment, variable rate debt instrument, and de minimis OID.

In response to these comments, the proposed regulations simplify the rules that were in the 1986 proposed regulations and, as explained below, provide more flexible definitions of certain terms for purposes of these rules. The proposed regulations attempt to conform the rules to normal commercial practices and to exclude from their application debt instruments with limited potential to defer or accelerate interest.

The proposed regulations are significantly shorter in length than the 1986 proposed regulations. The shorter length is generally attributable to the simplification of the rules and the elimination of rules that are also in the statute. In addition, because the proposed regulations are proposed to be effective for debt instruments issued on or after the date that is 60 days after the date the regulations are finalized, the proposed regulations do not include the numerous transitional rules that were in the 1986 proposed regulations.

The proposed regulations do not amend the rules for contingent payments that are in § 1.1275–4 of the 1986 proposed regulations. These rules will be addressed in future regulations.

In general, the major changes from the 1986 proposed regulations are noted as follows:

Section 1.163–7 Deduction for OID on Certain Debt Instruments

The proposed regulations allow the issuer of a debt instrument with a de minimis amount of OID to deduct the OID using a straight line method rather than a constant yield method. In addition, if an issuer redeems a debt instrument for the issuer's newly issued debt instrument, the proposed regulations provide rules to determine the amount of the repurchase premium, if any, on the redemption and the timing of the issuer's deduction for the repurchase premium. To determine the amount of the repurchase premium, the issuer's repurchase price for the debt instrument is the issue price of the newly issued debt instrument (reduced by any unstated interested). However, if the issue price of the newly issued debt instrument is determined under either section 1273(b)(4) or section 1274, any repurchase premium on the redemption is amortized by the issuer over the term of the newly issued instrument in the same manner as if it were OID on the instrument.

Section 1.446–2 Method of Accounting for Interest

The proposed regulations clarify that unstated interest, as determined under section 483, is taken into account by the buyer and the seller based on their respective methods of accounting for stated interest.

Request for comments: In general, the proposed regulations require the use of the constant yield method to determine interest accruals. However, the proposed regulations generally respect the allocation of payments under a lending or sales contract if (1) the aggregate amount of payments due under the contract does not exceed $250,000, (2) the contract does not have unstated interest, and (3) the debt instrument evidencing the contract is not issued at a discount. This small transaction exception was also in the 1986 proposed regulations. The exception, however, has a limited scope, and taxpayers must still determine whether interest is prepaid under their allocation. Comments are requested as to whether the final regulations should keep this exception. Comments are also requested as to whether the final regulations should allow the use of the Rule of 78's (or any other method) to allocate interest on consumer loans that are not within the small transaction exception, including loans issued for cash.

Section 1.483–1 through 1.483–3 Unstated Interest

For purposes of the lower test rate under section 483(e) for certain sales or exchanges of land between related individuals, the proposed regulations allow the use of the lower rate for a single debt instrument to the extent the stated principal amount of the instrument does not exceed $500,000. For example, if the stated principal amount of the debt instrument is $700,000, the proposed regulations treat the instrument as two instruments: A $500,000 debt instrument, which is eligible for the lower test rate, and a $200,000 debt instrument. The 1986 proposed regulations only allowed the lower rate if a separate debt instrument was issued for the principal amount in excess of $500,000.

Sections 1.1001–1(g) and 1.1012–1(g) Amount Realized and Basis

The proposed regulations provide that the issue price of a debt instrument issued in a sale or exchange of property determines the seller's amount realized and the buyer's basis in the property. However, the proposed regulations provide that if the issue price of the debt instrument equals the instrument's stated redemption price at maturity under section 1273(b)(4), the issue price is reduced by any unstated interest for purposes of sections 1001 and 1012.

Section 1.1271–1 Special Rules Applicable to Amounts Received on Retirement, Sale or Exchange of Debt Instruments

Under section 1271, if there is an intention to call a debt instrument prior to maturity, the gain on the sale, exchange, or retirement of the debt instrument is treated as ordinary income to the extent of any unaccrued OID. The proposed regulations add rules to determine when there is an intention to call the debt instrument prior to maturity. An intention to call exists only if there is an agreement not provided for in the debt instrument that the issuer will redeem the instrument prior to maturity. For example, a mandatory sinking fund provision or call option is not evidence of an intention to call under section 1271. The proposed regulations also provide that the intention to call rules do not apply to publicly offered debt instruments or to debt instruments subject to section 1272(a)(6).

Section 1.1272–1 Current Inclusion in Income of OID

The proposed regulations provide that the amount of OID that accrues during an accrual period is determined using the constant yield method. For purposes of this determination, the 1986 proposed regulations required that all accrual periods on a debt instrument (other than a short initial or final accrual period) be of equal length. The proposed regulations, however, allow the use of accrual periods of different lengths of not more than one year. In determining the amount of OID accruals, the yield of the debt instrument must be adjusted to take into account the length of the particular accrual period if accrual periods of different lengths are used.

The proposed regulations also provide new rules to determine the yield and maturity of a debt instrument with a stated contingency that could result in the acceleration or deferral of payments if the amounts payable upon the occurrence of the contingency are fixed. In general, the contingency is ignored. However, if, based on all the facts and circumstances, the contingency is more likely than not to occur, it is assumed that the contingency will occur. In addition, special rules that were in the 1986 proposed regulations for a debt instrument with a put option, call option, or option to extend are retained,

and extended to a debt instrument with an option to pay interest in the form of additional debt instruments of the issuer.

If a debt instrument is partially prepaid, the proposed regulations provide that the payment is subject to the payment ordering rule under § 1.1275–2. In general, the payment reduces the adjusted issue price of the debt instrument. For purposes of OID accruals after the prepayment, the yield of the debt instrument is not adjusted for the prepayment. However, any shortfall created as a result of the prepayment is treated as OID and allocated to the final accrual period. See § 1.1272–1(c)(2).

Section 1.1272–2 Treatment of Debt Instruments Purchased at a Premium

The proposed regulations define the term purchase as any acquisition of a debt instrument. In addition, the proposed regulations provide new rules to determine the adjusted basis of a debt instrument for purposes of determining whether a holder has acquired a debt instrument at a premium or at an acquisition premium.

Section 1.1272–3 Election by Accrual Method Holder To Treat All Interest on a Debt Instrument as OID

Under the proposed regulations, a holder that uses an accrual method of accounting may elect to treat all interest on a debt instrument as OID. For purposes of the election, interest includes stated interest, OID, market discount, de minimis OID and market discount, acquisition discount, and unstated interest, as adjusted for any acquisition premium or amortizable bond premium. In effect, the election simplifies the calculation of interest income for the holder by applying a single method (constant yield method) to determine the timing and amount of interest income on the debt instrument (e.g., a holder that acquires a debt instrument with acquisition premium need not calculate and use the acquisition premium fraction).

Request for comments: The proposed regulations impose certain conditions on the use of the election. In general, the conditions are similar to those in the market discount and amortizable bond premium rules. For example, if the election is made for a debt instrument with amortizable bond premium or with market discount, the holder becomes subject to the conformity requirements of section 171 or section 1278(b), whichever is applicable. Comments are requested as to whether the final regulations should retain the conformity requirements and other conditions.

Section 1.1273–1 Definition of OID

OID is defined as the excess of a debt instrument's stated redemption price at maturity over the instrument's issue price. Under the 1986 proposed regulations, a debt instrument's stated redemption price at maturity was defined as the sum of all payments due under the instrument other than qualified periodic interest payments. In general, qualified periodic interest payments were defined as a series of payments equal to the product of the outstanding principal balance of the debt instrument and a single fixed rate of interest that is actually and unconditionally payable at fixed periodic intervals of one year or less during the entire term of the debt instrument (including short periods).

The proposed regulations, by providing a more flexible approach to the treatment of stated interest, generally exclude from their application debt instruments with limited potential to defer or accelerate interest. Under the proposed regulations, "qualified stated interest" is the term used to refer to stated interest that is not includible in the debt instrument's stated redemption price at maturity. Qualified stated interest for a fixed-rate debt instrument is stated interest that is unconditionally payable in cash or in property (other than debt instruments of the issuer) at least annually at a single fixed rate. Interest is payable at a single fixed rate only if the rate appropriately takes into account the length of the interval between payments.

The proposed regulations provide that no stated interest on a short-term obligation is qualified stated interest. Therefore, all stated interest payments on a short-term obligation are included in its stated redemption price at maturity. In response to comments made on the 1986 proposed regulations, which had the same rule, the rule applies for purposes of sections 871 and 881.

The proposed regulations provide an additional rule to determine when a debt instrument with an interest holiday or a teaser rate has a de minimis amount of OID. Under this rule, the amount of OID resulting from an interest holiday or a teaser rate is generally the amount of interest foregone during the holiday or teaser period. The instrument is then tested under the general de minimis rules to determine whether the debt instrument has a de minimis OID. For example, under this rule, a 30-year self-amortizing mortgage loan with a fixed interest rate of 8.5 percent, compounded monthly, but a 2-year teaser rate of 6 percent, compounded monthly, would have only a de minimis amount of OID.

The proposed regulations also add rules for the treatment of de minimis OID by the holder. A holder includes de minimis OID in income on a pro rata basis as principal payments are made on the debt instrument. In addition, any gain attributable to de minimis OID that is recognized upon the sale or exchange of a debt instrument is capital gain if the instrument is a capital asset in the hands of the holder. A similar rule was provided in § 1.1232–3(b)(1)(ii).

Section 1.1273–2 Determination of Issue Price

The proposed regulations provide new rules to determine when a debt instrument is publicly traded or is issued for property that is publicly traded for purposes of determining the issue price of the debt instrument. In general, a debt instrument or property (stock, security, contract, commodity, or currency) is publicly traded if, at any time during a 60-day period ending 30 days after the issue date of the debt instrument, the debt instrument or property is traded on an established market. A debt instrument or property is traded on an established market if (1) it is listed on certain securities exchanges, interdealer quotation systems, or designated foreign exchanges or boards of trade, (2) it is traded on a designated contract market or an interbank market, (3) it appears on a system of general circulation that provides a reasonable basis to determine fair market value by disseminating either recent price quotations of identified brokers and dealers or actual prices of recent sales transactions, or (4) price quotations with respect to the debt instrument are readily available from dealers and brokers. Price quotations are deemed not readily available if (1) no other outstanding debt of the issuer is traded on an established market, (2) the original stated principal amount of the issue is less than $25 million, (3) all other issues of the issuer's debt that are traded on an established market impose materially more restrictive covenants or conditions on the issuer, or (4) the maturity date of the debt instrument is more than 3 years after the latest maturity date of all other issues of the issuer that are traded on an established market.

The proposed regulations allocate the issue price of an investment unit between the components of the unit based on their relative fair market values. The 1986 proposed regulations provided allocation rules that generally restated common law valuation principles. Unlike the 1986 proposed

regulations, the proposed regulations do not provide specific allocation rules. Under the proposed regulations, however, the holder of an investment unit must use the issuer's allocation unless the holder discloses on its Federal income tax return that it plans to use an allocation that is inconsistent with the issuer's allocation.

The 1986 proposed regulations provided that no portion of the issue price of a debt instrument is allocated to a right to convert the instrument into stock of the issuer. However, after the amendments proposed on February 28, 1991, if the conversion right could be satisfied in cash, the 1986 proposed regulations allocated a portion of the issue price of the debt instrument to the conversion right. The proposed regulations modify these rules by providing that no portion of the issue price of a debt instrument is allocated to a right to convert the instrument into stock of the issuer or a party related to the issuer, even if the conversion right may be satisfied in cash.

The proposed regulations change the lender's treatment of a payment of points made incident to a lending transaction. Under the proposed regulations, a payment of points (including a payment of points that is deductible by the borrower under section 461(g)(2)) reduces the issue price of the debt instrument, thereby creating OID on the instrument. If the amount of OID created under this rule is de minimis, the proposed regulations treat the OID in the same manner as any other amount of de minimis OID. By contrast, the 1986 proposed regulations required that the lender include the payment in income when received, regardless of the lender's method of accounting. See § 1.446–2(e) of the 1986 proposed regulations.

Sections 1.1274–1 Through 1.1274–5 Determination of Issue Price in the Case of Certain Debt Instruments Issued for Property

The proposed regulations restructure and simplify the rules that were in sections 1.1274–1 through 1.1274–7 of the 1986 proposed regulations.

The proposed regulations modify the 1986 proposed regulations by providing that the issue price of a debt instrument issued for nonpublicly traded property in a potentially abusive situation is the fair market value of the property. In addition, the proposed regulations treat a debt instrument with clearly excessive interest as issued in a potentially abusive situation. The proposed regulations also provide that, for purposes of the potentially abusive rules, the term nonrecourse financing does not include a sale or exchange of a real property interest financed by a nonrecourse debt instrument, if, in addition to the instrument, the purchaser provides a down payment that is at least 20 percent of the total stated purchase price of the interest.

The proposed regulations provide new rules to determine the imputed principal amount of a debt instrument if the instrument provides for contingent payments. Under the proposed regulations, the imputed principal amount generally is the sum of the present values of the noncontingent payments and the fair market value of the contingent payments. If the fair market value of the contingent payments cannot be determined when separated from the noncontingent payments, the imputed principal amount is the fair market value of the debt instrument. Only in rare and extraordinary cases will the fair market value of the debt instrument be treated as not reasonably ascertainable.

The proposed regulations provide new rules to determine the test rate of interest for an installment obligation. Unlike the 1986 proposed regulations, which had three alternative rules, the proposed regulations use a single rule that uses the weighted average maturity of the debt instrument to determine the test rate.

The proposed regulations no longer contain the transitional rule in the 1986 proposed regulations that provided that section 1274 applied to a modified debt instrument only if the original debt instrument was subject to section 1274.

The proposed regulations limit the use of a test rate that is lower than the applicable Federal rate to debt instruments having a maturity of six months or less (or to debt instruments with a qualified floating rate of interest that is reset at least every six months). For debt instruments having a maturity of less than three months, the proposed regulations modify the 1986 proposed regulations and provide that the allowable Treasury index rate is the market yield on U.S. Treasury bills with the same maturity as the debt instrument.

The proposed regulations provide new rules for debt instruments that are materially modified in connection with an assumption of a debt instrument as part of a sale or exchange of property. In general, the modification is treated as a separate transaction that takes place immediately before the sale or exchange and is attributed to the seller. The seller and buyer, however, may jointly elect to treat the transaction as one in which the buyer first assumed the unmodified debt instrument and subsequently modified the debt instrument.

Request for comments: The proposed regulations provide rules to determine the issue price of a debt instrument subject to an option that allows a holder or issuer the unconditional right to accelerate or defer payments (including a put option, call option, or option to extend the maturity of an instrument). These rules are similar to rules contained in the 1986 proposed regulations. Comments are requested regarding the appropriateness of these rules and regarding whether these rules should be extended to options subject to contingencies that affect the right to exercise or the amounts payable in the event of exercise.

The proposed regulations do not provide any limitations on "recent sales transactions" that are subject to the potentially abusive situation rules. Comments are requested on the limitations, if any, that should be included in the final regulations.

Section 1.1274A–1 Special Rules for Certain Transactions Where Stated Principal Amount Does Not Exceed $2,800,000

The proposed regulations revise the rules for making a cash method election. The proposed regulations also allow a cash method election for a debt instrument that was issued in a debt-for-debt exchange, subject to an anti-abuse rule, if the instrument otherwise qualifies as a cash method debt instrument. The 1986 proposed regulations only allowed the election if the "old" debt instrument was a cash method debt instrument. In addition, the proposed regulations disallow interest deductions for a debt instrument that is incurred or continued to purchase or carry a cash method debt instrument.

Section 1.1275–1 Definitions

The term "debt instrument" is defined as any instrument or contractual arrangement that constitutes indebtedness under general principles of Federal income tax law. Based on this definition, the proposed regulations treat a payment of stock pursuant to a contingent stock payout under section 483, rather than under the OID provisions. See Example 3 in § 1.446–2(h).

Section 1.1275–2 Special Rules Relating to Debt Instruments

The proposed regulations revise the aggregation rules that were in the 1986 proposed regulations. In general, only debt instruments that are issued by a single issuer to a single holder are

aggregated. The Commissioner, however, may aggregate debt instruments that are issued by more than one issuer or that are issued to more than one holder if the debt instruments are issued in an arrangement that is designed to avoid the aggregation rule. In addition, if under the terms of a debt instrument the holder may receive one or more additional debt instruments of the issuer, the additional debt instruments are aggregated with the original debt instrument.

The proposed regulations also provide a specific payment ordering rule for purposes of the OID provisions. In addition, the proposed regulations add rules for qualified reopenings of Treasury securities.

Section 1.1275–3 OID Information Reporting Requirements

The 1986 proposed regulations generally required an issuer of a debt instrument with OID to legend the instrument with certain information. The proposed regulations provide that debt instruments do not have to be legended if the instruments are publicly offered or are issued by individuals. In addition, the proposed regulations except a debt instrument from legending if the instrument is not evidenced by a physical document. In the case of a debt instrument that has to be legended, the proposed regulations provide new rules that should simplify compliance with the legending requirement. As an alternative to detailed legending of OID information, the proposed regulations permit the issuer to provide the address or telephone number of a representative of the issuer who will promptly give the OID information to the holder upon request.

Section 1.1275–5 Variable Rate Debt Instruments

The proposed regulations substantially expand the definition of the term "variable rate debt instrument." In general, a variable rate debt instrument is a debt instrument that provides for stated interest (compounded or paid at least annually) at a qualified floating rate, an objective rate, a fixed rate followed by a qualified floating rate, or a qualified floating rate followed by another qualified floating rate. A qualified floating rate generally is an interest-like rate, such as the applicable Federal rate or LIBOR. An objective rate generally is a rate based on the price of property that is actively traded (other than foreign currency) or an index of the prices of such property. An objective rate is also a rate that is based on one or more qualified floating rates (unless the rate itself is a qualified floating rate). For example, a multiple of a qualified floating rate is an objective rate.

For purposes of determining whether a variable rate debt instrument has OID, the proposed regulations generally treat all stated interest on the instrument that is unconditionally payable at least annually as qualified stated interest. If, however, the debt instrument provides for stated interest at a fixed rate followed by a qualified floating rate or a qualified floating rate followed by a different qualified floating rate, the instrument may have accelerated or deferred interest, which is not qualified stated interest. For example, if a ten-year debt instrument provides for annual interest payments for the first five years equal to the value of one-year LIBOR on each payment date and for the last five years equal to the value of one-year LIBOR on each payment date plus 200 basis points, the 200 basis points in the last five years is deferred interest.

The proposed regulations also provide rules for the accrual of OID on variable rate debt instruments. In general, if the OID is attributable to accelerated or deferred interest or to "true discount" (the excess of a debt instrument's stated principal amount over its issue price), the OID is allocated to an accrual period under the rules of section 1272. The allocation, however, is determined by assuming that the debt instrument provided for qualified stated interest payments at the end of each accrual period based on a reasonable fixed rate.

The proposed regulations provide a special rule for certain tax-exempt debt instruments that provide for stated interest at an objective rate. If the issuer of a tax-exempt debt instrument, contemporaneously with the issuance, enters into one or more financial contracts that substantially offset the variations in the objective rate, the debt instrument is not a variable rate debt instrument. The Treasury Department and the Internal Revenue Service are considering the appropriate treatment of tax-exempt debt instruments with embedded options, forwards, and swaps.

Request for comments: The 1986 proposed regulations did not provide clear guidance on the treatment of a debt instrument that provided for one or more variable interest rates or a combination of a fixed and a variable interest rate. The proposed regulations provide guidance for the treatment of these debt instruments. In general, the proposed regulations attempt to provide rules that reflect the economics of these debt instruments and limit the acceleration or deferral of interest. Comments are requested on the appropriateness of these rules, including the rules for accelerated and deferred interest.

As noted above, the proposed regulations provide a special rule for certain tax-exempt debt instruments with stated interest at an objective rate. Comments are requested on the appropriateness of this rule.

Comments are requested on whether there should be a consistency rule for debt instruments with accelerated interest or deferred interest.

Effective Dates

The proposed regulations are proposed to be effective for debt instruments issued on or after the date that is 60 days after the date the regulations are finalized. The proposed regulations are also proposed to be effective for lending transactions, sales and exchanges that occur on or after the date that is 60 days after the date the regulations are finalized. The rules for qualified reopenings of Treasury securities, however, will be effective for reopenings on or after March 25, 1992.

The Internal Revenue Service intends to treat the 1986 proposed regulations that are withdrawn in this document as authority under section 6662 for debt instruments issued prior to their withdrawal and for lending transactions, sales and exchanges that occurred prior to their withdrawal.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these proposed regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Comments and Public Hearing

Before these proposed regulations are adopted, consideration will be given to any written comments that are timely submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying in their entirety.

A public hearing on these proposed regulations will be held on February 16,

1993, at 10 a.m. See the notice of public hearing published elsewhere in this issue of the **Federal Register**.

Drafting Information

The principal authors of these regulations are Frederick S. Campbell-Mohn, William E. Blanchard, and Andrew C. Kittler of the Office of Assistant Chief Counsel (Financial Institutions and Products), Internal Revenue Service. However, other personnel from the Service and Treasury Department participated in their development.

Income taxes.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority citation for part 1 is amended by adding the following citations:

Authority: 26 U.S.C. 7805 * * * Sections 1.483–1 through 1.483–3 also issued under 26 U.S.C. 483(g). Sections 1.1271–1 through 1.1275–5 also issued under 26 U.S.C. 1275(d). Section 1.1274A–1 also issued under 26 U.S.C. 1274A(e).

Par. 2. Section 1.163–7, as proposed on April 8, 1986 (51 FR 12030), is revised to read as follows:

§ 1.163–7 Deduction for OID on certain debt instruments.

(a) *General rule.* Except as otherwise provided in paragraph (b) of this section, the amount of OID that an issuer (or transferee) deducts each year under section 163(e)(1) is determined in accordance with section 1272 without regard to section 1272(a)(7) (relating to acquisition premium). An issuer (or transferee) is permitted a deduction under section 163(e)(1) only to the extent the issuer (or transferee) is primarily liable on the debt instrument. For certain limitations on the deductibility of OID by the issuer (or transferee), see sections 163(e)(2)(C), 163(e)(3), 163(e)(4), 163(e)(5), and 1275(b)(2).

(b) *Special rules for de minimis OID*—(1) *In general.* Except as provided in paragraph (b)(2) of this section, a debt instrument has OID for purposes of section 163(e) even if the amount of OID is de minimis within the meaning of section 1273(a)(3) and the regulations thereunder.

(2) *Stated interest.* If a debt instrument has a de minimis amount of OID (within the meaning of § 1.1273–1(d)), all stated interest on the debt instrument is treated as qualified stated interest. See § 1.446–2(b) for the treatment of qualified stated interest.

(3) *Deduction of de minimis OID on straight-line basis.* The issuer of a debt instrument with a de minimis amount of OID (other than a de minimis amount treated as qualified stated interest under paragraph (b)(2) of this section) may choose to deduct the OID on a straight-line basis over the term of the debt instrument. The issuer must make this choice on the issuer's timely filed Federal income tax return for the taxable year in which the debt instrument is issued.

(c) *Deduction upon repurchase.* Except to the extent disallowed by any other section of the Internal Revenue Code (*e.g.*, section 249), or this paragraph (c), if a debt instrument is repurchased by the issuer for a price in excess of its adjusted issue price (as defined in § 1.1275–1(b)), the excess (repurchase premium) is deductible as interest for the taxable year. If the issuer repurchases a debt instrument in a debt-for-debt exchange, the repurchase price is the issue price of the newly issued debt instrument (reduced by any unstated interest within the meaning of section 483). However, if the issue price of the newly issued debt instrument is determined under either section 1273(b)(4) or section 1274, any repurchase premium is not deductible in the year of the repurchase, but is amortized over the term of the newly issued debt instrument in the same manner as if it were OID.

Par. 3. Section 1.446–2, as proposed on April 8, 1986 (51 FR 12031), is revised to read as follows:

§ 1.446–2 Method of accounting for interest.

(a) *Applicability*—(1) *In general.* This section provides rules for determining the amount of interest that accrues during an accrual period (other than interest described in paragraph (a)(2) of this section). For purposes of this section, "interest" includes amounts treated as interest (whether stated or unstated) in any lending or deferred payment transaction. Accrued interest determined under this section is taken into account by a taxpayer under the taxpayer's regular method of accounting (e.g., an accrual method or the cash receipts and disbursements method). Application of an exception described in paragraph (a)(2) of this section to one party to a lending or deferred payment transaction does not affect the application of this section to any other party to the transaction.

(2) *Exceptions*—(i) *Interest included or deducted under certain other provisions.* This section does not apply to interest that is taken into account under—

(A) Sections 1272(a), 1275, and 163(e) (income and deductions relating to original issue discount);

(B) Section 467(a)(2) (certain payments for the use of property or services);

(C) Sections 1276 through 1278 (market discount);

(D) Sections 1281 through 1283 (discount on certain short-term obligations);

(E) Section 7872(a) (certain loans with below-market interest rates); or

(F) Section 1.1272–3 (an election by a holder that uses the accrual method of accounting to treat all interest on a debt instrument as original issue discount).

(ii) *De minimis original issue discount.* This section does not apply to de minimis amounts of original issue discount as determined under section 1273(a)(3) and the regulations thereunder. See §§ 1.1273–1(d)(6) and 1.1272–3 for the treatment of de minimis original issue discount by the holder.

(b) *Accrual of qualified stated interest.* Qualified stated interest (as defined in § 1.1273–1(c)) accrues ratably over the accrual period to which it is attributable and accrues at the stated rate for that period.

(c) *Accrual of interest other than qualified stated interest.* Subject to the modifications in paragraph (d) of this section, the amount of interest that accrues for any accrual period is determined under rules similar to those in §§ 1.1272–1, 1.1275–4, and 1.1275–5. The preceding sentence applies regardless of any contrary formula agreed to by the parties.

(d) *Modifications*—(1) *Issue price.* The issue price of the loan or contract is equal to—

(i) In the case of a deferred payment contract to which section 483 applies,

the amount described in § 1.483–2(a)(1)(i) or (ii), whichever is applicable; or

(ii) In any other case, the amount loaned.

(2) *Adjusted issue price.* The adjusted issue price of the loan or contract is modified in the case of a contract to which section 483 applies by excluding from the calculation any principal payment that is not a deferred payment.

(3) *Qualified stated interest.* No interest payments are treated as qualified stated interest payments.

(e) *Allocation of interest to payments*—(1) *In general.* Except as provided in paragraphs (e)(2) and (e)(3) of this section, each payment under a loan (other than payments of additional interest or similar charges provided with respect to amounts that are not paid when due) is treated as a payment of interest to the extent of the accrued and unpaid interest as of the date the payment becomes due. Any remaining amount is treated as a payment of principal.

(2) *Special rule for points deductible under section 461(g)(2).* If a payment of points is deductible by the borrower under section 461(g)(2), the payment is treated by the borrower as a payment of interest.

(3) *Allocation respected in certain small transactions*—(i) *In general.* If the aggregate amount of interest and principal payable under a contract does not exceed $250,000 and section 483 does not apply to the loan, an express allocation of the payments between interest and principal by the parties is respected. Similarly, if section 483 applies to a contract under which the aggregate amount payable does not exceed $250,000, but does not apply to a party to the contract (as, for example, in the case of an obligor under a debt instrument given in consideration for the sale or exchange of personal use property), an express allocation of the payments between interest and principal by the parties is respected for purposes of determining the tax liability of the party not subject to section 483.

(ii) *Prepaid interest.* The amount of interest allocated to any payment under this paragraph (e)(3) is treated as prepaid interest to the extent the amount exceeds—

(A) The aggregate amount of accrued interest as of the date the payment becomes due; reduced (but not below zero) by

(B) The aggregate amount of interest allocated to prior payments under this paragraph (e)(3).

(iii) *Accounting for prepaid interest.* Prepaid interest must be included in income by a lender when received, regardless of the lender's method of accounting. Except as otherwise provided in section 461(g)(2), prepaid interest is not deductible before such interest accrues (as determined under paragraph (c) of this section).

(f) *Aggregation rule.* For purposes of this section, all sales or exchanges that are part of the same transaction (or a series of related transactions) are treated as a single sale or exchange and all contracts calling for deferred payments arising from the same transaction (or a series of related transactions) are treated as a single contract.

(g) *Debt instruments denominated in a currency other than the U.S. dollar.* The rules of this section apply to debt instruments that provide for payments denominated in, or determined by reference to, the functional currency of the taxpayer or qualified business unit of the taxpayer (even if that currency is other than the U.S. dollar). *See* § 1.988–2(b) to determine interest income or expense for debt instruments that provide for payments denominated in, or determined by reference to, a nonfunctional currency.

(h) *Examples.* The principles of this section are illustrated by the following examples.

Example 1. Allocation of unstated interest to deferred payments—(i) *Facts.* On July 1, 1996, A sells his personal residence to B for a stated purchase price of $1,297,143.66. The property is not personal use property (within the meaning of section 1275(b)(3)) in the hands of B. Under the loan agreement, B is required to make two installment payments of $648,571.83, the first due on June 30, 1998, and the second due on June 30, 2000. Both A and B use the cash receipts and disbursements method of accounting and use a calendar year for their taxable year.

(ii) *Amount of unstated interest.* Under section 483, the agreement does not provide for adequate stated interest. Thus, the loan's yield is the test rate of interest determined under § 1.483–3. Assume that both A and B use annual accrual periods and that the test rate of interest is 9.2 percent, compounded annually. Under § 1.483–2, the present value of the deferred payments is $1,000,000. Thus, the agreement has unstated interest of $297,143.66.

(iii) *First two accrual periods.* Under paragraph (d)(1) of this section, the issue price at the beginning of the first accrual period is $1,000,000 (the amount described in § 1.483–2(a)(1)(i)). Under paragraph (c) of this section, the amount of interest that accrues for the first accrual period is $92,000 ($1,000,000×.092) and the amount of interest that accrues for the second accrual period is $100,464 ($1,092,000×.092). Thus, $192,464.00 of interest has accrued as of the end of the second accrual period. Under paragraph (e)(1) of this section, the $648,571.83 payment made on June 30, 1998, is treated first as a payment of interest to the extent of $192,464.00. The remainder of the payment ($456,107.83) is treated as a payment of principal. Both A and B take the payment of interest ($192,464.00) into account in 1998.

(iv) *Second two accrual periods.* The adjusted issue price at the beginning of the third accrual period is $543,892.17 ($1,092,000+$100,464–$649,571.83). The amount of interest that accrues for the third accrual period is $50,038.08 ($543,892.17×.092) and the amount of interest that accrues for the final accrual period is $54,641.58, the excess of the amount payable at maturity ($648,571.83), over the adjusted issue price at the beginning of the accrual period ($593,930.25). As of the date the second payment becomes due, $104,679.66 of interest has accrued. Thus, of the $648,571.83 payment made on June 30, 2000, $104,679.66 is treated as interest and $543,892.17 is treated as principal. Both A and B take the payment of interest ($104,679.66) into account in 2000.

Example 2. Small transaction allocation—(i) *Facts.* On July 1, 1996, A sells nonpublicly traded property to B for a stated purchase price of $100,000. The property is not personal use property (within the meaning of section 1275(b)(3)) in the hands of B. Under the loan agreement, B is required to make two installment payments of $64,857.18, each consisting of $50,000 of principal and $14,857.18 of interest. The first payment is due on June 30, 1998, and the second payment is due on June 30, 2000. Both A and B use the cash receipts and disbursements method of accounting and use a calendar year for their taxable year. Assume that the test rate of interest is 9.2 percent, compounded annually.

(ii) *Loan has adequate stated interest.* Under § 1.483–2, the loan has adequate stated interest. Because the loan provides for adequate stated interest and the total amount payable is less than $250,000, the allocation of principal and interest by A and B is respected even though A and B have allocated less interest to the first installment payment than the amount that has accrued as of the date the payment becomes due ($19,246.40).

Example 3. Contingent stock payout—(i) *Facts.* M Corporation and N Corporation each owns one-half of the stock of O Corporation. On December 31, 1994, pursuant to a reorganization qualifying under section 368(a)(1)(B), M contracts to acquire the one-half interest held by N for an initial distribution on that date of 30,000 shares of M voting stock, and a non-assignable right to receive up to 10,000 additional shares of M's voting stock during the next 3 years, provided the net profits of O exceed certain amounts specified in the contract. No interest is provided for in the contract. No additional shares are received in 1995 or in 1996, but in 1997 the annual earnings of O exceed the specified amount and on December 31, 1997, an additional 3,000 M voting shares are transferred to N. Assume that the fair market value of the 3,000 shares on December 31, 1997, is $300,000.

(ii) *Allocation of unstated interest.* The transfer of the 3,000 M voting shares to N is a deferred payment subject to section 483. Because the contract does not provide for any interest on the payment, a portion of the

shares is treated as unstated interest. The amount of the unstated interest allocable to the shares is an amount equal to the excess of $300,000 (the fair market value of the shares on the payment date) over the present value of $300,000, which is determined by discounting the payment at the test rate of interest applicable to the contract from the date of the payment to the date of the exchange. Assume that, under § 1.483–3, the test rate of interest is 10 percent, compounded annually. The amount of unstated interest allocable to the payment of the shares is $74,605.56 ($300,000–$225,394.44).

Par. 4. Sections 1.483–1 through 1.483–5, as proposed on April 8, 1986 (51 FR 12038), are revised to read as follows:

§ 1.483–1 Interest on certain deferred payments.

(a) *Amount constituting interest in certain deferred payment transactions*—(1) *In general.* Except as provided in paragraph (c) of this section, section 483 applies to a contract for the sale or exchange of property if the contract provides for payments due more than one year after the date of the sale or exchange, and the contract does not provide for adequate stated interest. In general, a contract has adequate stated interest if the contract provides for a stated rate of interest that is at least equal to the test rate (determined under § 1.483–3) and the interest is paid or compounded at least annually. Section 483 may apply to a contract whether the contract is express (written or oral) or implied. For purposes of section 483, "sale or exchange" includes any transaction treated as a sale or exchange for tax purposes. In addition, for purposes of section 483, "property" includes debt instruments and investment units, but does not include U.S. currency, services, or the right to use property. For the treatment of certain payments for the use of property or services, see sections 404 and 467.

(2) *Treatment of contracts to which section 483 applies*—(i) *Treatment of unstated interest.* If section 483 applies to a contract, unstated interest under the contract is treated as interest for tax purposes. Thus, for example, unstated interest is not treated as part of the amount realized from the sale or exchange of property (in the case of the seller), and is not included in the purchaser's basis in the property acquired in the sale or exchange.

(ii) *Method of accounting for interest on contracts subject to section 483.* Any stated or unstated interest on a contract subject to section 483 is taken into account by a taxpayer under the taxpayer's regular method of accounting (e.g., an accrual method or the cash receipts and disbursements method). See §§ 1.446–1, 1.451–1, and 1.461–1. For purposes of the preceding sentence, the amount of interest (including unstated interest) allocable to a payment under a contract to which section 483 applies is determined under § 1.446–2(e).

(iii) *Certain transactions between related parties.* For rules relating to the determination of the basis of property in certain transactions between related parties, see § 1.1012–2.

(b) *Definitions*—(1) *Deferred payments.* For purposes of the regulations under section 483, a deferred payment means any payment that constitutes all or a part of the sales price (as defined in paragraph (b)(2) of this section), and that is due more than six months after the date of the sale or exchange. A payment may be made in the form of cash, stock or securities, or other property (except as provided in section 483(c)(2)).

(2) *Sales price.* For purposes of section 483, the sales price with respect to any sale or exchange is the amount due under the contract (other than stated interest), and the amount of any liability included in the amount realized from the sale or exchange (see § 1.1001–2). Thus, the sales price with respect to any sale or exchange includes any amount of unstated interest under the contract.

(c) *Exceptions to and limitations on the application of section 483*—(1) *In general.* Sections 483(d), 1274(c)(4), and 1275(b) contain exceptions to and limitations on the application of section 483.

(2) *Sales price of $3,000 or less.* Section 483(d)(2) applies only if it can be determined at the time of the sale or exchange that the sales price cannot exceed $3,000, regardless of whether the sales price eventually paid for the property is less than $3,000.

(3) *Other exceptions and limitations*—(i) *Certain transfers subject to section 1041.* Section 483 does not apply to any transfer of property subject to section 1041 (relating to transfers of property between spouses or incident to divorce).

(ii) *Treatment of certain obligees.* Section 483 does not apply to an obligee under a contract that—

(A) Is given in consideration for the sale or exchange of property that is personal use property (within the meaning of section 1275(b)(3)) in the hands of the obligor; and

(B) Evidences a below-market gift loan (described in section 7872(c)(1)(A)), a below-market compensation-related loan (described in section 7872(c)(1)(B)), or a below-market corporation-shareholder loan (described in section 7872(c)(1)(C)).

(iii) *Transactions involving certain demand loans.* Section 483 does not apply to any payment under a contract that evidences a demand loan that is either a gift loan (described in section 7872(c)(1)(A)), a compensation-related loan (described in section 7872(c)(1)(B)), or a corporation-shareholder loan (described in section 7872(c)(1)(C)).

(iv) *Transactions involving certain annuity contracts.* Section 483 does not apply to any payment under an annuity contract described in section 1275(a)(1)(B) (relating to annuity contracts excluded from the definition of debt instrument).

(v) *Options subject to section 1234.* Section 483 does not apply to any payment under an option to buy or sell property.

(d) *Assumptions.* If a debt instrument is assumed, or property is taken subject to a debt instrument, in connection with a sale or exchange of property, the debt instrument is treated for purposes of section 483 in a manner consistent with the rules of § 1.1274–5.

(e) *Aggregation rule.* For purposes of section 483, all sales or exchanges that are part of the same transaction (or a series of related transactions) are treated as a single sale or exchange, and all contracts calling for deferred payments arising from the same transaction (or a series of related transactions) are treated as a single contract. This rule, however, generally only applies to contracts and to sales or exchanges involving a single buyer and a single seller.

§ 1.483–2 Unstated interest.

(a) *In general*—(1) *Adequate stated interest.* A contract subject to section 483 has unstated interest if the contract does not provide for adequate stated interest. A contract does not provide for adequate stated interest if the sum of the deferred payments exceeds—

(i) The sum of the present values of the deferred payments and the present values of any stated interest payments due under the contract; or

(ii) In the case of a cash method debt instrument (within the meaning of section 1274A(c)(2)) received in exchange for property in a potentially abusive situation (as defined in § 1.1274–3), the fair market value of the property reduced by the fair market value of any consideration other than the debt instrument, and reduced by the sum of all principal payments that are not deferred payments.

(2) *Amount of unstated interest.* For purposes of section 483, the term "unstated interest" means an amount equal to the excess of the sum of the

deferred payments over the amount described in paragraph (a)(1)(i) or (a)(1)(ii) of this section, whichever is applicable.

(b) *Operational rules*—(1) *In general.* For purposes of paragraph (a) of this section, rules similar to those in paragraphs (c), (d), and (e) of § 1.1274–2 apply to determine whether a contract has adequate stated interest and the amount of unstated interest, if any, on the contract.

(2) *Present value.* For purposes of paragraph (a) of this section, the present value of any deferred payment or interest payment is determined by discounting the payment from the time it becomes due to the date of the sale or exchange at the test rate of interest applicable to the contract in accordance with § 1.483–3.

(c) *Examples.* The provisions of this section are illustrated by the following examples.

Example 1. Contract that does not have adequate stated interest. On January 1, 1994, A sells B nonpublicly traded property under a contract that calls for a $100,000 payment of principal on January 1, 2004 and 10 interest payments of $9,000 on January 1 of each year, beginning on January 1, 1995. Assume that the test rate of interest is 9.20 percent, compounded annually. The contract does not provide for adequate stated interest because it does not provide for interest equal to 9.20 percent, compounded annually. The present value of the deferred payments is $98,727.69. As a result, the contract has unstated interest of $1,272.31.

Example 2. Contract that does not have adequate stated interest; no interest for initial short period. On May 1, 1996, A sells B nonpublicly traded property under a contract that calls for B to make a principal payment of $200,000 on December 31, 1998, and semiannual interest payments of $9,000, payable on June 30 and December 31 of each year, beginning on December 31, 1996. Assume that the test rate of interest is 9 percent, compounded semiannually. Even though the contract calls for a stated rate of interest no lower than the test rate of interests, the contract does not provide for adequate stated interest because the stated rate of interest does not apply for the short period from May 1, 1986, through June 30, 1986.

Example 3. Potentially abusive situation—(i) *Facts.* Assume that in a potentially abusive situation, a contract for the sale of nonpublicly traded personal property calls for the issuance of a cash method debt instrument (as defined in section 1274A(c)(2)) with a stated principal amount of $700,000, payable in five years. No other consideration is given. The debt instrument calls for annual payments of interest over its entire term at a rate of 9.20 percent, compounded annually (the test rate of interest applicable to the debt instrument). Thus, the present value of the deferred payment and the interest payments is $700,000. Assume that the fair market value of the property is $500,000.

(ii) *Amount of unstated interest.* A cash method debt instrument received in exchange for property in a potentially abusive situation provides for adequate stated interest only if the sum of the deferred payments under the instrument does not exceed the fair market value of the property. Because the deferred payment ($700,000) exceeds the fair market value of the property ($500,000), the debt instrument does not provide for adequate stated interest. The debt instrument has unstated interested of $200,000.

Example 4. Variable rate debt instrument with adequate stated interest; variable rate as of the issue date greater than test rate—(i) *Facts.* A contract for the sale of nonpublicly traded property calls for the issuance of a debt instrument in the principal amount of $75,000 due in ten years. The debt instrument calls for interest payable semiannually at a rate of 3 percentage points above the yield on 6-month Treasury bills for the mid-point of the semiannual period immediately preceding the interest payment. Assume that the interest rate is a qualified floating rate and that the debt instrument is a variable rate debt instrument within the meaning of § 1.1275–5.

(ii) *Adequate stated interest.* Under paragraph (b)(1) of this section, the rules of § 1.1274–2(d) apply to determine whether the debt instrument has adequate stated interest. Assume that the test rate of interest applicable to the debt instrument is 9 percent, compounded semiannually, and that the yield on 6-month Treasury bills on the date of the binding written contract for the sale is 8.89 percent. Under § 1.1274–2(d), the debt instrument is tested for adequate stated interest as if it provided for a stated rate of interest of 11.89 percent (3 percent plus 8.89 percent), compounded semiannually, payable over its entire term. Because the test rate of interest is 9 percent, compounded semiannually, and the debt instrument is treated as providing for stated interest of 11.89 percent, compounded semiannually, the debt instrument provides for adequate stated interest.

§ 1.483–3 Test rate of interest applicable to a contract.

(a) *General rule.* Except as provided in paragraph (b) of this section, the test rate of interest for purposes of section 483 is the applicable Federal rate (based on the appropriate compounding period).

(b) *Special rates of interest applicable to certain sales or exchanges*—(1) *Qualified debt instruments.* In the case of a qualified debt instrument (as defined in section 1274A(b)), the test rate is not greater than 9 percent, compounded semiannually, or an equivalent rate based on an appropriate compounding period.

(2) *Sale-leaseback transactions.* In the case of a sale or exchange of property, all or a portion of which, pursuant to a plan, is leased by the transferor of the property or a person related to the transferor (within the meaning of sections 267(b) or 707(b)(1)) after the sale or exchange, the test rate is 110 percent of the applicable Federal rate.

(3) *Lower rate for certain sales or exchanges of land between related individuals*—(i) *Test rate.* In the case of a qualified sale or exchange of land between related individuals (described in section 483(e)), the test rate is not greater than 6 percent, compounded semiannually, or an equivalent rate based on an appropriate compounding period.

(ii) *Special rules.* The following rules and definitions apply in determining whether a sale or exchange is a qualified sale under section 483(e):

(A) *Definition of family members.* The members of an individual's family are determined as of the date of the sale or exchange. The members of an individual's family include those individuals described in section 267(c)(4) and the spouses of those individuals. In addition, for purposes of section 267(c)(4), full effect is given to a legal adoption, "ancestor" means parents and grandparents, and "lineal descendants" means children and grandchildren.

(B) *$500,000 limitation.* Section 483(e) does not apply to the extent that the stated principal amount of the debt instrument given in the sale or exchange, when added to the aggregate stated principal amount of any other debt instruments to which section 483(e) applies that were issued in prior qualified sales between the same two individuals during the same calendar year, exceeds $500,000. See *Example 3* of paragraph (b)(3)(iii) of this section.

(C) *Other limitations.* Section 483(e) does not apply if the parties to a contract include persons other than the related individuals and the parties enter into the contract with an intent to circumvent the purposes of section 483(e). In addition, if the property sold or exchanged includes any property other than land, section 483(e) applies only to the extent that the stated principal amount of the debt instrument given in the sale or exchange is attributable to the land (based on the relative fair market values of the property and the land).

(iii) *Examples.* The provisions of this paragraph (b)(3) are illustrated by the following examples.

Example 1. On January 1, 1994, A sells land to B, A's child, for $650,000. The contract for sale calls for B to make a $250,000 downpayment and issue a debt instrument with a stated principal amount of $400,000. The sale is a qualified sale and section 483(e) applies to the debt instrument.

Example 2. The facts are the same as in *Example 1*, except that on June 1, 1994, A

sells additional land to B under a contract that calls for B to issue a debt instrument with a stated principal amount of $100,000. The stated principal amount of this debt instrument ($100,000) when added to the stated principal amount of the prior debt instrument ($400,000) does not exceed $500,000. Thus, section 483(e) applies to both debt instruments.

Example 3. The facts are the same as in *Example 1*, except that on June 1, 1994, A sells additional land to B under a contract that calls for B to issue a debt instrument with a stated principal amount of $150,000. The stated principal amount of this debt instrument when added to the stated principal amount of the prior debt instrument exceed $500,000. Thus, for purposes of section 483(e), the debt instrument issued in the sale of June 1, 1994, is treated as two separate debt instruments: a $100,000 debt instrument (to which section 483(e) applies) and a $50,000 debt instrument (to which section 1274, if otherwise applicable, applies).

(c) *Determination of applicable Federal rate.* For purposes of determining the test rate of interest, the applicable Federal rate with respect to a contract is the rate that would apply under § 1.1274–4 if the contract were a debt instrument subject to section 1274.

Par. 5. Section 1.1001–1, paragraph (g), as proposed on April 8, 1986 (51 FR 12046), is revised to read as follows:

§ 1.1001–1 Computation of gain or loss.

* * * * *

(g) *Debt instruments issued in exchange for property.* In the case of any debt instrument issued in exchange for property, the amount realized attributable to the debt instrument is the issue price of the debt instrument as determined under paragraphs (c) or (e) of § 1.1273–2, or § 1.1274–2(b). For purposes of the preceding sentence, if the issue price of a debt instrument is determined under § 1.1273–2(e), the issue price is reduced by the portion of any payments treated as unstated interest (as determined under section 483).

Par. 6. In § 1.1012–1, paragraph (f) is amended by removing the last sentence, and paragraph (g) is added to read as follows:

§ 1.1012–1 Basis of property.

* * * * *

(g) *Debt instruments issued in exchange for property.* In the case of any debt instrument that is issued in exchange for property, the amount of the basis of the property attributable to the debt instrument is the issue price of the debt instrument as determined under paragraphs (c) or (e) of § 1.1273–2, or § 1.1274–2(b). For purposes of the preceding sentence, if the issue price of a debt instrument is determined under § 1.1273–2(e), the issue price is reduced by the portion of any payments treated as unstated interest (as determined under section 483).

Par. 7. Sections 1.1271–1 through 1.1275–3, as proposed on April 8, 1986 (51 FR 12048) and further proposed to be amended on September 7, 1989 (54 FR 37125), May 7, 1991 (56 FR 21112) and July 12, 1991 (56 FR 31887), are amended as follows:

1. Sections 1.1271–1 through 1.1275–3 are revised.
2. Section 1.1272–3 is added.
3. The added and revised provisions read as follows:

§ 1.1271–1 Special rules applicable to amounts received on retirement, sale or exchange of debt instruments.

(a) *Intention to call before maturity*—(1) *In general.* For purposes of section 1271(a)(2), all or a portion of gain realized on a sale or exchange of a debt instrument to which section 1271 applies is treated as ordinary income if there was an intention to call the debt instrument before maturity. "Intention to call a debt instrument before maturity" means a written or oral agreement or understanding not provided for in the debt instrument between the issuer and the original holder of the debt instrument that the issuer will redeem the debt instrument before maturity. In the case of debt instruments that are part of an issue, the agreement or understanding must be between the issuer and the original holders of a substantial amount of the debt instruments in the issue. An intention to call before maturity can exist even if the intention is conditional (*e.g.*, the issuer's decision to call depends on the financial condition of the issuer on the potential call date) or is not legally binding. For purposes of this section, "original holder" means the first holder (other than an underwriter or dealer that purchased the debt instrument for resale in the ordinary course of its trade or business).

(2) *Exceptions.* In addition to the exceptions provided in sections 1271(a)(2)(B) and 1271(b), section 1271(a)(2) does not apply to—

(i) A debt instrument that is publicly offered (as defined in § 1.1273–2(a)(2)); or

(ii) A debt instrument to which section 1272(a)(6) applies (relating to certain interests in or mortgages held by a REMIC, and certain other debt instruments with payments subject to acceleration).

(b) *Short-term obligations*—(1) *In general.* Under sections 1271(a)(3) and (a)(4), all or a portion of the gain realized on the sale or exchange of a short-term government or nongovernment obligation is treated as ordinary interest income. Sections 1271(a)(3) and (a)(4), however, do not apply to any short-term obligation subject to section 1281.

(2) *Method of making elections.* Elections to accrue on a constant yield basis under sections 1271(a)(3)(E) and (a)(4)(D) are made on an obligation by obligation basis by reporting the transaction on the basis of daily compounding on the taxpayer's timely filed Federal income tax return for the year of the sale or exchange. These elections are irrevocable.

(3) *Counting conventions.* In computing the ratable share of acquisition discount under section 1271(a)(3) or OID under section 1271(a)(4), any reasonable counting convention may be used (*e.g.*, 30 days per month/360 days per year).

§ 1.1272–1 Current inclusion in income of OID.

(a) *Overview*—(1) *In general.* Under section 1272(a)(1), a holder of a debt instrument includes accrued OID in gross income (as interest), regardless of the holder's regular method of accounting. A holder includes qualified stated interest (as defined in § 1.1273–1(c)) in income under the holder's regular method of accounting. See §§ 1.446–2 and 1.451–1.

(2) *Debt instruments not subject to OID inclusion rules.* Sections 1272(a)(2) and 1272(c) list exceptions to the general inclusion rule of section 1272(a)(1). For purposes of section 1272(a)(2)(E) (relating to certain loans between natural persons), "loan" does not include a stripped bond or stripped coupon within the meaning of section 1286(e), and the rule in section 1272(a)(2)(E)(iii), which treats a husband and wife as one person, does not apply to loans made between a husband and wife.

(b) *Accrual of OID*—(1) *Constant yield method.* Except as provided in paragraph (b)(2) of this section, the amount of OID includible in the income of a holder of a debt instrument for any taxable year is determined using the constant yield method as described under this paragraph (b)(1).

(i) *Step one: Determine the debt instrument's yield to maturity.* The "yield to maturity" or "yield" of a debt instrument is the discount rate that, when used in computing the present value of all principal and interest payments to be made under the debt instrument, produces an amount equal to the issue price of the debt instrument. The yield must be constant over the term of the debt instrument and, when

expressed as a percentage, must be calculated to at least two decimal places. *See* paragraph (d) of this section for rules relating to the yield of certain debt instruments subject to contingencies.

(ii) *Step two: Determine the accrual periods.* An accrual period is an interval of time with respect to which the accrual of OID is measured. Accrual periods may be of any length and may vary in length over the term of the debt instrument, provided that each accrual period is no longer than one year and each scheduled payment of principal or interest occurs at the end of an accrual period. In general, the computation of OID is simplest if accrual periods correspond to the intervals between payment dates provided by the terms of the debt instrument. In computing the length of accrual periods, any reasonable counting convention may be used (*e.g.*, 30 days per month/360 days per year).

(iii) *Step three: Determine the OID allocable to each accrual period.* Except as provided in paragraph (c) of this section, the OID allocable to an accrual period equals the product of the adjusted issue price of the debt instrument (as defined in § 1.1275–1(b)] at the beginning of the accrual period and the yield of the debt instrument, less the amount of any qualified stated interest allocable to the accrual period. In performing this calculation, the yield must be stated appropriately taking into account the length of the particular accrual period. *Example 1* in paragraph (j) of this section provides a formula for converting a yield based upon an accrual period of one length to an equivalent yield based upon an accrual period of a different length.

(iv) *Step four: Determine the daily portions of OID.* The daily portion of OID is determined by allocating to each day in an accrual period the ratable portion of the OID allocable to the accrual period. The holder of the debt instrument includes in income the daily portions of OID for each day during the taxable year on which the holder held the debt instrument.

(2) *Exceptions and modifications*—(i) The rules of paragraph (b)(1) of this section do not apply to—

(A) A debt instrument to which section 1272(a)(6) applies (certain interests in or mortgages held by a REMIC, and certain other debt instruments with payments subject to acceleration);

(B) A debt instrument to which § 1.1275–4 applies (debt instruments with contingent payments), except as provided in § 1.1275–4; or

(C) A variable rate debt instrument to which § 1.1275–5 applies, except as provided in § 1.1275–5.

(ii) The amount of OID includible in income by a holder is adjusted for any acquisition premium or is eliminated in the case of a debt instrument purchased at a premium. See sections 1272(a)(7) and 1272(c) and § 1.1272–2.

(c) *Special rules for determining the OID allocable to an accrual period*—(1) *Unpaid qualified stated interest allocable to an accrual period.* In determining the OID allocable to an accrual period under paragraph (b)(1)(iii) of this section, if an interval between payments of qualified stated interest contains more than one accrual period—

(i) The amount of qualified stated interest payable at the end of the interval is allocated on a pro rata basis to each accrual period in the interval; and

(ii) The adjusted issue price must be increased by the amount of any qualified stated interest that has accrued prior to the beginning of the accrual period but is not payable until a later date. *See Example 2* of paragraph (j) of this section for an example illustrating the rules in this paragraph (c)(1).

(2) *Special rule for final accrual periods.* The OID allocable to the final accrual period is the difference between the amount payable at maturity (other than a payment of qualified stated interest) and the adjusted issue price at the beginning of the final accrual period.

(3) *Special rule for certain instruments with an initial short accrual period.* If all accrual periods are of equal length, except for an initial shorter accrual period, the amount of OID allocable to the initial accrual period may be computed using any reasonable method. See *Example 3* in paragraph (j) of this section.

(4) *Cross-reference. See* § 1.1272–3 for an election by an accrual method holder to treat all interest income (including any market discount, acquisition discount, or qualified stated interest) on a debt instrument as OID.

(d) *Yield and maturity of certain debt instruments subject to contingencies*—(1) *In general.* The yield and maturity of a debt instrument are determined by assuming that payments will be made according to the instrument's stated payment schedule, even if the debt instrument provides for a contingency that could result in the acceleration or deferral of one or more payments.

However, the rule in the preceding sentence only applies if, as of the issue date, the amounts payable upon the occurrence of the contingency are fixed. See § 1.1275–4 for the treatment of a debt instrument with payments contingent as to amount.

(2) *Contingencies that are likely to occur*—(i) *Contingency taken into account.* Notwithstanding the rule in paragraph (d)(1) of this section, if, based on all the facts and circumstances as of the issue date, it is more likely than not that the contingency will occur, then the yield and maturity of the debt instrument are computed by assuming that the contingency will occur.

(ii) *Mandatory sinking fund provision.* Paragraph (d)(2)(i) of this section does not apply to a mandatory sinking fund provision if the terms of the provision meet reasonable commercial standards.

(iii) *Consistency rule.* The determination by the issuer that a contingency will or will not occur under paragraph (d)(2)(i) of this section is binding on all holders of the debt instrument. However, the issuer's determination is not binding on a holder that explicitly discloses that its determination of the yield and maturity of the instrument is different from the issuer's determination. The disclosure must be made on the form prescribed by the Commissioner and attached to the holder's timely filed Federal income tax return for the tax year that includes the acquisition date of the debt instrument.

(3) *Treatment of options.* Notwithstanding paragraphs (d)(1) and (d)(2) of this section, this paragraph (d)(3) provides rules for determining the yield and maturity of a debt instrument that provides the holder or issuer with unconditional options to accelerate or defer payments on one or more dates during the term of the debt instrument if, as of the issue date, the amounts payable upon the exercise of the options are fixed. For purposes of calculating yield and maturity, an issuer is treated as exercising any such option if its exercise would lower the yield of the debt instrument. A holder is treated as exercising any such option if its exercise would increase the yield of the debt instrument. See *Example 5* through *Example 7* in paragraph (j) of this section.

(4) *Subsequent adjustments.* If a contingency described in this paragraph (d) (including the exercise of an option described in paragraph (d)(3) of this section) actually occurs or does not occur, contrary to the assumption made pursuant to this paragraph (d) (a "change in circumstances"), the debt instrument is treated as follows—

(i) If the change in circumstances defers a payment (*e.g.*, failure to exercise a put or call option treated as exercised, or exercise of an option to extend treated as not exercised), then,

solely for purposes of sections 1272 and 1273, the debt instrument is treated as reissued on the date of exercise or non-exercise for an amount equal to its adjusted issue price on that date. See *Example 5* in paragraph (j) of this section.

(ii) If the change in circumstances accelerates a payment (*e.g.*, failure to exercise an option to extend or to issue additional debt instruments in lieu of cash interest payments treated as exercised, or exercise of a put or call option treated as not exercised), the debt instrument is treated as if the issuer made a prepayment in the amount of the accelerated payment. See section 1271 and the regulations thereunder if the debt instrument is retired or § 1.1275–2(a) in all other cases. See *Example 6* and *Example 7* in paragraph (j) of this section.

(5) *Certain debt instruments with indefinite maturities.* The yield of a debt instrument payable on demand or with an indefinite maturity is its stated interest rate if its issue price is equal to its stated principal amount and interest is paid or compounded at a fixed rate over the entire term of the debt instrument at intervals of one year or less.

(e) *Convertible debt instruments.* For purposes of section 1272, an option to convert a debt instrument into the stock of the issuer or a related party (as defined in section 267(b) or section 707(b)(1)) is ignored, even if the privilege may be satisfied or exercised for the cash value of the stock.

(f) *Special rules for determining whether a debt instrument is a short-term obligation.* For purposes of sections 871(g), 1271(a)(3), 1271(a)(4), 1272(a)(2)(C), and 1283(a)(1), the term of a debt instrument is the longest length of time possible that the instrument could be outstanding under the terms of the debt instrument. In addition, the term of the instrument includes either the issue date or the maturity date, but not both dates.

(g) *Basis adjustment.* The basis of a debt instrument in the hands of the holder is increased by the amount of OID included in the holder's gross income and decreased by the amount of any payment from the issuer to the holder under the debt instrument other than a payment of qualified stated interest.

(h) *Debt instruments denominated in a currency other than the U.S. dollar.* The rules of section 1272 and this section apply to debt instruments that provide for payments denominated in, or determined by reference to, the functional currency of the taxpayer or qualified business unit of the taxpayer (even if that currency is other than the U.S. dollar). See § 1.988–2(b) to determine interest income or expense for debt instruments that provide for payments denominated in, or determined by reference to, a nonfunctional currency.

(i) [*Reserved*]

(j) *Examples.* The rules of this section are illustrated by the following examples. Each example assumes that all taxpayers use the calendar year as the taxable year. In addition, each example assumes a 30-day month, 360-day year, and that the first accrual period begins on the issue date and the final accrual period ends on the day before the stated maturity date. Although, for purposes of simplicity, the yield as stated is rounded to two decimal places, the computations do not reflect any such rounding convention.

Example 1. Accrual of OID on zero coupon debt instrument; choice of accrual periods—(i) *Facts.* On July 1, 1994, A purchases at original issue, for $675,564.17, a debt instrument that matures on July 1, 1999, and provides for a single payment of $1,000,000 at maturity.

(ii) *Determination of yield.* Under paragraph (b)(1)(i) of this section, the yield of the debt instrument is eight percent, compounded semiannually.

(iii) *Determination of accrual period.* Under paragraph (b)(1)(ii) of this section, accrual periods may be of any length, provided that each accrual period is no longer than one year and each payment of principal or interest occurs at the end of an accrual period. The yield to maturity to be used in computing OID accruals in any accrual period, however, must reflect the length of the accrual period chosen. A yield based on compounding b times per year is equivalent to a yield based on compounding c times per year as indicated by the following formula:

$$r=c\{(1+i/b)^{b/c}-1\}$$

In which:

i=The yield based on compounding b times per year expressed as a decimal

r=The equivalent yield based on compounding c times per year expressed as a decimal

b=The number of compounding periods in a year on which i is based (for example, 12, if i is based on monthly compounding)

c=The number of compounding periods in a year on which r is based

(iv) *Determination of OID allocable to each accrual period.* Assume that A decides to compute OID on the debt instrument using semiannual accrual periods. Under paragraph (b)(1)(iii) of this section, the OID allocable to the first accrual period is $27,022.56: the product of the issue price ($675,564.17) and the yield properly adjusted for the length of the accrual period (eight percent/2), less qualified stated interest allocable to the accrual period ($0). The daily portion of OID for the first semiannual accrual period is $150.13 ($27,022.56/180).

(v) *Determination of OID if monthly accrual periods are used.* Alternatively, assume that A decides to compute OID on the debt instrument using monthly accrual periods. Using the above formula, the yield on the debt instrument reflecting monthly compounding is 7.87 percent, compounded monthly ($12\{(1+.08/2)^{2/12}-1\}$). Under paragraph (b)(1)(iii) of this section, the OID allocable to the first accrual period is $4,430.48: the product of the issue price ($675,564.17) and the yield properly adjusted for the length of the accrual period (7.87 percent/12), less qualified stated interest allocable to the accrual period ($0). The daily portion of OID for the first monthly accrual period is $147.68 ($4,430.48/30).

Example 2. Accrual of OID on debt instrument with qualified stated interest—(i) *Facts.* On September 1, 1994, A purchases at original issue, for $90,000, B corporation's debt instrument that matures on September 1, 2004, and has a stated principal amount of $100,000, payable on that date. The debt instrument provides for semiannual payments of interest of $3,000, payable on September 1 and March 1 of each year, beginning on March 1, 1995.

(ii) *Determination of yield.* The debt instrument is a ten-year debt instrument with an issue price of $90,000 and a stated redemption price at maturity of $100,000. The semiannual payments of $3,000 are qualified stated interest payments. Under paragraph (b)(1)(i) of this section, the yield is 7.44 percent, compounded semiannually.

(iii) *Accrual of OID if semiannual accrual periods are used.* Assume that A decides to compute OID on the debt instrument using semiannual accrual periods. Under paragraph (b)(1)(iii) of this section, the OID allocable to the first accrual period equals the product of the issue price ($90,000) and the yield properly adjusted for the length of the accrual period (7.44 percent/2), less qualified stated interest allocable to the accrual period ($3,000). Therefore, the amount of OID for the accrual period equals $345.78 ($3,345.78–$3,000).

(iv) *Adjustment for accrued but unpaid qualified stated interest if monthly accrual periods are used.* Assume, alternatively, that A decides to compute OID on the debt instrument using monthly accrual periods. The yield, compounded monthly, is 7.32 percent. Under paragraph (b)(1)(iii) of this section, the OID allocable to the first accrual period equals the product of the issue price ($90,000) and the yield properly adjusted for the length of the accrual period (7.32 percent/12), less qualified stated interest allocable to the accrual period. Under paragraph (c)(1)(i) of this section, the qualified stated interest allocable to the accrual period is the pro rata amount of qualified stated interest allocable to the accrual period ($3,000 × 1/6, or $500). Therefore, the amount of OID for the accrual period is $49.18 ($549.18–$500).

Example 3. Accrual of OID for debt instrument with short first accrual period—(i) *Facts.* On May 1, 1994, G purchases at original issue, for $80,000, H corporation's debt instrument maturing on July 1, 2004. The debt instrument provides for a single payment at maturity of $250,000. G computes

its OID assuming six-month accrual periods ending on January 1 and July 1 of each year and an initial short two-month accrual period from May 1, 1994 through June 30, 1994.

(ii) *Determination of yield.* The yield on the debt instrument is 11.53 percent, compounded semiannually.

(iii) *Determination of OID allocable to short first accrual period.* Under paragraph (c)(3) of this section, G may use any reasonable method to compute OID for the initial accrual period. One reasonable method is to calculate the amount of OID pursuant to the following formula:

$OID_{short}=IP\times(i/k)\times f$

In which:

OID_{short}=The amount of OID allocable to the initial short accrual period
IP=The issue price of the debt instrument
i=The yield to maturity expressed as a decimal
k=The number of accrual periods in a year
f=A fraction whose numerator is the number of days in the short first accrual period, and whose denominator is the number of days in a full accrual period

(iv) *Amount of OID for the short period.* Under this method, the amount of OID for the initial short accrual period equals $1,537 ($80,000 × (11.53 percent/2) × (60/180)).

(v) *Alternative method.* Another reasonable method is to calculate the amount of OID for the initial short period using the yield based on bi-monthly compounding, computed pursuant to the formula set forth in *Example 1* of paragraph (j) of this section. Under this method, the amount of OID for the initial short period equals $1,508.38 ($80,000 × (11.31 percent/6).

Example 4. Impermissible accrual of OID using a method other than constant yield method—(i) *Facts.* On July 1, 1994, B purchases at original issue, for $100,000, C corporation's debt instrument that matures on July 1, 1999, and has a stated principal amount of $100,000. The debt instrument provides for a single payment at maturity of $148,024.43. The yield of the debt instrument is eight percent, compounded semiannually.

(ii) *Determination of yield.* Assume that C uses six monthly accrual periods to compute its OID for 1994. The yield must reflect the monthly compounding (as determined using the formula described in *Example 1* of paragraph (j) of this section). As a result, the monthly yield of the debt instrument is 7.87 percent, divided by 12. C may not compute its monthly accruals of OID for the last six months in 1994 by dividing eight percent by 12.

Example 5. Debt instrument subject to put option—(i) *Facts.* On January 1, 1994, G purchases at original issue, for $70,000, H corporation's debt instrument maturing on January 1, 2009, with a stated principal amount of $100,000, payable at maturity. The debt instrument provides for semiannual payments of interest of $4,000, payable on January 1 and July 1 of each year, beginning on July 1, 1994. The debt instrument gives G a right to put the bond back to H, exercisable on January 1, 2004, in return for $85,000 (exclusive of the $4,000 of stated interest payable on that date).

(ii) *Determination of yield and maturity.* Yield determined without regard to the put option is 12.47 percent, compounded semiannually. Yield determined by assuming that the put option is exercised (*i.e.*, by using January 1, 2004, as the maturity date and $85,000 as the stated principal amount payable on that date) is 12.56 percent, compound semiannually. Thus, under paragraph (d)(3) of this section, it is assumed that G will exercise the put option, because exercise of the option would increase the yield of the debt instrument. Thus, for purposes of calculating OID, the debt instrument is assumed to be a ten-year debt instrument with an issue price of $70,000, a stated redemption price at maturity of $85,000, and a yield of 12.56 percent, compounded semiannually.

(iii) *Consequences if put option is, in fact, not exercised.* If the put option is, in fact, not exercised, then, under paragraph (d)(4)(i) of this section, the debt instrument is treated, solely for purposes of sections 1272 and 1273, as if it were reissued on January 1, 2004 for an amount equal to its adjusted issue price on that date, $85,000. The new debt instrument matures on January 1, 2009, with a stated principal amount of $100,000 payable on that date and provides for semiannual payments of interest of $4,000. The yield of the new debt instrument is 12.08 percent, compounded semiannually.

Example 6. Debt instrument subject to partial call option—(i) *Facts.* On January 1, 1994, H purchases at original issue, for $95,000, J corporation's debt instrument that matures on January 1, 1999, and has a stated principal amount of $100,000, payable on that date. The debt instrument provides for semiannual payments of interest of $4,000, payable on January 1 and July 1 of each year, beginning on July 1, 1994. On January 1, 1997, J has a right to call 50 percent of the principal amount of the debt instrument for $55,000 (exclusive of the $4,000 of stated interest payable on that date).

(ii) *Determination of yield and maturity.* Yield determined without regard to the call option is 9.27 percent, compounded semiannually. Yield determined by assuming J exercises its call option is 10.75 percent, compounded semiannually. Thus, under paragraph (d)(3) of this section, it is assumed that J will not exercise the call option because exercise of the option would increase the yield of the debt instrument. Thus, for purposes of calculating OID, the debt instrument is assumed to be a five-year debt instrument with a single principal payment at maturity of $100,000, and a yield of 9.27 percent, compounded semiannually.

(iii) *Consequences if the call option is, in fact, exercised.* If the call option is, in fact, exercised, then under paragraph (d)(4)(ii) of this section, the debt instrument is treated as if the issuer made a prepayment of $55,000 that is subject to § 1.1275–2(a). Consequently, under § 1.1275–1(b), the adjusted issue price immediately after the call option is exercised equals the issue price of the debt instrument ($95,000) increased by the OID previously includable in gross income ($2,725.12) and decreased by any payment (other than a qualified stated interest payment) ($55,000). The yield of the debt instrument continues to be 9.27 percent, compounded semiannually. Under paragraph (c)(2) of this section, the OID for the final accrual period is $7,357.22 (the difference between the amount payable at maturity and the adjusted issue price at the beginning of the final accrual period).

Example 7. Debt instrument providing for payment of interest "in kind"—(i) *Facts.* On January 1, 1994, T purchases at original issue, for $75,000, U corporation's debt instrument maturing on January 1, 1999, at a stated principal amount of $100,000, payable on that date. The debt instrument provides for semiannual payments of interest of $2,000 on January 1 and July 1 of each year, beginning on July 1, 1994. The debt instrument gives U the right to issue, in lieu of the first interest payment, a second debt instrument maturing on January 1, 1999 with a stated principal amount of $2,000. This debt instrument would provide for semiannual payments of interest of $40 on January 1 and July 1 of each year, beginning on January 1, 1995.

(ii) *Determination of yield and maturity.* Under § 1.1275–2(c)(3), the issuance of the subsequent debt instrument is not considered a payment made on the original debt instrument, and the subsequent debt instrument is aggregated with the original debt instrument. As a result, the right to issue the subsequent debt instrument is treated as an option to defer the initial interest payment until maturity. Yield determined without regard to the option to defer is 10.41 percent, compounded semiannually. Yield determined by assuming U exercises its option to defer is 10.28 percent, compounded semiannually. Thus, under paragraph (d)(3) of this section, it is assumed that U will exercise the option to defer by issuing the subsequent debt instrument because exercise of the option would decrease the yield of the debt instrument. For purposes of calculating OID, the debt instrument is assumed to be a five-year debt instrument with a single principal payment at maturity of $102,000 and nine semiannual interest payments of $2,040 beginning on January 1, 1995. As a result, the yield is 10.28 percent, compounded semiannually.

(iii) *Consequences if the initial interest payment is made.* Under paragraph (d)(4)(ii) of this section, if U pays $2,000 on July 1, 1994, the debt instrument is treated as if the issuer made a prepayment of $2,000. Consequently, the adjusted issue price of the debt instrument immediately after the prepayment is $77,380.22. The yield continues to be 10.28 percent, compounded semiannually. Under paragraph (c)(2) of this section, the OID for the final accrual period of six months is $4,255.56 (the difference between the amount payable at maturity and the adjusted issue price at the beginning of the final accrual period).

Example 8. Debt instrument with stepped interest rate—(i) *Facts.* On July 1, 1994, G purchases at original issue, for $85,000, H corporation's debt instrument maturing on July 1, 2004. The debt instrument has a stated principal amount of $100,000, payable on the maturity date and provides for semiannual interest payments on January 1 and July 1 of each year, beginning on January 1, 1995. For the first five years, the amount of each payment is $2,000 and for the final five years the amount of each payment is $5,000.

(ii) *Determination of OID.* Assume that G computes its OID using six-month accrual periods ending on January 1 and July 1 of each year. The yield of the debt instrument, determined under paragraph (b)(1)(i) of this section, is 8.65 percent, compounded semiannually. Interest is unconditionally payable at a fixed rate of at least four percent, compounded semiannually, for the entire term of the debt instrument. Consequently, under § 1.1273–1(c)(1), the semiannual payments are qualified stated interest payments to the extent of $2,000. The amount of OID for the first six-month accrual period is $1,674.34 (the issue price of the debt instrument ($85,000) times the yield of the debt instrument for that accrual period (.0865/2) less the amount of any qualified stated interest allocable to that accrual period ($2,000)).

Example 9. Debt instrument with an indefinite maturity that provides for interest at a constant rate—(i) *Facts.* On January 1, 1994, V purchases at original issue, for $100,000, W corporation's debt instrument. The debt instrument calls for interest to accrue at a rate of nine percent, compounded annually. The debt instrument is redeemable at any time at the option of the holder for an amount equal to $100,000, plus accrued interest.

(ii) *Amount of OID.* Pursuant to paragraph (d)(5) of this section, the yield of the debt instrument is nine percent, compounded annually. If the debt instrument is not redeemed during 1994, the amount of OID allocable to the year is $9,000.

§ 1.1272–2 Treatment of debt instruments purchased at a premium.

(a) *In general.* Under section 1272(c)(1), if a holder purchases a debt instrument at a premium, the holder does not include any OID in gross income. Under section 1272(a)(7), if a holder purchases a debt instrument at an acquisition premium, the holder reduces the amount of OID includible in gross income by the fraction determined under paragraph (b)(4) of this section.

(b) *Definitions and special rules*—(1) *Purchase.* For purposes of section 1272 and this section, "purchase" means any acquisition of a debt instrument, including the acquisition of a newly issued debt instrument in a debt-for-debt exchange or the acquisition of a debt instrument in a transferred basis transaction (e.g., under section 362 (a) or (b) or section 1015).

(2) *Premium.* A debt instrument is purchased at a premium if its adjusted basis, immediately after its purchase by the holder, exceeds the sum of all amounts payable on the instrument after the purchase date other than payments of qualified stated interest (as defined in § 1.1273–1(c)).

(3) *Acquisition premium.* A debt instrument is purchased at an acquisition premium if it is not purchased at a premium and immediately after its purchase (including a purchase at original issue) its adjusted basis is greater than its adjusted issue price (as defined in § 1.1275–1(b)).

(4) *Acquisition premium fraction.* In applying section 1272(a)(7), the cost of a debt instrument is its adjusted basis immediately after its acquisition by the purchaser. Thus, the numerator of the fraction determined under section 1272(a)(7)(B) is the excess of the adjusted basis of the debt instrument immediately after its acquisition by the purchaser over the adjusted issue price of the debt instrument. The denominator of the fraction determined under section 1272(a)(7)(B) is the excess of the sum of all amounts payable on the debt instrument after the purchase date, other than payments of qualified stated interest, over the instrument's adjusted issue price.

(5) *Election to accrue discount on a constant yield basis.* Rather than apply the acquisition premium fraction, a holder of a debt instrument purchased at an acquisition premium may elect under § 1.1272–3 to compute OID accruals by treating the purchase as a purchase at original issuance and applying the mechanics of the constant yield method.

(6) *Special rules for determining basis*—(i) *Debt instruments acquired in exchange for other property.* For purposes of section 1272(a)(7), section 1272(c), and this section, if a debt instrument is acquired in an exchange for other property (other than in a reorganization defined in section 368) and the basis of the debt instrument is determined, in whole or in part, by reference to the basis of the other property, the basis of the debt instrument will not exceed its fair market value immediately after the exchange. For example, if a debt instrument is distributed from a partnership to a partner and the distribution is subject to section 731, the partner's basis in the debt instrument may not exceed its fair market value for purposes of this section.

(ii) *Purchases of debt instruments with accrued but unpaid qualified stated interest.* For purposes of this section, if the adjusted basis of a debt instrument immediately after its purchase is equal to the cost of the instrument under section 1012, the adjusted basis is reduced by any amount of qualified stated interest that is accrued but unpaid as of the purchase date.

(iii) *Acquisition by gift.* For purposes of this section, a donee's adjusted basis in a debt instrument is the donee's basis for determining gain under section 1015(a).

(c) *Examples.* The following examples illustrate the application of this section.

Example 1. Debt instrument purchased at an acquisition premium—(i) *Facts.* On July 1, 1992, A purchased at original issue, for $500, a debt instrument issued by Corporation X. The debt instrument matures on July 1, 1997, and calls for a single payment at maturity of $1,000. Under section 1273(a), the debt instrument has a stated redemption price at maturity of $1,000 and, thus, OID of $500. On July 1, 1994, when the debt instrument's adjusted issue price is $659.75, A sells the debt instrument to B for $750 in cash.

(ii) *Acquisition premium fraction.* Because the cost to B of the debt instrument is less than the amount payable on the debt instrument after the purchase date, but is greater than the debt instrument's adjusted issue price, B has paid an acquisition premium for the debt instrument. Accordingly, the daily portion of OID for any day that B holds the debt instrument is reduced by a fraction the numerator of which is $90.25 (the excess of the cost of the debt instrument over its adjusted issue price), and the denominator of which is $340.25 (the excess of the sum of all payments after the purchase date over its adjusted issue price).

Example 2. Debt-for-debt exchange where holder is considered to purchase new debt instrument at a premium—(i) *Facts.* On January 1, 1994, H purchases at original issue, for $1,000, a debt instrument issued by Corporation X. On July 1, 1996, when H's adjustable basis in the debt instrument is $1,000, Corporation X issues a new debt instrument with a stated redemption price at maturity of $750 to H in exchange for the old debt instrument. Assume that the issue price of the new debt instrument is $600. Thus, under section 1273(a), the debt instrument has OID of $150. The exchange qualifies as a recapitalization under section 368(a)(1)(E), with the consequence that, under sections 354 and 358, H recognizes no loss on the exchange and has an adjusted basis in the new debt instrument of $1,000.

(ii) *Application of section 1272(c)(1).* Under paragraphs (b)(1) and (b)(2) of this section, H purchases the new debt instrument at a premium of $250. Accordingly, under section 1272(c)(1), H is not required to include OID in income with respect to the new debt instrument.

Example 3. Debt-for-debt exchange where holder is considered to purchase new debt instrument at an acquisition premium—(i) *Facts.* The facts are the same as in *Example 2*, except that H purchases the old debt instrument from another holder on July 1, 1994, and on July 1, 1996, H's adjusted basis in the old debt instrument is $700. Under section 1273(a), the new debt instrument is issued with OID of $150.

(ii) *Application of section 1272(a)(7).* Under paragraphs (b)(1) and (b)(3) of this section, H purchases the new debt instrument at an acquisition premium of $100. Accordingly, the daily portion of OID that is includible in H's income is reduced by the daily portion of acquisition premium determined under section 1272(a)(7).

Example 4. Treatment of acquisition premium for debt instrument acquired by gift—(i) *Facts.* On July 1, 1994, D receives as

a gift a debt instrument with a stated redemption price at maturity of $1,000 and an adjusted issue price of $800. The fair market value of the debt instrument on that date is $900. The donor purchased the debt instrument on July 1, 1993 at an acquisition premium and had an adjusted basis of $950 in the debt instrument.

(ii) *Application of section 1272(a)(7).* Under paragraphs (b)(1), (b)(3) and (b)(6)(iii) of this section, D is considered to have purchased the debt instrument at an acquisition premium of $150. Accordingly, the daily portion of OID that is includible in D's income is reduced by the daily portion of acquisition premium determined under section 1272(a)(7).

§ 1.272–3 Election by accrual method holder to treat all interest on a debt instrument as OID.

(a) *Election.* A holder that uses an accrual method of accounting may elect to include in gross income all interest that accrues on a debt instrument by using the constant yield method described in paragraph (c) of this section. For purposes of this election, interest includes stated interest, acquisition discount, OID, de minimis OID, market discount, de minimis market discount, and unstated interest, as adjusted by any amortizable bond premium or acquisition premium.

(b) *Scope of election*—(1) *In general.* Except as provided in paragraph (b)(2) of this section, a holder may make the election for any debt instrument.

(2) *Exceptions, limitations, and special rules*—(i) *Debt instruments with amortizable bond premium (as determined under section 171).* (A) A holder may make the election for a debt instrument with amortizable bond premium only if the instrument qualifies under section 171(d).

(B) If a holder makes an election under this section for a debt instrument with amortizable bond premium, the holder is deemed to have made the election under section 171(c)(2) for all of the holder's other debt instruments with amortizable bond premium. If the holder has previously made the election under section 171(c)(2), the requirements of that election with respect to any debt instrument are satisfied by electing to amortize the bond premium under the rules provided by this section.

(ii) *Tax-exempt debt instruments.* A holder may not make the election for a tax-exempt obligation as defined in section 1275(a)(3).

(iii) *Market discount debt instruments.* If a holder makes the election under this section for a debt instrument with market discount, the holder is deemed to have made the election under section 1278(b) for all of the holder's other debt instruments with market discount. If the holder has previously made the election under section 1278(b), the requirements of that election with respect to any debt instrument are satisfied by electing to include the market discount in income in accordance with the rules provided by this section.

(c) *Mechanics of the constant yield method*—(1) *In general.* For purposes of this section, the amount of interest that accrues during an accrual period is determined under rules similar to those under section 1272 (the constant yield method). In applying the constant yield method, however, a debt instrument subject to the election is treated as if—

(i) The instrument is issued for the holder's adjusted basis immediately after its acquisition by the holder;

(ii) The instrument is issued on the holder's acquisition date; and

(iii) None of the interest payments provided for in the instrument are qualified stated interest payments.

(2) *Special rules to determine adjusted basis.* For purposes of paragraph (c)(1)(i) of this section—

(i) If the debt instrument is acquired in an exchange for other property (other than in a reorganization defined in section 368) and the basis of the debt instrument is determined, in whole or in part, by reference to the basis of the other property, the adjusted basis of the debt instrument may not exceed its fair market value immediately after the exchange; and

(ii) If the debt instrument was acquired with amortizable bond premium (as determined under section 171), the adjusted basis of the debt instrument is reduced by the value attributable to any conversion feature, unless that amount is de minimis.

(d) *Basis adjustments.* The holder's basis in each debt instrument is adjusted for amounts taken into account by the holder under this section.

(e) *Time and manner of making the election.* The election must be made for the taxable year in which the holder acquires the debt instrument. The election is made by attaching to the holder's timely filed Federal income tax return a statement that the holder is making an election under this paragraph and that identifies the debt instruments subject to the election. A holder may make the election for a class or group of debt instruments by attaching a statement describing the type or types of debt instruments being designated for the election. If applicable, this election satisfies the election requirements under sections 171(c)(2), 1276(b)(2), 1278(b), and 1283(b)(2).

(f) *Revocation of election.* The election may not be revoked unless approved by the Commissioner. However, the holder will still be required to use the constant yield method to compute accrued market discount and acquisition discount for debt instruments that were acquired on or before the revocation and that were subject to the election.

§ 1.1273–1 Definition of OID.

(a) *In general.* Section 1273(a)(1) defines OID as the excess of a debt instrument's stated redemption price at maturity over its issue price. Section 1.1273–2 defines issue price and paragraphs (b) and (c) of this section define stated redemption price at maturity. Paragraph (d) of this section provides de minimis rules under which the amount of OID is treated as zero. Although the total amount of OID with respect to a debt instrument with an indefinite maturity date (including an instrument payable on demand) may be indeterminate, § 1.1272–1(d)(5) provides rules to determine the yield of certain debt instruments with indefinite maturities. See Example 9 in § 1.1272–1(j).

(b) *Stated redemption price at maturity.* A debt instrument's stated redemption price at maturity is the sum of all payments provided by the debt instrument other than qualified stated interest payments. The rules of § 1.1272–1(d) apply in determining the stated redemption price at maturity of certain debt instruments subject to contingencies.

(c) *Qualified stated interest.*—(1) *In general.* "Qualified stated interest" is stated interest that is unconditionally payable in cash or in property (other than debt instruments of the issuer) at least annually at a single fixed rate. Interest is payable at a single fixed rate only if the rate appropriately takes into account the length of the interval between payments. See Example 1 in paragraph (f) of this section. Interest is considered to be unconditionally payable only if late payment or nonpayment is penalized or reasonable remedies exist to compel payment. Notwithstanding the preceding sentence, interest is not considered to be unconditionally payable if the lending transaction does not reflect arm's length dealing and the holder does not intend to enforce such remedies. Interest payable upon the occurrence of a contingency (such as the existence of profits) is not unconditionally payable.

(2) *Variable rate debt instrument.* In the case of a variable rate debt instrument, "qualified stated interest" is defined in § 1.1275–5(e)

(3) *Stated interest in excess of qualified stated interest.* To the extent

that stated interest payable under a debt instrument exceeds qualified stated interest, the excess is included in the debt instrument's stated redemption price at maturity.

(4) *Short-term obligations.* In the case of a short-term obligation (as defined in section 1283(a)(1)(A)), no payments of interest are considered to be qualified stated interest.

(d) *De minimis OID*—(1) *In general.* If the amount of OID with respect to a debt instrument is less than the de minimis amount, the amount of OID is treated as zero, and all stated interest is treated as qualified stated interest.

(2) *De minimis amount.* The de minimis amount is an amount equal to 0.0025 multiplied by the product of the stated redemption price at maturity and the number of complete years to maturity from the issue date.

(3) *Installment obligations.* In the case of an installment obligation (as defined in paragraph (e)(1) of this section), paragraph (d)(2) of this section is applied by substituting for the "number of complete years to maturity" the weighted average maturity (as defined in paragraph (e)(3) of this section). Alternatively, in the case of a debt instrument that provides for payments of principal no more rapidly than a self-amortizing installment obligation (as defined in paragraph (e)(2) of this section), the de minimis amount defined in paragraph (d)(2) of this section may be calculated by substituting 0.00167 for 0.0025.

(4) *Special rule for variable rate debt instruments.* If a variable rate debt instrument (within the meaning of § 1.1275–5(a)) has stated interest that is not unconditionally payable at least annually, the amount of OID on the debt instrument is considered to be greater than the de minimis amount.

(5) *Special rule for interest holidays, teaser rates, and other interest shortfalls*—(i) *In general.* Solely for the purpose of determining whether OID is de minimis, the rule in this paragraph (d)(5) generally treats teaser rates, interest holidays, and certain other interest shortfalls as resulting in OID equal to the amount of interest foregone during the period of the teaser, holiday, or shortfall. This rule applies if—

(A) The amount of OID is more than the de minimis amount as otherwise determined under paragraph (d) of this section; and

(B) All stated interest provided for in the debt instrument would be qualified stated interest under paragraph (c) of this section except that for one or more accrual periods the interest rate is below the rate applicable for the remainder of the instrument's term (*e.g.*, if as a result of an interest holiday, all stated interest is not qualified stated interest).

(ii) *Redetermination of stated redemption price at maturity.* For purposes of determining whether a debt instrument described in paragraph (d)(5)(i) of this section has de minimis OID, the stated redemption price at maturity is treated as equal to the stated principal amount plus the amount of additional stated interest that would be necessary to be payable on the instrument in order for all stated interest to be qualified stated interest under paragraph (c) of this section. In applying the preceding sentence, the additional amount that is added to the stated redemption price at maturity is reduced (but not below zero) by the difference between the debt instrument's issue price and its stated principal amount. See Example 3 of paragraph (f) of this section. In addition, the weighted average maturity of the debt instrument under paragraph (e)(3) of this section is determined by ignoring the stated interest payments.

(6) *Treatment of de minimis OID by holders*—(i) *Allocation of de minimis OID to principal payments.* The holder of a debt instrument includes any de minimis OID in income as stated principal payments are made. The amount includible in income with respect to each principal payment equals the product of the total amount of de minimis OID on the instrument and a fraction, the numerator of which is the amount of the principal payment made and the denominator of which is the stated principal amount of the instrument. Any amount of de minimis OID includible in income under the preceding sentence is treated as an amount received in retirement of the debt instrument for purposes of section 1271.

(ii) *Character of de minimis OID.* Any gain attributable to de minimis OID that is recognized on the sale or exchange of a debt instrument is capital gain if the debt instrument is a capital asset in the hands of the seller.

(iii) *Cross-reference.* See § 1.1272–3 for an election by an accrual method holder to treat de minimis OID as OID.

(e) *Definitions*—(1) *Installment obligation.* An installment obligation is a debt instrument that provides for the payment of any amount other than qualified stated interest before maturity.

(2) *Self-amortizing installment obligation.* A self-amortizing installment obligation is an obligation that provides for equal payments composed of principal and qualified stated interest that are unconditionally payable at least annually during the entire term of the debt instrument with no significant additional payment required at maturity.

(3) *Weighted average maturity.* The weighted average maturity of a debt instrument is the sum of the amounts obtained by multiplying the amount of each payment under the instrument (other than a payment of qualified stated interest) by a fraction, the numerator of which is the number of complete years from the issue date until the payment is made and the denominator of which is the stated redemption price at maturity.

(f) *Examples.* The provisions of this section are illustrated by the following examples.

Example 1. Qualified stated interest—(i) *Facts.* On January 1, 1994, A purchases at original issue, for $100,000, a debt instrument that matures on January 1, 1998 and has a stated principal amount of $100,000, payable at maturity. The debt instrument provides for interest payments of $8,000 on January 1, 1995 and January 1, 1996, and quarterly interest payments of $1,943, beginning on April 1, 1996.

(ii) *Amount of qualified stated interest.* The annual payments of $8,000 and the quarterly payments of $1,943 reflect interest payable at a single fixed rate because 8 percent, compounded annually, is equivalent to 7.77 percent, compounded quarterly. Consequently, all stated interest payments under the debt instrument are qualified stated interest payments.

Example 2. Stated interest in excess of qualified stated interest—(i) *Facts.* On January 1, 1994, B purchases at original issue, for $100,000, C corporation's five-year debt instrument. The debt instrument provides for a principal payment of $100,000 payable at maturity, and calls for annual interest payments of $10,000 for the first 3 years and annual interest payments of $10,600 for the last two years.

(ii) *Payments in excess of qualified stated interest.* All of the first three interest payments and $10,000 of each of the last two interest payments are qualified stated interest payments within the meaning of paragraph (c)(1) of this section. Under paragraph (c)(3) of this section, the remaining $600 of each of the last two interest payments is included in the stated redemption price at maturity, so that the stated redemption price at maturity is $101,200. Pursuant to paragraph (e)(3) of this section, the weighted average maturity of the debt instrument is 4.994 years {(4 years × $600/$101,200) + (5 years × $100,600/$101,200)}. The de minimis amount, or one-fourth of one percent of the stated redemption price at maturity multiplied by the weighted average maturity, is $1,263.50. Because the actual amount of discount, $1,200, is less than the de minimis amount, the instrument is treated as having no OID, and, under paragraph (d)(1) of this section, all of the interest payments are considered to be qualified stated interest.

Example 3. De minimis OID: interest holiday—(i) *Facts.* On January 1, 1994, C purchases at original issue, for $97,561, a debt instrument that matures on January 1, 2006 and has a stated principal amount of

$100,000, payable at maturity. The debt instrument provides for an initial interest holiday of one quarter and quarterly interest payments of $2,500 thereafter (beginning on July 1, 1994). The issue price of the debt instrument is $97,561.

(ii) *De minimis amount of OID.* But for the interest holiday, all stated interest on the debt instrument would be qualified stated interest. Under paragraph (d)(5) of this section, for purposes of determining whether the debt instrument has de minimis OID, the stated redemption price at maturity of the instrument is $100,061 ($100,000 (stated principal amount) plus $2,500 (additional interest for the initial period) minus $2,439 (the difference between the instrument's stated principal amount and issue price)). Thus, the debt instrument is treated as having OID of $2,500 ($100,061 minus $97,561). Because this amount is less than the de minimis amount of $3,000 (0.0025 multiplied by $100,000 multiplied by 12 complete years to maturity), the debt instrument is treated as having no OID, and all stated interest is treated as qualified stated interest.

(iii) *If debt instrument had greater than de minimis OID.* If the issue price were $97,000 or less, the debt instrument would not have de minimis OID. In that case, none of the stated interest would be qualified stated interest. If, for example, the issue price were $97,000, the stated redemption price at maturity would be $217,500 ($100,000 plus all stated interest), and the debt instrument would have $120,500 of OID to be accounted for under the rules of § 1.1272–1.

§ 1.1273–2 Determination of issue price.

(a) *Publicly offered debt instruments not issued for property*—(1) *In general.* Except as provided in paragraph (a)(3) of this section, the issue price of a debt instrument that is part of an issue of publicly offered debt instruments not issued for property is the first price at which a substantial amount of the debt instruments included in the issue is sold to the public. For this purpose, the public does not include bond houses, brokers, or similar persons or organizations acting in the capacity of underwriters or wholesalers. The issue price does not change if part of the issue is subsequently sold at a different price.

(2) *Publicly offered debt instruments defined.* A debt instrument is publicly offered if it is part of an issue of debt instruments the initial offering of which—

(i) Is registered with the Securities and Exchange Commission; or

(ii) Would be required to be registered under the Securities Act of 1933 but for an exemption from registration—

(A) Under section 3 of the Securities Act of 1933 (relating to exempted securities);

(B) Under sections 2 or 4 of the Securities Act of 1933 because of the identity of the issuer or the nature of the security; or

(C) Because the issue is intended for distribution to persons who are not United States persons.

(3) *Publicly offered Treasury securities.* The issue price of an issue of publicly offered Treasury securities is the average price of the debt instruments sold. See § 1.1275–2(d) for rules regarding additional Treasury securities issued in the qualified reopening.

(b) *Other debt instruments not issued for property*—(1) *In general.* The issue price of an issue of debt instruments not issued for property and not publicly offered is the price paid by the first buyer of an instrument that is part of the issue. For this purpose, the first buyer does not include any bond house, broker, or similar person or organization acting in the capacity of an underwriter, placement agent, or wholesaler. Typically, the issue price of a debt instrument evidencing a loan to a natural person is determined under this paragraph (b)(1).

(2) *Below-market loans subject to section 7872(b).* The issue price of a below-market loan subject to section 7872(b) (a term loan other than a gift loan) is the issue price determined under this section, reduced by the excess amount determined under section 7872(b)(1).

(c) *Debt instruments issued for property where there is trading on an established market*—(1) *Publicly traded debt instruments.* The issue price of a debt instrument issued for property is the debt instrument's fair market value, as of the issue date, if the debt instrument is part of an issue a portion of which is traded on an established market.

(2) *Non-publicly traded debt instruments issued for publicly traded property.* The issue price of a debt instrument issued for property is the property's fair market value, as of the issue date, if the debt instrument—

(i) Is not part of an issue a portion of which is traded on an established market; and

(ii) Is issued for property that is traded on an established market.

(3) *Definition of property.* For purposes of this section, "property" means a debt instrument, stock, security, contract, commodity, or currency.

(d) *Traded on an established market*—(1) *In general.* Property is traded on an established market for purposes of section 1273(b)(3) if, at any time during the 60-day period ending 30 days after the issue date (as defined in § 1.1275–1(e)), the property is described in paragraph (d)(2), (d)(3), (d)(4), or (d)(5) of this section.

(2) *Exchange listed property.* Property is described in this paragraph if it is listed on—

(i) A national securities exchange registered under section 6 of the Securities Exchange Act of 1934 (15 U.S.C. 78f);

(ii) An interdealer quotation system sponsored by a national securities association registered under section 15A of the Securities Exchange Act of 1934; or

(iii) The International Stock Exchange of the United Kingdom and the Republic of Ireland, Limited, the Luxembourg Stock Exchange, the Frankfurt Stock Exchange, the Tokyo Stock Exchange, or any other foreign exchange or board of trade that is designated by the Commissioner in a revenue ruling or revenue procedure (see § 601.601(d)(2)(ii)(*b*) of this chapter).

(3) *Market traded property.* Property is described in this paragraph if it is traded either on a board of trade that is designated as a contract market by the Commodities Futures Trading Commission or on an interbank market.

(4) *Property appearing on a quotation medium.* Property is described in this paragraph if it appears on a system of general circulation (a quotation medium) that provides a reasonable basis to determine fair market value by disseminating either recent price quotations of identified brokers and dealers (including those of a single, identified broker or dealer) or actual prices of recent sales transactions. A quotation medium includes a computer listing of recent sales prices that is disseminated to subscribing brokers, dealers, or traders. A quotation medium does not include a directory of listing of brokers or dealers for specific securities that provides neither quotations nor actual prices of recent sales transactions, such as the "yellow sheets."

(5) *Readily quotable debt instruments*—(i) *In general.* A debt instrument is described in this paragraph if price quotations are readily available from dealers and brokers.

(ii) *Safe harbors.* A debt instrument is not considered to be described in paragraph (d)(5)(i) of this section if—

(A) No other outstanding debt instrument of the issuer (or of any person who guarantees the debt instrument) is described in paragraphs (d)(2), (d)(3), or (d)(4) of this section (such debt collectively being "other traded debt");

(B) The original stated principal amount of the issue that includes the debt instrument does not exceed $25 million;

(C) The conditions and covenants relating to the issuer's performance with respect to the debt instrument are materially less restrictive than the conditions and covenants included in all of the issuer's other traded debt (*e.g.*, the debt instrument is subject to an economically significant subordination provision whereas the issuer's other traded debt is senior); or

(D) The maturity date of the debt instrument is more than three years after the latest maturity date of the issuer's other traded debt.

(6) *Effect of certain temporary restrictions on trading.* If there is any temporary restriction on trading a purpose of which is to avoid the characterization of the property as one that is traded on an established market for Federal income tax purposes, then the property is treated as traded on an established market. For purposes of the preceding sentence, a temporary restriction on trading need not be imposed by the issuer.

(7) *Convertible debt instruments.* A debt instrument is not treated as traded on an established market solely because the debt instrument is convertible into property which is so traded.

(e) *Other debt instruments.* Under section 1273(b)(4), the issue price of a debt instrument that is not determined under paragraphs (a) through (d) of this section and that is not determined under section 1274 is the instrument's stated redemption price at maturity.

(f) *Investment units*—(1) *In general.* Under section 1273(c)(2), the issue price of an investment unit that is publicly traded or that is issued for cash or publicly traded property is determined in accordance with the rules of section 1273 and this section as if the investment unit were a debt instrument. The issue price is allocated between the debt instrument and the property right (or rights) that comprise the unit based on their relative fair market values.

(2) *Consistent allocation by holders and issuer.* The issuer's allocation of the issue price of the investment unit is binding on all holders of the investment unit. However, the issuer's determination is not binding on a holder that explicitly discloses that its allocation of the issue price of the investment unit is different from the issuer's allocation. The disclosure must be made on the form prescribed by the Commissioner and attached to the holder's timely filed Federal income tax return for the tax year that includes the acquisition date of the investment unit.

(g) *Convertible debt instruments* The issue price of a debt instrument that is convertible into another debt instrument or stock of either the issuer or a related party (as defined in section 267(b) or section 707(b)(1)) includes any amount paid with respect to the conversion privilege, even if the privilege may be satisfied or exercised for the cash value of the other debt instrument or stock.

(h) *Treatment of amounts representing pre-issuance accrued interest*—(1) *Applicability.* Paragraph (h)(2) of this section provides an optional rule for determining the issue price of a debt instrument if—

(i) A portion of the initial purchase price of the instrument is allocable to interest that has accrued prior to the issue date (pre-issuance accrued interest); and

(ii) The instrument provides for a payment of stated interest on the first payment date within one year of the issue date that equals or exceeds the amount of the pre-issuance accrued interest.

(2) *Exclusion of pre-issuance accrued interest from issue price.* If a debt instrument meets the requirements of paragraph (h)(1) of this section, the instrument's issue price may be computed by subtracting from the issue price (as otherwise computed under the rules of this section) the amount of pre-issuance accrued interest. If the issue price of the instrument is computed in this manner, a portion of the stated interest payable on the first payment date must be treated as a return of the excluded pre-issuance accrued interest, rather than as an amount payable on the debt instrument.

(i) [*Reserved*]

(j) *Treatment of certain cash payments incident to lending transactions*—(1) *Applicability.* The provisions of this paragraph (j) apply to cash payments made incident to private lending transactions (including seller financing).

(2) *Payments from borrower to lender.* In a lending transaction to which section 1273(b)(2) applies, a payment from the borrower to the lender (other than a payment for services provided by the lender, such as commitment fees or loan processing costs) reduces the issue price of the debt instrument evidencing the loan. In a transaction to which section 1274 applies, a payment from the buyer to the seller that is designated as interest or points reduces the stated principal amount of the debt instrument evidencing the loan. However, solely for purposes of the borrower (buyer), this paragraph (j)(2) does not apply to a payment of points that is deductible by the borrower (buyer) under section 461(g)(2).

(3) *Payments from lender to borrower.* A payment from the lender to the borrower in a lending transaction is treated as an amount loaned.

(4) *Payments between lender and third party.* If, as part of a lending transaction, a party other than the borrower (the third party) makes a payment to the lender, that payment is treated in appropriate circumstances as made from the third party to the borrower followed by a payment in the same amount from the borrower to the lender and governed by the provisions of paragraph (j)(2) of this section. If, as part of a lending transaction, the lender makes a payment to a third party, that payment is treated in appropriate circumstances as an additional amount loaned to the borrower and then paid by the borrower to the third party. The character of the deemed payment between the borrower and the third party depends on the substance of the transaction.

(5) *Examples.* The provisions of this paragraph (j) are illustrated by the following examples.

Example 1. Payments from borrower to lender in a cash transaction—(i) *Facts.* A lends $100,000 to B for a term of 10 years. At the time the loan is made, B pays $4,000 in points to A. Assume that the points are not deductible by B under section 461(g)(2) and that the stated redemption price at maturity of the debt instrument is $100,000.

(ii) *Payment results in OID.* Under paragraph (j)(2) of this section, the issue price of B's debt instrument evidencing the loan is $96,000. As a result, the debt instrument has $4,000 of OID. Because the $4,000 is more than a de minimis amount of OID, the points are accounted for by both A and B as OID under section 1272 and the regulations thereunder.

Example 2. Payments from borrower to lender in a section 1274 transaction—(i) *Facts.* A sells property to B for $1,000,000 in a transaction that is not a potentially abusive situation (within the meaning of § 1.1274–3). In consideration therefor, B gives A $300,000 and issues a five-year debt instrument with a stated principal amount of $700,000, payable at maturity, and that calls for semiannual payments of interest at a rate of 8.5 percent. In addition to the cash downpayment, B pays A $14,000 designated as points on the loan. Assume that the points are not deductible under section 461(g)(2).

(ii) *Issue price.* Under paragraph (j)(2) of this section, the stated principal amount of B's debt instrument is $686,000 ($700,000 minus $14,000). Assuming a test rate of 9 percent, compounded semiannually, the imputed principal amount of B's debt instrument under § 1.1274–2(c)(1) is $686,153. Under § 1.1274–2(b)(1), the issue price of B's debt instrument is the stated principal amount of $686,000. As a result, the debt instrument has $14,000 of OID. Because the $14,000 is more than a de minimis amount of OID, the points are accounted for by both A and B as OID under section 1272 and the regulations thereunder B's basis in the property purchased is

$1,000,000 ($686,000 debt instrument plus $314,000 cash payments).

Example 3. Payments between lender and third party—(i) *Facts.* A sells Blackacre to B for $500,000 in a transaction that is not a potentially abusive situation (within the meaning of § 1.1274–3). B makes a cash down payment of $100,000 and borrows $400,000 of the purchase price from a lender, L, repayable in annual installments over a term of 15 years calling for interest at a rate of 9 percent, compounded annually. As part of the transaction, A makes a payment of $8,000 to L to facilitate the loan to B.

(ii) *Payment results in a de minimis amount of OID.* Under the provisions of paragraphs (j)(2) and (j)(4) of this section, B is treated as having made an $8,000 payment directly to L and a payment of only $492,000 to A for Blackacre. Thus, B's basis in Blackacre is $492,000. The payment to L reduces the issue price of B's debt instrument to $392,000, resulting in $8,000 of OID ($400,000–$392,000). Because the amount of OID is de minimis under § 1.1273–1(d), L must account for the de minimis OID under § 1.1273–1(d)(6). *But see* § 1.1272–3 (election to treat de minimis OID as OID). B must account for the de minimis OID under § 1.163–7.

§ 1.1274–1 Debt instruments to which section 1274 applies.

(a) *Types of debt instruments to which section 1274 applies.* Subject to the exceptions and limitations in paragraph (b) of this section, section 1274 and this section apply to any debt instrument given in consideration for the sale or exchange of property. For purposes of section 1274, "property" includes debt instruments and investment units, but does not include U.S. currency, services, or the right to use property. For the treatment of certain payments for the use of property or services, see sections 404 and 467.

(b) *Exceptions*—(1) *Debt instrument with adequate stated interest and no OID.* Section 1274 does not apply to a debt instrument if—

(i) All interest payable on the instrument is qualified stated interest;

(ii) The stated rate of interest is at least equal to the test rate of interest (as defined in § 1.1274–4); and

(iii) The debt instrument is not issued in a potentially abusive situation (as defined in § 1.1274–3).

(2) *Exceptions under sections 1274(c)(1)(B), 1274(c)(3), 1274(c), and 1275(b)(1)*—(i) *In general.* Sections 1274(c)(1)(B), 1274(c)(3), 1274A(c), and 1275(b)(1) describe certain transactions to which section 1274 does not apply. This paragraph provides certain rules to be used in applying those exceptions.

(ii) *Special rules for certain exceptions under section 1274(c)(3)*—(A) *Determination of sales price for certain sales of farms.* For purposes of section 1274(c)(3)(A), the determination as to whether the sales price cannot exceed $1,000,000 is made without regard to any other exception to, or limitation on, the applicability of section 1274 (*e.g.*, without regard to the special rules regarding sales of principal residences and land transfers between related persons). In addition, the sales price is determined without regard to section 1274 and without regard to any stated interest. The sales price includes the amount of any liability included in the amount realized from the sale or exchange (see § 1.1001–2).

(B) *Sales involving total payments of $250,000 or less.* Under section 1274(c)(3)(C), the determination of the amount of payments due under all debt instruments and the amount of other consideration to be received is made as of the date of the sale or exchange or, if earlier, the contract date. If the precise amount due under any debt instrument or the precise amount of any other consideration to be received cannot be determined as of that date, section 1274(c)(3)(C) applies only if it can be determined that the maximum of the aggregate amount of payments due under the debt instruments and other consideration to be received cannot exceed $250,000. For purposes of determining the aggregate amount of payments due, if a liability is assumed or property is taken subject to a liability, the outstanding principal balance or adjusted issue price (in the case of an obligation originally issued at a discount) of the obligation assumed or taken subject to is taken into account.

(3) *Other exceptions to section 1274*—(i) *Holders of certain below-market instruments.* Section 1274 does not apply to any holder of a debt instrument that—

(A) Is given in consideration for the sale or exchange of property that is personal use property (within the meaning of section 1275(b)(3)) in the hands of the issuer; and

(B) Evidences a below-market gift loan (described in section 7872(c)(1)(A)), a below-market compensation-related loan (described in section 7872(c)(1)(B)), or a below-market corporation-shareholder loan (described in section 7872(c)(1)(C)).

(ii) *Transactions involving certain demand loans.* Section 1274 does not apply to any debt instrument that evidences a demand loan that is either a gift loan (described in section 7872(c)(1)(A)), a compensation-related loan (described in section 7872(c)(1)(B)), or a corporation-shareholder loan (described in section 7872(c)(1)(C)).

(iii) *Certain transfers subject to section 1041.* Section 1274 does not apply to any debt instrument issued in consideration for a transfer of property subject to section 1041 (relating to transfers of property between spouses or incident to divorce).

(c) *Examples.* The provisions of this section are illustrated by the following examples.

Example 1. Single stated rate paid semiannually. A debt instrument issued in consideration for the sale of nonpublicly traded property in a transaction that is not a potentially abusive situation calls for the payment of a principal amount of $1,000,000 at the end of a ten-year term and 20 semiannual interest payments of $60,000. Assume that the test rate of interest is 12 percent, compounded semiannually. The debt instrument is not subject to section 1274 because it provides for interest equal to the test rate and all interest payable on the instrument is qualified stated interest.

Example 2. Sale of farm for debt instrument with contingent interest—(i) *Facts.* On July 1, 1995, A, an individual, sells to B land used as a farm within the meaning of section 6420(c)(2). As partial consideration for the sale, B issues a debt instrument calling for a single $500,000 payment due in ten years unless profits from the land in each of the ten years preceding maturity of the debt instrument exceed a specified amount, in which case B is to make a payment of $1,200,000. No interest is provided for in the debt instrument.

(ii) *Total payments may exceed $1,000,000.* Even though the total payments ultimately payable under the contract may be less than $1,000,000, at the time of the sale or exchange it cannot be determined that the sales price cannot exceed $1,000,000. Thus, the sale of the land used as a farm is not an excepted transaction described in section 1274(c)(3)(A).

Example 3. Sale between related parties subject to section 483(e)—(i) *Facts.* On July 1, 1995, A, an individual, sells land (not used as a farm within the meaning of section 6420(c)(2)) to A's child B for $650,000. In consideration for the sale, B issues a debt instrument to A that calls for a payment of $650,000. No other consideration is given. The debt instrument is due in ten years. No interest is provided for in the debt instrument.

(ii) *Bifurcation of debt instrument.* For purposes of section 483(e), the $650,000 debt instrument is treated as two separate debt instruments: a $500,000 debt instrument and a $150,000 debt instrument. The $500,000 debt instrument is subject to section 483(e), and accordingly is covered by the exception from section 1274 described in section 1274(c)(3)(F). Because the amount of the payments due as consideration for the sale exceeds $250,000, the $150,000 debt instrument is subject to section 1274.

§ 1.1274–2 Treatment of debt instruments to which section 1274 applies.

(a) *In general.* If section 1274 applies to a debt instrument, section 1274 and this section determine the issue price of the debt instrument. For rules relating to the determination of the amount and

timing of OID to be included in income, see section 1272 and the regulations thereunder.

(b) *Issue price*—(1) *Debt instruments that provide for adequate stated interest; stated principal amount.* The issue price of a debt instrument that provides for adequate stated interest is the stated principal amount of the debt instrument. For purposes of section 1274, the stated principal amount of a debt instrument is the aggregate amount of all payments due under the debt instrument, excluding any amount of stated interest.

(2) *Debt instruments that do not provide for adequate stated interest; imputed principal amount.* The issue price of a debt instrument that does not provide for adequate stated interest is the imputed principal amount of the debt instrument (as determined under paragraphs (c), (d), and (e) of this section).

(3) *Debt instruments issued in a potentially abusive situation; fair market value.* Notwithstanding paragraphs (b)(1) and (b)(2) of this section, in the case of a debt instrument issued in a potentially abusive situation (as defined in § 1.1274–3), the issue price of the debt instrument is the fair market value of the property received in exchange for the debt instrument, reduced by the fair market value of any consideration other than the debt instrument given in consideration for the sale or exchange.

(c) *Determination of whether a debt instrument provides for adequate stated interest*—(1) *In general.* A debt instrument provides for adequate stated interest if its stated principal amount is less than or equal to its imputed principal amount. "Imputed principal amount" means the sum of the present values, as of the issue date, of all payments, including payments of stated interest, due under the debt instrument (determined by using a discount rate equal to the test rate of interest as determined in § 1.1274–4). If a debt instrument has a single stated rate of interest that is paid or compounded at least annually, and that rate is equal to or greater than the test rate, the debt instrument has adequate stated interest.

(2) *Determination of present value.* The present value of a payment is the amount that, if invested on the computation date at a compound rate of interest equal to the test rate, would increase in value to the amount of the future payment on the payment date. To determine present value, a compounding period must be selected, and the test rate must be based on the same compounding period.

(3) *Treatment of certain options*—(i) *In general.* This paragraph (c)(3) provides rules for determining the issue price of a debt instrument to which section 1274 applies (other than a debt instrument issued in a potentially abusive situation) that is subject to one or more options described in paragraph (c)(3)(ii) of this section. The holder of a debt instrument with an option is presumed to exercise the option if the imputed principal amount of the debt instrument, assuming exercise of the option, exceeds the imputed principal amount of the debt instrument, assuming the option is not exercised. The issuer of a debt instrument with an option is presumed to exercise the option if the imputed principal amount of the debt instrument, assuming exercise of the option, is less than the imputed principal amount of the debt instrument, assuming the option is not exercised. See § 1.1272–1(d)(3) to determine the debt instrument's yield and maturity for purposes of determining the accrual of OID with respect to the instrument.

(ii) *Described options.* An option is described in this paragraph if it is not separately alienable from the debt instrument and allows a holder or issuer the unconditional right to accelerate or defer payments on one or more dates during the term of the debt instrument. However, an option is not described in this paragraph (c)(3) if, as of the issue date, the amounts payable on the debt instrument upon exercise of the option are not fixed. See paragraph (e) of this section for the treatment of a debt instrument with payments contingent as to amount.

(4) *Examples.* The provisions of paragraph (c) of this section are illustrated by the following examples. Each example assumes a 30-day month, 360-day year. In addition, each example assumes that the debt instrument is not a qualified debt instrument (as defined in section 1274A(b)) or issued in a potentially abusive situation.

Example 1. Debt instrument without a fixed rate over its entire term—(i) *Facts.* On January 1, 1994, A sells nonpublicly traded property to B for a stated purchase price of $3,500,000. In consideration for the sale, B makes a down payment of $500,000 and issues a ten-year debt instrument with a stated principal amount of $3,000,000, payable at maturity. The debt instrument calls for no interest in the first two years and interest at a rate of 15 percent payable annually over the remaining eight years of the debt instrument. The first interest payment of $450,000 is due on December 31, 1996, and the last interest payment is due on December 31, 2003, together with the $3,000,000 payment of principal. Assume that the test rate of interest applicable to the debt instrument is 10.5 percent, compounded annually.

(ii) *Determination of present value.* Because the debt instrument does not call for a fixed rate of interest no lower than the test rate of interest for its entire term, the debt instrument has adequate stated interest only if the stated principal amount is less than or equal to the imputed principal amount. To compute the imputed principal amount, all payments due under the debt instrument must be discounted back to the issue date at 10.5 percent, compounded annually, as follows:

(A) The present value of the $3,000,000 principal payment payable on December 31, 2003, is $1,105,347, determined as follows:

$$\$1{,}105{,}347 = \frac{\$3{,}000{,}000}{(1 + .105/1)^{10}}$$

(B) The present value of the eight interest payments of $450,000 as of January 1, 1996, (the interim date) is $2,357,635, determined as follows:

$$\$2{,}357{,}635 = \$450{,}000 \times \frac{1-(1 + .105/1)^{-8}}{(.105/1)}$$

(C) The present value of this interim amount as of January 1, 1994, the computation date, is $1,930,865, determined as follows:

$$\$1{,}930{,}865 = \frac{\$2{,}357{,}635}{(1 + .105/1)^{2}}$$

(iii) *Determination of issue price.* The debt instrument's imputed principal amount (that is, the total present value of all payments due under the debt instrument) is $3,036,212 ($1,105,347 + $1,930,865). Because the stated principal amount ($3,000,000) is less than the imputed principal amount, the debt instrument provides for adequate stated interest. However, because none of the interest on the debt instrument is qualified stated interest, the instrument's stated redemption price at maturity (as defined in section 1273(a)(2)) exceeds the instrument's stated principal amount by $3,600,000 ($450,000 × 8). Therefore, the debt instrument is subject to section 1274. The issue price of the debt instrument is its stated principal amount ($3,000,000).

Example 2. Debt instrument subject to issuer call option—(i) *Facts.* On January 1, 1994, in partial consideration for the sale of nonpublicly traded property, H corporation issues to G a ten-year debt instrument, maturing on January 1, 2004, with a stated principal amount of $10,000,000, payable on that date. The debt instrument provides for annual payments of interest of eight percent for the first five years and 14 percent for the final five years, payable on January 1 of each year, beginning on January 1, 1995. In addition, the debt instrument provides H with the option to call (prepay) the debt instrument at the end of five years for its full face amount of $10,000,000. Assume that the applicable Federal mid-term and long-term

rates applicable to the sale based on annual compounding are nine percent and ten percent, respectively.

(ii) *Option presumed exercised.* Assuming exercise of the call option, the imputed principal amount as determined under paragraph (c)(1) of this section is $9,611,034.87 (the present value of all of the payments due within a five-year term discounted at a test rate of nine percent, compounded annually). Assuming nonexercise of the call option, the imputed principal amount is $10,183,354.78 (the present value of all of the payments due within a ten-year term discounted at a test rate of ten percent, compounded annually). For purposes of determining the imputed principal amount, the option is presumed exercised because the imputed principal amount assuming exercise of the option is less than the imputed principal amount assuming the option is not exercised. If the option is presumed exercised, the debt instrument fails to provide adequate stated interest. Thus, the issue price of the instrument is $9,611,034.87.

(d) *Treatment of variable rate debt instruments*—(1) *Stated interest at a qualified floating rate*—(i) *In general.* For purposes of paragraph (c) of this section, the imputed principal amount of a variable rate debt instrument (within the meaning of § 1.1275–5(a)) that provides for stated interest at a qualified floating rate (or rates) is determined by assuming that the instrument provides for a fixed rate of interest for each accrual period to which a qualified floating rate applies. For purposes of the preceding sentence, the assumed fixed rate in each accrual period is the value of the qualified floating rate as of the date of the sale or exchange (or, if earlier, the contract date). See § 1.1274–4(c) to determine the test rate for a variable rate debt instrument that provides for stated interest at a qualified floating rate (or rates).

(ii) *Interest rate limitations.* Notwithstanding paragraph (d)(1)(i) of this section, if, as a result of interest rate limitations (such as an interest rate cap), the expected yield of the debt instrument taking the limitations into account is significantly less than the expected yield of the debt instrument without regard to the limitations, the interest payments on the debt instrument (other than any fixed interest payments) are treated as contingent payments subject to paragraph (e) of this section. Generally, reasonably symmetric interest rate caps and floors do not result in the debt instrument being subject to this rule.

(2) *Stated interest at a single objective rate.* For purposes of paragraph (c) of this section, the imputed principal amount of a variable rate debt instrument (within the meaning of § 1.1275–5(a)) that provides for stated interest at a single objective rate is determined by treating the interest payments as contingent payments subject to paragraph (e) of this section.

(e) *Contingent payments*—(1) *General rule.* For purposes of paragraph (c)(1) of this section, the stated principal amount of a debt instrument that provides for contingent payments is the maximum amount of the contingent and noncontingent payments, excluding any amount of stated interest (whether or not contingent). The imputed principal amount of such a debt instrument is the sum of the present values of the noncontingent payments as determined under paragraph (c) of this section, and the fair market value of the contingent payments as of the issue date. If the fair market value of the contingent payments cannot be determined when separated from the noncontingent payments, the imputed principal amount of the debt instrument is its fair market value. Only in rare and extraordinary cases will the fair market value of the debt instrument be treated as not reasonably ascertainable. For additional rules relating to contingent payments, see § 1.1275–4.

(2) *Special rule for earn-outs.* Notwithstanding paragraph (e)(1) of this section, the imputed principal amount of a debt instrument that provides for contingent interest payments is its stated principal amount if—

(i) All or a portion of the contingent interest payments are conditioned on a return from the exploitation of the property acquired for the debt instrument (including payments conditioned on profits, sales, rents, production, or royalties);

(ii) The debt instrument would provide for adequate stated interest under paragraph (c) of this section at a test rate of interest equal to 80 percent of the test rate applicable to the debt instrument; and

(iii) It is reasonable to expect that contingent payments of interest described in paragraph (e)(2)(i) of this section will raise the total yield on the debt instrument to at least the test rate of interest applicable to the debt instrument.

(f) *Examples.* The provisions of paragraph (d) of this section are illustrated by the following examples. Each example assumes a 30-day month, 360-day year. In addition, each example assumes that the debt instrument is not a qualified debt instrument (as defined in section 1274A(b)) or issued in a potentially abusive situation.

Example 1. Variable rate debt instrument with a single rate over its entire term—(i) *Facts.* On January 1, 1994, A sells B nonpublicly traded property. In partial consideration for the sale, B issues a debt instrument in the principal amount of $1,000,000, payable in five years. The debt instrument calls for interest payable monthly at a rate of one percentage point above the average prime lending rate of a major bank for the month preceding the month of the interest payment. Assume that the test rate of interest applicable to the debt instrument is 10.5 percent, compounded monthly. On the date the test rate of interest is determined, one percentage point above the prime lending rate of the designated bank is 12.5 percent, compounded monthly.

(ii) *Debt instrument has adequate stated interest.* The debt instrument is a variable rate debt instrument within the meaning of § 1.1275–5. Under paragraph (d)(1)(i) of this section, the debt instrument is treated as if it provided for a fixed rate of interest equal to 12.5 percent, compounded monthly. Because the test rate of interest is 10.5 percent, compounded monthly, the debt instrument provides for adequate stated interest.

Example 2. Debt instrument with a capped variable rate. On July 1, 1995, A sells nonpublicly traded property to B in return for a debt instrument with a stated principal amount of $10,000,000 payable on July 1, 2005. Interest is payable on July 1 of each year, beginning on July 1, 1996, at the Federal short-term rate for June of the same year. The debt instrument provides, however, that the interest rate cannot rise above 8.5 percent, compounded annually. Assume that as of the date the test rate of interest with respect to the debt instrument is determined, the Federal short-term rate is eight percent, compounded annually. Assume further that as a result of the interest rate cap of 8.5 percent, compounded annually, the expected yield of the debt instrument is significantly less than the expected yield of the debt instrument if it did not include the interest rate cap. Under paragraph (d)(1)(ii) of this section, the variable payments are treated as contingent payments for purposes of this section.

§ 1.1274–3 Potentially abusive situations defined.

(a) *In general.* For purposes of section 1274, a "potentially abusive situation" means—

(1) A tax shelter (as defined in section 6662(d)(2)(C)(ii)); or

(2) Any other situation involving—

(i) A recent sales transaction;

(ii) Nonrecourse financing;

(iii) Financing with a term in excess of the useful life of the property; or

(iv) A debt instrument with clearly excessive interest.

(b) *Operating rules*—(1) *Debt instruments exchanged for nonrecourse financing.* "Nonrecourse financing" does not include an exchange of a nonrecourse debt instrument for an outstanding recourse or nonrecourse debt instrument.

(2) *Nonrecourse debt with substantial down payment.* The term "nonrecourse

financing" does not include a sale or exchange of a real property interest financed by a nonrecourse debt instrument, if, in addition to the nonrecourse debt instrument, the purchaser provides a down payment that equals or exceeds 20 percent of the total stated purchase price of the real property interest. For purposes of the preceding sentence, a "real property interest" means any interest, other than an interest solely as a creditor, in real property.

(3) *Clearly excessive interest.* Interest on a debt instrument is clearly excessive if the interest, in light of the terms of the debt instrument and the creditworthiness of the borrower, is clearly greater than the arm's length amount of interest that would have been charged in a cash lending transaction between the same two parties.

(c) *Other situations to be specified by ruling.* The Commissioner may designate by revenue ruling or revenue procedure situations that, although described in paragraph (a)(2) of this section, will not be treated as potentially abusive because they do not have the effect of significantly misstating basis or amount realized.

(d) *Consistency rule.* The issuer's determination that the debt instrument is or is not issued in a potentially abusive situation is binding on all holders of the debt instrument. However, the issuer's determination is not binding on a holder who explicitly discloses a position that is inconsistent with the issuer's determination. The disclosure must be made on the form prescribed by the Commissioner and attached to the holder's timely filed Federal income tax return for the tax year that includes the acquisition date of the debt instrument.

§ 1.1274–4 Test rate.

(a) *Determination of test rate of interest*—(1) *In general.* Except as otherwise provided in sections 1274(e) and 1274A, the test rate of interest is the applicable Federal rate based on an appropriate compounding period.

(2) *Sale-leaseback transactions.* For purposes of section 1274(e)(3), "related party" means a person related to the transferor within the meaning of sections 267(b) or 707(b)(1).

(b) *Applicable Federal rate defined.* Except as otherwise provided in this section, the applicable Federal rate is defined in section 1274(d). The applicable Federal rates are published monthly in revenue rulings (see § 601.601(d)(2)(ii)(*b*) of this chapter).

(c) *Certain variable rate debt instruments*—(1) *In general.* Except as otherwise provided in paragraph (c)(2) of this section, in the case of a variable rate debt instrument (as defined in § 1.1275–5(a)) with stated interest at a qualified floating rate (or rates), the applicable Federal rate is determined by reference to the longest interval between interest adjustment dates of the qualified floating rate, or, if the variable rate debt instrument provides for an initial fixed rate, the interval during which the fixed rate of interest applies, if it is longer.

(2) *Limitations on adjustments.* If, due to significant limitations on variations in a qualified floating rate of interest (such as those imposed by periodic or permanent limitations in the amount by which the variable rate can increase or decrease), the qualified floating rate in substance resembles a fixed rate, the applicable Federal rate is determined by reference to the term of the debt instrument.

(d) *Lower rate permitted in certain cases*—(1) *In general.* The applicable Federal rate with respect to certain debt instruments having a maturity of 6 months or less is the allowable Treasury index rate (as defined in paragraph (d)(2) of this section), if the issuer provides on the face of the debt instrument (or, if applicable, in the master advance agreement) that the debt instrument qualifies as having adequate stated interest under section 1274(d)(1)(D) and if the issuer and holder agree to treat the debt instrument as having adequate stated interest. All successors and assignees thereof are bound by this agreement.

(2) *Allowable Treasury index rates.* The allowable Treasury index rates are based on the rates published periodically by the Federal Reserve (*i.e.*, Federal Reserve Statistical Releases G.13 and H.15) and, at any given time, are the lowest of the following rates for any day within (or for any weekly period ending within) the preceding 15 days. In the case of debt instruments having a maturity of 3 or 6 months, the allowable Treasury index rates are the auction average yield (investment) on the most recently auctioned U.S. Treasury bills of the same maturity as the debt instrument. In the case of debt instruments having a maturity between 3 and 6 months, the allowable Treasury index rate is a linear interpolation of the auction average yield (investment) on the most recently auctioned U.S. Treasury bills with maturities of 3 and 6 months. In the case of debt instruments having a maturity of 3 months or less, the allowable Treasury index rate is the market yield on U.S. Treasury bills of the same maturity as the debt instrument.

(e) *Foreign currency loans.* In the case of a debt instrument that is denominated in a foreign currency, the applicable Federal rate is a foreign currency rate of interest analogous to the applicable Federal rate described in this section. An analogous foreign currency rate of interest is a rate of interest based on yields (with an appropriate compounding period) of the highest grade of outstanding marketable obligations denominated in such currency (excluding any obligations that benefit from special tax exemptions or preferential tax rates not available to debt instruments generally) with due consideration given to the maturities of the obligations.

(f) *Installment obligations.* For purposes of determining the test rate of interest for an installment obligation (as defined in § 1.1273–1(e)(1)), the term of the obligation is its weighted average maturity (as defined in § 1.1273–1(e)(3)).

(g) *Date for determining the applicable Federal rate of interest.* For purposes of section 1274, the applicable Federal rate with respect to a debt instrument is the lowest of the applicable Federal rates in effect during the three-month period ending with the first month in which there is a binding contract (including an irrevocable option) in writing that substantially sets forth the terms under which the sale or exchange is ultimately consummated. If there is no binding contract in writing for the sale or exchange, the three-month period described in the preceding sentence ends with the month in which the sale or exchange occurs.

(h) *Examples.* The provisions of this section are illustrated by the following examples. Each example assumes that the debt instrument is not issued in a potentially abusive situation.

Example 1. Variable rate debt instrument that limits the amount of increase and decrease in the rate—(i) *Facts.* On July 1, 1996, A sells nonpublicly traded property to B in return for a five-year debt instrument that provides for interest to be paid on July 1 of each year, beginning on July 1, 1997, based on the prime rate of a local bank on that date. However, the interest rate cannot increase or decrease from one year to the next by more than .25 percentage points (25 basis points).

(ii) *Significant limitation.* The debt instrument is a variable rate debt instrument as defined in § 1.1275–5. Assume that based on all the facts and circumstances, the limitation is a significant limitation on the variations in the rate of interest. Under paragraph (c)(2) of this section, the applicable Federal rate is determined by reference to the term of the debt instrument, and the applicable Federal rate is the Federal mid-term rate.

Example 2. Installment obligation—(i) *Facts.* On January 1, 1996, A sells

nonpublicly traded property to B in exchange for a debt instrument that calls for a payment of $500,000 on January 1, 2001, and a payment of $1,000,000 on January 1, 2006. The debt instrument does not provide for any stated interest.

(ii) *Determination of term.* The debt instrument is an installment obligation. Under paragraph (f) of this section, the term of the debt instrument is its weighted average maturity (as defined in § 1.1273–1(e)(1)). The debt instrument's weighted average maturity is 8.33 years, which is the sum of (A) the ratio of the first payment to total payments (500,000/1,500,000), multiplied by the number of complete years from the issue date until the payment is due (five years), and (B) the ratio of the second payment to total payments (1,000,000/1,500,000), multiplied by the number of complete years from the issue date until the second payment is due (ten years).

(iii) *Applicable Federal rate.* Based on the calculation in paragraph (ii) of this example, the term of the debt instrument is treated as 8.33 years. Consequently, the test rate is the mid-term applicable Federal rate.

§ 1.1274–5 Assumptions.

(a) *In general.* Section 1274 does not apply to a debt instrument if the debt instrument is assumed, or property is taken subject to the debt instrument, in connection with a sale or exchange of property, unless the terms of the debt instrument, as part of the sale or exchange, are modified in a manner that would constitute an exchange under section 1001.

(b) *Modification of debt instruments*—(1) *In general.* Except as provided in paragraph (b)(2) of this section, if a debt instrument is assumed, or property is taken subject to a debt instrument, in connection with a sale or exchange of property, the terms of the debt instrument are modified as part of the sale or exchange, and the modification triggers an exchange under section 1001, the modification is treated as a separate transaction taking place immediately before the sale or exchange and is attributed to the seller of the property. For purposes of this paragraph, a debt instrument is not considered to be modified as part of the sale or exchange unless the seller knew or had reason to know about the modification.

(2) *Election to treat buyer as modifying the debt instrument.* Rather than having the rules in paragraph (b)(1) of this section apply, the seller and buyer may jointly elect to treat the transaction as one in which the buyer first assumed the original (unmodified) debt instrument and then subsequently modified the debt instrument. For this purpose, the modification is treated as a separate transaction taking place immediately after the sale or exchange. The buyer and seller may only make this election before the last day (including extensions) for filing the Federal income tax returns of both the buyer and seller for the taxable year reporting the sale or exchange of the property and must attach the prescribed statement to their Federal income tax returns. The buyer and seller make the election by jointly signing the statement, which includes the following information—

(i) The names, addresses, and taxpayer identification numbers of the seller and buyer; and

(ii) A clear indication that the election is being made under paragraph (b)(2) of this section.

(c) *Wraparound indebtedness.* For purposes of paragraph (a) of this section, the issuance of wraparound indebtedness is not considered an assumption.

(d) *Consideration attributable to assumed debt.* If, as part of the consideration for the sale or exchange of property, the buyer assumes or takes subject to an indebtedness that was issued at a discount (including a debt instrument issued in a prior sale or exchange to which section 1274 applied), the portion of the buyer's basis in the property and the seller's amount realized attributable to the debt instrument equals the adjusted issue price of the debt instrument as of the date of the sale or exchange.

(e) *Example.* The provisions of paragraph (b)(2) of this section are illustrated by the following example.

Example. Assumption of a debt instrument in conjunction with a modification—(i) *Facts.* On July 1, 1996, B sells Blackacre to C for $40,000,000 subject to an existing debt instrument held by A with a face amount of $10,000,000 and a remaining term of ten years. The debt instrument provides for annual interest payments at eight percent, compounded annually. As part of the sale, C assumes the debt instrument and the debt instrument is materially modified within the meaning of section 1001.

(ii) *Modification occurs before the sale.* Unless B and C jointly elect under paragraph (b)(2) of this section, the modification is treated as taking place immediately before the sale in a transaction involving B and A. C is treated as having assumed the modified debt instrument.

§ 1.1274A–1 Special rules for certain transactions where stated principal amount does not exceed $2,800,000.

(a) *Overview.* Section 1274A allows the use of a lower test rate for purposes of sections 483 and 1274 in the case of a qualified debt instrument (as defined in section 1274A(b)) and, if elected by the borrower and the lender, the use of the cash receipts and disbursements method of accounting for interest on a cash method debt instrument (as defined in section 1274A(c)(2)). This section provides special rules for qualified debt instruments and cash method debt instruments.

(b) *Rules for both qualified and cash method debt instruments*—(1) *Sale-leaseback transactions.* A debt instrument issued in a sale-leaseback transaction (within the meaning of section 1274(e)) cannot be either a qualified debt instrument or a cash method debt instrument.

(2) *Debt instruments calling for contingent payments.* A debt instrument cannot be a qualified debt instrument unless it can be determined at the time of the sale or exchange that the maximum amount of the stated principal due under the debt instrument cannot exceed the amount specified in section 1274A(b). Similarly, a debt instrument cannot be a cash method debt instrument unless it can be determined at the time of the sale or exchange that the maximum amount of the stated principal due under the debt instrument cannot exceed the amount specified in section 1274A(c)(2)(A).

(3) *Aggregation of transactions*—(i) *General rule.* The aggregation rules of section 1274A(d)(1) are applied using a facts and circumstances test.

(ii) *Examples.* The following examples illustrate the application of section 1274A(d)(1) and paragraph (b)(3)(i) of this section.

Example 1. Aggregation of two sales to a single person. In two transactions evidenced by separate sales agreements, A sells undivided half interests in Blackacre to B. The sales are pursuant to a plan for the sale of a 100 percent interest in Blackacre to B. These sales or exchanges are part of a series of related transactions and, thus, are treated as a single sale for purposes of section 1274A.

Example 2. Aggregation of two purchases by unrelated individuals. Pursuant to a plan, unrelated individuals X and Y purchase undivided half interests in Blackacre from A and subsequently contribute these interests to a partnership in exchange for equal interests in the partnership. These purchases are treated as part of the same transaction and, thus, are treated as a single sale for purposes of section 1274A.

Example 3. Aggregation of sales made pursuant to a tender offer. Fifteen unrelated individuals own all the stock of X Corporation. Y Corporation makes a tender offer to these 15 shareholders. The terms offered to each shareholder are identical. Shareholders holding a majority of the shares of X Corporation elect to tender their shares pursuant to Y Corporation's offer. These sales are part of the same transaction and, thus, are treated as a single sale for purposes of section 1274A.

Example 4. No aggregation for separate sales of similar property to unrelated persons. Pursuant to a newspaper advertisement, X Corporation offers for sale similar condominiums in a single building.

The prices of the units vary due to a variety of factors, but the financing terms offered by X Corporation to all buyers are identical. The units are purchased by unrelated buyers who decided whether to purchase units in the building at the price and on the terms offered by X Corporation, without regard to the actions of other buyers. Because each buyer acts individually, the sales are not part of the same transaction or a series of related transactions and, thus, are treated as separate sales.

(4) *Inflation adjustment of dollar amounts.* Under section 1274A(d)(2), the dollar amounts specified in sections 1274A(b) and 1274A(c)(2)(A) are adjusted for inflation. The dollar amounts, adjusted for inflation, will be published in revenue rulings or other administrative pronouncements (see § 601.601(d)(2)(ii)(*b*) of this chapter).

(c) *Rules for cash method debt instruments*—(1) *Time and manner of making cash method election.* The borrower and lender must each make the election described in section 1274A(c)(2)(D) on or before the last day (including extensions) for filing each of their Federal income tax returns for the taxable year in which the debt instrument is issued and must attach the prescribed statement to their timely filed returns. The borrower and lender make the election by jointly signing the statement, which includes the following information—

(i) The names, addresses and taxpayer identification numbers of the borrower and lender;

(ii) A clear indication that an election is being made under section 1274A(c)(2); and

(iii) A statement that the debt instrument with respect to which the election is being made fulfills the requirements of a cash method debt instrument.

(2) *Successors of electing parties.* Except as otherwise provided in this paragraph (c)(2), the cash method election under section 1274A(c) applies to any successor of the electing lender or borrower (or any transferee thereof). Thus, for any period after the transfer of a cash method debt instrument, the successor takes into account the interest (including unstated interest) thereon under the cash receipts and disbursements method of accounting. Nevertheless, if the lender (or any successor thereof) transfers the cash method debt instrument to a taxpayer who uses an accrual method of accounting, section 1272 rather than section 1274A(c) applies to the successor of the lender (or a successor thereof) with respect to the debt instrument for any period after the date of the transfer. The borrower (or any successor thereof), however, remains on the cash receipts and disbursements method of accounting with respect to the cash method debt instrument.

(3) *Modified debt instrument.* In the case of a debt instrument issued in a debt-for-debt exchange that qualifies as an exchange under section 1001, the debt instrument is eligible for the election to be a cash method debt instrument if the other prerequisites to making the election in section 1274A(c) are met. However, if a principal purpose of the modification is to defer interest income or deductions through the use of the election, then the debt instrument is not eligible for the election.

(4) *Debt incurred or continued to purchase or carry a cash method debt instrument.* No interest deduction is allowed for interest on a debt instrument that is incurred or continued to purchase or carry a cash method debt instrument. For purposes of the preceding sentence, rules similar to those under section 265(a)(2) apply to determine whether a debt instrument is incurred or continued to purchase or carry a cash method debt instrument.

§ 1.1275–1 Definitions.

(a) *Applicability.* The definitions contained in this section apply for purposes of sections 163(e) and 1271 through 1275 and the regulations thereunder.

(b) *Adjusted issue price.* The adjusted issue price of a debt instrument at the beginning of the first accrual period is the issue price. Thereafter, the adjusted issue price of the debt instrument is the issue price of the debt instrument—

(1) Increased by the amount of OID previously includible in the gross income of any holder (determined without regard to section 1272(a)(7) and section 1272(c)(1)); and

(2) Decreased by the amount of any payment previously made on the debt instrument other than a payment of qualified stated interest.

(c) *OID.* "OID" means original issue discount (as defined in section 1273(a) and §§ 1.1273–1 and 1.1273–2).

(d) *Debt instrument.* Except as provided in section 1275(a)(1)(B) (relating to certain annuity contracts), "debt instrument" means any instrument or contractual arrangement that constitutes indebtedness under general principles of Federal income tax law.

(e) *Issue date*—(1) *Publicly offered debt instruments.* In the case of debt instruments that are publicly offered (as defined in § 1.1273–2(a)(2)), "issue date" means the first settlement date for the sale to the public (within the meaning of § 1.1273–2(a)(1)) of a substantial amount of the debt instruments included in that issue. See § 1.1275–2(d) for rules relating to reopenings of Treasury securities.

(2) *Non-publicly offered debt instruments not issued for property.* The issue date of an issue of debt instruments not issued for property and not publicly offered is the date on which the first buyer purchases an instrument that is part of the issue.

(3) *Debt instruments distributed by corporations with respect to stock.* The issue date of a debt instrument distributed by a corporation with respect to its stock is the date of the distribution.

(4) *Other debt instruments issued for property.* In the case of a debt instrument not described in paragraph (e)(1), (e)(2), or (e)(3) of this section, the issue date is the date on which the debt instrument is issued in a sale or exchange.

(f) *Tax-exempt obligations.* For purposes of section 1275(a)(3)(B), "exempt from tax" means exempt from Federal income tax.

(g) *Issue.* Two or more publicly offered debt instruments (as described in § 1.1273–2(a)(2)) are part of the same issue if they have the same credit and payment terms and are sold at substantially the same time pursuant to a common plan of marketing. Two or more debt instruments that are not publicly offered are part of the same issue if they have the same credit and payment terms and are issued as part of a single transaction or a series of related transactions. See § 1.1275–2(d) for rules relating to reopenings of Treasury securities.

(h) *Debt instruments issued by a natural person.* If an entity is a primary obligor under a debt instrument, the debt instrument is considered to be issued by the entity and not by a natural person even if a natural person is a co-maker and is jointly liable for the debt instrument's repayment. A debt instrument issued by a partnership is considered to be issued by the partnership as an entity even if the partnership is composed entirely of natural persons.

§ 1.1275–2 Special rules relating to debt instruments.

(a) *Payment ordering rule.* Each payment under a debt instrument (other than a payment of qualified stated interest or, in the case of the issuer, a payment of points deductible under section 461(g)(2)) is treated first as a payment of OID to the extent of the OID that has accrued as of the date of payment and has not been allocated to prior payments and second as a

payment of principal. Thus, no portion of any payment (other than, in the case of the issuer, a payment of points deductible under section 461(g)(2)) is treated as prepaid interest.

(b) *Debt instruments distributed by corporations with respect to stock.* A debt instrument distributed by a corporation with respect to its stock is treated as issued by the corporation for property. See section 1275(a)(4). Thus, under section 1273(b)(3), the issue price of a distributed debt instrument that is traded on an established market is its fair market value. The issue price of a distributed debt instrument that is not traded on an established market is determined under section 1274 or section 1273(b)(4). See also § 1.1275–1(e)(3) (issue date of distributed debt instrument).

(c) *Aggregation of debt instruments*—(1) *General rule.* Except as provided in paragraph (c)(2) of this section, debt instruments issued in connection with the same transaction or related transactions (determined based on all the facts and circumstances) are treated as a single debt instrument for purposes of sections 1271 through 1275 and the regulations thereunder. This rule ordinarily applies only to debt instruments of a single issuer that are issued to a single holder. The Commissioner may, however, aggregate debt instruments that are issued by more than one issuer or that are issued to more than one holder if the debt instruments are issued in an arrangement that is designed to avoid the aggregation rule (e.g., debt instruments issued by or to related parties or debt instruments originally issued by different issuers or to different holders with the understanding that the debt instruments will be assumed by a single issuer or transferred to a single holder).

(2) *Exception if separate issue price established.* Paragraph (c)(1) of this section does not apply to a debt instrument if—

(i) The debt instrument is part of an issue a portion of which is separately traded on an established market within the meaning of § 1.1273–2(c); or

(ii) The debt instrument is part of an issue a substantial portion of which is issued for cash (or for property traded on an established market within the meaning of § 1.1273–2(c)) to parties who are not related to the issuer or holder and who do not purchase other debt instruments of the same issuer in connection with the same transaction or related transactions.

(3) *Special rule for debt instruments that provide for the issuance of additional debt instruments.* If under the terms of a debt instrument (the original debt instrument) the holder may receive one or more additional debt instruments of the issuer, the additional instrument or instruments are aggregated with the original debt instrument. Thus, the payments made pursuant to an additional instrument are treated as made on the original debt instrument, and the distribution by the issuer of the additional instrument is not considered to be a payment made on the original debt instrument. See § 1.1272–1(d) for the treatment of certain rights to issue additional debt instruments in lieu of cash payments.

(4) *Examples.* The rules set forth in paragraphs (c)(1) and (c)(2) of this section are illustrated by the following examples.

Example 1. Exception for debt instruments issued separately to other purchasers. On January 1, 1994, Corporation M issues two series of bonds, Series A and Series B. The two series are sold for cash and have different terms. Although some holders purchase bonds from both series, a substantial portion of the bonds are issued to different holders. H purchases bonds from both series. Under the exception in paragraph (c)(2)(ii) of this section, the Series A and Series B bonds purchased by H are not aggregated.

Example 2. Tiered REMICs. Z forms a dual tier real estate mortgage investment conduit (REMIC). In the dual tier structure, Z forms REMIC A to acquire a pool of real estate mortgages and to issue a residual interest and several classes of regular interests. Contemporaneously, Z forms REMIC B to acquire as qualified mortgages all of the regular interests in REMIC A. REMIC B issues several classes of regular interests and a residual interest, and Z sells all of those interests to unrelated parties in a public offering. Under the general rule set out in paragraph (c)(1) of this section, all of the regular interests issued by REMIC A and held by REMIC B are treated as a single debt instrument for purposes of section 1271 through 1275.

(d) *Special rules for reopenings of Treasury securities*—(1) *Treatment of additional Treasury securities.* Additional Treasury securities issued in a qualified reopening are part of the same issue as the original Treasury securities and have the same issue date as the original Treasury securities. The issue price of both the original Treasury securities and the additional Treasury securities is the average price at which the original Treasury securities were sold.

(2) *Definitions*—(i) *Additional Treasury securities.* Additional Treasury securities are Treasury securities with terms that are in all respects identical to the terms of the original Treasury securities and that are issued (without regard to paragraph (d)(1) of this section) not more than twelve months after the original Treasury securities were first issued to the public.

(ii) *Original Treasury securities.* Original Treasury securities are securities comprising any issue of outstanding Treasury securities.

(iii) *Qualified reopening.* A qualified reopening is a reopening of Treasury securities intended to alleviate an acute, protracted shortage of the original Treasury securities.

§ 1.1275–3 OID information reporting requirements.

(a) *In general.* This section provides legending and information reporting requirements intended to facilitate the reporting of OID.

(b) *Information required to be set forth on face of debt instruments that are not publicly offered*—(1) *In general.* Except as provided in paragraph (b)(4) or paragraph (d) of this section, the requirements of this paragraph (b) apply to any debt instrument that is not publicly offered (within the meaning of § 1.1273–2(a)(2)), is issued in physical form, and has OID. The issuer of any such debt instrument must legend the instrument by stating on the face of the instrument that the debt instrument was issued with OID. In addition, the issuer must either—

(i) Set forth on the face of the debt instrument the issue price, the amount of OID, the issue date, and the yield to maturity; or

(ii) Provide the name and either the address or telephone number of a representative of the issuer who will, beginning no later than 10 days after the issue date, promptly make available to holders upon request the information described in paragraph (b)(1)(i) of this section.

(2) *Time for legending.* An issuer may satisfy the requirements of this paragraph by legending the debt instrument when it is first issued in physical form. Legending is not required, however, before the first holder of the debt instrument disposes of the instrument.

(3) *Legend must survive reissuance upon transfer.* Any new physical security that is issued (for example, upon registration of transfer of ownership) must contain any required legend.

(4) *Exceptions.* The requirements of paragraph (b)(1) of this section do not apply to debt instruments described in section 1272(a)(2) (relating to debt instruments not subject to the periodic OID inclusion rules), debt instruments issued by natural persons (as defined in § 1.6049–4(f)(2)), REMIC regular interests or other debt instruments

subject to section 1272(a)(6), or stripped bonds and coupons within the meaning of section 1286.

Par. 8. Section 1.1275–5, as proposed on April 8, 1986 (51 FR 12094), is revised to read as follows:

§ 1.1275–5 Variable rate debt instruments.

(a) *Applicability*—(1) *In general.* This section provides rules for variable rate debt instruments. For purposes of section 163(e) and sections 1271 through 1275, a variable rate debt instrument is a debt instrument that meets the conditions described in paragraphs (a)(2), (a)(3), and (a)(4) of this section.

(2) *Principal payments.* The debt instrument must provide for total noncontingent principal payments that are at least equal to the instrument's issue price.

(3) *Stated interest.* The debt instrument must provide for stated interest (compounded or paid at least annually) at—

(i) A single qualified floating rate;

(ii) A single qualified floating rate followed by a second qualified floating rate;

(iii) A single fixed rate followed by a single qualified floating rate; or

(iv) A single objective rate.

(4) *Current value.* The debt instrument must provide that each qualified floating rate or objective rate in effect during an accrual period is set at a current value of that rate. A current value is the value of the rate on any day occurring during the interval that begins three months prior to the first day on which that value is in effect under the debt instrument and ends one year following that day.

(b) *Qualified floating rate*—(1) *In general.* For purposes of this section, a floating rate is a qualified floating rate if variations in the rate can reasonably be expected to measure contemporaneous variations in the cost of newly borrowed funds. A multiple of a qualified floating rate is generally not a qualified floating rate.

(2) *Restrictions on the stated rate of interest.* Notwithstanding paragraph (b)(1) of this section, restrictions on the maximum or minimum stated interest rate, restrictions on the amount of increase or decrease in the stated interest rate, or other similar restrictions generally do not result in a rate failing to be treated as a qualified floating rate. However, a rate is not a qualified floating rate if it is subject to a cap (or similar restriction) that is very likely to cause the interest rate in one or more accrual periods, known as of the issue date, to be significantly less than the overall expected return on the debt instrument. In addition, a rate is not a qualified floating rate if it is subject to a floor (or similar restriction) that is very likely to cause the interest rate in one or more accrual periods, known as of the issue date, to be significantly more than the overall expected return on the debt instrument.

(c) *Objective rate*—(1) *In general.* For purposes of this section, an objective rate is a rate (other than a qualified floating rate) based on the price of property that is actively traded (within the meaning of section 109(d)(1)), or on an index of the prices of such property. An objective rate is also a rate that is based on one or more qualified floating rates, but that is not itself a qualified floating rate under paragraph (b)(1) of this section. For example, a multiple of a qualified floating rate is an objective rate. An objective rate, however, must be determined using a single formula that is fixed throughout the term of the debt instrument.

(2) *Exceptions*—(i) *Restrictions on the stated rate of interest.* Notwithstanding paragraph (c)(1) of this section, a restriction described in paragraph (b)(2) of this section or a formulation of the objective rate that is substantially similar to such a restriction generally does not result in the rate failing to be an objective rate. However, a rate is not an objective rate if it is subject to a cap (or similar restriction or a formulation of the objective rate that is substantially similar to a cap) that is very likely to cause the interest rate in one or more accrual periods, known as of the issue date, to be significantly less than the overall expected return on the debt instrument. In addition, a rate is not an objective rate if it is subject to a floor (or similar restriction or a formulation of the objective rate that is substantially similar to a floor) that is very likely to cause the interest rate in one or more accrual periods, known as of the issue date, to be significantly more than the overall expected return on the debt instrument.

(ii) *Tax-exempt debt.* Notwithstanding paragraph (c)(1) of this section, a debt instrument governed by section 103 does not provide for stated interest at an objective rate if the issuer, contemporaneously with the issuance, enters into one or more financial contracts (other than a debt instrument of the issuer) that substantially offset the variations in the stated interest.

(iii) *Nonfunctional currency.* Notwithstanding paragraph (c)(1) of this section, an objective rate does not include a rate based on the price of nonfunctional currency of the taxpayer or a qualified business unit (as defined in section 989(a)).

(d) *Examples.* The provisions of paragraph (b) and (c) of this section are illustrated by the following examples. For purposes of these examples, assume that the exceptions in paragraphs (b)(2) and (c)(2) of this section do not apply.

Example 1. Rate is based on LIBOR. X issues a debt instrument that provides for annual payments of interest at a rate equal to the one-year London Interbank Offered Rate (LIBOR) at the end of each year. Variations in one-year LIBOR over the term of the instrument can reasonably be expected to measure contemporaneous variations in the cost of newly borrowed funds over that term. Accordingly, the rate is a qualified floating rate.

Example 2. Rate increased by a fixed amount. X issues a debt instrument that provides for annual payments of interest at a rate equal to 200 basis points (two percent) plus the current value, at the end of each year, of the average yield on one-year Treasury securities as published in Federal Reserve bulletins. This rate can reasonably be expected to measure contemporaneous variations in the cost of newly borrowed funds. Accordingly, the rate is a qualified floating rate.

Example 3. Rate is based on commercial paper rate. X issues a debt instrument that provides for a rate of interest that is periodically adjusted to equal the current interest rate of Bank's commercial paper. This rate can reasonably be expected to measure contemporaneous variations in the cost of newly borrowed funds. Accordingly, the rate is a qualified floating rate.

Example 4. Rate is based on an inflation index. X issues a debt instrument that provides for annual payments of interest at a rate equal to 400 basis points (four percent) plus the annual percentage change in a general inflation index (*e.g.* the Consumer Price Index, U.S. City Average, All Items, for all Urban Consumers, seasonally unadjusted). Because inflation is a component of borrowing costs, this rate can reasonably be expected to measure contemporaneous variations in the cost of newly borrowed funds. Accordingly, the rate is a qualified floating rate.

Example 5. Changes in the price of a commodity index. X issues a debt instrument that provides for annual interest payments at the end of each year at a rate equal to the percentage increase, if any, in the price of an actively traded commodity for the year immediately preceding the payment. The rate of interest on this debt instrument is not reasonably expected to measure contemporaneous variations in the cost of newly borrowed funds. Accordingly, the stated rate is not a qualified floating rate. However, because the rate is based on the price of actively traded property, the rate is an objective rate.

Example 6. Changes based on issuer profits. Z issues a debt instrument that provides for annual interest payments equal to 20 percent of Z's net profits earned during the year immediately preceding the payment. This rate is not reasonably expected to measure contemporaneous variations in the cost of newly borrowed funds. Accordingly,

the rate is not a qualified floating rate. In addition, because the stated rate is neither based on the price of actively traded property nor based on a qualified floating rate, the rate is not an objective rate.

Example 7. Changes based on a multiple of an interest index. Z issues a debt instrument with annual interest payments at a rate equal to the excess of three times annual LIBOR over ten percent. Changes in the rate are not reasonably expected to measure changes in the cost of newly borrowed funds (*e.g.*, a one percent increase in LIBOR results in a three percent increase in the rate, which does not measure changes in the costs of newly borrowed funds). Accordingly, the rate is not a qualified floating rate. However, because the stated rate is based on a qualified floating rate using a formula that is fixed over the term of the debt instrument, the rate is an objective rate.

Example 8. Inverse floater. Z issues a debt instrument that provides for monthly interest payments equal to the stated principal amount times a rate equal to ten percent, compounded monthly, less the value of one-month LIBOR as of the payment date. This rate is not reasonably expected to measure contemporaneous variations in the cost of newly borrowed funds. Accordingly, the rate is not a qualified floating rate. However, because the stated rate is based on a qualified floating rate, the rate is an objective rate.

(e) *Qualified stated interest on a variable rate debt instrument.* In general, stated interest on a variable rate debt instrument is qualified stated interest if the interest is unconditionally payable in cash or in property (other than debt instruments of the issuer) at least annually. *See* § 1.1273–1(c)(1) to determine whether interest is unconditionally payable.

However, if a variable rate debt instrument provides for a fixed rate followed by a qualified floating rate or a qualified floating rate followed by another qualified floating rate, any accelerated interest or deferred interest on the debt instrument (as described in paragraph (f) of this section) is not qualified stated interest.

(f) *Accelerated and deferred interest*—(1) *Debt instruments that provide for a fixed rate followed by a qualified floating rate*—(i) *In general.* A variable rate debt instrument that provides for a fixed rate followed by a qualified floating rate has accelerated interest or deferred interest unless the fixed rate is a reasonable substitute for the qualified floating rate during the interval for which the fixed rate is applicable (the initial interval). The fixed rate is a reasonable substitute for the qualified floating rate if the variable rate debt instrument would have approximately the same fair market value as a hypothetical debt instrument with identical terms except that the hypothetical debt instrument provides for the qualified floating rate during the initial interval. If, based on this comparison, the variable rate debt instrument would be more valuable than the hypothetical debt instrument, the variable rate debt instrument has accelerated interest. Conversely, if the variable rate debt instrument would be less valuable than the hypothetical debt instrument, the variable rate debt instrument has deferred interest.

(ii) *Accelerated interest*—(A) *Amount of accelerated interest.* Accelerated interest is the stated interest accruing in the initial interval that is attributable to the number of percentage points that must be subtracted from the fixed rate to make the fixed rate a reasonable substitute for the qualified floating rate.

(B) *Example of accelerated interest.* The rule in paragraph (f)(1)(ii)(A) of this section is illustrated by the following example.

Example. A five-year debt instrument provides for annual payments of interest. For the first two years, the rate of interest is five percent, compounded annually. For the final three years, the rate of interest is the current value of one-year LIBOR on each payment date. The debt instrument is a variable rate debt instrument. If the fair market value of the variable rate debt instrument would be greater than the fair market value of an otherwise identical hypothetical debt instrument that provides for one-year LIBOR during the first two years, the variable rate debt instrument has accelerated interest. Assume that the fair market value of the variable rate debt instrument would be the same as that of the hypothetical debt instrument if the fixed rate on the variable rate debt instrument was four percent, rather than five percent. The amount of accelerated interest on the variable rate debt instrument is the amount of stated interest during the first two years that corresponds to 100 basis points (one percent) per year. The remainder of the stated interest (four percent, compounded annually, for the first two years and one-year LIBOR for the last three years) is qualified stated interest if it is unconditionally payable at least annually.

(iii) *Deferred interest*—(A) *Amount of deferred interest.* Deferred interest is the stated interest accruing in the subsequent interval that is attributable to the number of percentage points that must be subtracted from the qualified floating rate to make the fixed rate a reasonable substitute for the qualified floating rate.

(B) *Example of deferred interest.* The rule in paragraph (f)(1)(iii)(A) of this section is illustrated by the following example.

Example. A five-year debt instrument provides for annual payments of interest. For the first two years, the rate of interest is three percent, compounded annually. For the final three years, the rate of interest is the current value of one-year LIBOR on each payment date. The debt instrument is a variable rate debt instrument. If the fair market value of the variable rate debt instrument would be less than the fair market value of an otherwise identical hypothetical debt instrument that provides for one-year LIBOR during the first two years, the debt instrument has deferred interest. Assume that the fair market value of the variable rate debt instrument would be the same as that of the hypothetical debt instrument if the qualified floating rate on the variable rate debt instrument was one-year LIBOR less 100 basis points (one percent), rather than one-year LIBOR. The amount of deferred interest on the variable rate debt instrument is the amount of stated interest during the last three years that corresponds to 100 basis points (one percent) per year. The remainder of the stated interest (three percent, compounded annually, for the first two years and one-year LIBOR less 100 basis points (one percent) for the last three years) is qualified stated interest if it is unconditionally payable at least annually.

(2) *Debt instruments that provide for one qualified floating rate followed by a second qualified floating rate.* If a variable rate debt instrument provides for one qualified floating rate followed by a second qualified floating rate, the amount of accelerated interest or deferred interest is determined in accordance with the principles of paragraph (f)(1) of this section. For example, if the interest rate of a variable rate debt instrument during the initial interval is less than the interest rate during the subsequent interval by a fixed number of percentage points (*e.g.*, LIBOR followed by LIBOR plus three percentage points), the amount of deferred interest is the stated interest in the subsequent interval that is attributable to that fixed number of percentage points.

(g) *General principles for accrual of OID with respect to a variable rate debt instrument*—(1) *In general.* A variable rate debt instrument may have OID because all stated interest is not unconditionally payable at least annually, because the stated principal amount exceeds the issue price (true discount), or because a portion of the stated interest is accelerated or deferred interest. OID must be recognized in a manner that reasonably reflects the principles described in paragraphs (g)(2) and (g)(3) of this section. See § 1.1273–1(d) to determine whether the amount of OID is de minimis.

(2) *Accrual of stated interest other than qualified stated interest, accelerated interest or deferred interest.* OID for an accrual period arising from stated interest that is not unconditionally payable at least annually (other than accelerated or deferred interest) is the amount of this stated interest that actually accrues

under the terms of the debt instrument during the accrual period.

(3) *Accrual of true discount, accelerated interest, and deferred interest.* Any true discount, accelerated interest, or deferred interest on a variable rate debt instrument must be allocated to an accrual period using the constant yield method (described in § 1.1272–1). A reasonable application of the constant yield method is to disregard all stated interest with respect to the variable rate debt instrument (other than any accelerated or deferred interest) and assume that the instrument provides for qualified stated interest payments at the end of each accrual period computed at a reasonable fixed rate. For purposes of the preceding sentence, qualified stated interest payments are generally computed at a reasonable fixed rate if the payments, combined with any true discount, accelerated interest or deferred interest, provide a yield to maturity that approximates the applicable Federal rate.

(h) *Examples.* The provisions of paragraphs (e), (f), and (g) of this section are illustrated by the following examples.

Example 1. Variable rate debt instrument with qualified stated interest. On January 1, 1994, A purchases at original issue, for $100,000, B corporation's debt instrument that matures on January 1, 2004, and has a stated principal amount of $100,000, payable at maturity. The debt instrument provides for semiannual payments of interest payable on January 1 and July 1 of each year, beginning on July 1, 1994. The rate on which each interest payment is based is the Federal short-term rate in effect at the beginning of each semiannual period that immediately precedes the payment. Under paragraph (b)(1) of this section, the interest rate is a qualified floating rate. Under paragraph (e) of this section, all stated interest payments are qualified stated interest payments.

Example 2. Variable rate debt instrument with an initial fixed rate and no accelerated or deferred interest—(i) *Facts.* On January 1, 1994, E purchases at original issue, for $100,000, F corporation's debt instrument that matures on December 31, 2003, and has a stated principal amount of $100,000, payable at maturity. The debt instrument provides for annual payments of interest on December 31 of each year, beginning on December 31, 1994. For the first five years, the interest rate is five percent, compounded annually. For the final five years, the interest rate is the value of one-year LIBOR on each payment date plus 100 basis points (one percent).

(ii) *Qualified stated interest.* The debt instrument is a variable rate debt instrument. Assume that, based on all the facts and circumstances, the variable rate debt instrument has approximately the same fair market value as an otherwise identical hypothetical debt instrument that provides for annual payments of one-year LIBOR plus 100 basis points (one percent) for the first five years. The fixed rate of five percent, compounded annually, is a reasonable substitute for one-year LIBOR plus 100 basis points (one percent), compounded annually. Under paragraph (f)(1) of this section, the debt instrument does not provide for accelerated or deferred interest. Thus, all of the stated interest payments are qualified stated interest payments.

Example 3. Variable rate debt instrument with an initial fixed rate and with deferred interest—(i) *Facts.* On January 1, 1994, E purchases at original issue, for $100,000, F corporation's debt instrument that matures on December 31, 2003, and has a stated principal amount of $100,000, payable at maturity. The debt instrument provides for annual payments of interest on December 31 of each year, beginning on December 31, 1994. For the first five years, the rate of interest is four percent, compounded annually. For the final five years, the rate of interest is the value of one-year LIBOR on each payment date plus 200 basis points (two percent).

(ii) *Determination of deferred interest.* The debt instrument is a variable rate debt instrument. Under paragraph (f)(1) of this section, the variable rate debt instrument provides for accelerated or deferred interest if the fixed rate is not a reasonable substitute for the qualified floating rate during the initial period. Assume that, based on all of the facts and circumstances, four percent, compounded annually, is not a reasonable substitute for one-year LIBOR plus 200 basis points (two percent), compounded annually, and that four percent, compounded annually, is a reasonable substitute for one-year LIBOR, compounded annually. The debt instrument has deferred interest. The amount of the deferred interest is the amount of stated interest accruing in years six through ten that corresponds to two hundred basis points (two percent) per year. Under paragraph (e) of this section, for the first five years, all of the stated interest payments are qualified stated interest, and for the last five years, stated interest payments at a rate equal to one-year LIBOR are qualified stated interest payments.

(iii) *Accrual of deferred interest on a variable rate debt instrument.* Under paragraph (g)(3) of this section, the amount of deferred interest allocable to an accrual period is determined using the constant yield method. A reasonable application of the constant yield method is to disregard all qualified stated interest on the variable rate debt instrument and assume that the instrument provides for qualified stated interest at a reasonable fixed rate. Assume that a reasonable fixed rate of interest is five percent because this rate, in combination with the 200 basis points (two percent) per year of deferred interest in years six through ten, produces a yield that approximates the applicable Federal rate. The constant yield method is applied as if the debt instrument provided for stated interest at five percent for the initial five years and stated interest at seven percent for the final five years (of which 200 basis points is not qualified stated interest), with a corresponding yield of 5.86 percent, compounded annually. The yearly OID accruals attributable to the deferred interest are described below:

Year	Assumed payments	Adjusted issue price beginning	OID	Assumed qualified stated interest	Adjusted issue price ending
1994	$5,000	$100,000.00	$858.62	$5,000	$100,858.62
1995	5,000	100,858.62	908.92	5,000	101,768.54
1996	5,000	101,768.54	962.17	5,000	102,729.71
1997	5,000	102,729.71	1,018.54	5,000	103,748.25
1998	5,000	103,748.25	1,078.21	5,000	104,826.47
1999	7,000	104,826.47	1,141.38	5,000	103,967.85
2000	7,000	103,967.85	1,091.08	5,000	103,058.93
2001	7,000	103,058.93	1,037.83	5,000	102,096.76
2002	7,000	102,096.76	981.46	5,000	101,078.21
2003	107,000	101,078.21	921.79	5,000	0
	.....	.....	10,000.00	.....	.....

Example 4. Variable rate debt instrument with an initial qualified floating rate and deferred interest—(i) *Facts.* On January 1, 1994, C purchases at original issue, for $100,000, D corporation's debt instrument that matures on December 31, 2003, and has a stated principal amount of $100,000, payable at maturity. The debt instrument provides for annual payments of interest on December 31 of each year, beginning on December 31, 1994. For the first five years, the interest rate is the value of one-year

LIBOR on each payment date less 100 basis points (one percent). For the subsequent five years, the interest rate is the value of one-year LIBOR on each payment date plus 200 basis points (two percent).

(ii) *Determination of deferred interest.* The debt instrument is a variable rate debt instrument. Interest on the debt instrument is stated at a qualified floating rate followed by another qualified floating rate. Under paragraph (f)(2) of this section, the variable rate debt instrument has deferred interest equal to 300 basis points (three percent) per year for years six through ten. Under paragraph (e) of this section, payments based on a rate equal to one-year LIBOR less 100 basis points (one percent) are qualified stated interest payments.

(iii) *Accrual of deferred interest.* Under paragraph (g)(3) of this section, the amount of deferred interest allocable to an accrual period is determined using the constant yield method. A reasonable application of the constant yield method is to disregard all qualified stated interest on the variable rate debt instrument and assume that the instrument provides for qualified stated interest at a reasonable fixed rate. Assume that a reasonable fixed rate of interest is five percent because this rate, in combination with the 300 basis points (three percent) per year of deferred interest in years six through ten, produces a yield that approximates the applicable Federal rate. The constant yield method is applied as if the debt instrument provided for stated interest at five percent for the initial five years and stated interest at eight percent for the final five years (of which 300 basis points is not qualified stated interest), with a corresponding yield of 6.27 percent, compounded annually. The yearly OID accruals attributable to the deferred interest are described below:

Year	Assumed payments	Adjusted issue price beginning	OID	Assumed qualified stated interest	Adjusted issue price ending
1994	$5,000	$100,000.00	$1,273.57	$5,000	$101,273.57
1995	5,000	101,273.57	1,353.47	5,000	102,627.04
1996	5,000	102,627.04	1,438.38	5,000	104,065.42
1997	5,000	104,065.42	1,528.62	5,000	105,594.03
1998	5,000	105,594.03	1,624.52	5,000	107,218.55
1999	8,000	107,218.55	1,726.43	5,000	105,944.98
2000	8,000	105,944.98	1,646.53	5,000	104,591.51
2001	8,000	104,591.51	1,561.62	5,000	103,153.13
2002	8,000	103,153.13	1,471.38	5,000	101,624.52
2003	108,000	101,624.52	1,375.49	5,000	0
	.....	.....	15,000.00	.....	.....

Example 5. Variable rate debt instrument with interest paid at maturity. On January 1, 1994, A lends B $100,000 in exchange for B's note having an issue price of $100,000 repayable in ten years. Interest compounds on June 30 and December 31 of each year, at a rate equal to the Federal short-term rate in effect on the compounding date, but the payment of interest is deferred until maturity. Assume that on June 30, 1994, the Federal short-term rate for that date is 5 percent, compounded semiannually. Because the stated interest is not payable at least annually, the stated interest is not qualified stated interest and its accrual is determined under paragraph (g)(2) of this section. The amount of OID that accrues under the debt instrument for the first semiannual accrual period is $2,500.

Shirley D. Peterson,

Commissioner of Internal Revenue.

BILLING CODE 4830-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 61

[FRL-4547-3]

National Emissions Standards for Hazardous Air Pollutants

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; correction.

SUMMARY: EPA is publishing a Memorandum of Understanding (MOU) Between the Environmental Protection Agency and the Nuclear Regulatory Commission Concerning Clean Air Act Standards for Radionuclide Releases from Facilities other than Nuclear Power Reactors Licensed by NRC or its Agreement States. This MOU was supposed to be published as an attachment to the Proposed Rule to Rescind subpart I for Facilities Other than Nuclear Power Reactors, which was published on December 1, 1992, 57 FR 56877; however, the MOU was accidently omitted from publication in the **Federal Register.**

The proposal to rescind subpart I for NRC licensees other than nuclear power reactors was issued pursuant to section 112(d)(9) of the Clean Air Act, which allows the EPA to decline to regulate NRC licensees if the Administrator determines by rule that the NRC regulatory program provides an ample margin of safety to protect the public health. The proposal to rescind is based on an extensive survey of these licensees which found that all surveyed facilities are presently in compliance with the quantitative emission limit in subpart I and on commitments made by NRC in the MOU with EPA.

FOR FURTHER INFORMATION CONTACT: Fran Jonesi, Air Standards and Economics Branch, Criteria and Standards Division, Office of Radiation and Indoor Air (6602J), Environmental Protection Agency, Washington, DC 20460, (202) 233-9229.

Dated: December 11, 1992.

Michael Shapiro,

Acting Assistant Administrator, Air and Radiation.

Memorandum of Understanding Between the Environmental Protection Agency and Nuclear Regulatory Commission Concerning Clean Air Act Standards for Radionuclide Releases from Facilities Other Than Nuclear Power Reactors Licensed by NRC or Its Agreement States

Subpart I, 40 CFR Part 61

In accordance with sections 112(d)(9) and 122(c)(2) of the Clean Air Act, as amended in 1990, and in order to minimize regulatory duplication and conserve resources in the control of radionuclide emissions to air from facilities other than nuclear power reactors, licensed by the Nuclear Regulatory Commission (NRC) or its Agreement States under the Atomic Energy Act of 1954, as amended, NRC and the Environmental Protection Agency (EPA) agree as follows:

General Goal of Agreement

EPA and NRC are entering into this MOU to ensure that facilities other than nuclear power reactors, licensed by the NRC, will continue to limit air emissions of radionuclides to levels that result in protection of the public health with an ample margin of safety. The guiding objective is that the actions under this MOU provide assurance that

public health is being and will continue to be protected with an ample margin of safety.

NRC will ensure that facilities licensed by Agreement States will also continue to limit air emissions of radionuclides to levels that result in protection of the public health with an ample margin of safety. NRC will accomplish this through its established procedures for continuous oversight of Agreement States' radiation control programs. Under the Atomic Energy Act, as amended, NRC is required to periodically review Agreement State programs for adequacy and compatibility with NRC's programs. Routine reviews are complete, in-depth examinations of Agreement State regulatory programs and are conducted every other calendar year. NRC review visits are usually conducted between routine reviews and maintain familiarity with the Agreement State program. Through this established process, NRC can provide adequate assurance that Agreement State-licensed facilities will continue to provide an ample margin of safety in protecting the public from air emissions of radionuclides.

NRC Lead Actions

1. NRC agrees to develop and issue a regulatory guide on designing and implementing a radiation protection program to ensure that doses resulting from effluents from licensed facilities will remain as low as is reasonably achievable (ALARA). The guide will establish a specific goal of 10 millirem per year total effective dose equivalent to the maximally exposed individual from radionuclide air emissions from licensed facilities and operations. The guide will also describe the types of administrative programs and objectives for environmental radiation protection programs that the NRC staff finds to be acceptable in satisfying the requirement in 10 CFR 20.1101(b).

The regulatory guide will be published for public comment and will be revised in response to comments, as appropriate, prior to finalization. NRC will publish a draft of the regulatory guide in October 1992, and after public comments have been incorporated, issue a final guide by April 1993. Once compliance with the revised 10 CFR part 20 is mandatory, and the final guide is available, NRC will review licensee compliance with the revised 10 CFR part 20 radiation protection program requirement through license renewals and ongoing inspection efforts. If any licensee fails to comply with the ALARA requirements of the revised 10 CFR part 20 and license conditions, NRC will take enforcement action in accordance with NRC's Enforcement Policy in Appendix C of 10 CFR part 2.

2. NRC agrees to develop inspection guidance on ALARA considerations for effluents and incorporate ALARA considerations in Standard Review Plans. Thus, license reviewers and inspectors will have comprehensive guidance and review criteria for assessments of ALARA at various licensed facilities. NRC will develop these documents based on the ALARA Regulatory Guide, which will be prepared with the benefit of public comment. NRC intends to complete the inspection guidance and Standard Review Plan shortly after completing the Regulatory Guide on ALARA for environmental effluents of radionuclides.

3. Pursuant to NRC's existing oversight authority for Agreement State programs described in the general goal of this MOU, NRC will work with Agreement States to adopt and implement regulations compatible with NRC's regulations in the revised 10 CFR part 20. These efforts will include maintenance of effluents, including air emissions, at ALARA levels.

4. Five years from the execution of the MOU, NRC will undertake a survey of a subset of NRC-licensees to verify that the NRC regulatory program is continuing to provide an ample margin of safety.

EPA Lead Actions

1. By November 15, 1992, EPA will develop and publish in the **Federal Register** a Notice of Proposed Rulemaking, pursuant to its authority under Clean Air Action Section 112(d)(9), to rescind its existing regulations in 40 CFR part 61, subpart I, as applied to licensed facilities other than nuclear power reactors. This proposal, which will occur only if the purposes and provisions of this MOU are proceeding effectively, requires that the Administrator find that the regulatory program implemented by NRC will protect public health with an ample margin of safety. It is expected, subject to public notice and comment, that the basis for this finding will ultimately be provided through the final report of EPA's survey of NRC and Agreement State licensees and through implementation of the commitments of this MOU. Final action on the rulemaking will be taken as soon as practicable after completion of the Notice of Proposed Rulemaking to rescind subpart I, as described in this paragraph.

2. In anticipation of issuance of the proposed rescission of 40 CFR part 61, subpart I for licensed facilities other than nuclear power reactors, EPA will propose a rule to further stay the effectiveness of subpart I for these facilities during the pendency of the rulemaking on rescission. The final rule staying the effectiveness of subpart I will be issued on or before the date EPA proposes rescission and is contingent upon the provisions of this MOU proceeding effectively.

Effective Date, Revision, and Termination

This memorandum shall be effective immediately and shall continue in effect until revised by mutual agreement, unless terminated by any party after 120 days notice in writing.

Dated: August 28, 1992.

Nuclear Regulatory Commission.

Robert M. Bernero,

Director, Office of Nuclear Material Safety and Safeguards.

Dated: September 4, 1992.

Environmental Protection Agency.

William G. Rosenberg,

Assistant Administrator for Air and Radiation.

BILLING CODE 6560-50-M

COMMISSION ON NATIONAL AND COMMUNITY SERVICE

45 CFR Parts 2500, 2501, 2502, 2503, 2504, 2505, and 2506

National and Community Service Grant Programs; Amendments

AGENCY: Commission on National and Community Service.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commission on National and Community Service proposes to amend its regulations concerning the programs authorized by the National and Community Service Act of 1990, as amended. The majority of these proposed changes reflect Congressional amendments to our original Act, while others result from experience gained from our first year of grant-making. The changes concern definitions, selection criteria, eligibility for grant awards and program participation, confidentiality of information about participants, and the amount of post-service benefits in the National Service Program. The Commission feels that these proposed amendments to its regulations will contribute to an easier grant process, from the perspective of both prospective grantees and the Commission.

DATES: Comments must be received on or before January 5, 1993.

ADDRESSES: Comments should be sent to Terry Russell, Commission on National and Community Service, 529 14th Street, NW., suite 452, Washington, DC 20045.

FOR FURTHER INFORMATION CONTACT: Terry Russell at (202) 724–0600.

SUPPLEMENTARY INFORMATION: These proposed rule changes would amend 45 CFR chapter XXV to clarify the definition of administrative costs, reflect Congressionally mandated changes to the Commission's enabling legislation, and provide the Commission the freedom to make changes in program focus or emphasis through application forms and notices of availability of funds in the **Federal Register**.

Administrative Costs

Under our Act and regulations, only 5% of Commission funds provided a grantee may be used for "administrative costs." Since our Act does not define administrative costs, the Commission provided a definition in its regulations. Consistent with the Commission's desire that program funds not pay for indirect costs, applicants in our first year of operation were advised that although indirect costs could be included in the match requirement, they could not be included in administrative costs unless they were directly apportioned to the program to be funded by the Commission. This proved problematic, especially for institutions of higher education, since their accounting systems were geared to determining indirect costs, and not "administrative costs."

The Commission desires to simplify as much as possible the administrative burdens on its grantees. Therefore the Commission proposes to modify the definition of administrative costs to include indirect costs in order to reflect the realities of accounting systems of many grantees that already classify "administrative costs" as indirect costs.

Conservation and Youth Service Corps

Technical amendments to the National and Community Service Act of 1990 (Pub. L. 102–384) call for three changes in the regulations with respect to Conservation and Youth Service Corps. First, in § 2500.2 paragraph (36) the time frame during which summer youth corps programs can be funded by the Commission has been expanded from June through August to April 30 through October 1.

Second, § 2503.1 is expanded to allow the Commission to fund part-time as well as full-time corps. During our first year of operation, we had numerous requests from corps for funding of part-time corps.

Third, in § 2503.21 the lower age limit for participation in summer programs is lowered from 15 to 14 years of age in order to include all high school students.

Program Focus and Emphasis

In its first year, the Commission awarded grants to a number of different types and models of programs, leaving others that the Commission was unable to fund, due either to lack of funds or lack of qualifying applications. The Commission also found that certain program elements or focuses were particularly beneficial. As a result, in its second year the Commission has elected to emphasize certain types of programs, or provide examples, as in Subtitle D. These should provide helpful guidance to applicants by narrowing somewhat the focus of grant awards.

In order to avoid confusion caused by having criteria for funding and program emphases partially described in the regulations and partially in applications and other notices, it has been determined that all criteria should be published in one place. The Commission, like other government agencies, does not wish to delineate the criteria for awarding grants too specifically in its regulations. Therefore the Commission proposes to modify the Criteria for Funding in §§ 2501.16, 2502.5, 2503.4, 2504.13 by referring to more specific information about program criteria, focuses, and emphases in notices of availability of funds in the **Federal Register** and in grant applications. Statutory criteria will, of course, continue to apply and will be referred to in notices of availability of funds and the Commission's application forms, as will the Commission's criteria of quality, innovation, replicability and sustainability.

National Service (Subtitle D) Post-Service Benefits

In accordance with the Higher Education Amendments of 1992 (Pub. L. 102–325), § 2504.10 now provides that the non-transferable post-service benefits of $2500 per year of full-time service shall be increased in conjunction with increases in the maximum Pell grant each year.

Assistance for Head Start

In accordance with the technical amendments, § 2505.41 is amended to expand the eligibility criteria for grant awards under Head Start to include organizations working under memoranda of agreement with ACTION as well as organizations who have received grants from ACTION to operate Foster Grandparent programs.

Confidentiality of Information

Also due to changes made by the technical amendments, regulations concerning the confidentiality of information acquired about participants through evaluation are modified (§ 2506.8). All information about individuals will still be kept confidential except in the case of prior written consent by the participant concerned. disclosure of information about participants in the aggregate will be permitted.

List of Subjects

45 CFR Part 2500

Grant programs—Social programs, Organization and functions.

45 CFR Part 2501

Grant programs—Social programs, Elementary and secondary education.

45 CFR Part 2502

Grant programs—Social programs, Colleges and universities.

45 CFR Part 2503

Grant programs—Social programs, Youth.

45 CFR Part 2504

Grant programs—Social programs, Community development block grants. Community action programs.

45 CFR Part 2505

Grant programs—Social programs, Community development.

45 CFR Part 2506

Grant programs—Social programs, Grants administration.

For the reasons set forth in the preamble, the Commission on National and Community Service proposes to amend Chapter XXV, parts 2500–2506, in title 45 of the Code of Federal Regulations to read as follows:

1. The authority citation for Chapter XXV continues to read as follows:

Authority: 42 U.S.C. 12501 et seq.

2. Section 2500.2 is amended by revising paragraphs (a)(2) and (a)(36) to read as follows:

§ 2500.2 Definitions.

* * * * *

(a) * * *

(2) *Administrative Costs or expenses* include: costs associated with overall program administration; salaries and benefits for directors and administrative staff of existing organizations that sponsor funded programs; and insurance that protects the grantee (e.g., liability insurance). Non-administrative (direct service) Costs include: costs

relating to service delivery (services that directly benefit participants); salaries and benefits of staff who train, place, and supervise such staff; costs of providing living allowances and usual in-service education and training for participants; and evaluation of the program as required by the terms and conditions of the grant. Particular costs charged to the program might be pro-rated (with documentation) between direct services and administration. Indirect costs may be included in administrative costs.

* * * * *

(36) *Summer Program* means a youth corps program authorized under this chapter that is limited to the period beginning after April 30 and ending before October 1.

* * * * *

2. Section 2501.16 is revised to read as follows:

§ 2501.16 Criteria for funding.

All criteria for funding can be found in the National and Community Service Act of 1990, as amended, (42 U.S.C. 12525 (a) & (b)). The grant application itself will also refer to the statutory criteria and delineate additional criteria for the selection process.

3. section 2502.5 should be revised to read as follows:

§ 2502.5 Criteria for evaluating applications.

All criteria for funding can be found in the National and Community Service Act of 1990, as amended, (42 U.S.C. 12531). The grant application itself will also refer to the statutory criteria and delineate additional criteria for the selection process..

4. Section 2503.1 should be revised to read as follows:

§ 2503.1 Purpose.

The purpose of this program is to provide grants for the creation or expansion of full-time, part-time, summer and year-round youth service or conservation corps programs, including grants for the addition of participants, an increase in the number of hours or weeks during which the program operates, the involvement of an existing program in new types of service, or the improvement of an existing program consistent with this part.

5. Section 2503.4 is revised to read as follows:

§ 2503.4 Selection criteria.

All criteria for funding can be found in the National and Community Service act of 1990, as amended, (42 U.S.C. 12541–12555). The grant application itself will also refer to the statutory criteria and delineate additional criteria for the selection process.

6. Section 2503.21(a)(1)(i) is revised to read as follows:

§ 2503.21 Age, citizenship, and other criteria for enrollment.

(a) * * *

(1) * * *

(i) Not less than 16 years nor more than 25 years of age, except that summer programs may include individuals not less than 14 years of age nor more than 21 years of age at the time of enrollment of such individuals; and

* * * * *

7. Section 2504.10 is amended by revising paragraph (b)(1) to read as follows:

§ 2504.10 Value of post-service benefits.

* * * * *

(b)(1) The Commission, through the State, shall annually provide to each full-time participant a non-transferable post-service benefit for each year of service that such participant provides to the program, which benefit shall be equal in value to $2,500 for each such year, and which benefit shall be adjusted to match any increases in the maximum Pell Grant as provided by the annual appropriation. Funds for this benefit shall be included in the budget for the program and reflected in the grant request.

* * * * *

8. Section 2504.13 is revised to read as follows:

§ 2504.13 Criteria for evaluating applications.

All criteria for funding can be found in the National and Community Service Act of 1990, as amended, (42 U.S.C. 12572 (a) & (b)). The grant application itself will also refer to the Statutory criteria and delineate additional criteria for the selection process.

9. Section 2505.41 is revised to read as follows:

§ 2505.41 Eligibility.

Only those organizations which have a grant from ACTION, the Federal Domestic Volunteer Agency, to operate a Foster Grandparent program, or those organizations operating under memoranda of agreement with ACTION, are eligible to receive awards.

10. Section 2506.8 is amended by revising paragraph (d) to read as follows:

§ 2506.8 Program evaluation.

* * * * *

(d) The Commission shall keep confidential the information acquired about individual participants or members of control groups from evaluations under paragraph (c) of this section, except that

(1) The content of any information described in (d) may be disclosed with the prior written consent of the individual participant with respect to whom the information is maintained; and that

(2) The Commission may disclose information about the aggregate characteristics of such participants.

Dated: December 14, 1992.

Catherine Milton,

Executive Director.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Chapter I

[CC Docket No. 92–166]

MSS Above 1 GHZ Negotiated Rulemaking Committee

AGENCY: Federal Communications Commission.

ACTION: Notice of advisory committee establishment and meetings.

SUMMARY: The Federal Communications Commission has established the MSS Above 1 GHz Negotiated Rulemaking Committee (Committee). The Committee will provide expert advice and recommendations on technical matters related to the establishment and regulation of a mobile satellite service in the 1610–1626.5/2483.5–2500 MHz frequency bands. The establishment of this Committee is necessary and is in the public interest.

In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, this notice also advises interested persons of the initial and proposed subsequent meetings of the Committee.

DATES:

Wednesday, January 6, 1993, at 9:30 a.m.
Tuesday, January 12, 1993, at 9:30 a.m.
Tuesday, January 26, 1993, at 9:30 a.m.

Wednesday, March 3, 1993, at 9:30 a.m.
Tuesday, March 9, 1993, at 9:30 a.m.
Thursday, March 18, 1993, at 9:30 a.m.
Wednesday, March 24, 1993, at 9:30 a.m.

Tuesday, March 30, 1993, at 9:30 a.m.

ADDRESSES: Federal Communications Commission, 1919 M Street NW., room 856, Washington, DC 20554.

SUPPLEMENTARY INFORMATION: The Committee was established by the Federal Communications Commission to bring together applicants, existing users of the frequency bands, and other affected entities, to discuss and to recommend approaches to resolve technical sharing and coordination issues involved in the establishment and regulation of a new satellite service. The FCC has solicited nominations for membership on the Committee pursuant to the Negotiated Rulemaking Act of 1990, Public Law 101–648, November 28, 1990, and will select members to achieve a balanced membership given the purposes and objectives of the Committee. See Public Notice in CC Docket No. 92–166, 57 FR 39661 (September 1, 1992), 7 FCC Rcd 5241 (1992).

The agenda for the first meeting is as follows:

1. Introductory Comments: Gerald P. Vaughan, Deputy Chief Common Carrier Bureau; Thomas S. Tycz, Designated Federal Officer and Deputy Chief, Domestic Facilities Division
2. Selection of Facilitator
3. Approval of Agenda
4. Committee Charter
5. Committee Membership
6. Work Program

8. Agenda for Next Meeting
9. Other Business

At subsequent meetings, the Committee will seek to determine and to recommend approaches to resolve the domestic sharing problems among the applicants and to resolve potential coordination problems with existing users of the spectrum and with users in adjacent frequencies. The Committee will also discuss international sharing and coordination issues.

Members of the general public may attend the meetings. The FCC will attempt to accommodate as many people as possible. However, admittance will be limited to the seating available. There will be no public oral participation, but the public may submit written comments to Fern J. Jarmulnek, Staff Attorney, Satellite Radio Branch, before each meeting.

FOR FURTHER INFORMATION CONTACT: Kathleen A. Campbell, Administrative Assistant of the MSS Above 1 GHz Negotiated Rulemaking Committee, at (202) 634–1952.

47 CFR Part 73

[MM Docket No. 92–291, RM–8133]

Radio Broadcasting Services; Cambridge and St. Michaels, MD

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition filed by C.W.A. Broadcasting, Inc., proposing the reallotment of Channel 232A from Cambridge, Maryland, to St. Michaels, Maryland, and modification of the construction permit for Station WFBR(FM) to specify Channel 232A at St. Michaels. The coordinates for Channel 232A at St. Michaels are 38–49–17 and 76–17–27.

DATES: Comments must be filed on or before February 4, 1993, and reply comments on or before February 19, 1993.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, as follows: Charles W. Adams, Jr., President, C.W.A. Broadcasting, Inc., 35 Solomon's Island Road, Annapolis, Maryland 21401.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 92–291, adopted November 25, 1992, and released December 14, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, 1990 M Street, NW., suite 640, Washington, DC 20036, (202) 452–1422.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contact.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

[MM Docket No. 92–293, RM–8128]

Radio Broadcasting Services; Stillwater, OK

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition filed by Kenneth R. Greenwood seeking the allotment of Channel 251A to Stillwater, Oklahoma, as the community's third local commercial FM service. Channel 251A can be allotted to Stillwater in compliance with the Commission's minimum distance separation requirements with a site restriction of 9 kilometers (6 miles) northwest to avoid a short-spacing to Stations KMOD-FM, Channel 248C, and KVOO-FM, Channel 253C, Tulsa, Oklahoma. The coordinates for Channel 251A at Stillwater are North Latitude 36–09–27 and West Longitude 97–09–20.

DATES: Comments must be filed on or before February 4, 1993, and reply comments on or before February 19, 1993.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Brent Weingardt, Esq., Comsultants, Inc., 4500 West Virginia Avenue, NW., Bethesda, Maryland 20814 (Counsel to petitioner).

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 92–293, adopted November 30, 1992.

and released December 14, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452–1422, 1990 M Street NW., suite 640, Washington, DC 20036.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. 47 CFR Part 73

(MM Docket No. 92–294, RM–8129)

Radio Broadcasting Services; Seaside, OR

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition filed by Ken's Corporation seeking the allotment of Channel 255A to Seaside, Oregon, as the community's second local FM service. Channel 255A can be allotted to Seaside in compliance with the Commission's minimum distance separation requirements with a site restriction of 6.7 kilometers (4 miles) southwest to avoid a short-spacing to Station KEZX–FM, Channel 255C, Seattle, Washington, at coordinates North Latitude 45–59–15 and West Longitude 124–00–34. Canadian concurrence in the allotment is required since Seaside is located within 320 kilometers (200 miles) of the U.S.-Canadian border.

DATES: Comments must be filed on or before February 4, 1993, and reply comments on or before February 19, 1993.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Margaret L. Tobey, Esq., Akin, Gump, Hauer & Feld, L.L.P., 1333 New Hampshire Avenue, NW., suite 400, Washington, DC 20036 (Counsel to petitioner).

GENERAL SERVICES ADMINISTRATION

48 CFR Part 6101

Amendments to GSA Board of Contract Appeals Rules of Procedure

AGENCY: Board of Contract Appeals, GSA.

ACTION: Request for comments.

SUMMARY: This notice invites written comments on proposed amendments to the rules of procedure of the GSA Board of Contract Appeals, which will govern all proceedings before the Board. These include protests of procurements involving acquisitions of automatic data processing (ADP) equipment and services, and contract disputes. The amendments are intended to clarify the Board's existing rules of procedure, as well as to increase the efficiency of proceedings at the Board. The rules have not been amended since June 1985, shortly after the Board first began hearing ADP protests. The Board intends to issue final, revised rules after considering all comments to the proposed amendments.

DATES: Comments must be submitted on or before February 12, 1993.

ADDRESSES: Copies of the proposed rules may be obtained from and written comments submitted to: Office of the Clerk of the Board, c/o Ms. Beatrice Jones, GSA Board of Contract Appeals, 18th & F Streets, NW., Washington DC 20504. (202) 501–0116.

FOR FURTHER INFORMATION CONTACT: Wilbur T. Miller, Chief Counsel, GSA Board of Contract Appeals. (202) 501–0890.

SUPPLEMENTARY INFORMATION:

A. Background

Section 2713 of the Competition in Contracting Act of 1984, 40 U.S.C. 759(f), provides that protests involving ADP procurements may be filed with the Board. The Act also provides that the Board is to adopt and issue rules and procedures necessary for the expeditious resolution of such protests. In addition, the Administrator of General Services has delegated to the Board the authority to adopt and issue rules necessary for the resolution of contract disputes under the Contract Disputes Act of 1978, 41 U.S.C. 601–613. The proposed rules have been approved by majority vote of the Board's members.

B. Regulatory Flexibility Act

The General Services Administration certifies that these proposed revisions will not have significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 et seq.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the proposed revisions to not impose recordkeeping or information collection requirements, or collection of information from

offerors, contractors, or members of the public which requires the approval of OMB under 44 U.S.C. 3501 et seq.

BILLING CODE 6820-AL-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

49 CFR Chapter III

[FHWA Docket No. MC-92-33]

Zero-Based Review of the Federal Motor Carrier Safety Regulations; Additional Public Outreach Session

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of public outreach session; request for comments; closing of public docket.

SUMMARY: In September 1992, the FHWA successfully completed an initial series of four public outreach sessions in St. Paul, Minnesota; Portland, Oregon; San Antonio, Texas; and Los Angeles, California, pursuant to the notice published in the **Federal Register** on August 18, 1992 (57 FR 37392). On November 6, 1992 (57 FR 53089), the FHWA announced six additional public outreach sessions in Albany, New York; Atlanta, Georgia; Albuquerque, New Mexico; Casper, Wyoming; Kansas City, Missouri; and Washington, DC, to obtain comments and recommendations for improvement of the Federal Motor Carrier Safety Regulations (FMCSRs) as they relate to the commercial motor carrier industry.

This notice announces one additional public outreach session to be held January 20, 1993. This outreach session will be held in conjunction with the United Bus Owners of America (UBOA)/ American Bus Association (ABA) Bus Expo. The outreach sessions are an essential part of FHWA's zero-base regulatory review project. The zero-base review is intended to develop a performance-based regulatory system that will best enhance commercial motor vehicle safety. These sessions will be held to obtain information, views, and opinions from representatives of the motor carrier industry and other interested persons. The FHWA will continue to accept written comments on the zero-base program until April 1, 1993. After the comment period has closed and the comments have been analyzed, the FHWA will continue the rulemaking process with the goal of developing a regulatory structure that is more performance-oriented.

DATES: Written comments must be received on or before April 1, 1993. The outreach session will be held from 1:30 p.m. to 5:30 p.m., local time, on January 20, 1993.

ADDRESSES: Submit written, signed comments to FHWA Docket MC-92-33, room 4232, HCC-10, Office of the Chief Counsel, Federal Highway Administration, 400 Seventh Street, SW., Washington, DC 20590. All comments received will be available for examination at the above address from 8:30 a.m. to 3:30 p.m., e.t., Monday through Friday, except legal Federal holidays. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard.

The outreach session will be held at the following location: Hyatt Regency Downtown Miami, 400 SE Second Avenue, Miami, Florida 33131, 305/ 358-1234.

FOR FURTHER INFORMATION CONTACT: Ms. Paula R. Robinson, telephone (202) 366-2984, or Mr. Robert Redmond, telephone (202) 366-5014, Federal Highway Administration, Office of Motor Carriers, 400 Seventh Street, SW., room 3404, Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except legal Federal holidays. In advance of the session, all individuals desiring to appear or planning to present information should contact Mr. Stan Hamilton, Office of Motor Carriers, telephone (202) 366-0665.

SUPPLEMENTARY INFORMATION: The Federal Motor Carrier Safety Regulations were enacted under the Motor Carrier Act of 1935, Ch. 498, 49 Stat. 546 (codified as amended at 49 U.S.C. 3102 and 3104). The regulations have been incrementally modified ever since. The authority for the current regulations has been vested in the Department of Transportation since 1966 (49 U.S.C. 1655(e)). All private, exempt commodity, common, and contract motor carriers of property and all for-hire carriers of passengers, as defined in the FMCSRs, are currently subject to these regulations. Additionally, the FHWA has proposed making private motor carriers of passengers subject to certain minimum safety requirements (54 FR 7362; notice of proposed rulemaking (1989)).

The FHWA recently completed a review of the FMCSRs in accordance with the President's January 28, 1992, Memorandum to Heads of Certain Executive Departments and Agencies to identify and eliminate any unnecessary regulatory burdens. Having completed that review, the FHWA believes it is appropriate to reconsider the underlying basis for all safety rules and to identify a performance-oriented regulatory structure that would enhance safety while minimizing the burdens placed on industry.

The FHWA believes the motor carrier industry will benefit from a regulatory structure that is more performance-oriented as opposed to prescriptive. Many of the basic provisions of the FMCSRs have remained unchanged for more than 50 years while others have been amended numerous times. The FHWA believes this has led to a set of regulations which can be difficult to understand and enforce. The FHWA plans to use the comments and recommendations gathered from all outreach sessions as the foundation to develop a comprehensive, unified set of performance-oriented safety requirements designed to ensure maximum safety on the Nation's highways. Discussion at the sessions will focus on identifying "who," "what," and "how" the FHWA should regulate commercial motor carriers and drivers to improve highway safety.

The goals and objectives of the zero-base review project are to: (1) Focus on those areas of enforcement and compliance which are most effective in reducing motor carrier accidents; (2) reduce compliance costs; (3) encourage innovation; (4) clearly and succinctly describe what is required; and (5) facilitate enforcement. The resulting regulatory system would apply to all appropriate segments of the motor carrier industry and would be enforceable by Federal, State and local authorities.

The performance-based regulations would be responsive to the needs of the industry and would enhance the safe operation of commercial motor vehicles.

Concurrent with the outreach effort, the FHWA has opened a public docket, MC-92-33, to allow commenters and interested parties who might be unable to attend the outreach sessions the opportunity to respond to the zero-base effort.

(23 U.S.C. 315; 49 CFR 1.48)

Issued on: December 14, 1992.

T.D. Larson,

Administrator.

BILLING CODE 4910-22-M

NATIONAL TRANSPORTATION SAFETY BOARD

49 CFR PART 826

Equal Access to Justice Act Fees

AGENCY: National Transportation Safety Board.

ACTION: Notice of proposed rule and request for comment.

SUMMARY: The NTSB is proposing to adopt a cost-of-living adjustment to the standard $75 cap for the calculation of attorneys fees permitted under the Equal Access to Justice Act (EAJA). The agency proposes to use the Bureau of Labor Statistics Consumer Price Index for All Urban Consumers, All Items, as the inflator. It intends that the cap may be inflated to the year of the provision of service by an inflation factor equal to the ratio of the index for the year of service over the index for the base year. The agency requests comments on this methodology.

DATES: Comments are invited by January 21, 1992.

ADDRESSES: An original and two copies of any comments must be submitted to: Office of General Counsel, National Transportation Safety Board, 490 L'Enfant Plaza East, SW., Washington, DC 20594, Attention: EAJA Rules.

Comments may be inspected at the above address, Room 6333, from 8 a.m. to 5 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Jane F. Mackall, (202) 382–1952.

SUPPLEMENTARY INFORMATION: The NTSB currently has rules, at 49 CFR part 826, that specify the procedures and standards that govern applications for attorneys fees and expenses in proceedings arising out of the Board's jurisdiction to hear appeals from actions taken by the Administrator of the Federal Aviation Administration. To the extent that fees and expenses are available in these proceedings, the awards are the result of the enactment in 1981 (and subsequent permanent reenactment in 1985) of the Equal Access to Justice Act, the relevant portion of which is codified at 5 U.S.C. 504. EAJA, as it is commonly called, was designed to diminish the deterrent effect of high legal costs on challenges to unjustified legal action by the government, though the Act was not designed to reimburse fees, even reasonable fees, without limit. The Act provides that, where fees are awarded, they shall be based on prevailing market rates for the kind and quality of service furnished, but that they shall not be awarded in excess of $75 per hour unless the agency determines by regulation that an increase in the cost of living or some special factor justifies a higher fee.

It is beyond dispute that a $75 fee cap would not have permitted full recovery of all attorneys fees even in 1981, and this was understood by Congress. Yet, to the extent that the value of the capped amount has diminished in real terms over time, so too is diminished the subsidy's ability to act as an inducement to a citizen to pursue vindication of legal rights against improper government action. There is no reason to believe that Congress intended an inflation-driven erosion of the utility of its enactment. It is, therefore, the purpose of this rulemaking to restore the original vitality of the EAJA process in NTSB procedures.

This agency has received several petitions requesting an adjustment to the EAJA fee cap.[1] Our inaction on these petitions has been based, in part, on the fact that no other agency had taken the opportunity afforded by clear statutory language to offer an inflation-based adjustment to the original cap. (The Administrative Conference of the United States, which has been charged by Congress with oversight of agency practice under EAJA, reported in 1991 that no agency had even initiated a fee adjustment rulemaking.) However, when EAJA was enacted its provisions were made simultaneously effective for agency and court proceedings alike. Perhaps because of their experience with other fee shifting arrangements, the courts have never hesitated to authorize cost-of-living based adjustment to the $75 cap. As the erosion of inflation compounds over time, we think that it has become imperative to follow the lead of the courts and announce by rule an inflation-based adjustment to our cap. As one court put it:

> Congress, by specifying the market rate for fees * * * intended to ensure that adequate representation would be available * * * for oftentimes "a party who chooses to litigate an issue against the Government is not only representing his or her own vested interest but is also refining and formulating public policy." * * * Congress did not think, however, that extraordinary fees were needed to ensure adequate representation; consequently, it limited public reimbursement * * * to $75 per hour * * * Congress was aware, however, that increases in the cost of living (inflation) might erode the fee-reimbursement scheme of EAJA; this is evidenced by inclusion in the Act of a cost-of-living escalator * * * By allowing district courts to adjust upwardly the $75 cap to account for inflation, Congress undoubtedly expected that the courts would use the cost-of-living escalator to insulate EAJA fee awards from inflation * * *.

Meyer v. *Sullivan*, 958 F.2d 1029 (11th Cir. 1992) (holding that courts must consider awarding inflation-adjustment fees). Citation omitted.

Reference to several leading court decisions is also informative as to the issues we can expect regarding what the new cap should be. Our examination of these decisions leads us to the view that the new cap should be self-adjusting, that is, based on reference to a known index that can be used prospectively for continual adjustment. We believe that this index should be the Bureau of Labor Statistics Consumer Price Index, All Urban Consumers, U.S. City Average, All Items, unless a more specific geographic index is published for the locality. This "CPI" is the generally understood "cost of living" index that is widely used as a price inflator in labor and contract matters. We recognize that there may be price inflators that are more specifically geared to the cost of legal services, but the statutory language under which we act speaks broadly to inflation adjustment for the cost of living, and we believe Congress must be understood to have said what it meant. See *Sullivan* v *Sullivan*, 958 F.2d 574 (4th Cir. 1992) (rejecting use of a CPI sub-category geared to legal services).

We also recognize that there could be controversy over the selection of the base year, because Congress has (arguably) twice chosen $75 as the fee cap, first in 1981 and then again in 1985. Our initial impression, supported by judicial precedent, is that 1981 should be the base, and that is our proposal here. See *Perales* v. *Casillas*, 950 F.2d 1066 (5th Cir. 1992). Additionally, we believe that the cost-of-living adjustments, if warranted, should be made only up to the year of provision of the service in question. Inflation to the year of decision represents an impermissible interest charge against the government. See Perales, *supra*.

The Board does not now intend to consider by rule any other specific adjustment to the fee cap, although the statute does contemplate that so-called "special factor" considerations must also be addressed by rule. (Our existing rule inexplicably refers to this issue as "special circumstances," a term which is used elsewhere in EAJA with entirely different consequences. We will make

[1] Petitions have been filed by Richard B. Thompson, George O. Grant, Harold M. Gay, John W. Cronin, David L. Ebershoff, Mark S. Kahan (on behalf of C and M Airways, Inc, d/b/a Armadillo Air Associates), and Robert V. Stewart. These petitions are granted to the extent discussed in this notice, and they are incorporated into and will be included in the record in this proceeding.

editorial amendment to our rule so that it conforms to the statutory usage.) The Board's experience with its docket does not lead to the conclusion that enforcement cases tried at the administrative level are of the type that warrant a "special factors" exception, at least not one based on considerations so certain of description that they can be captured in a standard rule. However, because of the statutory requirement for a regulation-based exception for special factors—that is, because our administrative law judges may not address this issue solely in the context of specific adjudication—the Board will consider the creation by rule of an additional exception to the standard fees to be exercised in its discretion, if satisfactory parameters for a special factor award can be developed. Given the problematic nature of this undertaking, the Board does not intend to postpone final adoption of a rule in this docket pending resolution of this separate question.

Finally, we do not propose to authorize supplemental filings in cases where EAJA fees have already been the subject of a Board order. We do, however, contemplate allowing petitioners in pending cases to supplement their filings to reflect the proposed standards, and intend any subsequent awards to be premised on the revised standard, if adopted. We caution all applicants to recall that inflation-adjusted rates would be available only after a finding that the prevailing market rate is in excess of $75.

As required by the Regulatory Flexibility Act, we certify that the proposed rules will not have a substantial impact on a significant number of small entities. What effect they may have, however, would be beneficial to small entities. The rules are not major rules for the purposes of Executive Order 12291. We also conclude that this action will not significantly affect either the quality of the human environment or the conservation of energy resources, nor will this action impose any information collection requirements requiring approval under the Paperwork Reduction Act.

List of Subjects in 49 CFR Part 826

Claims, Equal access to justice, Lawyers.

Accordingly, 49 CFR part 826 is proposed to be amended as set forth below.

PART 826—RULES IMPLEMENTING THE EQUAL ACCESS TO JUSTICE ACT OF 1980

1. The authority citation for part 826 continues to read as follows:

Authority: Section 203(a)(1) Pub. L. 99–80, 99 Stat. 186 (5 U.S.C. 504).

2. Section 826.6 is proposed to be amended by revising paragraph (b) to read as follows:

§ 826.6 Allowable fees and expenses.

* * * * *

(b)(1) No award for the fee of an attorney or agent under this part may exceed $75 indexed as follows:

$$\frac{X}{\$75/hr} = \frac{CPI\text{–}New}{CPI\text{–}1981}$$

The CPI to be used is the CPI, All Urban Consumers, U.S. City Average, All Items, except where a more pertinent local, All Item index is available. The numerator of that equation is the yearly average for the year(s) the services were provided, with each year calculated separately. This formula increases the $75 statutory cap by indexing it to reflect cost of living increases, as authorized in 5 U.S.C. 504(b)(1)(A)(ii). Application of these increased rate caps requires affirmative findings under § 821.6(c). For ease of application, available U.S. City figures are reproduced as follows:

1981	90.9
1982	96.5
1983	99.6
1984	103.9
1985	107.6
1986	109.6
1987	113.6
1988	118.3
1990	130.7
1991	136.2

(2) No award to compensate an expert witness may exceed the highest rate at which the agency pays expert witnesses. However, an award may also include the reasonable expenses of the attorney, agent, or witness as a separate item, if the attorney, agent, or witness originarily charges clients separately for such expenses.

* * * * *

3. Section 826.7 is proposed to be revised to read as follows:

§ 826.7 Rulemaking on maximum rates for attorney fees.

(a) In addition to increases based on cost of living (*see* § 826.6), attorney fees in some or all of the proceedings covered by this part may also be increased beyond the statutory cap of $75 if warranted by special factors (such as limited availability of attorneys qualified to handle certain types of proceedings). The Board will conduct any rulemaking proceedings for this purpose under the informal rulemaking procedures of the Administrative Procedure Act.

(b) any person may file with the Board a petition for rulemaking to increase the maximum rate for attorney fees by demonstrating that a special factor(s) justifies a higher fee. The petition shall identify the rate the petitioner believes the Board should establish and the proceeding(s) or types of proceedings in which the rate should be used. It should also explain fully the reasons why the higher rate is warranted. The Board will respond to the petition within 60 days after it is filed, by initiating a rulemaking proceeding, denying the petition, or taking other appropriate action.

Issued in Washington, DC on this 14th day of December.

Carl W. Vogt,

Chairman.

BILLING CODE 7533–01–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 655

[Docket No. 921221–2321]

Atlantic Mackerel, Squid, and Butterfish Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Proposed initial specifications for the 1993 and 1994 Atlantic mackerel, squid, and butterfish fisheries and request for comment.

SUMMARY: NMFS issues these proposed initial specifications for the 1993 and 1994 fishing years for Atlantic mackerel, squid, and butterfish. Regulations governing these fisheries require the Secretary of Commerce (Secretary) to publish specifications for the upcoming fishing year. This action is intended to fulfill this requirement and promote the development of the U.S. Atlantic mackerel, squid, and butterfish fisheries.

DATES: Public comments must be received on or before January 21, 1993.

ADDRESSES: Copies of the Mid-Atlantic Fishery Management Council's "quota paper" and recommendations are available from John C. Bryson, Executive Director, Mid-Atlantic Fishery Management Council, room 2115, Federal Building, 300 South New

Street, Dover, DE 19901. Copies of the draft environmental assessment for this action are available from Richard B. Roe, Regional Director, Northeast Region, National Marine Fisheries Service, One Blackburn Drive, Gloucester, MA 01930.

FOR FURTHER INFORMATION CONTACT: Myles Raizin, (508) 281–9104 or Richard Seamans, (508) 281–9244.

SUPPLEMENTARY INFORMATION: Regulations implementing the Fishery Management Plan for Atlantic Mackerel, Squid, and Butterfish Fisheries (FMP) prepared by the Mid-Atlantic Fishery Management Council (Council), appear at 50 CFR part 655. These regulations stipulate that the Secretary will publish a notice specifying the initial annual amounts of the initial optimum yield (IOY) as well as the amounts for allowable biological catch (ABC) domestic annual harvest (DAH), domestic annual processing (DAP), joint venture processing (JVP), and total allowable levels of foreign fishing (TALFF) for the species managed under the FMP. No reserves are permitted under the FMP for any of these species. Regulations implementing Amendment 4 to the FMP allow the Council to recommend specifications for these fisheries for up to three consecutive years.

Since an update of the Atlantic mackerel stock assessment will be forthcoming in 1994, the Council has chosen to recommend specifications for 1993 and 1994, only. Procedures for determining the initial annual amounts are found in § 655.22.

The following table contains the proposed initial specifications for Atlantic mackerel, *Loligo* squid, *Illex* squid, and butterfish. These specifications are based on the recommendations of the Mid-Atlantic Fishery Management Council (Council).

TABLE.—PRELIMINARY INITIAL ANNUAL SPECIFICATIONS FOR ATLANTIC MACKEREL, SQUID, AND BUTTERFISH FOR THE FISHING YEARS, JANUARY 1 THROUGH DECEMBER 31, 1993 AND JANUARY 1 THROUGH DECEMBER 31, 1994

[In metric tons (mt)]

Specifications	Squid		Atlantic mackerel	Butterfish
	Loligo	Illex		
Max OY[1]	44,000	30,000	[2] N/A	16,000
ABC[3]	44,000	30,000	850,000	16,000
IOY	44,000	30,000	100,000	10,000
DAH	44,000	30,000	[4] 100,000	10,000
DAP	44,000	30,000	50,000	10,000
JVP	0	0	35,000	0
TALFF	0	0	0	0

[1] Max OY as stated in the FMP;
[2] Not applicable; see the FMP;
[3] IOY can rise to this amount;
[4] Contains 15,000 mt. projected recreational catch based on the formula contained in the regulations (50 CFR part 666).

Atlantic Mackerel

The FMP provides that ABC in U.S. waters for the upcoming fishing year is that quantity of mackerel that could be caught in U.S. and Canadian waters minus the estimated catch in Canadian waters, while still maintaining a spawning stock size in the year following the year for which catch estimates and quotas are being prepared, equal to or greater than 600,000 mt. Using an estimated spawning stock biomass of 1,500,000 mt and an estimated Canadian catch of 50,000 mt, the Council derived an ABC of 850,000 mt.

The proposed IOY for the 1993 and 1994 Atlantic mackerel fisheries is set at 100,000 mt, equal to the specified DAH. The proposed specification for DAH is computed by adding the estimated recreational catch, the proposed specified DAP, and the proposed specified JVP. The recreational component of DAH is estimated at 15,000 mt using a formula found at § 655.21(b)(2)(ii). DAP and JVP components of DAH are estimated using the Council's annual processor survey. The U.S. processors projected a U.S. production of 46,105 mt for the upcoming fishing year. Based upon responses from the annual processor survey and inquiries from Estonia, the Council has recommended and the Regional Director proposes a specification of 35,000 mt of JVP for the 1993 and 1994 fisheries. The Council also recommended and the Regional Director proposes a DAP of 50,000 mt yielding a DAH of 100,000 mt, which includes the 15,000 mt recreational component.

Zero TALFF is proposed for the 1993 and 1994 Atlantic mackerel fisheries. The exclusion of directed foreign fishing is recommended by the Council and proposed by the Regional Director as described in the draft environmental assessment. However, the final TALFF specification will also be based on public comment.

The Council used testimony from both the domestic fishing and processing industries and analysis of nine economic factors found at § 655.21(b)(2)(ii) to determined that Atlantic mackerel produced from directed foreign fishing would directly compete with U.S. processed products, thus limiting markets available to U.S. processors. The industry was nearly unanimous in its assessment that a specification of TALFF would impede the continued growth of the U.S. fishery. The Council believes that an expanding mackerel market and uncertainty regarding world supply, due to the economic and political restructuring in Eastern Europe, may substantially increase opportunities for U.S. producers to increase sales to new markets abroad. Also, the Department of Agriculture has accepted the Department of Commerce's recommendation to include Atlantic mackerel on the list of eligible commodities for fiscal year 1993 under the Agricultural Trade Development and Assistance Act of 1954 (Pub. L. 480). This may provide a market opportunity for U.S. produced Atlantic mackerel.

As a supplement to its regulations, a benefit-cost analysis was prepared by the Council. Results of the analysis indicate that after eight to ten years, a specification of zero TALFF will yield positive benefits to the fishery and to the Nation.

The Council also recommended and the Regional Director proposes four special conditions to be imposed on the 1993 and 1994 Atlantic mackerel fisheries as follows: (1) Joint ventures are allowed, but river herring bycatch south of 37°30′ N. latitude may not exceed 0.25 percent of the over-the-side transfers of Atlantic mackerel; (2) the Regional Director should reduce

impacts on marine mammals, whenever possible, in prosecuting the Atlantic mackerel fisheries; (3) IOY may be increased during the year, but the total should not exceed 200,000 mt; and (4) applications from a particular nation for joint ventures for 1993 or 1994 will not be decided on until the Regional Director determines, based on an evaluation of performances, any purchase obligations for 1992 and previous years have been fulfilled.

Atlantic Squids

The maximum OY for *Loligo* is 44,000 mt. The recommended ABC for the 1993 and 1994 fisheries is 44,000 mt, representing an increase of 7,000 mt over the 1992 ABC of 37,000 mt. This level of ABC is based on the most recent stock assessments and is determined to be at a level that will not harm the continued growth of the resource.

An IOY of 44,000 mt, equal to DAH and DAP, is recommended by the Council and proposed by the Regional Director. Since the U.S. industry intends to fully utilize the IOY, there is no opportunity for JVP or TALFF.

Results of the 1992 Council processor survey indicate that the U.S. processing sector plans to process 57,836 mt of *Loligo* in the upcoming year. Therefore, the Council recommends and the Regional Director proposes a DAP of 44,000 mt.

Based on the results of the processor survey, the Council recommended and the Regional Director proposes zero JVP and zero TALFF for the 1993 and 1994 fisheries for *Loligo*. The expansion of the U.S. freezer trawler and refrigerated sea water fleets participating in this fishery, and the substantial increase in U.S. landings, indicate that there is no longer a justification for foreign participation. TALFF and JVP have been absent from this fishery since 1987. Since TALFF and JVP are set at zero, DAH of 44,000 mt equals DAP for the 1993 and 1994 fisheries for *Loligo*. Maximum OY for these fisheries can only be increased by an amendment to the FMP.

The maximum OY for *Illex* squid is 30,000 mt. Based on the best available scientific information, the Council recommended and the Regional Director proposes an ABC of 30,000 mt equal to the maximum OY.

The Council also recommended and the Regional Director proposes that the IOY for *Illex* be set at 30,000 mt because U.S. harvesters intend to utilize the entire IOY. Consequently, there is no TALFF available. No directed foreign fishery has been allowed for *Illex* since 1986. Given the current economic situation, zero TALFF is recommended by the Council and proposed by the Regional Director.

Based on the 1992 Council processor survey, *Illex* squid processors plan to process 40,737 mt of *Illex* in 1993. Therefore, the DAP for the 1993 fishery is specified at 30,000 mt. This reflects the large increases in the capacity of the east coast freezer trawler fleet and projected increases in the number of vessels using refrigerated seawater systems capable of landing high quality *Illex*. Much of the increase in capacity is a function of a general increase in prices in the range of 20 percent for 1990 and 1991. Prices continue to remain strong in the 1992 fishery. The continued strength in *Illex* prices is related to decreases in world supply including a closing of 30,000 square miles of traditional squid grounds east of the Falklands/Malvinas, a decrease in *Loligo* squid landings in Thailand, and reduction in fishing efforts of Eastern European fleets. Although *Illex* is primarily a bait squid, it has been used as a substitute for *Loligo*, a food squid, in many markets.

Butterfish

The FMP sets the maximum OY for butterfish at 16,000 mt. Based on the most current stock assessments, the Council recommends and the Regional Director proposes an ABC of 16,000 mt for the 1993 and 1994 fisheries, unchanged from the 1992 specification. Commercial landings of butterfish have decreased in the past 3 years from 4,000 mt to 2,285 mt. Estimated landings for the first five months of 1992 were 1,704 mt, up 64 percent from the same period in 1991. Difficulty in locating schools of market-size fish and market limitations have caused severe reductions in both supply of and demand for butterfish. Fishermen and processors feel that the size and fat content of butterfish will improve in the 1993 and 1994 fisheries.

The Council recommended and the Regional Director proposes an IOY for butterfish of 10,000 mt. The U.S. industry intends to fully utilize this IOY. Thus, there is no TALFF available. The Council recommends and the Regional Director proposes a DAH of 10,000 mt based on the Council processor survey of 8,283 mt with an allowance of approximately 2,000 mt for non-responses. There has been no interest expressed in joint ventures, thus, the IOY is proposed at a level that does not allow for a JVP. The Council recommended and the Regional Director proposes that both JVP and TALFF be specified at zero for the 1993 and 1994 fisheries. However, a 6,000 mt difference between ABC and IOY is set aside to accommodate an increase in IOY if economic conditions dictate.

Classification

This action is authorized by 50 CFR part 655 and complies with Executive Order 12291 and the National Environmental Policy Act.

Authority: 6 U.S.C. 1801 *et seq.*

[Docket No. 921220-2320]

RIN 0648-AD18

Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Proposed rule; notice of proposed 1993 specifications of Pacific halibut bycatch allowances; request for comments.

SUMMARY: Pending approval by the Secretary of Commerce (Secretary) of Amendment 21 to the Fishery Management Plan (FMP) for the Groundfish fishery of the Bering Sea and Aleutian Islands (BSAI), NMFS proposes regulations that would establish halibut bycatch mortality limits for trawl and non-trawl gear fisheries in the BSAI. Apportionments of the bycatch mortality limits as bycatch allowances among fisheries and seasons for 1993 also are proposed. This action is intended to promote management and conservation of groundfish and other fish resources and to further the goals and objectives contained in the FMP.

DATES: Comments are invited on or before January 19, 1993.

ADDRESSES: Comments may be sent to Ronald J. Berg, Chief, Fisheries Management Division, Alaska Region, NMFS, P.O. Box 21668, Juneau, Alaska 99802 (Attn. Lori Gravel). The proposed rule was analyzed as part of the environmental assessment/regulatory impact review/initial regulatory flexibility analysis (EA/RIR/IRFA) prepared for Amendment 21. Individual copies of Amendment 21 and the EA/RIR/IRFA may be obtained from the

North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, Alaska 99510 (telephone 907–271–2809).

FOR FURTHER INFORMATION CONTACT: Susan J. Salveson, Fisheries Management Division, at 907–586–7228.

SUPPLEMENTARY INFORMATION: The domestic and foreign groundfish fisheries in the exclusive economic zone of the BSAI are managed by the Secretary in accordance with the BSAI FMP. The FMP was prepared by the North Pacific Fishery Management Council (Council) under the Magnuson Fishery Conservation and Management Act (Magnuson Act) and is implemented by regulations appearing at 50 CFR 611.93 for the foreign fishery and 50 CFR part 675 for the U.S. fishery.

General regulations that also pertain to U.S. fisheries appear at 50 CFR part 620.

Halibut bycatch limits for trawl and non-trawl gear fisheries that were established for 1992 under Amendment 19 to the FMP (57 FR 43926, September 23, 1992) expire at the end of 1992. Without further regulatory action, no halibut bycatch restrictions would be in effect for BSAI non-trawl gear fisheries in 1993 and beyond, and the halibut bycatch limit for trawl gear fisheries will revert back to the 1991 level of 5,333 metric tons (mt).

During its January 15–17, 1992, meeting, the Council requested that a draft EA/RIR/IRFA be prepared to analyze alternatives for Pacific halibut bycatch limits for trawl and non-trawl gear fisheries in the BSAI during 1993 and beyond. These limits would replace those that expire at the end of 1992 under Amendment 19. A draft analysis was prepared under the National Environmental Policy Act (NEPA), E.O. 12291, and NOAA policy. The Council reviewed this document at its April 22–26, 1992, meeting, and decided to send the analysis to the interested public for review. At its June 23–28, 1992, meeting, the Council considered the testimony and recommendations of its Advisory Panel (AP), Scientific and Statistical Committee (SSC), Plan Teams, fishing industry representatives, and the general public on alternative halibut bycatch limits and how those limits were to be established and managed. The following measures were approved for inclusion in Amendment 21 for review under section 304(b) of the Magnuson Act:

(1) Establish Pacific halibut bycatch limits in terms of halibut mortality rather than halibut bycatch;

(2) Establish Pacific halibut bycatch mortality limits for trawl and non-trawl gear fisheries in regulations rather than in the FMP to allow for changes in bycatch mortality limits through a regulatory amendment process rather than an FMP amendment; and

(3) Establish FMP authority to annually apportion the non-trawl halibut bycatch mortality limit among fisheries and seasons as bycatch allowances. This authority would be similar to existing FMP provisions for annual specification of bycatch allowances of prohibited species catch limits among trawl gear fisheries.

Consistent with its recommendation of Amendment 21, the Council recommended a 3,775-mt halibut bycatch mortality limit for trawl gear fisheries at its June 1992 meeting. The Council delayed action on a Pacific halibut bycatch mortality limit for the non-trawl gear fisheries until its September 22–27, 1992, meeting. At that meeting, the Council recommended a 900-mt mortality limit for the non-trawl gear fisheries and specified the non-trawl gear fisheries that would be eligible to receive separate halibut bycatch allowances. During the September meeting, the Council also proposed bycatch allowances of the trawl and non-trawl halibut mortality limits among fisheries and seasons.

Amendment 21 is under Secretarial review. A notice of availability was published on November 16, 1992 (57 FR 54045). Secretarial approval of Amendment 21 is necessary in order for NMFS to issue this proposed rule as a final rule.

Reasons for, and a description of, this proposed rule follow:

FMP Authority to Establish Pacific Halibut Bycatch Mortality Limits in Regulations

Under Amendment 21, annual BSAI-wide Pacific halibut bycatch mortality limits for trawl and non-trawl gear fisheries would be established in regulations and revised by regulatory amendment. When developing a regulatory amendment to change a halibut bycatch mortality limit, the Secretary, after consultation with the Council, would consider information that includes:

1. Estimated change in halibut biomass and stock condition;
2. Potential impact on the halibut stock and fisheries;
3. Potential impact on groundfish fisheries;
4. Estimated bycatch mortality during prior years;
5. Expected halibut bycatch mortality;
6. Methods available to reduce halibut bycatch mortality;
7. The cost of reducing halibut bycatch mortality; and
8. Other biological and socioeconomic factors that affect the appropriateness of a specific bycatch mortality limit in terms of FMP objectives.

Fishery bycatch allowances of Pacific halibut, and seasonal apportionment of those allowances, would be annually specified and published in the **Federal Register** as required under § 675.20(a)(7). This apportionment process is further discussed below under "Apportionment of Halibut Bycatch Mortality Limits." When a fishery reaches its specified bycatch allowance or seasonal apportionment thereof, the entire BSAI would be closed to that fishery for the remainder of the year or for the remainder of the season.

The Council maintained the existing FMP provision for a "two-step" closure of the BSAI to specified trawl gear fisheries that take their halibut bycatch mortality allowance. When a specified portion of a fishery's halibut bycatch allowance is reached (primary bycatch allowance), Zones 1 and 2H are closed. When the entire bycatch allowance has been reached (secondary bycatch allowance), the entire BSAI is closed to that fishery.

Proposed Halibut Bycatch Mortality Limits Authorized Under Amendment 21

At its June 1992 meeting, the Council recommended a 3,775-mt halibut bycatch mortality limit for trawl gear fisheries and recommended the primary limit be maintained at a level equivalent to 3,300 mt of mortality. The proposed primary and secondary mortality limits assume a mortality rate of 75 percent in BSAI trawl operations and reflect the same level of mortality that resulted from the 1992 primary and secondary bycatch limits of 4,400 mt and 5,033 mt, respectively, established under Amendment 19 to the FMP. The assumed mortality rate for BSAI trawl fisheries was recommended in the 1992 Stock Assessment and Fishery Evaluation (SAFE) report dated November 1991, and was the rate used by the International Pacific Halibut Commission in establishing Pacific halibut quotas for the 1992 setline fisheries.

At its September 1992 meeting, the Council recommended a 900-mt bycatch mortality limit for the BSAI non-trawl gear fisheries. For purposes of the proposed rule, non-trawl gear means hook-and-line, jig, longline, and pot-and-line gear. The proposed limit of 900-mt is higher than the 1992 limit established under Amendment 19 (750 mt), but is less than the actual amount

of bycatch mortality experienced in the 1992 non-trawl fisheries (1,100 mt). The overage of the 1992 limit resulted from a delay in the effective date of the 750-mt mortality limit implemented under Amendment 19. This delay was requested by the Council at its August 13–15, 1992, meeting to minimize the effect of halibut bycatch restrictions on the hook-and-line fishery for Pacific cod.

The Council's proposed 900-mt mortality limit for non-trawl gear fisheries is intended to provide a total limit on bycatch mortality without imposing undue constraints on the increasing fishing effort for Pacific cod by vessels using hook-and-line gear. This increased fishing effort is attributed to continued displacement of fishing effort for Pacific cod from trawl gear to hook-and-line and pot gear due to trawl closures caused by halibut bycatch restrictions.

The Council believes the 900-mt limit should not prematurely close the hook-and-line fishery for Pacific cod during 1993 and beyond because additional management measures are being considered to reduce further halibut mortality rates and overall mortality in this fishery. These measures include mandatory cutting of ganglions, other careful release techniques, and a reduction in fishing effort for Pacific cod during summer months when halibut bycatch rates are high. The Council is scheduled to take final action on these measures during its December 1992 meeting.

For purposes of monitoring the 3,775-mt and 900-mt mortality limits proposed for trawl and non-trawl gear fisheries, respectively, the Director, Alaska Region, NMFS (Regional Director) would use groundfish catch and observed halibut bycatch rates to project when the mortality limits are reached. The Regional Director would use assumed mortality rates to monitor the bycatch mortality limits that are based on the best information available, including that contained in the final annual SAFE report. Based on analysis of 1990 observer data, the current assumed halibut mortality rates are 75 percent for BSAI trawl gear fisheries, 16 percent for hook-and-line gear and jig fisheries, and 10 percent for groundfish pot gear fisheries. The final 1993 SAFE report will be available to the Council during its December 7–11, 1992, meeting, and will include an analysis of 1991 observer data that may support alternative bycatch mortality rate assumptions for 1993.

Apportionment of the Halibut Bycatch Mortality Limits

Under proposed Amendment 21, the trawl and non-trawl halibut bycatch mortality limits would be apportioned among specified fisheries as bycatch allowances that may be further apportioned into seasonal allowances. When making these recommendations, the Council must review the need to control the bycatch of halibut and recommend appropriate apportionment of the halibut mortality limits to fishery categories. These apportionments are intended to optimize total groundfish harvest under established bycatch mortality limits, taking into consideration the anticipated amounts of incidental catch of halibut in each fishery category. The Council may recommend to exempt specified non-trawl fisheries from the non-trawl halibut bycatch mortality limit restrictions after considering the eight factors listed above for setting of halibut bycatch mortality limits.

Trawl gear fisheries that are eligible to receive separate bycatch allowances are set forth in existing regulations (§ 675.21(b)) and are categorized by target species or species groups. This provision would remain unchanged under Amendment 21. The trawl fisheries would be eligible to receive separate apportionments of the 3,775-mt halibut bycatch mortality limit as bycatch mortality allowances are yellowfin sole, rock sole/other flatfish, Greenland turbot/sablefish/arrowtooth flounder, Pacific cod, rockfish, and pollock/Atka mackerel/"other species."

Under Amendment 21, non-trawl gear fisheries that are eligible to receive separate bycatch mortality allowances also would be defined in regulations and categorized by target species or species groups and gear types. At its September 1992 meeting, the Council proposed that the following three non-trawl fisheries be eligible to receive separate halibut bycatch mortality allowances.

(1) Pacific cod hook-and-line fishery. Fishing with hook-and-line gear during any weekly reporting period that results in a retained catch of Pacific cod that is greater than the retained amount of any other groundfish species.

(2) Groundfish pot gear fishery. Fishing with pot gear under restrictions set forth in § 675.24(b) during any weekly reporting period that results in a retained catch of groundfish.

(3) Other non-trawl fishery. Fishing for groundfish with non-trawl gear during any weekly reporting period that results in a retained catch of groundfish and does not qualify as a Pacific cod hook-and-line fishery or a groundfish pot gear fishery.

To implement the halibut bycatch mortality limits proposed under this action, proposed apportionments of those limits must be published in the **Federal Register** for public review and comment. Normally, annual apportionments of halibut bycatch limits among fisheries are established through the annual total allowable catch (TAC) specification process undertaken by NMFS and the Council during the September and December Council meetings each year (§§ 675.20(a)(2) and 675.21(b)(3)). Pending approval of Amendment 21, the halibut mortality limits proposed under this action would become effective after the start of the 1993 fishing year. The proposed 1993 apportionments of these mortality limits among fisheries are included with the proposed rule. Public comment and testimony on the proposed apportionments will be reviewed by the Council during its December 1992 meeting. The Council is scheduled to recommend final apportionments during the December meeting that, pending approval by the Secretary, would be published with the final rule implementing the revised mortality limits authorized under Amendment 21.

During its September 1992 meeting, the Council recommended that the 3,775-mt halibut mortality limit established for trawl gear fisheries be apportioned to fisheries in the same relative manner as those specified for 1992 under Amendment 19. These apportionments also were implemented early in 1992 under a March 30, 1992, emergency rule (57 FR 11433, April 3, 1992) that was extended for an additional 90-day period (57 FR 29223, July 1, 1992). The proposed fishery apportionments, and seasonal apportionments thereof, are listed in Table 1 of this preamble. The preamble to the March 30 emergency rule and the final rule implementing Amendment 19 set forth the record in support of the proposed trawl fishery bycatch specifications listed in Table 1.

At its September 1992 meeting, the Council recommended that the groundfish pot gear fishery be exempted from halibut bycatch restrictions during 1993. It further recommended that the 900-mt halibut bycatch mortality limit proposed for non-trawl gear be seasonally apportioned between the Pacific cod hook-and-line and "other non-trawl" fisheries as shown in Table 2 of this preamble.

The Council proposed to exempt pot gear from halibut bycatch restrictions after considering that the groundfish catches by pot gear have been small to

date. Furthermore, observer information suggests that bycatch rates of halibut are low with pot gear, and the mortality of incidentally-caught halibut is only 10 percent. During 1992, the total estimated halibut mortality experienced by the groundfish pot gear fisheries was 8 mt.

TABLE 1.—APPORTIONMENT OF THE PROPOSED HALIBUT BYCATCH MORTALITY LIMIT FOR TRAWL GEAR AMONG FISHERIES AND SEASONS

Fishery allowance	Seasonal by catch (mt halibut)
Yellowfin sole:	
May 01–Aug. 02	318
Aug. 03–Dec. 31	319
Total	637

Fishery	Annual and seasonal bycatch allowances, metric tons and percent annual allowance
Other non-trawl fisheries:	
Jan. 1–Dec. 31	75 (100%)
Total bycatch mortality limit	900

[1] Groundfish pot gear fisheries are exempt from 1993 bycatch restrictions.

The proposed seasonal halibut mortality allowances specified for the Pacific cod hook-and-line fishery were based on recommendations by representatives for the freezer longliner industry and are intended to reduce fishing effort for cod during summer months when halibut bycatch rates are highest. The market value of cod also is lowest during this period, because the quality of cod deteriorates in the post-spawning summer months and associated recovery rates are low. The distribution of fishing effort for Pacific cod during the past 3 years supports the Council's recommendation to allocate most of the halibut bycatch allowance specified for the Pacific cod hook-and-line fishery to the first 5 months of the year. During 1991–1992, the percentage of the total annual cod harvest in directed fisheries by all gear types during this 5-month period has ranged between 60 and 70 percent. The percentage of the total annual cod harvest during this period by vessels participating in the directed fishery using hook-and-line gear ranged from 38 percent in 1990 to about 52 percent in 1992. Although the 1992 fishery took 42 percent of its harvest of Pacific cod between mid May and the end of August, halibut bycatch rates peaked during this period, resulting in higher bycatch mortality of halibut than would occur if more Pacific cod were taken during the winter months.

Halibut bycatch mortality allowances and the seasonal apportionment of those allowances will be subject to change at the December 1992 Council meeting, pending public comment, year-to-date information on bycatch performance, and updated information on anticipated fishing patterns in 1993.

Classification

The Assistant Administrator for Fisheries, NOAA (Assistant Administrator), has determined that this proposed rule is necessary for the conservation and management of the groundfish fishery off Alaska and that, pending Secretarial approval of Amendment 21, would be consistent with the Magnuson Act and other applicable laws.

The Council prepared an EA for Amendment 21 and this proposed rule that discusses the impact on the environment as a result of this rule. A copy of the EA may be obtained from the Council (see **ADDRESSES**).

The Assistant Administrator initially determined that this proposed rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291. This determination is based on the RIR prepared for this proposed rule. The proposed rule, if adopted, is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, state, or local government agencies or geographic regions; or a significant adverse effect on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Council prepared an IRFA as part of the RIR, which concludes that this proposed rule, if adopted, could have significant effects on small entities. A copy of this analysis is available from the Council (see **ADDRESSES**). More than 2,400 vessels may fish for groundfish off Alaska in 1993 and future years. The operators of all vessels fishing for groundfish in the BSAI could potentially be affected by fishery closures that are implemented when halibut bycatch allowances are reached. These closures could result in foregone gross or net wholesale revenues that approach or exceed 5 percent of an individual vessel's annual revenues. Estimated costs of the proposed halibut bycatch mortality limits to the groundfish industry are based on a bycatch model that ignores any costs associated with actions the groundfish industry takes to reduce bycatch mortality rates. These costs are unknown, but they are assumed to be lower than the costs of foregone revenues to the groundfish industry that would result from reducing halibut bycatch mortality through reduced opportunity to harvest available groundfish.

NMFS has determined that, if the groundfish fishery were conducted in accordance with the management measures proposed under this rule, the fishery would not be likely to adversely affect endangered or threatened species. Therefore, formal consultation pursuant

to section 7 of the Endangered Species Act is not required for the approval of Amendment 21 or the implementation of the proposed rule.

This rule does not include a collection-of-information requirement subject to the Paperwork Reduction Act.

NMFS has determined that this rule does not affect the coastal zone of any state with an approved coastal management program. This determination had been submitted for review by the responsible state agencies under section 307 of the Coastal Zone Management Act.

This proposed rule does not contain policies with federalism implications sufficient to warrant preparation of a Federalism Assessment under Executive Order 12612.

List of Subjects in 50 CFR Part 675

Fisheries, Reporting and recordkeeping.

Dated: December 17, 1992.

William W. Fox, Jr.,

Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 675 is proposed to be amended as follows:

PART 675—GROUNDFISH OF THE BERING SEA AND ALEUTIAN ISLANDS AREA

1. The authority citation for part 675 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 675.2, a new definition of "non-trawl gear" is added in alphabetical order to read as follows:

§ 675.2 Definitions.

* * * * *

Non-trawl gear means hook-and-line, jig, longline, and pot-and-line gear.

3. In § 675.21, paragraph (b)(4) is removed, existing paragraphs (b)(2) and (b)(3) are redesignated as paragraphs (b)(3) and (b)(4), respectively, new paragraph (b)(2) is added, and paragraph (b) heading, redesignated paragraphs (b)(3) (ii) and (iii), and existing paragraphs (a), (b)(1), (c)(1), and (d) are revised to read as follows:

§ 675.21 Prohibited species catch (PSC) limitations.

(a) *PSC limits.* (1) The PSC limit of red king crab caught while conducting any trawl fishery for groundfish in Zone 1 during any fishing year is 200,000 red king crabs.

(2) The PSC limit of Tanner crabs (*C. bairdi*) caught while conducting any trawl fishery for groundfish in Zone 1 during any fishing year is one million animals.

(3) The PSC limit of Tanner crabs (*C. bairdi*) caught while conducting any trawl fishery for groundfish in Zone 2 during any fishing year is three million animals.

(4) The primary PSC limit of Pacific halibut caught while conducting any trawl fishery for groundfish in the Bering Sea and Aleutian Islands Management Area during any fishing year is an amount of Pacific halibut equivalent to 3,300 mt of halibut mortality.

(5) The secondary PSC limit of Pacific halibut caught while conducting any trawl fishery for groundfish in the Bering Sea and Aleutian Islands Management Area during any fishing year is an amount of Pacific halibut equivalent to 3,775 mt of halibut mortality.

(6) The PSC limit of Pacific herring caught while conducting any domestic trawl fishery for groundfish in the Bering Sea and Aleutian Islands Management Area is 1 percent of the annual eastern Bering Sea herring biomass. The PSC limit will be apportioned into annual herring PSC allowances, by target fishery, and will be published along with the annual herring PSC limit in the **Federal Register** with the proposed and final specifications defined in Sec. 675.20(a)(7) of this part.

(7) The PSC limit of Pacific halibut caught while conducting any non-trawl fishery for groundfish in the Bering Sea and Aleutian Islands Management Area during any fishing year is an amount of Pacific halibut equivalent to 900 mt of halibut mortality.

(b) *Apportionment of PSC limits to fisheries*—(1) *Apportionment to trawl fishery categories.* NMFS, after consultation with the Council, will apportion each PSC limit set forth in paragraphs (a)(1) through (a)(6) of this section into bycatch allowances for fishery categories specified in paragraph (b)(1)(iii) of this section, based on each category's proportional share of the anticipated incidental catch during a fishing year of prohibited species for which a PSC limit is specified and the need to optimize the amount of total groundfish harvested under established PSC limits. The sum of all bycatch allowances of any prohibited species will equal its PSC limit.

(i) For purposes of this section, the trawl PSC limits for red king crab, *C. bairdi* Tanner crab, and Pacific halibut will be apportioned to the fishery categories listed at paragraphs (b)(1)(iii)(B) through (F) of this section. Any amount of red king crab, *C. bairdi* Tanner crab, or Pacific halibut that is incidentally taken in the midwater pollock fishery, as defined at paragraph (b)(1)(iii)(A) of this section, will be counted against the bycatch allowances specified for the pollock/Atka mackerel/"other species" category defined at paragraph (b)(1)(iii)(F) of this section.

(ii) For purposes of this section, the PSC limit for Pacific herring will be apportioned to the fishery categories listed at paragraphs (b)(1)(iii) (A) through (F) of this section.

(iii) For purposes of apportioning trawl PSC limits among fisheries, the following fishery categories are specified and defined in terms of round weight equivalents of those groundfish species or species groups for which a TAC has been specified under § 675.20.

(A) *Midwater pollock fishery.* Fishing with trawl gear during any weekly reporting period that results in a catch of pollock that is 95 percent or more of the total amount of groundfish caught during the week.

(B) *Flatfish fishery.* Fishing with trawl gear during any weekly reporting period that results in a retained aggregate amount of rock sole, "other flatfish," and yellowfin sole that is greater than the retained amount of any other fishery category defined under paragraph (b)(1)(iii) of this section.

(*1*) *Yellowfin sole fishery.* Fishing with trawl gear during any weekly reporting period that is defined as a flatfish fishery under paragraph (b)(1)(iii)(B) of this section and results in a retained amount of yellowfin sole that is 70 percent or more of the retained aggregate amount of rock sole, "other flatfish," and yellowfin sole.

(*2*) *Rock sole/"other flatfish" fishery.* Fishing with trawl gear during any weekly reporting period that is defined as a flatfish fishery under paragraph (b)(1)(iii)(B) of this section and is not a yellowfin sole fishery as defined under paragraph (b)(1)(iii)(B) (*1*) of this section.

(C) *Greenland turbot/arrowtooth flounder/sablefish fishery.* Fishing with trawl gear during any weekly reporting period that results in a retained aggregate amount of Greenland turbot, arrowtooth flounder, and sablefish that is greater than the retained amount of any other fishery category defined under paragraph (b)(1)(iii) of this section.

(D) *Rockfish fishery.* Fishing with trawl gear during any weekly reporting period that results in a retained aggregate amount of rockfish species of the genera *Sebastes* and *Sebastolobus* that is greater than the retained amount of any other fishery category defined under paragraph (b)(1)(iii) of this section.

(E) *Pacific cod fishery.* Fishing with trawl gear during any weekly reporting

period that results in a retained aggregate amount of Pacific cod that is greater than the retained amount of any other groundfish fishery category defined under paragraph (b)(1)(iii) of this section.

(F) *Pollock/Atka mackerel/"other species."* Fishing with trawl gear during any weekly reporting period that results in a retained aggregate amount of pollock other than pollock harvested in the midwater pollock fishery defined at paragraph (b)(1)(iii)(A) of this section, Atka mackerel, and "other species" that is greater than the retained amount of any other fishery category defined under paragraph (b)(1)(iii) of this section.

(2) *Apportionment to non-trawl fishery categories.* (i) The Secretary, after consultation with the Council, may apportion the halibut PSC limit for non-trawl gear set forth in paragraph (a)(7) of this section into bycatch allowances for fishery categories specified in paragraph (b)(2)(ii) of this section, based on each category's proportional share of the anticipated bycatch mortality of halibut during a fishing year and the need to optimize the amount of total groundfish harvested under the non-trawl halibut PSC limit. The sum of all halibut bycatch allowances will equal the halibut PSC limit specified at paragraph (a)(7) of this section.

(ii) For purposes of apportioning the non-trawl halibut PSC limit among fisheries, the following fishery categories are specified and defined in terms of round weight equivalents of those groundfish species for which a TAC has been specified under § 675.20.

(A) *Pacific cod hook-and-line fishery.* Fishing with hook-and-line gear during any weekly reporting period that results in a retained catch of Pacific cod that is greater than the retained amount of any other groundfish species.

(B) *Groundfish pot gear fishery.* Fishing with pot gear under restrictions set forth in § 675.24(b) during any weekly reporting period that results in a retained catch of groundfish.

(C) *Other non-trawl fisheries.* Fishing for groundfish with non-trawl gear during any weekly reporting period that results in a retained catch of groundfish and does not qualify as a Pacific cod hook-and-line fishery or a groundfish pot gear fishery.

(3) * * *

(ii) Unused seasonal apportionments of fishery bycatch allowances made under paragraph (b)(3)(i) of this section will be added to its respective fishery bycatch allowance for the next season during a current fishing year.

(iii) If a seasonal apportionment of a fishery bycatch allowance made under paragraph (b)(3)(i) of this section is exceeded, the amount by which the seasonal apportionment is exceeded will be deducted from its respective apportionment for the next season during a current fishing year.

* * * * *

(c) * * *

(1) *Attainment of a trawl bycatch allowance for red king crab, C. bairdi Tanner crab, or Pacific halibut.*

(i) *Zone 1 red king crab or C. bairdi Tanner crab bycatch allowance.* If, during the fishing year, the Regional Director determines that U.S. fishing vessels participating in any of the fishery categories listed in paragraphs (b)(1)(iii) (B) through (F) of this section will catch the Zone 1 bycatch allowance, or seasonal apportionment thereof, of red king crab or *C. bairdi* Tanner crab specified for that fishery category under paragraph (b) of this section, NMFS will publish in the **Federal Register** the closure of Zone 1 to directed fishing for aggregate species within that fishery category, for the remainder of the year or for the remainder of the season, except that when a bycatch allowance, or seasonal apportionment thereof, specified for the pollock/Atka mackerel/"other species" fishery category is reached, only directed fishing for pollock is closed to trawl vessels using non-pelagic trawl gear.

(ii) *Zone 2 red king crab or C. bairdi crab bycatch allowance.* If, during the fishing year, the Regional Director determines that U.S. fishing vessels participating in any of the fishery categories listed in paragraphs (b)(1)(iii) (B) through (F) of this section will catch the Zone 2 bycatch allowance, or seasonal apportionment thereof, of red king crab or *C. bairdi* crab specified for that fishery category under paragraph (b) of this section, NMFS will publish in the **Federal Register** the closure of Zone 2 to directed fishing for aggregate species within that fishery category, for the remainder of the year or for the remainder of the season, except that when a bycatch allowance, or seasonal apportionment thereof, specified for the pollock/Atka mackerel/"other species" fishery category is reached, only directed fishing for pollock is closed to trawl vessels using non-pelagic trawl gear.

(iii) *Primary halibut bycatch allowance.* If, during the fishing year, the Regional Director determines that U.S. fishing vessels participating in any of the fishery categories listed in paragraphs (b)(1)(iii)(B) through (F) of this section in the Bering Sea and Aleutian Islands Management Area will catch the primary halibut bycatch allowance, or seasonal apportionment thereof, specified for that fishery category under paragraph (b) of this section, NMFS will publish in the **Federal Register** the closure of Zones 1 and 2H to directed fishing for aggregate species within that fishery category, for the remainder of the year or for the remainder of the season, except that when a bycatch allowance, or seasonal apportionment thereof, specified for the pollock/Atka mackerel/"other species" fishery category is reached, only directed fishing for pollock is closed to trawl vessels using non-pelagic trawl gear.

(iv) *Secondary halibut bycatch allowance.* If, during the fishing year, the Regional Director determines that U.S. fishing vessels participating in any of the trawl fishery categories listed in paragraphs (b)(1)(iii) (B) through (F) of this section in the Bering Sea and Aleutian Islands Management Area will catch the secondary halibut bycatch allowance, or seasonal apportionment thereof, specified for that fishery category under paragraph (b) of this section, NMFS will publish in the **Federal Register** the closure of the entire Bering Sea and Aleutian Islands Management Area to directed fishing for aggregate species within that fishery category, for the remainder of the year or for the remainder of the season, except that when a bycatch allowance, or seasonal apportionment thereof, specified for pollock/Atka mackerel/"other species" fishery category is reached, only directed fishing for pollock is closed to trawl vessels using non-pelagic trawl gear.

(2) *Attainment of a trawl bycatch allowance for Pacific herring.* If, during the fishing year, the Regional Director determines that U.S. fishing vessels participating in any of the fishery categories listed in paragraphs (b)(1)(iii) (A) through (F) of this section in the Bering Sea and Aleutian Islands Management Area will catch the herring bycatch allowance, or seasonal apportionment thereof, specified for that fishery category under paragraph (b) of this section, NMFS will publish in the **Federal Register** the closure of the Herring Savings Areas to directed fishing for aggregate species within that fishery category, except that:

(i) When the midwater pollock fishery category reaches its specified bycatch allowance, or seasonal apportionment thereof, the Herring Savings Areas are closed to directed fishing for pollock with trawl gear; and

(ii) When the pollock/Atka mackerel/"other species" fishery category reaches its specified bycatch allowance, or seasonal apportionment thereof, only

the Herring Savings Areas are closed to directed fishing for pollock by trawl vessels using non-pelagic trawl gear.

(d) *Attainment of a Pacific halibut non-trawl fishery bycatch allowance.* If, during the fishing year, the Regional Director determines that U.S. fishing vessels participating in any of the non-trawl fishery categories listed in paragraphs (b)(2)(ii) (A) through (C) of this section will catch the Pacific halibut bycatch allowance, or season apportionment thereof, specified for that fishery category under paragraph (b) of this section, NMFS will publish in the **Federal Register** the closure of the entire Bering Sea and Aleutian Islands Management Area to directed fishing for aggregate species within that fishery category.

Notices

Federal Register
Vol. 57, No. 246
Tuesday, December 22, 1992

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

[Docket No. 92-027N]

FLD Policy Memoranda; Semi-Annual Listing

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This document lists and makes available to the public a memorandum which was issued by the Food Labeling Division (FLD), (formerly the Standards and Labeling Division), Regulatory Programs, Food Safety and Inspection Service (FSIS), and contains significant new applications or interpretations of the Federal Meat Inspection Act, the Poultry Products Inspection Act, the regulations promulgated thereunder, or departmental policy concerning labeling.

FOR FURTHER INFORMATION CONTACT: Ashland L. Clemons, Director, Food Labeling Division, Regulatory Programs, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 205-0042.

SUPPLEMENTARY INFORMATION: Pursuant to section 7 of the Federal Meat Inspection Act (12 U.S.C. 607 *et seq.*) and section 8 of the Poultry Products Inspection Act (21 U.S.C. 457 *et seq.*), and the regulations promulgated thereunder (9 CFR 301.1 *et seq.* and 9 CFR 381.1 *et seq.*), meat and poultry products which do not bear approved labels or other labeling may not be distributed in commerce for use as human food. Accordingly, FSIS conducts a prior approval program for labels or other labeling (specified in 9 CFR 317.4, 317.5, 381.132 and 381.134) to be used on or in conjunction with federally inspected meat and poultry products.

FSIS's prior labeling approval program is conducted by labeling review experts within FLD. A variety of factors, such as continuing technological innovations in food processing and expanded public concern regarding the presence of various substances in foods, has generated a series of increasingly complex issues which FLD must resolve a part of the prior labeling approval process. In interpreting the Acts and regulations to resolve these issues, FLD may modify its policies on labeling or develop new ones.

Significant or novel interpretations of determinations made by FLD are issued in writing in memorandum form. This document lists one FLD policy memorandum which was issued during the period of April 1, 1992, through October 1, 1992.

Persons interested in obtaining copies of the following FLD policy memorandum, or in being included on a list for automatic distribution of future FLD policy memoranda, may write to: Printing and Distribution Section, Paperwork Management Branch, Administrative Services Division, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250.

Memo No.	Title and date	Issue	Reference
122	Meat Content Requirements for Meat Soups, August 11, 1992 ...	What are the meat content requirements for meat soups?	9 CFR 381.167

The FLD policy specified in this memorandum will be uniformly applied to all relevant labeling applications unless modified by future memoranda or more formal Agency actions. Applications retain all rights of appeal regarding decisions based upon these memoranda.

Done at Washington, DC, on: December 16, 1992.

Ashland L. Clemons,

Director, Food Labeling Division, Regulatory Programs, Food Safety and Inspection Service.

BILLING CODE 3410-DM-M

DEPARTMENT OF COMMERCE

Agency Forms Under Review by the Office of Management and Budget

DOC has submitted to OMB for clearance the following proposals for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of Export Administration (BXA).

Title: Telecommunications.

Agency Form Number: No form number but requirements will be found in Supplement 1 to Section 799.1 of Export Administration Regulations.

OMB Approval Number: None.

Type of Request: New collection.

Burden: 92 reporting/recordkeeping hours.

Number of Respondents: 75.

Avg Hours Per Response: Ranges between one and two hours for reporting requirements — 1 minute for recordkeeping.

Needs and Uses: These reporting and recordkeeping requirements are needed to allow for increased exports of telecommunications equipment to proscribed destinations. The requirements place conditions on approved export licenses.

Affected Public: Businesses or other for-profit institutions; small businesses or organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Gary Waxman, (202) 395-7340, Room 3208, New Executive Office Building, Washington, DC 20230.

Agency: Bureau of Export Administration (BXA).

Title: Application for Export License.

Agency Form Number: BXA-622P.

OMB Approval Number: 0694-0005.

Type of Request: Revision.
Burden: 11,763 hours.
Number of Respondents: 28,211.
Avg Hours Per Response: 25 minutes for reporting; 2 minutes for recordkeeping.
Needs and Uses: This collection is required to be in compliance with U.S. export regulations. The information given by U.S. exporters provides the basis for decisions to grant export licenses for exports of goods and technology that are controlled for reasons of national security and foreign policy. The collection is being slightly revised to require more specific information on end use of certain items that are now being allowed to be exported to the People's Republic of China and former Bloc countries.
Affected Public: Businesses or other for-profit institutions; small businesses or organizations.
Frequency: On occasion.
Respondent's Obligation: Required to obtain or retain a benefit.
OMB Desk Officer: Gary Waxman, (202) 395-7340, Room 3208, New Executive Office Building, Washington, DC 20503.

Agency: National Oceanic and Atmospheric Administration (NOAA).
Title: Marine Fisheries Initiative (MARFIN).
Agency Form Number: NOAA 88-205.
OMB Approval Number: 0648-0175.
Type of Request: Extension of the expiration date.
Burden: 390 hours.
Number of Respondents: 60.
Avg Hours Per Response: Ranges between 1 and 4 hours.
Needs and Uses: The purpose of the MARFIN grant program is to develop, rejuvenate, and maintain Gulf of Mexico fisheries. Information provided by grant applicants is used by the National Marine Fisheries Service to evaluate applications and make funding decisions.
Affected Public: Individuals; state or local governments; businesses or other for-profit institutions; federal agencies or employees; non-profit institutions; and, small businesses or organizations.
Frequency: On occasion, quarterly, annually.
Respondent's Obligation: Required to obtain or retain a benefit.
OMB Desk Officer: Ron Minsk, (202) 395-3084, Room 3019, New Executive Office Building, Washington, DC 20503.

Copies of the above information collection proposals can be obtained by calling or writing Edward Michals, DOC Forms Clearance Officer, (202) 482-3271, Department of Commerce, Room 5327, 14th and Constitution Avenue, N W , Washington, DC 20230.

Written comments and recommendations for the proposed information collections should be sent to the respective OMB Desk Officer listed above.

Dated: December 16, 1992

Edward Michals,

Departmental Forms Clearance Officer, Office of Management and Organization.

[FR DOC 92-30965 Filed 12-21-92; 8:45am]

BILLING CODE 3510-CW-F

International Trade Administration

[A-559-806]

Resumption of Antidumping Duty Proceeding: Portable Electric Typewriters From Singapore

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 22, 1992.

FOR FURTHER INFORMATION CONTACT: Stephanie Hager or Ross L. Cotjanle, Office of Countervailing Investigations, U.S. Department of Commerce, room 3099, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482-5055 or 482-3534, respectively.

Resumption of Proceeding

On September 3, 1992, Slip Op. 92-152, the United States Court of International Trade (CIT) reversed the Department's determination that Brother Industries (USA) Inc. (BIUSA) was not an interested party and thus did not have standing to file a petition against portable electric typewriters from Singapore. Both the Smith Corona Corporation (Smith Corona) and the United States Government have filed notices of appeal of Slip Op. 92-152.

On October 13, 1992, BIUSA sought enforcement of the Court's decision. On October 29, 1992, the Department published Portable Electric Typewriters From Singapore: Notice of Court of International Trade Decision (57 FR 49071, October 29, 1992), in accordance with the "publication" requirement in *Timken Co.* v. *United States*, 893 F.2d 337 (Fed. Cir. 1990) ("*Timken*"). The Department stated in the notice that because the decision of the CIT was not a "conclusive" decision, there was no requirement in Timken that the Department implement the decision. The Department stated further that "upon a 'conclusive' decision by the Court of Appeals for the Federal Circuit affirming the CIT, the Department will consider whether BIUSA filed the petition 'on behalf of' the domestic industry; if so, the Department will proceed with the investigation."

The CIT, however, on November 30, 1992, granted BIUSA's Motion to Enforce, and stated that "in the absence of a stay Timken requires Commerce to proceed at once with implementation of the court decision, and if the investigation results in a preliminary affirmative determination, to suspend liquidation."

On December 7, 1992, Smith Corona filed an Application for a Stay Pending Appeal. On December 14, 1992, the United States Government agreed with Smith Corona's Application for a Stay Pending Appeal.

As there has been no ruling to date on the Application for a Stay Pending Appeal, the Department is hereby announcing its schedule for the implementation of the Court's decision On or before January 29, 1993, the Department will determine whether the antidumping petition in this proceeding was filed on behalf of the relevant domestic industry. If the Department's determination is affirmative, it will simultaneously issue its preliminary antidumping determination. Subsequent determinations will be issued in accordance with the procedures and deadlines established in the Department's regulations. The Department will not be requesting additional information from any interested party in this proceeding for either of these determinations.

Dated: December 15, 1992.

Alan M. Dunn,

Assistant Secretary for Import Administration.

[FR Doc. 92-30143 Filed 12-21-92; 8:45 am]

BILLING CODE 3510-DS-M

[C-201-003]

Ceramic Tile From Mexico; Request for Revocation in Part of Countervailing Duty Order

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of request for revocation in part of countervailing duty order.

SUMMARY: The Department of Commerce has received a request from the Government of Mexico for revocation of forty-six firms covered by the countervailing duty order on ceramic tile from Mexico for the administrative review period January 1, 1991, through December 31, 1991.

EFFECTIVE DATE: December 22, 1992.

FOR FURTHER INFORMATION CONTACT:

Gayle Longest or Kelly Parkhill, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 482–2786.

SUPPLEMENTARY INFORMATION:

Background

On June 18, 1992, the Department of Commerce initiated an administrative review of the countervailing duty order for ceramic tile from Mexico for the period January 1, 1991, through December 31, 1991. Initiation of Antidumping and Countervailing Duty Administrative Reviews. 57 FR 27212 (June 18, 1992). Prior to the initiation, the Government of Mexico had submitted a request on May 29, 1992, for revocation of the countervailing duty order for forty-six of the companies being reviewed.

The forty-six companies for which revocation was requested are:

(1) Azuelejos Decorativos Carrillo, S.A.
(2) Azuelejos Orion, S.A.
(3) Ceramica Santa Julia, S.A. de C.V.
(4) Eduardo S. Garcia de la Pena
(5) Jesus Garza Arocha
(6) Ladrillera Monterrey, S.A.
(7) Pisos Coloniales de Mexico, S.A. de C.V.
(8) Reynol Martinez Chapa
(9) Teofilo Covarrubias Villarreal
(10) Agustin Cedillo Ruiz
(11) Alfonso Cortez Coronel
(12) Aurelio Cedillo Ruiz
(13) Benjamin Chavez Torres
(14) Ernesto Cortez
(15) Francisco Almanza Estrada
(16) Fernando Espinosa Sanchez
(17) Francisco Gallegos Garcia
(18) Francisco Gallegos Olivares
(19) Francisco Rincon Leija
(20) Idelfonso Chavez Parga
(21) Ines Bustos Vargas
(22) Isabel Cortez Coronel
(23) Jesus Ambrosio Garcia R.
(24) Jesus Gallegos Olivares
(25) Jesus Hernandez T.
(26) Jesus Jimenez Lucio
(27) Jose Angel Hernandez Martinez
(28) Jose Arellano Valdez
(29) Jose Davila Torres
(30) Jose Dolores Hernandez
(31) Jose S. Vazquez Garcia
(32) Juan Cortez Coronel
(33) Juan Rodriguez Rocha
(34) Julio Ulloa Rodriguez
(35) Leopoldo Montiel Rincon
(36) Manuel Alvarez Ramon
(37) Pablo Cortez Coronel
(38) Pedro Lopez Alonso
(39) Ramon Jimenez de Leon
(40) Raul Leija
(41) Rosendo Rodriguez Hernandez
(42) Santos Rivera Tovar
(43) Sergio Garcia de las Fuentes
(44) Sotelo Jalomo Reyna
(45) Vicente Jalomo Reyna
(46) Zenon Cortez Coronel

Thirty-nine of the firms requesting revocation did not participate in all four consecutive reviews prior to the current administrative review. We note that only seven firms have been reviewed in the last four consecutive administrative reviews by the Department and found to have neither applied for nor received a net subsidy: Azuelejos Orion, S.A., Eduardo S. Garcia de la Pena, Jesus Garcia Arocha, Ladrillera Monterrey, S.A., Pisos Coloniales de Mexico, S.A. de C.V., Reynol Martinez Chapa, and Teofilo Covarubias Villarreal.

This notice is issued pursuant to 19 CFR 355.25(c)(2)(i) (1992).

Dated: December 16, 1992.

[FR Doc. 92–31044 Filed 12–21–92; 8:45 am]
BILLING CODE 3510–DS–M

Minority Business Development Agency

Business Development Center Applications: Minneapolis/St. Paul SMSA (Service Area)

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: In accordance with Executive Order 11625, the Minority Business Development Agency (MBDA) is soliciting competitive applications under its Minority Business Development Center (MBDC) program to operate an MBDC for approximately a 3 year period, subject to Agency priorities, recipient performance and the availability of funds. The cost of performance for the first budget period (12 months) is estimated at $169,125 in Federal funds, and a minimum of $29,846 in non-federal (cost-sharing) contributions. Cost-sharing contributions may be in the form of cash contributions, client fees, in-kind contributions or combinations thereof. The period of performance will be from June 1, 1993 to May 31, 1994. The MBDC will operate in the Minneapolis/St. Paul geographic service area. The award number of this MBDC will be 05–10–93001–01.

The funding instrument for the MBDC will be a cooperative agreement. Competition is open to individuals, non-profit and for-profit organizations, state and local governments, American Indian tribes and educational institutions.

The MBDC program is designed to provide business development services to the minority business community for the establishment and operation of viable minority businesses. To this end, MBDA funds organizations that can coordinate and broker public and private resources on behalf of minority individuals and firms; offer a full range of management and technical assistance; and serve as a conduit of information and assistance regarding minority business.

Applications will be evaluated initially by Regional staff on the following criteria: The experience and capabilities of the firm and its staff in addressing the needs of the business community in general and, specifically, the special needs of minority businesses, individuals and organizations (50 points); the resources available to the firm in providing business development services (10 points); the firm's approach (techniques and methodolgy) to performing the work requirements included in the application (20 points); and the firm's estimated cost for providing such assistance (20 points). An application must receive at least 70% of the points assigned to any one evaluation criteria category to be considered programmatically acceptable and responsive. The selection of an application for further processing by MBDA will be made by the Director based on a determination of the application most likely to further the purposes of the MBDC program. The application will then be forwarded to the Department for final processing and approval, if appropriate. The Director will consider past performance of the applicant on previous Federal awards.

MBDCs shall be required to contribute at least 15% of the total project cost through non-federal contributions. To assist them in this effort, MBDCs may charge client fees for management and technical assistance (M&TA) rendered. Based on a standard rate of $50 per hour, MBDCs will charge client fees at 20% of the total cost for firms with gross sales of $500,000 or less and 35% of the total cost for firms with gross sales of over $500,000.

MBDCs performing satisfactorily may continue to operate, after the initial competitive year for up to 2 additional budget periods. MBDCs with year-to-date "commendable" and "excellent" performance ratings may continue to be funded for up to 3 or 4 additional budget periods, respectively. Under no circumstances shall an MBDC be funded for more than 5 consecutive budget periods without competition. Periodic reviews culminating in year-to-date quantitative and qualitative evaluations will be conducted to determine if

funding for the project should continue. Continued funding will be at the discretion of MBDA based on such factors as an MBDC's performance, the availability of funds and Agency priorities.

Award recipients and subrecipients under this program shall be subject to all Federal Departmental regulations, policies, and procedures applicable to Federal assistance awards.

No award of Federal funds shall be made to an applicant who has an outstanding delinquent Federal debt until either the delinquent account is paid in full, a negotiated repayment schedule is established and at least one payment is received, or other arrangements satisfactory to the Department of Commerce (DOC) are made.

All primary applicants must submit a completed Form CD–511, "Certifications Regarding Debarment, Suspension and Other Responsibility Matters; Drug-Free Workplace Requirements and Lobbying:"

Prospective participants (as defined at 15 CFR part 26, section 105) are subject to 15 CFR part 26, "Nonprocurement Debarment and Suspension" and the related section of the certification form;

Grantees (as defined at 15 CFR part 26, section 605) are subject to 15 CFR part 26, subpart F, "Government-wide Requirements for Drug-Free Workplace (Grants)" and the related section of the certification form;

Persons (as defined at 15 CFR part 28, section 105) are subject to the lobbying provisions of 31 U.S.C. 1352, "Limitation on use of appropriated funds to influence certain Federal contracting and financial transactions," and the lobbying section of the certification form which applies to applicable/bids for grants, cooperative agreements, and contracts for more than $100,000, and loans and loan guarantees for more than $150,000, or the single family maximum mortgage limit for affected programs, whichever is greater; and

Any applicant that has paid or will pay for lobbying using any funds must submit an SF–LLL, "Disclosure of Lobbying Activities," as required under 15 CFR part 28, Appendix B.

Recipients shall require applicants/bidders for subgrants, contracts, subcontracts, or other lower tier covered transactions at any tier under the award to submit, if applicable, a completed Form CD–512, "Certifications Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion—Lower Tier Covered Transactions and Lobbying" and disclosure form, SF–LLL, "Disclosure of Lobbying Activities." Form CD–512 is intended for the use of recipients and should not be transmitted to DOC. SF–LLL submitted by any tier recipient or subrecipient should be submitted to DOC in accordance with the instructions contained in the award document.

The Departmental Grants Officer may terminate any grants/cooperative agreement in whole or in part at any time before the date of completion whenever it is determined that the MBDC has failed to comply with the conditions of the grant/cooperative agreement. Examples of some of the conditions which can cause termination are failure to meet cost-sharing requirements: unsatisfactory performance of MBDC work requirements: And reporting inaccurate or inflated claims of client assistance or client certification. Such inaccurate or inflated claims may be deemed illegal and punishable by law.

Unsatisfactory performance under prior Federal awards may result in an application not being considered for funding.

If applicants incur any costs prior to an award being made, they do so solely at their own risk of not being reimbursed by the Government. Notwithstanding any verbal assurance that they may have received, there is no obligation on the part of the Government to cover pre-award costs.

If an application is selected for funding, the U.S. Department of Commerce has no obligation to provide any additional future funding in connection with that award. Renewal of an award to increase funding or extend the period of performance is at the total discretion of the Department.

All non-profit and for-profit applicants are subject to a name check review process. Name checks are intended to reveal if any key individuals associated with the applicant have been convicted of or is presently facing, criminal charges such as fraud, theft, perjury, or other matters which significantly reflect on the applicant's management honesty or financial integrity; and a false statement on an application is grounds for denial or termination of funds and grounds for possible punishment by a fine or imprisonment as provided in 18 U.S.C. 1001.

CLOSING DATE: The closing date for applications is January 29, 1993. Applications must be postmarked on or before January 29, 1993.

ADDRESSES: Chicago Regional Office, Minority Business Development Agency, U.S. Department of Commerce, 55 East Monroe, Suite 1440, Chicago, Illinois 60603.

FOR FURTHER INFORMATION CONTACT: David Vega, Regional Director, Chicago Regional Office.

Address: Chicago Regional Office, Minority Business Development Agency, 55 East Monroe Street, Suite 1440, Chicago, Illinois 60603. 312/353–0182.

Statutory Authority: 15 U.S.C. 1512.
Funding Authority: Executive Order 11625, October 13, 1971.

SUPPLEMENTARY INFORMATION: Anticipated processing time of this award is 120 days. Executive Order 12372 "Intergovernmental Review of Federal Programs" is not applicable to this program. A pre-bid conference will be held on January 11, 1993, at 10 a.m. at the MBDA Chicago Regional Office. Questions concerning the preceding information, copies of application kits and applicable regulations can be obtained at the above address.

National Institute of Standards and Technology

[Docket No. 921191–2291]

Opportunity To Join a Cooperative Research and Development Consortium for Development of New Dental Materials

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice.

SUMMARY: The National Institute of Standards and Technology (NIST) seeks industrial parties interested in entering into a cooperative research consortium to develop a metallic, mercury-free, direct filling replacement for dental amalgam. Under 15 U.S.C. 3710a(c)(4), NIST will give preference to business units located in the United States that agree that products embodying any invention made in the consortium will be manufactured substantially in the United States. Any program undertaken will be within the scope and confines of The Federal Technology Transfer Act of 1986 (Pub. L. 99–502, 15 U.S.C. 3710a), which provides federal laboratories including NIST, with the authority to enter into cooperative research agreements with qualified parties. Under this law, NIST may contribute personnel, equipment, intellectual property and facilities—but no funds—to the cooperative research program. NIST intends to conduct a meeting in January, 1993 for interested parties. The

meeting will discuss the possible formation of a research consortium including NIST, The American Dental Association Health Foundation and industry to conduct research in this area. This is not a grant program.

DATES: Interested parties should contact NIST at the address or telephone number shown below no later than January 11, 1993.

ADDRESSES: Dr. David Lashmore, Bldg. 224, room B–166, National Institute of Standards and Technology, Gaithersburg, MD 20899.

FOR FURTHER INFORMATION CONTACT: Dr. David Lashmore, (301) 975–6405.

SUPPLEMENTARY INFORMATION: NIST seeks qualified United States industrial parties interested in entering into a cooperative consortium research program to develop a metallic, mercury-free, direct-filling replacement for dental amalgam. NIST has filed for a patent for a "Process for Forming Alloys in situ in Absence of Liquid-Phase Sintering" which may be useful in the development of such new direct-filling replacements for dental amalgams. Members will receive a time-limited, royalty bearing, co-exclusive license, limited to the dental field, for any patent issuing from the current application. In addition, it is anticipated that participating companies will receive time-limited, royalty bearing co-exclusive licenses, limited to the dental field, for any new materials developed by the consortium.

Companies should be prepared to invest $50,000 per year in the collaboration and be firmly committed to the goal of developing a new dental restorative material that would be a viable alternative to silver-mercury amalgams.

This program is being undertaken within the scope and confines of the Federal Technology Transfer Act of 1986 (Pub. L. 99–502, 15 U.S.C. 3710a), which authorizes government owned and operated federal laboratories, including NIST, to enter into cooperative research and development agreements ("CRADAs") with qualified parties. Under the law, a CRADA may provide for contributions from the federal laboratory of personnel, equipment, intellectual property and facilities, but not direct funding. NIST intends to hold a planning meeting in January, 1993 for interested parties.

Dated: December 16, 1992.

John W. Lyons,

Director.

National Oceanic and Atmospheric Administration

Permits; Foreign Fishing

In accordance with a memorandum of understanding with the Secretary of State, the National Marine Fisheries Service, on behalf of the Secretary of State, publishes for public review and comment a summary of applications received by the Secretary of State requesting permits for foreign fishing vessels to operate in the Exclusive Economic Zone in 1993 under provisions of the Magnuson Fishery Conservation and Management Act (Magnuson Act, 16 U.S.C. 1801 *et seq.*). Specifically, the Russian Federation has submitted an application which requests 10,000 metric tons (mt) of Atlantic mackerel for directed fishing and 10,000 mt of Atlantic mackerel for joint venture purchases. The large stern trawler/processors GISSAR and PIONER NIKOLAEV are identified as the vessels that will fish and receive fish from U.S. vessels. Send comments on this application to: NOAA—National Marine Fisheries Service, Office of Fisheries Conservation and Management, 1335 East West Highway, Silver Spring, Maryland 20910 and/or, to one or both of the Regional Fishery Management Councils listed below:

Douglas G. Marshall, Executive Director, New England Fishery Management Council, 5 Broadway (Route 1), Saugus, MA 01906, 671/231–0422

John C. Bryson, Executive Director, Mid-Atlantic Fishery Management Council, Federal Building, room 2115, 320 South New Street, Dover, DE 19901, 302/674–2331

For further information contact Robert A. Dickinson, Office of Fisheries Conservation and Management, (301) 713–2337.

Dated: December 16, 1992.

Marine Mammals

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Modification No. 2 to Permit No. 634.

Notice is hereby given that pursuant to the provisions of §§ 216.33 (d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), Public Display Permit No. 634 issued to Marine World Africa, USA, Marine World Parkway, Vallejo, California 94589, on April 29, 1988 (53 FR 16307), modified on January 18, 1991 (56 FR 3542) is further modified as follows:

Section B.4, first sentence is changed to read:

4. The authority to acquire the marine mammals authorized herein shall extend from the date of issuance through June 30, 1993.

This modification becomes effective upon publication in the **Federal Register**.

Documents submitted in connection with the above modification are available for review by appointment in the following offices:

Office of Protected Resources, National Marine Fisheries Service, NOAA, 1335 East-West Highway, room 7324, Silver Spring, MD, 20910 (301/713–2289); and

Director, Southwest Region, National Marine Fisheries Service, NOAA, 501 West Ocean Boulevard, Long Beach, CA 90802–4213 (310/980–4016).

Dated: December 16, 1992.

COMMODITY FUTURES TRADING COMMISSION

Authorization of the National Futures Association To Implement the Direct Electronic Entry Registration Program on a Permanent Basis; Approval of Proposed New Registration Rule 801

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice and Order authorizing the National Futures Association (NFA) to offer its current pilot Program for the Direct Electronic Entry of Registration Data on a permanent basis. Under the program, specified registrants may enter registration data electronically into the NFA computer system with respect to associated person (AP) applicants and NFA may grant temporary AP licenses on the basis of such electronic filings.

SUMMARY: Section 8a(1) of the Commodity Exchange Act (Act) provides, in part, that the Commodity Futures Trading Commission (Commission or CFTC) may grant a temporary license to any applicant for registration with the Commission pursuant to such rules, regulations, or orders as the Commission may adopt. 7

U.S.C. 12a(1) (1988), as amended by the Futures Trading Practices Act of 1992, Pub. L. No. 102–546, 106 Stat. 3590 (October 28, 1992). The direct entry pilot program was established in 1990 to expedite the temporary licensing process. As discussed below, NFA has submitted, and the Commission has approved, new NFA Registration Rule 801 which will permit NFA to offer the direct entry program on a permanent basis. As proposed to be operated under the new rule, the direct entry program should expedite and increase the efficiency of the temporary licensing process and other aspects of registration processing.

SUPPLEMENTARY INFORMATION:

I. Background

A. Introduction

By Commission order of August 28, 1990 (1990 Order), for the past nineteen months NFA has operated a program for the direct entry of certain registration information on a pilot basis. Under the pilot program, a limited number of firms have access to registration data in NFA's computer database, the Membership Registration Receivables System (MRRS). The program also permits certain participating firms to enter registration data concerning AP applicants sponsored by such firms directly into the MRRS database via computer terminals in their offices for the purpose of obtaining temporary licenses for their employees.[1]

NFA now seeks Commission approval to terminate the pilot status of and make permanent the direct entry program, expand the types of filings for which direct entry may be used and make various procedural modifications to the operation of the program.[2] Under NFA's Proposed Rule 801, registrant sponsors would electronically enter into MRRS all information required to be filed on Form 8–R (application for registration for individuals), Form 3–R (supplemental statement to application for registration), Form 8–T (notice of termination) or Form U–5 (uniform termination notice for securities industry registration) for all AP applicant's, APs, principals and branch office managers[3] of such sponsors and of any introducing brokers (IBs) guaranteed by such sponsors for whom the sponsors have assumed registration responsibilities.

As set forth in the Submission, NFA also proposes to modify the procedures followed under the pilot program in a number of respects designed to increase the efficiency of the program, including: (1) Elimination of the notice to the Commission and approval requirements for adding firms to the program; (2) reduction of the period of Phase II operational experience required before firms may advance to Phase III of the program; (3) reduction of line-by-line review by NFA of electronically filed forms; (4) reduction of statistics provided to the Commission; (5) elimination of the requirement that all forms be entered electronically by each participating firm; (6) expansion of the program to permit electronic filings of Forms 8–R and 8–T for principals and of Forms 3–R updating Forms 7–R; and (7) elimination of certain paper filings.

B. History of the Direct Entry Program[4]

NFA's direct entry procedures were developed to expedite the temporary licensing process by allowing direct input of data by firms into NFA's MRRS database, thereby permitting applicants to act as APs sooner than if their applications were mailed or delivered to NFA and the data entered into the NFA database by NFA personnel. This mechanism is fully consistent with the primary purpose of the temporary license procedure—to enable apparently qualified applicants to begin work as soon as possible prior to completion of a full fitness check.[5]

The direct entry program had its genesis in a 1987 proposal by NFA to provide certain member firms the capability to access and query the MRRS database. This access capability, which later became known as Phase I of the direct entry pilot program, simply provided firms with computer access to registration information concerning their own employees and public information concerning other registrants without having to obtain such information from NFA's Registration Department or Information Center. This procedure became operational on November 10, 1987 when the Commission approved NFA's proposal to provide two futures commission merchants (FCMs) with direct inquiry access to NFA's registration database.[6] NFA states that this phase of the program has enabled it to reduce the resources required to respond to member firm inquiries and provide improved service to members of the public requesting information from the NFA Information Center.

On January 5, 1989, NFA petitioned the Commission for authorization to implement a program for direct entry of AP registration data into NFA's MRRS system by the sponsors of APs (Phase II) and ultimately the electronic granting of temporary licenses for APs following such direct entry of registration data (Phase III).[7] By order dated August 28, 1990, the Commission authorized NFA to implement Phases II and III of the direct entry program as a pilot program subject to certain conditions which generally incorporated procedures proposed by NFA.[8] These conditions included the following: (1) Sponsors would continue to be required to file with NFA the required paper registration forms, fingerprint cards and sponsor certifications, which would be compared with electronically entered data material to the granting of a temporary license and used to complete the fitness processing for final registration determinations; (2) all participating firms would be required to sign NFA's Agreement For Firm Direct Entry Privileges to MRRS (Direct Entry Agreement), setting forth the conditions, responsibilities and obligations of pilot program participants; (3) NFA would comply with its responsibilities under the direct entry pilot program as set forth in its January 5, 1989 petition; (4) any firm not specified in the Commission's order would be required to receive permission to participate in Phase II; (5) implementation of Phase III of the pilot program would be subject to Commission approval; (6) NFA would provide the Commission with monthly statistical reports relating to the pilot

---

[1] A temporary AP license allows an applicant who is eligible for registration to act as an AP of his sponsoring firm without waiting for completion of a full fitness screening which, due to the necessity to have fingerprint cards processed by the Federal Bureau of Investigation, may take six to eight weeks. The applicant may not be granted AP registration until the fitness screening is concluded.

[2] Request for an Order Granting NFA Permission to Offer the Direct Entry Registration Program on a Permanent Basis Pursuant to Proposed New Registration Rule 801, submitted by NFA, July 9, 1992 (Submission), as supplemented by submissions dated August 27, 1992, October 8, 1992, November 13, 1992, November 25, 1992 and December 8, 1992. Submission at 2.

[3] Branch office managers are APs but also are required to disclose their status as branch office managers on Forms 8–R, 3–R and 8–T.

[4] A more detailed discussion of the direct entry pilot program is provided in the Federal Register release accompanying the Commission's order approving the pilot program. 55 FR 35925 (September 4, 1990).

[5] 49 FR 8208, 8210 (March 5, 1984).

[6] See letter from Lawrence B. Patent, Associate Chief Counsel, Division of Trading and Markets, CFTC to Daniel J. Roth, Vice President, General Counsel and Secretary, National Futures Association, dated November 10, 1987 responding to letters dated October 6 and 29, 1987 from Daniel J. Roth to Andrea M. Corcoran, Director, Division of Trading and Markets, CFTC.

[7] This petition was supplemented by a letter dated July 17, 1990 from Daniel J. Roth, Vice President, General Counsel and Secretary, NFA, to the Division of Trading and Markets, CFTC, which identified the firms seeking authorization to participate in Phase II.

[8] See 55 FR 35925, 35934 (September 4, 1990).

program; and (7) NFA would terminate any temporary license granted under the pilot program if NFA did not receive all required follow-up paper filings or if NFA's review of the paper filings revealed that an applicant was not eligible for a temporary license or the temporary license had been granted by mistake or as a result of fraudulent means.

Currently, the direct entry pilot program operated by NFA pursuant to the Commission's Order consists of three phases. Under Phase I, as noted above, participating FCMs are provided with direct inquiry access, via computer terminals at those firms, to all registration information in the MRRS database to which they are entitled under NFA Registration Rules 701 (b) and (c). This information includes all registration information relating to a firm's own employees and prospective employees and public information regarding all registrants. As of October 31, 1992, 25 firms were participating in Phase I.[9]

Phases II and III of the pilot program permit participating firms to enter electronically into NFA's registration computer system, through terminals located in their offices, information required to be filed on Form 8–R, Form 3–R, Form 8–T or Form U–5 for all AP applicants, APs and branch office managers. Under Phase II, although the participating firm enters the AP application data by computer, only NFA personnel are authorized to instruct the NFA computer system to process an application and, if appropriate, grant a temporary license. The Commission's 1990 Order authorized participation by ten firms in Phases II and III of the program but provided that additional firms could be added with prior approval. The 1990 Order also required that Commission staff be provided an opportunity to review data concerning the accuracy, timeliness and completeness of data entry during Phase II and to raise any concerns or objections deemed appropriate based upon the Phase II data and other experience prior to implementation of Phase III of the pilot program. See 55 FR 35925 (September 4, 1990). As of October 31, 1992, three firms were participating in Phase II of the program: Refco, Inc., Prudential Securities Inc., and Shearson Lehman Brothers Inc. Another Phase I participant, Cargill Investor Services, Inc., has been approved but is not yet participating in Phase II. The 1990 Order also provided that a participating Phase II firm would not become eligible for participation in Phase III until completion of ninety days in Phase II.

Under Phase III of the pilot program, participating firms continue to enter AP registration data directly into NFA's registration computer system. However, under Phase III, qualifying AP applicants are issued a temporary license upon entry of a computer command by the participating firm when the application data entered by the firm indicate that the AP is eligible for a temporary license.[10] The participating firm must file the hardcopy Form 8–R, together with the applicant's fingerprint card and evidence of the applicant's satisfaction of the NFA proficiency requirements,[11] by mailing it to NFA on the same day on which the firm directs MRRS to process the application. A temporary license is issued by NFA immediately when the data entered in MRRS by the participating firm indicate that the AP applicant is eligible for a temporary license. NFA immediately terminates any previously issued temporary license if the applicant's Form 8–R, fingerprint card or proof of passage of the Series 3 examination are not received by NFA within five business days of the date on which the application was filed electronically. NFA registration staff compare the information on the hardcopy Form 8–R with the application information previously entered into MRRS by the sponsoring firm. If such comparison discloses different information from that entered directly by the sponsoring firm and that information indicates that the applicant is not eligible for a temporary license because of, for example, derogatory information indicating a statutory disqualification, NFA terminates the temporary license. Subsequent FBI fitness reports or fitness checks with the Securities and Exchange Commission (SEC) revealing disqualifications not previously disclosed result in termination of the temporary license upon five days notice.[12] Currently, four firms are participating in Phase III of the program: LIT America, Inc., Merrill Lynch, Pierce, Fenner & Smith, Index Futures Group and Brokers Resource Corp.[13]

As of October 31, 1992, 1,078 filings had been processed under Phase II of the pilot program and 1,094 filings had been processed under Phase III of the pilot program.[14] Filings under Phases II and III represent about four percent of all registration filings received by NFA during the same period. Of the 1,078 forms filed under Phase II, 376 were Forms 8–R, 75 were Forms 3–R, and 627 were termination notices (either Form 8–T or Form U–5). Of the 1,094 forms filed under Phase III, 489 were Forms 8–R, 158 were Forms 3–R and 447 were termination notices.

Based upon its item-by-item comparison of the data entered into MRRS and the information on the registration forms submitted by participating firms, NFA describes the performance of participating firms during the pilot program as

[9] As of October 31, 1992, the firms participating in Phase I are: ADM Investor Services, Inc., Advest, Inc., Brody White & Co., Inc., BT Futures Corp., Cargill Investor Services, Inc., Colorado Commodities Management Corp., Commodities Corp., Daiwa Securities America, Inc., Dean Witter Reynolds, Inc., ED&F Mann International Futures, Inc., First American Discount Corporation; Goldermann Inc., Goldman Sachs & Co., J.P. Morgan Futures, Inc., Kemper Securities Group, Inc., Lind-Waldock & Company, Linnco Futures, Inc., Nomura Securities, Inc., Paine Webber Inc., Rodman & Renshaw, Inc., R.J. O'Brien Associates, Inc., Rosenthal Collins Group, Salomon Brothers, Inc., UBS Securities, Inc.; and Vision Limited Partnership.

[10] In order for an applicant to qualify for a temporary license, the applicant must submit a completed registration application which includes a fingerprint card and sponsor's certification. In addition, in order for the applicant to qualify for a temporary license, the application may not contain a "Yes" answer to any of the disciplinary history questions on the application (questions 14–18) (self-declared derogatory information). In addition, the applicant may not have a conditional, suspended or revoked registration and must not be the subject of a current NFA investigation. Finally, the applicant must provide proof of successful completion of the National Commodity Futures Examination (Series 3).

[11] NFA Bylaw 401(b) provides that no person may be associated with an NFA member (i.e., as an AP) unless the person is registered with NFA as an associate. NFA Registration Rule 401 requires as a condition for associate registration evidence that the applicant has taken and passed the National Commodity Futures Examination no more than two years prior to the date the application is received by NFA, has been duly registered in another capacity within that two-year period, or is registered with the National Association of Securities Dealers (NASD) as a general securities representative and the applicant's activities will be limited to the solicitation of funds for commodity pools or referring clients to an AP who has satisfied the proficiency requirements.

[12] If a firm were to make a data entry error that was potentially adverse to the applicant's registration status, there would be an opportunity for correction of the error prior to any adverse action being taken. Before any action is taken to deny registration, the affected applicant usually is notified by a letter from the NFA Director of Compliance, or the Director's designee, of the contemplated action and the basis for it and provided with an opportunity to withdraw the registration application. Registrants are provided with a notice of commencement of a revocation proceeding and an opportunity for a hearing before any adverse action is taken with respect to their registration status.

[13] Index Futures Group and Brokers Resource Corp. are treated as one firm for the purpose of compiling performance data.

[14] The Submission cites 1,037 as the total number of filings received during the pilot program, representing electronic filings from April 12, 1991 through April 12, 1992. The number cited in the text represents the total number of electronic filings filed from April 12, 1991 through October 31, 1992.

"outstanding."[16] Specifically, NFA reports that since the implementation of Phase II of the pilot program, of the 2,172 direct entry filings received, only one contained a material discrepancy between the electronic filing and the paper filing.[16] Fewer than five percent of these filings contained non-material discrepancies, primarily typographical errors.[17] NFA submits that these data demonstrate that the reliability of registration data has not been affected by use of direct entry procedures.[18] NFA also notes that during the nineteen months that the pilot program has been in operation, all paper filings have been timely received.

With regard to the fitness screening process during the pilot program, when an applicant disclosed a potential disqualification, a temporary license was not issued and the applicant was accorded the same fitness review applicable where a potential disqualification was disclosed in a paper filing. During Phases II and III of the pilot program, any filings deemed not qualified for a temporary license due to a disciplinary history disclosure were referred to NFA's fitness review staff, and potentially to NFA's Registration Compliance Legal Committee, for a full fitness review. As of October 31, 1992, thirty-one applications had resulted in such referrals. In addition, all FBI fingerprint cards were received within one day of the electronic filing, enabling the FBI background checks to begin virtually immediately. NFA reports that it identified no instances during the pilot program in which an individual ineligible for registration received a temporary license.[19]

NFA states that its experience with the pilot program demonstrates that neither fitness screening nor any other aspect of the registration process is compromised by the substitution of electronic filing for paper filing. NFA also reports that due to the transfer to the clerical data entry responsibility from NFA to sponsoring firms under the direct entry program, it has experienced a significant decrease in the resources required for registration processing functions. NFA notes that soon after the start of Phase I, NFA's registration processing staff was reduced by more than fifty percent, a reduction it attributes to the efficiencies of the MRRS system as well as the decrease in NFA processing activities due to the direct entry program. NFA also notes that since the direct entry program became operational the number of calls received at its Information Center has remained steady and in some years has decreased, whereas prior to the direct entry program the number of calls to the Information Center had increased substantially each year. NFA represents that the firms participating in Phase II of the program receive temporary licenses for their AP applicants approximately four business days sooner than those firms using paper filings.

II. Discussion

A. The Proposed Rule

NFA Registration Rule 801 would make the direct entry program permanent.[20] Subject to certain conditions, the rule allows, but does not require, all sponsoring firms to file Forms 8–R, 3–R, 8–T and U–5 electronically by direct dial-up transmission to NFA's registration and membership database. With respect to the electronic filing of Forms 8–R, a sponsoring registrant must send to NFA,[21] on the same day it has directed the computer to process the electronic filing, the applicant's disciplinary history on a hardcopy form provided by NFA and signed by the applicant, together with the applicant's fingerprints and proof of successful completion of the proficiency examination, as provided by NFA Registration Rule 206(a)(3). The disciplinary history section of Form 8–R contains important information concerning the applicant's background which directly relates to eligibility for registration. The disciplinary history form required to be signed by the applicant and provided in hardcopy to NFA will contain the applicant's signature certifying to the truthfulness and accuracy of the disciplinary history set forth therein and all other certifications and agreements by the applicant currently required by the Form 8–R.[22] By signing the disciplinary history form, the applicant will further certify: (1) That all information he has provided to his sponsoring firm in connection with the electronically filed portion of the application is true and not misleading, and (2) that he understands that a willfully false or misleading statement or omission made to his sponsoring firm and electronically transmitted by the firm to NFA will have the same effect as a willfully false or misleading statement or omission made in a hard copy application signed by him.

With respect to the remainder of the Form 8–R, which comprises the bulk of the form and includes information relating to the applicant's residential, employment and educational history, no paper filing requirement would exist, and thus no handwritten signature by the AP applicant attesting to the accuracy and completeness of the information, would be incorporated in the submission to NFA. Proposed Rule 801(b), however, provides that by authorizing the computer to process an electronically filed form, the registrant firm electronically certifies that it has complied with all requirements of the rule and has made all reasonable efforts to ensure that the applicant information

---

[16] Submission at 8.

[16] In that case, one of the Form 8–R disciplinary history questions was not answered on the hardcopy Form 8–R although the electronic filing indicated a "no" answer. As soon as NFA discovered the discrepancy, it terminated the temporary license. That same day, however, NFA learned that the "no" response was the appropriate answer and the temporary license was reissued. Submission at 8, n.1.

[17] Submission at 8.

[18] NFA also notes that it receives completed applications more expeditiously from firms participating in the direct entry program, as evidenced by a significantly lower number of deficiency letters being issued as a result of direct entry filings than for paper filings. Approximately thirty-eight percent of paper filings result in a deficiency letter being sent to the firm as compared to less than one percent issued as a result of direct entry filings.

[19] Submission at 7.

[20] NFA Registration Rules 701 (Disclosure of Information from Registration Records Maintained by NFA) and 702 (Certification of the Authenticity of Registration Records Maintained by NFA) make reference to "registration records" and "application forms". With the adoption of Registration Rule 801, the terms "registration records" and "application forms" will encompass any forms filed electronically pursuant to that rule. Thus, NFA will consider a registration form filed electronically to be a registration record and/or an application form pursuant to NFA Registration Rules 701 and 702.

[21] Rule 801 would require that such filing be made by first-class mail, hand-delivery or any other standard means of conveyance including a generally recognized overnight delivery service.

[22] A Form 8–R currently requires certifications by the individual applicant as to, among other things, his understanding that he is subject to the imposition of criminal penalties for any false statements or omissions made in the application, that he will at all times keep accurate and current the answers to the items required to be updated, and that his answers and statements on the Form 8–R are true and not misleading. Form 8–R currently incorporates, and the disciplinary history form to be employed under Rule 801 will also incorporate, certain agreements by the applicant relating to application for membership as an Associate member of NFA. (Letter from Daniel J. Roth, dated November 25, 1992 to Jean A. Webb, Secretariat, CFTC). As noted above, Rule 801 will not require filing with NFA of the hardcopy of the complete Form 8–R including the applicant's employment and educational history. Therefore, absent action by the sponsoring firm to maintain hardcopy records of information on the latter topics supplied by the applicant, no hardcopy record of the applicant's employment and educational history to support the firm's electronic filing will be preserved. The requirements of Commission rules as to the necessary support for the sponsors certifications required under Rule 3.12 are discussed *infra*.

entered by electronic filing is accurate.[23] Rule 801 requires a firm to make all of the certifications required by Rule 3.12(c) and the current Form 8–R.[24] The Rule also provides that these electronic certifications "shall have the same force and effect as a certification on the Form itself signed by an authorized officer of the registrant."[25] Proposed Registration Rule 801(b).[26]

The applicant's disciplinary history, with all required attachments, must be received by NFA within five business days after the electronic filing is processed. If the applicant's disciplinary history and required attachments indicate that the applicant does not qualify for a temporary license or NFA fails to receive the form with all required attachments and certifications within five days after the electronic filing was processed, NFA will terminate immediately, upon notice to the sponsoring firm, any temporary license previously granted. Proposed Registration Rule 801(a)(2).

Proposed Rule 801 also provides that no registrant may electronically file registration forms until NFA has assigned it an identifying code and password and that each registrant is responsible for maintaining the security and confidentiality of its identifying code and for controlling access to all terminals that have inquiry or data entry access to NFA's MRRS database. Proposed Registration Rule 801 (c) and (d). Finally, the rule states that electronic filing "is a privilege and not a right" and that NFA may disable a registrant's identifying code and password, thereby terminating the registrant's ability to file forms electronically, as opposed to in hard copy, at any time, without notice or hearing, in NFA's sole discretion. Proposed Registration Rule 801(f).

B. Consistency With Commission Rule 3.12(c)

The direct entry of registration data, pursuant to proposed Rule 801, would substantially modify the manner of submitting registration application data from that contemplated by paper filing systems such as were in use at the time of the promulgation of the Commission's requirements for registration applications. The Commission has reviewed proposed Rule 801 to assure that it is consistent with the requirements of the Commission's registration rules, in particular, Rule 3.12 (c) governing applications for registration as an AP of an FCM or IB, and to determine whether any modifications of Commission rules are needed to accommodate the use of direct entry procedures. Based upon this review, the Commission has determined that no rule changes are necessary and that existing requirements can be applied in the direct entry context.

Commission Rule 3.12(c) requires that an application for registration as an AP of an FCM or IB must be on Form 8–R, completed and filed in accordance with the instructions thereto and that specified certifications "in writing" and signed and dated by the sponsor must be submitted concurrently with the Form 8–R. Rule 3.12(c) also requires that each Form 8–R filed pursuant to that rule must be accompanied by the fingerprints of the applicant on a fingerprint card provided for that purpose by the NFA. Rule 3.12(e) provides that the sponsor must retain in

[23] The certification required by the rule is accomplished by electronic data entry. After all the information required on the Form 8–R, 3–R, 8–T or U–8 has been entered into the computer, a question will appear on the screen asking the data entry operator whether he or she is ready to process the form. A "yes" answer to this question means that the firm is certifying, and in effect, verifying all of the previously entered data. In addition, by answering "yes" to the question, the firm is also certifying that it is forwarding the fingerprint card and proof of the applicant's successful completion of the National Commodity Futures Examination. Proposed Registration Rule 801(a)(1).

[24] Under proposed Rule 801, the sponsoring firm must certify that: (1) the information supplied by the applicant in response to questions contained in the electronically filed Form 8–R relating to the applicant's employment and education history for the past three years has been verified; (2) the applicant has been hired or is employed by the firm or that it is the intention of the firm to hire or otherwise employ the applicant as an AP within thirty days after the firm receives notification that the applicant has received a temporary license; (3) the applicant will not be permitted to act as an AP until a temporary license has been issued or he has been registered pursuant to the electronically filed application; (4) the firm understands that it is under a duty not to employ a person subject to a statutory disqualification under Section 8a(2) of the Act, to notify the Commission when any employee becomes subject to such a disqualification and to supervise applicants named in electronic filings with a view towards preventing applicants from violating the Act; (5) in the case of an applicant answering items 14 or 16 on the Form 8–R in the affirmative, the firm has received a copy of the complaint or letter issued by the Commission or NFA; and (6) the information contained in the electronically filed Form 8–R has been obtained by the firm for the sole purpose of verifying the information contained in the applicant's Form 8–R and the firm will seek to prevent the wrongful dissemination of any of the information contained in the electronically filed Form 8–R and of any records and documents retained in support thereof.

[25] Although the validity of an electronic certification as an authorized "signature" of a firm or its officers has not been established as yet by judicial precedent, there is precedent establishing the validity of "signatures" other than handwritten signatures. *See Cam* v. *Bessemer Cement Company*, 558 F. Supp. 706 (W.D. Pa. 1983) (holding pre-printed company name constituted company's signature on a bill of lading for purposes of exercising the consignor's "non-recourse" option under such bill of lading and noting that it "appears to be settled under the common law that a printed name on an instrument which is intended to have the force of a signature is valid and thus will have the intended effect"). See also, Uniform Commercial Code § 1–201(39) which provides that the term "signature" means any symbol executed or adopted by a party with the present intention to authenticate a writing. On August 7, 1992, the SEC published for comment in the Federal Register proposed rules and procedures to implement the operational phase of its Electronic Data Gathering, Analysis, and Retrieval (EDGAR) system. See 57 FR 35070 (August 7, 1992). The proposed regulation, Regulation S–T, will apply to electronic submissions processed by the SEC's Division of Corporation Finance, and in some cases, to those processed by the Division of Investment Management. The proposed rules provide that:

Signatures to or within any electronic filing shall be in typed form rather than manual format. For purposes of Regulation S–T (part 232 of this chapter), the term "signature" means an electronic entry in the form of a magnetic impulse or other form of computer data compilation of any letter or series of letters comprising a name, executed, adopted or authorized as a signature. Proposed § 232.13 of Regulation S–T.

The SEC is proposing to require that essentially all documents, including filings, correspondence and supplemental information submitted by or relating to registrants under the Securities Act of 1933, the Securities Exchange Act of 1934, the Trust Indenture Act of 1939 and the Investment Company Act of 1940, be submitted electronically. This would include periodic and other filings by domestic companies on Forms 10–K, 10–Q, 8–K, 10 and definitive proxy statements, annual and quarterly reports of domestic companies on Forms 10–K and 10–Q, Securities Act registration statements, filings made in connection with tender offers on Schedules 13D, 13G, 14D–1, 14D–9, 13E–3, and 13E–4, stock ownership reports on Forms 3, 4, 5, 144 and 13F, and Schedules 13D, 13G and 14D–1, and periodic reports filed under the Investment Company Act on Forms N–SAR–A, N–SAR–B and N–SAR–U. Although such filings do not involve licenses, the NASD currently permits electronic filing of certain information relating to licenses of securities professionals. With respect to electronic filing of registration information, see note 46 *infra*.

[26] Rule 801 also requires that each firm filing registration information electronically make available its data entry personnel having duties relating to filing under the direct entry program for testimony in court or before the Commission, NFA or any contract market regarding the authenticity, integrity or accuracy of any electronic filing. Proposed Registration Rule 801(e).

accordance with Rule 1.31 "such records as are necessary to support the certifications required by this section."

The Commission believes that the requirement of "signed and dated" written certifications by the applicant's sponsor may be satisfied by electronically filed certifications of the sponsor pursuant to Rule 801, which establishes that by directing the computer to process an electronically filed form, the sponsoring registrant makes the certifications required as part of the current Form 8–R, including the certifications required by Rule 3.12(c), and that these certifications "shall have the same force and effect as a certification on the form itself signed by an authorized officer of the registrant." These certifications are in written text submitted electronically and are "signed" by the firm by typewritten rendering of the firm name on the electronic filing and by the firm's affirmative action authorizing the computer to process the electronically filed form. As noted above, each registrant using direct entry procedures must be assigned an identifying code and password and is responsible for maintaining the confidentiality of its identifying code and for controlling access to terminals that are used for electronic filing. Consequently, the sponsoring firm is properly charged with responsibility for data entered pursuant to its identifying code and password. Thus, under the terms of Rule 801, a firm that has directed the computer to process an electronically filed form is fully responsible for the submission of that information and for the certifications included therein.

Rule 3.12(e) further requires that the sponsor retain such records as are necessary to support the certifications required by this section. The Commission emphasizes that the required certification under Rule 801 by the applicant's sponsor that it has verified the information supplied by the applicant in response to questions contained in the electronically filed Form 8–R relating to the applicant's employment and education history for the past three years would necessitate that the firm retain either in hardcopy, optical disc format, or comparable recordkeeping system the information supplied it by the applicant, certified by the applicant's signature, and such further records as are necessary to evidence verification of this information from other sources.[27]

C. Fitness Screening

The direct entry program substitutes instantaneous electronic transmission of information for mailed transmission of hardcopy forms, effectively transferring the clerical data entry function for registration information from NFA to the sponsoring firm. The direct entry program does not change the content of the information required or the nature of NFA's review of that information; the only change is in the manner in which data are supplied to NFA and entered into the MRRS system. The evaluation of potential registration disqualifications is not modified by reason of the electronic filing of registration data.[28] Under the proposed Rule, temporary licenses granted on the basis of an electronic filing terminate immediately upon notice to the sponsoring registrant that the applicant's disciplinary history, with all required attachments, has not been received by NFA within five business days after the electronic filing was processed or that the Form 8–R or required attachments indicate that the applicant does not qualify for a temporary license.[29] All information critical to temporary license eligibility will continue to be reviewed by NFA staff, as under the pilot program. NFA will conduct the same fitness review of electronically filed information and will retain the same ability to terminate a temporary license based upon electronically filed applications as in the case of paper applications. As noted above, NFA has identified no instance under the pilot program in which an individual ineligible for registration received a temporary license.

D. Reliability of Registration Data in the MRRS System

In approving the direct entry pilot program, the Commission addressed the potential impact of the program upon the reliability of the MRRS data due to the performance by sponsoring firms of data entry functions, noting that applicants and their sponsors would have the same incentives to provide accurate registration information as under preexisting procedures. 55 FR 35925, 35930 (September 4, 1990). Firms and individual applicants continue to be bound by section 8a(2)(G) and section 8a(3)(G) of the Act, 7 U.S.C. 12a(2)(G) and 12a(3)(g) (1988), as amended by the Futures Trading Practices Act of 1992, which make the willful submission of inaccurate registration information grounds for denial, revocation, restriction, conditioning or suspension of registration. In addition, firms could be sanctioned under NFA Compliance Rule 2–2(f)[30] for the willful submission of materially false or misleading information through direct entry of such data into MRRS. Further, unintentional but frequent data entry errors could subject a firm to disciplinary action under NFA Compliance Rule 2–9 for lack of appropriate supervision.[31] Finally, a participating firm's failure to diligently supervise the operation of direct entry filings of registration data would constitute a violation of Commission Rule 166.3, 17 CFR 166.3 (1992), which generally requires diligent supervision of all activities of the firm's partners, officers, employees or agents relating to the firm's business as a Commission registrant.[32] The direct entry program, therefore, should not provide any unique incentive for a firm to falsify data in order to obtain a temporary license or a materially greater opportunity to do so than under current procedures in which a temporary license is granted or denied on the basis of self-declared information filed in hard copy.[33]

NFA developed extensive review procedures to detect data entry errors and to assure the accuracy of the information in MRRS during the pilot program. These review procedures included the line-by-line comparison of all hardcopy registration forms received as follow-ups to the electronic filings. NFA has proposed to change its line-by-line review procedure from a review of all information on the Form 8–R

[27] The requirement of Rule 3.12(c) that fingerprint cards for the applicant be filed with the Form 8–R is satisfied by filing of such cards with the disciplinary history portion of the Form 8–R, which is required to be submitted in hardcopy under Rule 801.

[28] Submission at 7.

[29] Notice of termination may be given by electronic transmission to a terminal on the sponsoring registrant's premises, by United States mail, by hand delivery, or by "any other standard means of conveyance including a generally recognized overnight delivery service." Proposed Registration Rule 801(a)(2).

[30] NFA Compliance Rule 2–2(f) provides that no NFA member or associate shall willfully submit materially false or misleading information to NFA or its agents.

[31] NFA Compliance Rule 2–9 provides that each NFA member shall diligently supervise its employees and agents in the conduct of their commodity futures activities for or on behalf of the member.

[32] Commission Rule 166.3, 17 CFR 166.3 (1992), provides that:

Each Commission registrant, except an associated person who has no supervisory duties, must diligently supervise the handling by its partners, officers, employees and agents (or persons occupying a similar status or performing a similar function) of all commodity interest accounts carried, operated, advised or introduced by the registrant and all other activities of its partners, officers, employees and agents (or persons occupying a similar status or performing a similar function) relating to its business as a Commission registrant.

[33] See 55 FR 35925, 35931 (September 4, 1990).

program to a review of only that information critical to the granting of a temporary license, *i.e.*, the applicant's disciplinary history. However, NFA will review all Forms 8–R on a line-by-line basis during a firm's training period (currently Phase II). Once NFA is satisfied that the firm has become proficient at the data entry function it will allow that firm to proceed to Phase III, in which only an applicant's disciplinary information will be required in hardcopy and reviewed on a line-by-line basis. NFA states that this change in its review procedures will not reduce the thoroughness of fitness screening or the reliability of the MRRS registration data. The statistics provided by NFA during the pilot program indicate that the firms participating in the program are entering data accurately and there appears to be no reason why firms would enter data less accurately if NFA alters its review procedures as proposed. As previously noted, repeated problems in entering accurate data by a firm operating under the direct entry program could lead to loss of that privilege (See Rule 801(f)), as well as sanctions under NFA Compliance Rule 2–9 or Commission Rule 166.3.

E. Computer Security

A further concern relevant to the proposal to make the direct entry program generally available to all sponsoring registrants is the potential impact upon the integrity of MRRS data as a result of unauthorized access to the MRRS system. NFA represents, however, that its state of the art security system makes a breach of security almost impossible. NFA states that its security practices make unauthorized access extremely difficult, limit exposure if unauthorized access is gained, and give NFA the ability to reconstruct data prior to the point of unauthorized access.[34] NFA's security procedures include membership in both IBM's Resource Access Control Facility (RACF), which protects access to MRRS by identifying and verifying the person attempting to gain access to MRRS and tracks unauthorized attempts to gain access to MRRS, and the IBM Information Network, which affords remote access to MRRS.

In order to obtain access to MRRS, other than from a terminal on NFA's premises, a user would need to have five different pieces of information: NFA's IBM Information Network account number, a user ID and a password for access to the IBM Information Network, and a user ID and password for access to NFA's computer system. Every authorized user is given a security profile by NFA's Security Administrator which is made unique by assigning the user his or her own individualized user ID. The security profile determines which systems, screens and fields the user is allowed to view and the systems, screens and fields to which the user is allowed access. For example, based on its security profile, a Phase II/Phase III user would not be allowed to update information in the files of an unaffiliated firm. All attempts to breach security are recorded by the computer. As a security safeguard, any terminal which remains inactive for fifteen minutes is automatically signed off by the computer. Member firms will not have programming access to NFA's computer system.

NFA states that the chance of a computer virus entering the system through a participating firm's terminal are "practically non-existent." In the unlikely event of unauthorized access, the access gained would be limited and NFA has the ability to reconstruct data prior to the point of contamination. NFA uses the Journaling Facility of the Computer Associates' Integrated Database Management System DATA BASE product to record all changes to the data in the system. This journal shows the data in existence before the change, the data as changed, and the cause of the change. By use of the journal, NFA personnel can determine when any damage occurred.[35]

Although NFA acknowledges that no security system is completely failsafe, it represents that the chances of unauthorized access to the MRRS system are extremely small and will be virtually unchanged by the limited access to be gained through off-site terminals in the offices of participating firms.[36] Moreover, NFA states that it is virtually impossible to cause damage to the MRRS system or the data stored on MRRS.

III. Proposed Procedural Changes to the Pilot Program

NFA has proposed certain changes to the direct entry program to facilitate making the program generally available to all sponsoring registrants and to increase the benefits of the program to participating firms. These changes are discussed below.

A. Preconditions to Participation

Under the pilot program procedures, NFA is required to notify the Commission before it provides inquiry access to a firm and to obtain Commission approval before it provides direct entry access to a firm. Proposed Rule 801 would eliminate these notification and approval requirements. NFA will provide the Commission with quarterly updates to identify those firms with inquiry and direct entry access.[37]

A further procedural modification proposed by NFA is a reduction in the time period that a firm must participate in Phase II prior to becoming eligible for participation in Phase III from ninety days to two weeks. NFA states that it takes approximately two weeks for a firm to demonstrate its proficiency at the data entry function. NFA would have the discretion to require a longer period of training for firms processing only a small number of applications during the two-week period.[38]

Finally, Rule 801 will supplant the Direct Entry Agreement for firms filing information electronically by codifying in the rule the conditions of direct entry participation.[39] Consequently, following

---

[34] Submission at 9. See also Description of Security Measures Presently in Use at National Futures Association's Data Center, Supplemental Submission to NFA's Petition for an Order Granting NFA Permission to Conduct a Pilot Program for the Direct Entry of Registration Data by a Sponsoring Registrant, July 16, 1990.

[35] For a more detailed description of the security procedures currently in place at NFA, see 55 FR 35925, 35932–35933 (September 4, 1990).

[36] NFA represents that there have been no instances of unauthorized access or attempts at such access or of any breach of security during the pilot program. Submission at 12.

[37] Submission at 14.

[38] NFA will make a determination in each case as to when a firm has demonstrated that it has become proficient at the data entry aspects of the program but in no event will a firm be moved from Phase II to Phase III prior to the completion of the two-week training period.

[39] Among other things, the Direct Entry Agreement requires that firms: (1) enter into NFA's MRRS database all information required to be filed on Forms 8–R, 3–R and 8–T for all APs of the participating firm and of the participating firm's guaranteed IBs for whom the participating firm has assumed registration responsibilities; (2) mail by first class mail or hand deliver to NFA, on the day that the firm enters a command in MRRS to process an application, the corresponding registration form with all required attachments; (3) adopt and enforce procedures to ensure the integrity and confidentiality of all individual filings; and (4) make its data entry personnel available for testimony in court, before the Commission, NFA or any contract market, in regard to the authenticity, integrity or accuracy of any paper or electronic filing covered by the agreement. The Direct Entry Agreement also requires that firms make certain certifications as part of its electronic filing as provided in Commission Rule 3.12(c)(1) (i)–(iv). The agreement further provides that the entry of an instruction by the participating firm to NFA to process an electronic filing constitutes a certification that the electronic filing accurately reflects the information on the paper filing and that the firm acknowledges that the willful submission of a false special certification constitutes cause for denial, suspension or revocation of the firm's registration under Sections 8a(2) and 8a(3) of the Act. In addition, the agreement provides that temporary licenses granted on the basis of an electronic filing shall terminate immediately upon notice to the firm that the paper filing was not

Continued

the approval of Registration Rule 801, firms will not be required to sign the Direct Entry Agreement.

B. Line-by-Line Review

Under current procedures, NFA reviews for accuracy on a line-by-line basis all forms filed electronically by firms participating in Phases II and III of the program by comparing the electronic filing to the hard copy. As noted above, NFA proposes to revise this procedure such that upon completion of a firm's training period (Phase II), during which time NFA will continue to review all Forms 8–R on a line-by-line basis, NFA will perform a line-by-line comparison of only the information critical to the granting of a temporary license, the applicant's disciplinary history, which will be required to be submitted separately on the paper form provided by NFA. Other information would be spot-checked for accuracy. As noted above, during the nineteen months the pilot program has been in operation, NFA staff has made a line-by-line comparison of 2,172 registration forms, which revealed a total of 83 errors, only one of which was material.[40]

As all information critical to temporary license eligibility will continue to be reviewed on a line-by-line basis, this procedural modification should not reduce the efficacy of the fitness screening process as it now exists. Reliability of registration data also should not be materially reduced. The data generated under the pilot program to date demonstrate the proficiency of the participating firms performing the data entry function and continuation of the line-by-line review of the information critical to the granting of a temporary license should be sufficient to assure data reliability.

C. Electronic Filing of All Forms

Under the current pilot program, participating firms are required to electronically enter every Form 8–R, Form 3–R, Form 8–T and Form U–5. NFA believed this requirement to be necessary in the early stages of the program in order to provide NFA staff with sufficient data for meaningful evaluation of the program. NFA states that it is no longer necessary to require that each participating firm file all of these forms electronically and proposes that participating firms have the option of filing either by mail or electronically.

D. Elimination of Paper Filing Requirement

NFA notes that the single most important aspect of the direct entry program to its members is the reduction of the amount of paper filings with NFA. NFA reports that its members have emphasized that having to file hard copy forms with NFA after completing the electronic filing significantly reduces the benefits of the program. NFA recognizes that the elimination of all paper filings is not possible due to the potentially important role in judicial or administrative proceedings of the certifications contained in certain filing signed by individuals. As discussed above, Rule 801 would still require the submission of a hardcopy form containing the information that directly bears upon the individual's eligibility to become registered, *i.e.*, the disciplinary history information, certified by the applicant. By signing this paper form, the individual applicant certifies the truthfulness and completeness of the information on the form. Rule 801 will allow firms to file electronically the bulk of the information required by Form 8–R, which relates to the applicant's residential, employment and educational history, for AP applicants sponsored by the firm, without submitting a corresponding paper filing.[41] Rule 801 also states that the registrant is deemed to make the certifications specified therein when it files the Form 8–R electronically. See note 24 *supra*.

Certain registration forms do not require individual certifications. Forms 8–T (notice of termination), U–5 (uniform termination notice for securities industry registration) and 3–R (except a Form 3–R amendment amending a Form 8–R) are certified by the firm and not the individual. The paper filing requirement with respect to these forms will be eliminated. The required certification for these forms is made when the firm directs the computer to process these forms due to the status accorded the electronic certification as a binding signature under proposed Rule 801. Although a Form 3–R updating a Form 8–R is certified by the individual registrant, the information certified on the Form 3–R is less likely to be critical to an individual's registration eligibility than the information on the original Form 8–R. The only circumstances in which information material to registration fitness would be involved is where an individual changed a "no" answer to a disciplinary history question to a "yes" answer by means of the Form 3–R. NFA notes that in this example, there is little likelihood that the change is not truthful and accurate due to the detrimental effect such change would have on the individual's registration status.[42] Proposed Registration Rule 801, therefore, provides for Forms 3–R and 8–T filings to be made exclusively by means of electronic filings. The Commission notes, however, that if a disciplinary history question answer is being changed from "no" to "yes" this may require the filing of supplementary documents in hardcopy form.[43]

NFA represents that elimination of the paper filing requirement for these forms will not impair NFA's ability to perform its delegated duties as the official custodian of the Commission's registration records or to provide accurate certifications concerning the authenticity and completeness of the records maintained. With respect to the forms for which electronic filing is substituted for paper filing, the computer records maintained in MRRS will constitute the registration record maintained on behalf of the Commission since there will be no hard copy form.[44] Furthermore, NFA will continue to certify the authenticity of the record and the accuracy of any computer printout.

The modifications of the direct entry program to reduce the number of paper filings have the potential to significantly reduce the number of paper filings received by NFA.[45] In the last year NFA received almost 14,000 Forms 3–R and more than 9,000 Forms 8–T. NFA notes that the elimination of the paper filing requirement for these forms is consistent with the Paperwork

received by NFA within five business days after the electronic filing or that the paper filing contains information different from the information in the electronic filing that indicates that the applicant does not qualify for a temporary license.

[40] See note 16 *supra*.

[41] See letter dated August 27, 1992 from Daniel J. Roth, General Counsel, NFA, to Jean Webb, Secretary, CFTC and letter dated October 8, 1992 from Carol Wooding, Attorney, NFA to Mary Cademartori, Staff Attorney, Division of Trading and Markets.

[42] As noted above, in the event that a firm erroneously entered data negatively affecting an AP's registration eligibility, NFA would undertake further review before taking any adverse registration action.

[43] The instructions to the Disciplinary History section of Form 8–R that if a person answers "yes" to any of the questions in that section, he must supply a certified copy of any applicable documents, such as any complaint, plea, order, agreement of settlement, verdict or other findings made, and sanctions or sentences imposed. If such documents are not obtainable must be furnished.

[44] See note 20 *supra*.

[45] NFA members who choose to prepare hard copy forms prior to completing the electronic filing will be required under NFA Compliance Rule 2–10 to maintain these forms as a business record. See also Commission Rules 3.12(e) and 1.31 (1992). NFA will not, however, require member firms to prepare and retain hard copies of these forms. See letter from Carol A. Wooding, Staff Attorney, NFA, to Mary Cademartori, Attorney, Division of Trading and Markets, CFTC, dated October 8, 1992.

Reduction Act. Further, NFA notes that the NASD is developing a program which will permit its member firms to file registration forms by computer without any follow-up paper filings.[46]

E. Statistical Information

Under the pilot program, NFA is required to provide the Commission on a monthly basis with certain statistics to provide a factual basis for evaluation of the pilot program. Statistics classified by type of filing, phase of the program in which the filing was made, and firm, are provided with respect to the time required to grant temporary licenses to the APs of participating firms and to APs of non-participating firms, the average time between the electronic filing and NFA's receipt of the complete filing, and the number and type of material and non-material discrepancies between the electronic filing and paper filings.

NFA proposes to provide the Commission with similar statistics on a quarterly rather than on a monthly basis.[47] The Commission believes that quarterly statistics will provide it with sufficient opportunity to monitor and review the direct entry program and, after further experience is gained with the direct entry program, may consider further reduction of the frequency of statistical data filings.

IV. Benefits of Direct Entry

NFA submits that the direct entry pilot program has proved that the electronic filing of registration forms has benefitted both the futures industry and the public without any negative impact on the registration process. Benefits cited include a significant decrease in the time within which temporary licenses for AP applicants are granted and reduction in the number of NFA staff required to process registration filings, permitting reallocation of staff to customer protection efforts and potentially leading to cost savings that could be reflected in reduced registration fees. The modifications of the program set forth herein should increase the efficiency of the registration process and reduce costs.[48]

Conclusion and Order

Based upon the foregoing, the Commission believes that the direct entry program can be implemented in a manner consistent with NFA's registration responsibilities under prior Commission orders and with the required degree of accuracy, reliability and security for NSFA registration processing and fitness screening.

Accordingly, pursuant to sections 8a(1), 8a(10), 17(j) and 17(*o*) of the Commodity Exchange Act, 7 U.S.C. 12a(1), 12a(10), 21(j) and 21(*o*) (1988), the Commission hereby authorizes NFA to put into effect NFA Registration Rule 801, which implements the direct entry program as described herein, subject to the conditions set forth below:

a. The direct entry pilot program is described in NFA's Submission dated July 9, 1992, as supplemented by submissions dated August 27, 1992, October 8, 1992, November 13, 1992, November 25, 1992 and December 8, 1992. The representations set forth in the foregoing submissions, as well as those contained in the Commission September 4, 1990 Order authorizing NFA to implement Phases II and III of the direct entry pilot program, as modified by the foregoing submissions, constitute the responsibilities of NFA unless otherwise stated or modified by this order.

b. In addition to providing the statistics described herein on a quarterly basis, NFA will provide the Commission with such data as may be requested from time to time concerning the direct entry program.

Issued in Washington, DC on December 16, 1992, by the Commission.

Jean A. Webb,

Secretary of the Commission.

[FR Doc. 92-30922 Filed 12-21-92; 8:45 am]

BILLING CODE 6351-01-M

[46] Currently, the NASD permits the electronic filing of all Form U-4s for the transfer of account representatives. The member firm must submit the hard copy of the Form U-4 and the fingerprint card within twenty-one days of the electronic filing. The NASD is developing a proposal to permit member firms to file transfer applications electronically without having to follow-up with the hard copy U-4. NASD also is in the process of implementing a procedure for electronic filing of updates of Form U-4 without submitting paper follow-ups. Currently, this is permitted for page one of Form U-4. NASD is in the process of implementing this procedure for pages two through four of Form U-4. NASD permits its member firms to file employee terminations electronically without follow-up paper filings.

[47] See 55 FR 35925, 35928 (September 4, 1990). In a telephone conversation with Division staff on October 14, 1992, Daniel Roth, NFA's General Counsel, represented to the Division that NFA will provide these statistics on a quarterly basis.

[48] The Commission has previously allowed the substitution of electronic filings for paper filings in the context of large trader reporting. See CFR 17.00(a)(1) and 17 CFR 17.02(a) (1992).

DEPARTMENT OF DEFENSE

Department of the Air Force

USAF Scientific Advisory Board; Meeting

The Architecture & Assessment Panel of the USAF Scientific Advisory Board's Committee on Options for Theater Air Defense will meet on 11 January 1993, at Langley AFB, VA from 8 a.m. to 5 p.m.

The purpose of this meeting will be to receive briefings and gather information on issues related to theater air defense.

The meeting will be closed to the public in accordance with section 552b(c) of title 5, United States Code, specifically subparagraphs (1) and (4) thereof.

For further information, contact the Scientific Advisory Board Secretariat at (703) 697-4811.

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

BILLING CODE 3910–01–M

DEPARTMENT OF ENERGY

Pittsburgh Energy Technology Center; Notice of Non-Competitive Financial Assistance Award

AGENCY: Bartlesville Project Office and Pittsburgh Energy Technology Center, U.S. Department of Energy.

ACTION: Notice of Non-Competitive Financial Assistance (Grant) Award with the American Geological Institute.

SUMMARY: The U.S. Department of Energy (DOE), Bartlesville Project Office (BPO) announces that pursuant to 10 CFR 600.7(b)(2)(i) criterion (H), it intends to make a non-competitive Financial Assistance (Grant) award through the Pittsburgh Energy Technology Center to the American Geological Institute for a four month feasibility study, which will include a feasibility and assessment study for the establishment of a national geoscience data repository.

ADDRESSES: U.S. Department of Energy, Pittsburgh Energy Technology Center, Acquisition and Assistance Division, P.O. Box 10940, MS 921–118, Pittsburgh, PA 15236–0940.

FOR FURTHER INFORMATION CONTACT: John R. Columbia, Contract Specialist, (412) 892–6219.

SUPPLEMENTARY INFORMATION:

Grant No.: DE–FG22–93BC14968

Title of Research Effort: "National Geoscience Data Repository"

Awardee: American Geological Institute

Term of Assistance Effort: Four (4) months

Cost of Assistance Effort: The total estimated value is $136,360.

Objective: Based upon the authority of 10 CFR 600.7(b)(2)(i) criterion (H), the objective of this Grant is to permit the American Geological Institute to conduct the assessment and feasibility study that would document the quantity and quality of geological and geophysical data available for transfer to a national Geoscience Data Repository. The results of this effort will contribute to the achievement of the overall goals of the DEO Program in establishing a repository of data which will aid in identifying specific technology transfer methods in order to provide a critical new source of information for independent oil and gas producers and in meeting the National Energy Strategy goal of arresting the U.S. vulnerability to oil supply disruptions by increasing the domestic crude oil resource base.

Dated: December 9, 1992.

Dale A. Siciliano,

Contracting Officer.

[FR Doc. 92–30988 Filed 12–21–92; 8:45 am]

BILLING CODE 6450–01–M

Pittsburgh Energy Technology Center; Non-Competitive Financial Assistance Award

AGENCY: Bartlesville Project Office and Pittsburgh Energy Technology Center, U.S. Department of Energy.

ACTION: Notice of non-competitive financial assistance (grant) award with ParaMagnetic Logging, Inc.

SUMMARY: The U.S. Department of Energy (DOE), Bartlesville Project Office (BPO) announces that pursuant to 10 CFR 600.7(b)(2)(i) (A) and (D), it intends to make a Non-Competitive Financial Assistance (Grant) Award through the Pittsburgh Energy Technology Center to ParaMagnetic Logging, Inc. for the continuation of their effort entitled "Fabrication and Downhole Testing of Moving Through Casing Resistivity Apparatus".

ADDRESSES: Department of Energy, Pittsburgh Energy Technology Center, Acquisition and Assistance Division, P.O. Box 10940, MS 921–118, Pittsburgh, PA 15236–0940.

FOR FURTHER INFORMATION CONTACT: Eric T. Bell, Contract Specialist, (412) 892–5802.

SUPPLEMENTARY INFORMATION:

Grant No.: DE–FG22–93BC14966

Title of Research Effort: "Fabrication and Downhole Testing of Moving Through Casing Resistivity Apparatus"

Awardee: ParaMagnetic Logging, Inc.

Term of Assistance Effort: Twelve (12) months

Cost of Assistance Effort: The total estimated value is $822,435. The DOE share is anticipated at $109,000. The remaining portion of $713,435 will be funded by the Gas Research Institute.

Objective: Based upon the authority of 10 CFR 600.7(b)(2)(i) (A) and (D), the objective of this Grant is for ParaMagnetic Logging, Inc. to continue research fabrication and downhole testing of an apparatus that continuously measures resistivity while moving through well casing. The studies offer technology that will allow operators to go back into oil wells and inexpensively evaluate the well bore for additional missed oil and gas potential left behind in the pipe. Fabrication and downhole testing of the Moving Thorough Casing Resistivity Apparatus is the main objective of this grant. The results of much of this research will be useful for locating and recovering bypassed oil and gas and further recovery evaluations.

The intended research will:

(1) Finish the fabrication of the Second Type Moving Through Casing Resistivity Apparatus ("MTCRA"),

(2) Test the operation principle of the Slider Method of Measurement,

(3) Analyze and verify that the data obtained using the Second Type MTCRA reproduced open-hole laterlogs,

(4) Test and debug the up-hole electronics and the Second Type MTCRA,

(5) Log a cased well and reproduce open-hole laterlogs, and

(6) Verify data against open-hole logs and transfer the learned technology.

Dated: December 9, 1992.

Richard D. Rogus,

Contracting Officer.

BILLING CODE 6450–01–M

Morgantown Energy Technology Center

Financial Assistance Award; Cooperative Agreement

AGENCY: Morgantown Energy Technology Center, DOE.

ACTION: Notice of noncompetitive financial assistance application for a cooperative agreement.

SUMMARY: Based upon a determination pursuant to 10 CFR 600.7(b)(2), the DOE Morgantown Energy Technology Center gives notice of its plans to award a five year Cooperative Agreement to the University of Wyoming's Western Research Institute, Laramie Wyoming, in the approximate amount of $10,000,000.

FOR FURTHER INFORMATION CONTACT: Thomas L. Martin, U.S. Department of Energy, Morgantown Energy Technology Center, P.O. Box 880, Morgantown, WV 26507–0880. Telephone: (304) 291–4087. Cooperative Agreement No.: DE–FC21–93MC30126.

SUPPLEMENTARY INFORMATION: The DOE will fund the allowable costs of the Cooperative Agreement. The pending award is based on an application for renewal of a portion of work begun under a Cooperative Agreement presently being funded by DOE. The work to be continued under this renewal will address: Oil and gas research to advance technologies of petroleum and gas production processes and to develop methods for cleanup of wastes. Advanced systems applications to develop and evaluate improved process systems for utilization of fossil fuels. Environmental technologies needed for remediation and waste management related to fossil energy utilization. Applied energy science to understand and evaluate applied energy technologies. The work is necessary to ensure continuity of the work currently being performed.

Issued: December 14, 1992.

Randolph L. Kesling,

Acting Director, Acquisition and Assistance Division, Morgantown Energy Technology Center.

[FR Doc. 92–30991 Filed 12–21–92; 8:45 am]

BILLING CODE 6450–01–M

Morgantown Energy Technology Center; Financial Assistance Award (Cooperative Agreement)

AGENCY: Morgantown Energy Technology Center, Department of Energy (DOE).

ACTION: Notice of noncompetitive financial assistance application for a cooperative agreement.

SUMMARY: Based upon a determination pursuant to 10 CFR 600.7(b)(2), the DOE Morgantown Energy Technology Center gives notice of its plans to award a five year Cooperative Agreement to the University of Wyoming's Western Research Institute, in Laramie Wyoming, in the approximate amount of $25,000,000.

FOR FURTHER INFORMATION CONTACT: Thomas L. Martin, U.S. Department of Energy, Morgantown Energy Technology Center, P.O. Box 880, Morgantown, WV 26507–0880. Telephone: (304) 291–

4087. Cooperative Agreement No.: DE–FC21–93MC30127.

SUPPLEMENTARY INFORMATION: The DOE will fund the allowable costs of the Cooperative Agreement. The pending award is based on an application for renewal of a portion of work begun under a Cooperative Agreement presently being funded by DOE. The work to be continued under this renewal will address the Jointly Sponsored Research Program. Under this program the participant will solicit research opportunities in conjunction with private industry which will enhance the fossil energy mission. The work is necessary to ensure continuity of the work currently being performed.

Dated: December 14, 1992.

Randolph L. Kesling,

Acting Director, Acquisition and Assistance Division, Morgantown Energy Technology Center.

BILLING CODE 6450–01–M

Advisory Committee To Develop On-Site Innovative Technologies for Environmental Restoration and Waste Management; Notice of Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following Advisory Committee meeting:

Name: Federal Advisory Committee to Develop On-Site Innovative Technologies for Environmental Restoration and Waste Management (DOIT Committee).

Date and Time: January 5, 1993 1 p.m. to 4:30 p.m.

Place: Hyatt Regency, 1750 Welton Street, Denver, Colorado 80202.

Contact: Dr. Clyde Frank, Deputy Assistant Secretary, Technology Development, EM–50, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–6382.

Purpose of the Committee: The DOIT Committee will serve as the primary vehicle for recommending a program that can be adopted to implement a Memorandum of Understanding (MOU) regarding Environmental Restoration and Waste Management in western states. This memorandum of understanding was signed in July 1991 by representatives from the U.S. Departments of Defense, the Interior, and Energy, the U.S. Environmental Protection Agency and the Western Governors' Association (WGA) the latter representing twenty western states and territorial governors. The DOIT Committee will help to improve Federal environmental restoration and waste management efforts by identifying technology needs at Federal facilities in western states; identifying/ assessing emerging technologies within the Federal and private sectors; identifying regulatory, institutional, or other government barriers to technology development; and identifying workforce planning/education requirements.

Agenda

Tuesday, January 5, 1993

12 p.m.—Lunch
1 p.m.—Dr. Clyde Frank, Designated Federal Official for the DOIT Committee Opens Meeting
1:15 p.m.—Briefing from DOD representative on status of DOD, DOE, EPA proposal to the Strategic Environmental Research and Development (SERDP) Science Advisory Board
1:45 p.m.—Discussion of need for and authorization to establish interagency/ state staff coordinating group for support purposes
2:15 p.m.—Discussion of requirements for a public stakeholder participation plan as called for in the DOIT charter
2:45 p.m.—Discussion of need for and authorization to establish public stakeholder work groups
3:15 p.m.—Break
3:30 p.m.—Public Comment Session
4:30 p.m.—Meeting Adjourns

Public Participation: The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Dr. Clyde Frank's office at the address or telephone number listed above. Such statements will be subject to a 10 minute rule. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Committee Chairperson is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Minutes: The minutes of the meeting will be available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585 between 9 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on December 17, 1992.

Marcia L. Morris,

Deputy Advisory Committee, Management Officer.

[FR Doc. 92–30986 Filed 12–21–92; 8:45 am]

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

Application Tendered for Filing With the Commission

December 16, 1992.

Take notice that the following hydroelectric application has been filed with the Federal Energy Regulatory Commission and is available for public inspection.

a. *Type of Application:* Exemption from Licensing.

b. *Project No.:* 11365–000.

c. *Date filed:* December 2, 1992.

d. *Applicant:* Swan Falls Corporation.

e. *Name of Project:* Swan Falls Hydroelectric Project.

f. *Location:* On the Saco River in Oxford County, Maine.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791 (a)–825(r).

h. *Applicant Contact:* Lawrence J. Keddy, 5 Gambo Road, P.O. Box 40, South Windham, Maine 04082–0040, (202) 892–4000.

i. *FERC Contact:* Mary C. Golato (202) 219–2804.

j. *Comment Date:* January 31, 1993.

k. *Description of Project:* The proposed project consists of the following features: (1) An existing dam approximately 630 feet long and 10 feet high; (2) an existing impoundment with a surface area of 150 acres, a length of 4.1 miles, and a storage capacity of 450 acre-feet; (3) an existing powerhouse containing one operable and two proposed turbine-generator units, thus increasing the installed capacity of the project from 350 to 820 kilowatts; (4) an existing 34.5-kilovolt transmission line; and (5) appurtenant facilities. The applicant estimates that the total average annual generation would be 4 million kilowatthours.

l. Pursuant to § 4.32(b)(7) of 18 CFR of the Commission's regulations, if any resource agency, Indian Tribe, or person believes that an additional scientific study should be conducted in order to form an adequate factual basis for a complete analysis of the application on its merit, the resource agency, Indian Tribe, or person must file a request for a study with the Commission not later than 60 days from the filing date and serve a copy of the request on the applicant.

Lois D. Cashell,

Secretary.

[FR Doc. 92–30938 Filed 12–21–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. ER93-55-000]

Southern California Edison Co.; Filing

December 16, 1992.

Take notice that on November 19, 1992, Southern California Edison Company (SCE) tendered for filing an amendment to its October 30, 1992 filing in this docket.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before December 28, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-30996 Filed 12-21-92; 8:45 am]

BILLING CODE 6717-01-M

Office of Arms Control and Nonproliferation Policy

Proposed Subsequent Arrangement

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160), notice is hereby given of a proposed "subsequent arrangement" under the Additional Agreement for Cooperation between the Government of the United States of America and the European Atomic Energy Community (EURATOM) concerning Peaceful Use of Atomic Energy, as amended, and the Agreement for Cooperation between the Government of the United States of America and the Government of Sweden concerning Peaceful Uses of Nuclear Energy.

The subsequent arrangements to be carried out under the above-mentioned agreements involves approval of the following retransfer: RTD/EU(SW)-84, for the transfer of 150 grams of uranium depleted in the isotope uranium-235 from Sweden to France for chemical analysis.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

Issued in Washington, DC on December 17, 1992.

Salvador N. Ceja,

Acting Director, Office of Nonproliferation Policy.

[FR Doc. 92-30997 Filed 12-21-92; 8:45 am]

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL-4647-8]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data instrument.

DATE: Comments must be submitted on or before January 11, 1993.

FOR FURTHER INFORMATION OR A COPY OF THIS ICR CONTACT: Sandy Farmer at EPA, (202) 260-2740.

SUPPLEMENTARY INFORMATION:

Office of Air and Radiation

Title: (EPA ICR #1614.01). This ICR requests approval for a new collection.

Abstract: Green Lights is a voluntary EPA program that encourages organizations to adopt energy efficient lighting as a profitable means of preventing pollution and improving lighting quality. Green Lights "Partners" include corporations, state and local governments, colleges and universities, and other private and public organizations. Green Lights "Allies" include lighting manufacturers, lighting service providers, and utilities.

All participants in the Green Lights program must complete, sign, and submit to EPA a Memorandum of Understanding (MOU) that outlines the responsibilities of both the Green Lights participant and EPA. The MOU commits a Green Lights participant to survey all of its U.S. facilities and consider a full set of lighting options that maximize energy savings while being profitable and not compromising lighting quality. The participant agrees to complete lighting upgrades within five years of signing the MOU in 90 per cent of the square footage of its facilities that meet these criteria. EPA needs to collect initial information in the MOU to formally establish participation in the Green Lights program and to obtain general information on Green Lights participants. EPA uses this information to identify a Green Light implementation manager at the participating organization and to obtain initial data on the size and type of buildings subject to the Green Lights agreement.

Upon completion of a lighting upgrade (or annually if the project is not completed within one year), all Green Lights participants complete and submit to EPA an implementation progress report that documents energy efficiency improvements and cost savings. The information provided includes the fixture, lamp, and ballast types, lighting controls, maintenance methods and implementation methods most commonly utilized. EPA needs information on implementation to evaluate each participant's progress in meeting Green Lights commitments and to determine if there is a need to provide technical or other assistance to that participant in completing their upgrades. In addition, overall program progress must be evaluated to determine aggregate energy savings and pollution prevention.

In addition to agreeing to survey lighting and implement upgrades, Green Lights Allies work with EPA to increase awareness of the benefits of energy efficient lighting and to develop a technical support program. Specifically, they agree to provide case studies of successful energy efficient lighting investments and provide EPA, upon request, with information on the lighting related products and/or services that the organization offers. EPA uses this information to develop a directory and provide program participants with this information.

Burden Statement: The public reporting burden for this collection of information will vary, depending upon whether the respondent is a Green Lights Partner or a Green Light Ally and the length of time the respondent has participated in the Green Lights program.

Respondents: Green Light Partners include corporations, state and local governments, colleges and universities, and other organizations, while Green Lights Allies include lighting manufacturers, lighting management companies, and utilities.

Estimated Number of Respondents: There are currently 624 participants in the Green Lights program. EPA expects the program to expand by approximately 240 new participants per year for the period covered by this ICR.

Estimated Total Annual Burden of Respondents: The estimated total annual burden of respondents will vary, depending on whether the respondent is a Green Lights Partner or Green Lights Ally and the length of time the respondent has participated in the Green Lights program.

Frequency of Collection: The Memorandum of Understanding (MOU) is completed and submitted once, upon joining the Green Lights program. The implementation progress report is submitted upon project completion or annually if the project is not completed within one year. Case studies and other information on products and services from lighting manufacturers, lighting service providers, and utilities are obtained upon joining the Green Lights program.

Send comments regarding the burden estimate or any other aspect of this information collection, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM–223Y), 401 M Street, SW., Washington, DC 20460,
and
Troy Hillier, Office of Management and Budget, Office of Information and Regulatory Affairs, 725 17th Street, NW., Washington, DC 20530.

Dated: December 11, 1992.

Edward Callahan,

BILLING CODE 6560–50–M

[OPPT–53315A; FRL–4180–2]

Certain Chemicals; Approval of a Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of an application for test marketing exemption (TME) under section 5(h)(1) of the Toxic Substances Control Act (TSCA) and 40 CFR 720.38. EPA has designated this application as TME–93–3. The test marketing conditions are described below.

EFFECTIVE DATE: (December 8, 1992).

FOR FURTHER INFORMATION CONTACT: Edna G. Pleasants, New Chemicals Branch, Chemical Control Division (TS–794), Office of Pollution Prevention and Toxics Environmental Protection Agency, Rm. E–611, 401 M St. SW., Washington, DC 20460, (202) 260–7800.

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use, and disposal of the substances for test marketing purposes will not present an unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present an unreasonable risk of injury.

EPA hereby approves TME–93–3. EPA has determined that test marketing of the new chemical substance described below, under the conditions set out in the TME application, and for the time period and restrictions specified below, will not present an unreasonable risk of injury to health or the environment. Production volume, use, and the number of customers must not exceed that specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

The following additional restrictions apply to TME–93–3: A bill of lading accompanying each shipment must state that the use of the substance is restricted to that approved in the TME. In addition, the applicant shall maintain the following records until 5 years after the date they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA:

1. Records of the quantity of the TME substance produced and the date of manufacture.
2. Records of dates of the shipments to each customer and the quantities supplied in each shipment.
3. Copies of the bill of lading that accompanies each shipment of the TME substance.

TME–93–3

Date of Receipt: October 30, 1992.

Notice of Receipt: November 17, 1992 (57 FR 54233).

Applicant: Confidential.

Chemical: (G) Aliphatic Polyamide.

Use: (S) Hot Melt for Bonding Industrial Parts.

Production Volume: Confidential.

Number of Customers: Confidential.

Test Marketing Period: Five (5) months, commencing on the first day of nonexempt commercial manufacture.

Risk Assessment: EPA identified no significant health or environmental concerns for the test market substance. Therefore, the test market activities will not present any unreasonable risk of injury to health or the environment.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information that comes to its attention cast significant doubt on its finding that the test marketing activities will not present any unreasonable risk of injury to health or the environment.

Dated: December 8, 1992.

Charles M. Auer,

Director, Chemical Control Division, Office of Pollution Prevention and Toxics.

Water Pollution Control; Sole Source Aquifer Determinations; MO

ACTION: Notice of decision to deny sole source aquifer petition.

Notice is hereby given that, pursuant to section 1424(e) of the Safe Drinking Water Act, the U.S. Environmental Protection Agency (EPA) Region 7 Administrator is denying the petition submitted by the National Park Service to designate the Big Spring Recharge Area as a Sole Source Aquifer. The Big Spring Recharge Area encompasses portions of Shannon, Carter, Oregon, Howell, and Ripley counties in south-central Missouri.

Based on an extensive review of the water resources in the area, and a thorough review of alternative water supplies, EPA has determined that alternative sources of drinking water are available to residents living in the petitioned area. A Decision Support Document is available upon request.

For more information, contact J. Patrick Costello, geologist, Office of Groundwater Protection, EPA Region 7, 726 Minnesota Avenue, Kansas City, Kansas 66101, phone (913) 551–7407.

Dated: December 15, 1992.

Morris Kay,

Regional Administrator, EPA, Region VII.

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirement Submitted to Office of Management and Budget for Review

December 15, 1992.

The Federal Communications Commission has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of this submission may be purchased from the Commission's copy contractor, Downtown Copy Center, 1990 M Street, NW., suite 640, Washington, DC 20036, (202) 452–1422. For further information on this submission contact Judy Boley, Federal Communications Commission, (202) 632–7513. Persons wishing to comment on this information collection should contact Jonas Neihardt, Office of Management and Budget, room 3235 NEOB, Washington, DC 20503, (202) 395–4814.

OMB Number: None.
Title: FM Broadcast Station Self-Inspection Survey
Action: New Collection
Respondents: Non-profit institutions and businesses or other for-profit (including small businesses)
Frequency of Response: Each station will be surveyed every five years
Estimated Annual Burden: 1,220 responses; 8 hours average burden per response; 9,760 hours total annual burden
Needs and Uses: Collection of this information is needed to establish and maintain the highest rate of compliance possible in the FM Broadcast Service and to educate licensees about current FCC Rules, specifically those with which strict compliance is expected. Due to limited resources available to the Commission field offices, traditional broadcast station inspections have occurred less frequently. The self-inspection method of collecting the data reduces the need to make regular field inspections to determine compliance. The information will be used by the FCC to gauge compliance with its rules. Without such information, the FCC will be unable to make accurate determinations of overall compliance rates and unable to identify trends in compliance.

Federal Communications Commission.
onna R. Searcy,
ecretary.

FEDERAL RESERVE SYSTEM

Century Bancorp, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than January 15, 1993.

A. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. Century Bancorp, Inc., Milledgeville, Georgia; to become a bank holding company by acquiring 100 percent of the voting shares of Century Bank and Trust, Milledgeville, Georgia.

B. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Shelby County Bancorp, Inc., Shelbyville, Illinois; to acquire 100 percent of the voting shares of Bank of Findlay, Findlay, Illinois.

C. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. Area Bancshares Corporation, Owensboro, Kentucky; to acquire 100 percent of the voting shares of Commonwealth Bancorp, Glasgow, Kentucky, and thereby indirectly acquire Bowling Green Bank & Trust Company, N.A., Bowling Green, Kentucky, and New Farmers National Bank, Glasgow, Kentucky.

2. Mercantile Bancorporation, Inc., St. Louis, Missouri; to acquire 100 percent of the voting shares of First National Bank of Flora, Flora, Illinois.

3. Union Planters Corporation, Memphis, Tennessee; to acquire 100 percent of the voting shares of First State Bancshares, Inc., Somerville, Tennessee, and thereby indirectly acquire First State Bank of Fayette County, Somerville, Tennessee.

4. Union Planters - FSB Acquisition Company, Memphis, Tennessee; to become a bank holding company by acquiring First State Bancshares, Inc., Somerville, Tennessee, and thereby indirectly acquire First State Bank of Fayette County, Somerville, Tennessee.

D. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. Central Service Corporation, Enid, Oklahoma; to acquire 100 percent of the voting shares of Ponca Bankshares, Inc., Ponca City, Oklahoma, and thereby indirectly acquire 84.07 percent of the voting shares of Security Bank & Trust Company, Ponca City, Oklahoma. In connection with this application, CSC Merger, Inc., a nonoperating subsidiary of Central Service Corporation, will become a bank holding company as the survivor of a merger with Ponca Bancshares, Inc., and will directly own 84.07 percent of the voting shares of Security Bank & Trust Company.

E. Federal Reserve Bank of Dallas (W Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. First Bancshares of Delaware, Inc., Wilmington, Delaware; to become a bank holding company by acquiring 83.8 percent of the voting shares of The Hamilton National Bank, Hamilton, Texas, and Bank of Tyler, Tyler, Texas.

F. Federal Reserve Bank of San Francisco (Kenneth R. Binning, Director, Bank Holding Company) 101 Market Street, San Francisco, California 94105:

1. The Sumitomo Bank, Limited, Osaka, Japan; to acquire shares in order to maintain its current 13.73 percent interest in the voting shares of CPB, Inc., Honolulu, Hawaii, and thereby indirectly acquire Central Pacific Bank, Honolulu, Hawaii.

Board of Governors of the Federal Reserve System, December 16, 1992.

BILLING CODE 6210-01-F

First of America Bank Corporation, et al.; Notice of Applications to Engage de novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 11, 1993.

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. First of America Bank Corporation, Kalamazoo, Michigan; to engage *de novo* through its subsidiary, First of America Mortgage Company, Kalamazoo, Michigan, in performing appraisals of real estate, pursuant to § 225.25(b)(13) of the Board's Regulation Y.

B. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Newberry Bancorp, Inc., Sault Ste. Marie, Michigan; to engage *de novo* through its subsidiary, Northern Michigan Bidco, Inc., Sault Ste. Marie, Michigan, in community development activities, pursuant to § 225.25(b)(6) of the Board's Regulation Y.

C. Federal Reserve Bank of San Francisco (Kenneth R. Binning, Director, Bank Holding Company) 101 Market Street, San Francisco, California 94105:

1. The Sanwa Bank, Limited, Tokyo, Japan; to engage *de novo* through its subsidiary, Sanwa-BKG Futures Inc., Chicago, Illinois, in the execution and clearance of, and provision of advisory services with respect to, trades in the NIKKEI Stock Average futures contracts and options thereon on the Chicago Mercantile exchange, pursuant to §§ 225.25(b)(18) and (19) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, December 16, 1992.

Paul Douglas Freedle, et al.; Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than January 11, 1993.

A. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. Paul Douglas Freedle, Tampa, Florida; to acquire 60.74 percent of the voting shares of Public Bank Corporation, Saint Cloud, Florida, and thereby indirectly acquire Public Bank, Saint Cloud, Florida.

2. Edwin Joseph Leonards, Morganza, Louisiana; to acquire an additional 18.33 percent of the voting shares of Great Guaranty Bancshares, Inc., New Roads, Louisiana, for a total of 18.39 percent, and thereby indirectly acquire Team Bank & Trust Company, New Roads, Louisiana.

B. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Terry M. Carley, to acquire an additional 91.1 percent of the voting shares of Avoca Financial Services, Inc., Avoca, Iowa, for a total of 100 percent, and thereby indirectly acquire Peoples National Bank, Avoca, Iowa.

2. James F. Schwertley, Missouri Valley, Iowa; Donald F. Schwertly, Council Bluffs, Iowa; and James R. King, Mondamin, Iowa; to acquire 80.1 percent of the voting shares of Overton Bank Shares, Inc., Mondamin, Iowa, and thereby indirectly acquire Mondamin Savings Bank, Mondamin, Iowa.

3. Marvin R. Selden, Jr., Melvin H. Nielsen, Dennis L. Gallagher, Robert F. McLaughlin and Doris R. Olson, as trustees for the Hugh N. Gallagher Trust; to acquire 55.86 percent of the voting shares of Iowa State Bank Holding Company, Des Moines, Iowa, and thereby indirectly acquire Iowa State Bank, Des Moines, Iowa.

C. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. William Cotulla, Cotulla, Texas, to acquire an additional 14.37 percent, for a total of 17.02 percent; Carl Huddleston, Cotulla, Texas, to acquire an additional 7.18 percent, for a total of 7.94 percent; Andrew Lewis, III, San Antonio, Texas, to acquire an additional 14.37 percent, for a total of 17.63 percent; Daniel Kinsel, III, Cotulla, Texas, to acquire an additional 14.37 percent, for a total of 17.40 percent; and John Northcut, Cotulla, Texas, to acquire an additional 14.37 percent, for a total of 16.83 percent, of the voting shares of Stockmens Financial Corporation, Cotulla, Texas, and thereby indirectly acquire Stockmens National Bank, Cotulla, Texas.

2. Fred Ronnie Myrick, Monroe, Louisiana, and Joe Kenneth Newton, Ruston, Louisiana; to acquire 7.73 percent of the voting shares of First Capital Bancorp, Inc., Delhi, Louisiana, for a total of 20.43 percent, and thereby indirectly acquire Capital Bank, Delhi, Louisiana.

Board of Governors of the Federal Reserve System, December 16, 1992.

BILLING CODE 6210-01-F

GENERAL SERVICES ADMINISTRATION

[G-92-2]

Delegation of Authority to the Attorney General

Pursuant to the authority vested in me by section 3726 of title 31, United States Code, I have determined that it is both cost-effective and in the public interest to delegate authority to the Attorney General to conduct a prepayment audit of domestic and foreign household goods/personal effects transportation; overseas transportation of privately owned vehicles; and overseas unaccompanied air baggage transportation, subject to the provisions of the Federal Property Management Regulations, title 41, Code of Federal Regulations, Subpart 101–41, and amendments thereto. This prepayment audit will be conducted by a General Services Administration's (GSA's) contractor, at the contractor's site, for the Relocation Management Office, FBI Headquarters in Washington, DC.

The Attorney General may redelegate this authority to any officer, official, or employee of the Federal Bureau of Investigation.

The Attorney General shall notify GSA in writing of these additional delegations and their basis. This delegation is effective upon publication in the **Federal Register**.

Dated: November 13, 1992.

Richard G. Austin,

Administrator of General Services.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Injury Research Grant Review Committee: Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control and Prevention (CDC) announces the following committee meeting.

Name: Injury Research Grant Review Committee (IRGRC).

Times and Dates: 7 p.m.-9:30 p.m., January 10, 1993, 8 a.m.-6 p.m., January 11, 1993, 8 a.m.-12 noon, January 12, 1993

Place: Swissotel Atlanta, 3391 Peachtree Road, NE., Atlanta, Georgia 30326.

Status: Open 7 p.m.-9 p.m., January 10, 1993, Closed 8 a.m., January 11, 1993, through 12 noon, January 12, 1993

Purpose: This committee is charged with advising the Secretary of Health and Human Services, the Assistant Secretary for Health, and the Director, CDC, regarding the scientific merit and technical feasibility of grant applications relating to the support of injury control research and demonstration projects and injury prevention research centers.

Matters To Be Discussed: Agenda items for the meeting will include announcements, discussion of review procedures, future meeting dates, and review of grant applications. Beginning at 8 a.m., January 11, through 12 noon, January 12, the committee will conduct its review of grant applications. This portion of the meeting will be closed to the public in accordance with provisions set forth in section 552b(c) (4) and (6), title 5 U.S.C., and the Determination of the Director, CDC, pursuant to Public Law 92–463.

Agenda items are subject to change as priorities dictate.

Contact Person for More Information: Richard W. Sattin, M.D., Executive Secretary, IRGRC, National Center for Injury Prevention and Control, CDC, 4770 Buford Highway, NE, Mailstop K58, Atlanta, Georgia 30341–3724, telephone 404/488–4265.

Dated: December 15, 1992.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control and Prevention (CDC).

BILLING CODE 4160-18-M

Health Care Financing Administration

Privacy Act of 1974; Report of New System

AGENCY: Department of Health and Human Services (HHS), Health Care Financing Administration (HCFA).

ACTION: Notice of new system of records.

SUMMARY: In accordance with the requirements of the Privacy Act of 1974, as amended (codified at 5 U.S.C. 552a), we are proposing to establish a new system of records, "The Medicaid Necessity, Appropriateness, and Outcomes of Care Study," HHS/HCFA/ORD No. 09–70–0059. We have provided background information about the proposed system in the "Supplementary Information" section below. Although the Privacy Act requires only that the "routine uses" portion of the systems be published for comment, HCFA invites comments on all portions of this notice. See "Dates" section for comment period.

DATES: HCFA filed a new system of records report with the Chairman of the Committee on Government Operations of the House of Representatives, the Chairman of the Committee on Governmental Affairs of the Senate, and the Acting Administrator, Office of Information and Regulatory Affairs, Office of Management and Budget, on December 18, 1992. The new system of records will become effective 60 days subsequent to the date of publication in the **Federal Register** (February 22, 1993), unless HCFA receives comments which would necessitate alterations to the system.

ADDRESSES: The public should address comments to Richard A. DeMeo, Privacy Act Officer, Office of Budget and Administration, Health Care Financing Administration, room 2–H–4, East Low Rise Building, 6325 Security Boulevard, Baltimore, Maryland 21207–5187. Comments received will be available for inspection at this location.

FOR FURTHER INFORMATION CONTACT: Ms. Penelope Pine, Office of Research, Office of Research and Demonstrations, Health Care Financing Administration, room 2502, Oak Meadows Building, 6325 Security Boulevard, Baltimore, Maryland 21207–5187, Telephone (410) 966–7718.

SUPPLEMENTARY INFORMATION: HCFA proposes to initiate a new system of records collecting data under the authority of section 9432(c) of Public Law 99–509, the Ombibus Budget Reconciliation Act of 1986. The purpose of this system of records is to provide data required to evaluate differences in

the necessity, appropriateness, and outcomes of care provided to Medicaid and privately insured patients. This study will assess the nature and outcomes of care provided to these two subpopulations through an extensive examination of detailed clinical data. The study will be conducted using data obtained from 250 hospitals located in three States: California, Georgia, and Michigan. The system will furnish information necessary to determine differences in the nature and outcomes of care provided to Medicaid and privately insured patients who receive treatment for the following conditions: Hysterectomy, complicated delivery, and pediatric asthma.

A pilot test of the data abstraction instrument is scheduled to begin in winter 1992, and the full study to commence in spring 1992. The system of records is expected to include data collected from hospital discharge abstracts, medical records, business office records, and emergency room logs and records. Information will be collected on approximately 16,340 individuals. This information will be collected and assessed by the study's contractor. In order to fulfill the objectives and complete the tasks of this contract, the contractor must have individually identifiable records. Because this system of records will be established and used strictly in accordance with the requirements and principles of the Privacy Act, it will not have an unfavorable effect on the privacy or other personal rights of individuals.

The Privacy Act permits us to disclose information without the consent of the individual for "routine uses"—that is, disclosure for purposes that are compatible with the purposes for which we collected the information. The proposed routine uses in the new system meet the compatibility criteria since the information is collected for the purpose of administering the Medicaid program for which HCFA is responsible. The disclosures under the routine uses will not result in any unwarranted adverse effects on personal privacy.

Dated: December 14, 1992.

William Toby, Jr.,

Acting Deputy Administrator, Health Care Financing Administration.

09-70-0059

SYSTEM NAME:

The Medicaid Necessity, Appropriateness, and Outcomes of Care Study.

SECURITY CLASSIFICATION:

None

SYSTEM LOCATION:

Data will be maintained at the contractor site and at HCFA. Contact system manager for location of contractor. See "System Manager(s) and Address" for system manager location.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Medicaid enrollees and privately insure individuals who receive hospital services at 250 hospitals in the three States (California, Georgia, and Michigan) chosen to participate in the study.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system will contain information concerning a patient's name, medical record number, demographic characteristics (e.g., age, sex), medical diagnoses and conditions, receipt of services, treatment protocols, outcomes of care, and other characteristics associated with the medical care rendered.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

This proposed system of records is authorized by section 9432(c) of Public Law 99-509, the Omnibus Budget Reconciliation Act of 1986.

PURPOSE OF THE SYSTEM:

To provide data necessary to evaluate differences in the nature and outcomes of care received by Medicaid and privately insured patients for selected conditions and treatments.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Disclosure may be made:

1. To contractor(s), for the purposes of collating, analyzing, aggregating, or otherwise refining or processing records in the system or for developing, modifying, and/or manipulating automatic data processing (ADP) software. Data may also be disclosed to contractors incidental to consultation, programming, operation, user assistance, or maintenance of ADP or telecommunication system containing or supporting records in the system. The contractor shall be required to maintain Privacy Act safeguards with respect to such records.

2. To a congressional office, from the record of an individual, in response to an inquiry from the congressional office made at the request of that individual.

3. To the Department of Justice, to a court or other tribunal, or to another party before such tribunal, when:

(a) HHS, or any component thereof; or

(b) Any HHS employee in his or her official capacity; or

(c) Any HHS employee in his or her individual capacity where the Department of Justice (or HHS, where it is authorized to do so) has agreed to represent the employee; or

(d) The United States or any agency thereof (when HHS determines that the litigation is likely to affect HHS or any of its components); is a party to litigation or has an interest in such litigation, and HHS determines that the use of such records by the Department of Justice, the tribunal, or other party is relevant and necessary to the litigation and would help in the effective representation of the governmental party, provided, however, that in each case, HHS determines that each disclosure is compatible with the purpose for which the records were collected.

4. To an individual or organization for a research, demonstration, evaluation, or epidemiologic project related to the prevention of disease or disability or the restoration or maintenance of health if HCFA:

a. Determines that the use of disclosure does not violate legal limitations under which the record was provided, collected, or obtained;

b. Determines that the research purpose for which the disclosure is to be made:

(1) Cannot be reasonably accomplished unless the record is provided in individually identifiable form, and

(2) Is of sufficient importance to warrant the effect and/or risk on the privacy of the individual that additional exposure of the record might bring, and

(3) There is reasonable probability that the objective for the use would be accomplished.

c. Requires the recipient to:

(1) Establish reasonable administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of the record, and

(2) Remove or destroy the information that allows the individual to be identified at the earliest time at which removal or destruction can be accomplished consistent with the purpose of the research project, unless the recipient presents an adequate justification of a research or health nature for retaining such information, and

(3) Makes no further use or disclosure of the record except:

(a) In emergency circumstances affecting the health or safety of any individual,

(b) For use in another research project, under these same conditions, and with the written authorization of HCFA,

(c) For disclosure to a properly identified person for the purpose of an

audit related to the research project, if information that would enable research subjects to be identified is removed or destroyed at the earliest opportunity consistent with the purpose of the audit, or

(d) When required by law;

d. Secures a written statement attesting to the recipient's understanding of a willingness to abide by these provisions.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper and electronic media.

RETRIEVABILITY:

Information will be retrieved by person's name and medical record number, or Social Security number.

SAFEGUARDS:

The contractor will maintain all records in secure storage areas accessible only to authorized employees and will notify all employees having access to records of criminal sanctions for unauthorized disclosure of information on individuals. For computerized records, the contractor will initiate ADP system security procedures required by HHS *Information Resources Manual* Circular #10, Automated Information Systems Security Program (e.g., use of passwords) (REF: HCFA Automated Information Systems Guide, HCFA.g:0805.1, "Systems Security Policies") and the National Institute of Standards and Technology Federal Information Processing Standards. Similar safeguards will be provided if any records are transferred to HCFA central office.

RETENTION AND DISPOSAL:

Hard copy data collection forms and magnetic tapes (or equivalent media) with identifiers will be retained in secure storage areas. Records will be retained for as long as needed for program research. Records will be disposed of 5 years after research is completed. The disposal techniques of degaussing will be used to strip magnetic tape (or equivalent media) of identifying names and numbers.

SYSTEM MANAGER AND ADDRESS:

The responsible agency official (System Manager) is the Director, Office of Research and Demonstrations, Health Care Financing Administration, 2230 Oak Meadows Building, 6325 Security Boulevard, Baltimore, Maryland 21207–5187.

NOTIFICATION PROCEDURE:

Notification of a record to be maintained in this system of records is governed by Department regulations at 45 CFR 5b.5 and 5b.6.

The request for notification must either be notarized or must contain a statement certifying that the requestor is who he claims to be, and that he understands that the knowing and willful request for or acquisition of a record under false pretenses is a criminal offense subject to a $5,000 fine. Also, the request must further verify the requestor's identity with information which parallels the record to which notification is being sought. Such further verification may include such particulars as the individual's years of attendance at a particular educational institution, rank attained in the uniformed services, date or place of birth, names of parents, an occupation, or the specific times an individual received medical treatment.

Only a parent or guardian of a minor, or the legal guardian of an individual declared incompetent by a court, is authorized to request access to a record on behalf of the minor or the incompetent individual, respectively. The requestor, in addition to verifying his own identity, must verify his relationship to the minor or incompetent individual by providing a copy of the minor's birth certificate, a court order, or other competent evidence of guardianship.

The requestor must identify the name and address of a designated representative who may be a physician, other health professional, or other responsible individual who would be willing to review the record and inform the subject individual of its contents at the representative's discretion.

RECORD ACCESS PROCEDURE:

To obtain access to a record follow the instruction for procedure. Requestors should reasonably specify the record contents being sought.

The request for access must either be notarized or must contain a statement certifying that the requestor is who he claims to be, and that he understands that the knowing and willful request for or acquisition of a record under false pretenses is a criminal offense subject to a $5,000 fine. Also, the request must further verify the requestor's identity with information which parallels the record to which access is being sought. Such further verification may include such particulars as the individual's years of attendance at a particular educational institution, rank attained in the uniformed services, date or place of birth, names of parents, an occupation, or the specific times an individual received medical treatment.

Only a parent or guardian of a minor or the legal guardian of an individual declared incompetent by a court, is authorized to request access to a record on behalf of the minor or the incompetent individual by providing a copy of the minor's birth certificate, a court order, or competent evidence of guardianship.

The requestor must identify the name and address of a designated representative who may be a physician, other health professional, or other responsible individual who would be willing to review the record and inform the subject individual of its contents at the representative's discretion. To determine if a record exists, write to the System Manager at the address indicated above, specifying the name, address, and health insurance number or Social Security number.

CONTESTING RECORD PROCEDURE:

Contact the system manager named above and reasonably identify the record and specify the information to be contested. State the reason for contesting it (e.g., why it is inaccurate, irrelevant, incomplete, or not current). These procedures are in accordance with Department regulation 45 CFR 5b.7.

RECORD SOURCE CATEGORIES:

Sources of information contained in this records system are expected to include: hospital discharge abstracts, medical records, hospital business office data on source of payment, and hospital emergency room logs and records.

SYSTEMS EXEMPT FROM CERTAIN PROVISIONS OF THE PRIVACY ACT:

None.

[FR Doc. 92–30961 Filed 12–21–92; 8:45 am]
BILLING CODE 4120–03–M

Privacy Act of 1974; Systems of Records

AGENCY: Department of Health and Human Services (HHS), Health Care Financing Administration (HCFA).

ACTION: Notice of proposed new routine use for existing system of records.

SUMMARY: HCFA is proposing to revise the system notice for the "Group Health Plan (GHP) System," System No. 09–70–4001, by adding a new routine use for release of GHP data to State Medicaid agencies. The purpose of this new routine use is to allow State Medicaid agencies to determine which of their Medicaid recipients are dual eligible Medicare beneficiaries who are enrolled

in Medicare prepaid health plans, in order to coordinate the delivery of medical care and to determine proper payment responsibilities. A dual eligible beneficiary is a Medicare beneficiary who is either also eligible for Medicaid benefits or eligible for State payment of Medicare cost sharing expenses. Release of these data to the States would also help the States avoid making duplicate payments of claims paid by Medicare.

EFFECTIVE DATE: The proposed new routine use shall take effect without further notice 30 days from the date of publication (January 21, 1993) unless comments received on or before that date would warrant changes.

ADDRESSES: Please address comments to Mr. Richard A. DeMeo, HCFA Privacy Officer, Office of Budget and Administration, Health Care Financing Administration, Room 2–H–4 East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland 21207–5187. We will make comments received available for inspection at this location.

FOR FURTHER INFORMATION CONTACT: Mrs. Marla K. Kilbourne, Office of Prepaid Health Care Operations and Oversight, Division of Payment and Operations Support, Enrollment Operations Branch, Health Care Financing Administration, Room 1–G–2, Oak Meadows Building, 6325 Security Boulevard, Baltimore, Maryland 21207–5187. Her number is (410) 966–7622.

SUPPLEMENTARY INFORMATION: The GHP System, No. 09–70–4001, contains a master file of group health plan Medicare members used to expedite the exchange of data with group health plans, and to control the posting of pro rata amounts to the Part B deductible of currently enrolled GHP members. This system was last published in the **Federal Register** (52 FR 13525) on April 23, 1987. Currently, disclosure of the information in this system may be made to six different types of individuals and/or organizations for a variety of reasons, the majority of which relate to the timely and accurate processing of Medicare claims, the accurate and timely enrollment and disenrollment of Medicare GHP members, and for research purposes.

There are numerous safeguards, as described in the safeguard section of the notice, in place to protect the data which have been developed in accordance with part 6 of the HHS Information Resource Management Manual and the National Institute of Standards and Technology Information Process Standards.

We are proposing to add a new routine use for release of data to State Medicaid agencies to coordinate in the delivery of medical care and to determine proper payment. The new routine use number (7) will read as follows:

(7) To a Medicaid State agency to coordinate the delivery of medical care and to determine proper payment responsibilities when certain conditions, as provided below, are met:

(a) HCFA receives in writing a request for a copy of the monthly GHP System from the Director of the State Medicaid agency on the agency's letterhead. The request must state that the data are needed to identify dual eligible Medicaid/Medicare HMO members for coordination of medical care and payments.

(b) The request must state that the confidentiality of the data will be maintained and that the data will be used only for the stated purposes.

(c) The agency must establish reasonable administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of any of the data on the GPH System file.

We are proposing that the States' Medicaid agencies have access to these data for several reasons. Many States are now expanding the number of enrollees in Medicaid managed care programs, and are developing statewide programs covering all Medicaid recipients. As these programs grow, it is essential that the managers of Medicaid programs know who is enrolled in Medicare HMOs. When the State does not know this, dual eligibles can be enrolled in both a Medicare HMO and a Medicaid HMO. Recipients then have two sets of providers, two cards, and two sets of rules and procedures to deal with. Consequently, plans are often providing and receiving payment for duplicative care. Because the main function of managed care is to effectively coordinate care, sharing data between Medicare and Medicaid is essential. Beneficiaries can be eligible both for Medicare and Medicaid HMOs. Providers in both Medicare and Medicaid may not be aware of a recipients dual eligibility. It would be a tremendous benefit to beneficiaries if this basic communication between Medicare and Medicaid was improved. It would also help reduce the billing confusion and cost for Medicaid providers. Finally, the Government has an interest in avoiding the wasteful practice of paying twice, through a Medicare capitation payment and through Medicaid capitation or fee-for-service payments, for the same services.

The provision of Medicare HMO enrollment data, as contained in the GHP System, will provide this link between both programs, thereby facilitating the coordination of the delivery of care to beneficiaries and avoiding duplicate payments.

The proposed new routine use for the GHP System is consistent with the Privacy Act, 5 U.S.C. 552(a)(7), since it is compatible with the purpose for which the information is collected. Because this addition of a routine use will not change the purposes for which the information is to be used or otherwise alter the system, we are not required to prepare a report of altered system of records under 5 U.S.C. 552a(r). In addition, we are publishing the notice in its entirety below for the convenience of the reader.

Dated: December 14, 1992.

William Toby, Jr.,

Acting Deputy Administrator, Health Care Financing Administration.

09–70–4001

SYSTEM NAME:

Group Health Plan System HHS/HCFA/OPHCOO.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Health Care Financing Administration, Bureau of Data Management and Strategy, Division of Capitation Systems, 6325 Security Boulevard, Baltimore, Maryland 21207–5187

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Recipients of Part A (Hospital Insurance) and Part B (supplementary medical) Medicare services enrolled in a group health plan.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

The system contains information about a beneficiary's health insurance entitlement and supplementary medical benefits usage. Contact System Manager for location of Contractor(s).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sections 1833(a)(1)(A), 1866 and 1876 of Title XVIII of the Social Security Act (42 U.S.C. 1395(a)(1)(A), 1395cc, and 1395mm).

PURPOSE(S):

To maintain a master file of Group Health Plan members for accounting control; to expedite the exchange of data with the Group Health Plans; and to control the posting of pro-rata amounts to the Part B deductible of currently enrolled Group Health Plan members.

Group Health Plan include the following: Health Maintenance

Organizations (HMO), Competitive Medical Plans (CMP), and Health Care Prepayment Plans (HCPP).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Disclosure may be made: (1) To a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. (2) To the Department of Justice, to a court or other tribunal, or to another party before such tribunal, when (a) HHS, or any component thereof; or (b) Any HHS employee in his or her official capacity; or (c) Any HHS employee in his or her individual capacity where the Department of Justice (or HHS, where it is authorized to do so) has agreed to represent the employee; or (d) The United States or any agency thereof where HHS determines that the litigation is likely to affect HHS or any of its components, is a party to litigation or has an interest in such litigation, and HHS determines that the use of such records by the Department of Justice, the tribunal, or the other party is relevant and necessary to the litigation and would help in the effective representation of the governmental party, provided, however, that in each case; HHS determines that such disclosure is compatible with the purpose for which the records were collected.

(3) To an individual or organizations for a research evaluation, or epidemiologic project related to the prevention of disease or disability, or the restoration or maintenance of health if HCFA:

a. Determines that the use or disclosure does not violate legal limitations under which the record was provided, collected, or obtained;

b. Determines that the purpose; for which the disclosure is to be made:

(1) Cannot be reasonably accomplished unless the record is provided in individually identifiable form.

(2) Is of sufficient importance to warrant the effect and/or risk on the privacy of the individual that additional exposure of the record might bring, and

(3) There is reasonable probability that the objective for the use would be accomplished;

c. Requires the information recipient to:

(1) Establish reasonable administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of the record, and

(2) Remove or destroy the information that allows the individual to be identified at the earliest time at which removal or destruction can be accomplished consistent with the purpose of the project, unless the recipient presents an adequate justification of a research or health nature for retaining such information, and

(3) Make no further use or disclosure of the record except:

(a) In emergency circumstances affecting the health or safety of any individual.

(b) For use in another research project, under these same conditions, and with written authorization of HCFA.

(c) For disclosure to a properly identified person for the purpose of an audit related to the research project, if information that would enable research subjects to be identified is removed or destroyed at the earliest opportunity consistent with the purpose of the audit or

(d) When required by law;

d. Secures a written statement attesting to the information recipient's understanding of a willingness to abide by the provisions.

(4) To providers and suppliers of services directly or dealing through contractors, fiscal intermediaries or carriers for administration of Title XVIII. Providers and suppliers:

a. Will have access only through a CRT terminal.

b. Will have access to only one record at a time.

c. Must enter both beneficiary name and Health Insurance Claim Number to access a record.

d. Must have a claim for services for the beneficiary.

e. Must enter a password in order to get access to the file.

5. To a contractor for the purpose of collating, analyzing, aggregating or otherwise refining or processing records in this system or for developing, modifying and/or manipulating ADP software. Data would also be disclosed to contractors incidental to consultation, programming, operation, user assistance, or maintenance for ADP or telecommunications system containing or supporting records in the system.

6. To a contractor when the Department contracts with a private firm for the purpose of collating, analyzing, aggregating, or otherwise refining records in this system. Relevant records will be disclosed to such a contractor. The contractor shall be required to maintain Privacy Act safeguards with respect to such records. The contractor must agree:

a. Not to publish or otherwise disclose data in a form in which beneficiaries could be identified (except to plans, providers, suppliers, carriers, and intermediaries as authorized by HCFA), and,

b. To safeguard the confidentiality of the data and to prevent unauthorized access to it.

(7) To a Medicaid State Agency to coordinate the delivery of medical care and to determine proper payment responsibilities when certain conditions, as provided below, are met before the release of data.

(a) HCFA receives in writing a request for a copy of the monthly Group Health Plan System from the Director of the state Medicaid agency on the agency's letterhead. The request must state that the data is needed to identify dual eligible Medicaid/Medicare HMO members for coordination of medical care and payments.

(b) The request must state that the confidentiality of the data will be maintained and that the data will be used only for the stated purposes. (c) The agency must establish reasonable administrative, technical and physical safeguards to prevent unauthorized use or disclosure of any of the data on the Group Health Plan System file.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Magnetic tape and microfilm.

RETRIEVABILITY:

The system is indexed by health insurance claim number.

SAFEGUARDS:

Only authorized personnel have direct access to information in the Group Health Plan systems. In addition, Groups Health Plan personnel are advised that information is confidential.

Offices containing records are locked when not in use. Computer terminals are in secured areas. All buildings are locked at night.

Employees who maintain records in this system are instructed to grant access only to authorized users. Data stored in computers are accessed through the use of passwords/keywords/numbers known only to the authorized personnel. These passwords are changed as needed. Contractor(s) who maintain records in this system are instructed to make no further disclosures of the records except as authorized by the system manager in accordance with the Privacy Act. Privacy Act requirements are specifically included in contracts related to this system. The project officer and contract officer oversee compliance with these requirements.

The particular safeguards implemented are developed in accordance with Part 6, "ADP Systems Security," of the HHS ADP Systems Manual and the National Bureau of Standards Federal Information Process Standards.

SYSTEM MANAGER(S) AND ADDRESS:

Health Care Financing Administration, Director, Office of Prepaid Health Care Operations and Oversight, 6325 Security Boulevard, Baltimore, Maryland 21207–5187

NOTIFICATION PROCEDURE:

Inquiries and requests for system records should be addressed to the system manager named above and directed to the attention of the Office of Financial Management. The individuals should furnish his or her health insurance claim number as shown on social security records.

RECORD ACCESS PROCEDURES:

Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR 5b.5(a)(2).))

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. State the corrective action sought and the reasons for the correction with supporting justification. (These procedures are in accordance with Department Regulations (45 CFR 5b.7).)

RECORD SOURCE CATEGORIES:

The identifying information contained in these records is obtained from the group health plans (which obtained the data from the individual concerned, and the Health Insurance Master record.)

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BILLING CODE 4310–70–M

Big Thicket National Preserve; Revision of Preserve Boundary at Little Pine Island—Pine Island Bayou Corridor Unit

Section 1 of the Act of October 11, 1974 (88 Stat. 1254), provides for the establishment of Big Thicket National Preserve and authorizes the United States to accept title to any lands, or interests in lands, located outside the boundaries of the preserve which any private person, organization, or public or private corporation may offer to donate to the United States, if the Secretary finds that such lands would make a significant contribution to the purposes for which the preserve was created and he may administer such lands as part of the preserve. The specific lands proposed for addition are described as follows:

All those certain tracts or parcels of land situated in the Daniel Easley Survey, A–20, and the Wesley Dikes Survey, A–17, Jefferson County, Texas, said tracts or parcels being more particularly described as follows:

Tract No. 176–22

All that certain tract or parcel of land lying and situate in the County of Jefferson, Texas, being 20.44 acres more or less, out of the Daniel Easely Survey, A–20, and being more particularly described as follows:

Beginning at the most easterly corner of the lands of grantor, said corner being South 60° 25′ 41″ West 3596.67 feet, more or less, from the northeast corner of the Daniel Easley Survey, A–20, said Point of Beginning having Texas Central Zone Grid Co-ordinates of North 241,389.39 and East 3,936,298.69;

Thence with the lands of grantor and the northwest right-of-way line of Loop Road and with the Boundary Line of Big Thicket National Preserve South 28° 41′ 29″ West 567.86 feet, more or less;

Thence with the dividing line between the lands of grantor and the lands, now or formerly, or O.B. Land and continuing with said Boundary Line North 60° 58′ 21″ West 1435.50 feet, more or less, to a Government marker;

Thence crossing the lands of grantor as follows: North 07° 02′ 11″ East 612.97 feet, more or less, to a Government marker; North 57° 19′ 33″ East 28.62 feet, more or less, to a Government marker; and North 57° 28′ 55″ East 38.98 feet, more or less;

Thence leaving said line and with the dividing line between the lands of grantor and the lands, now or formerly, of E. S. Westmoreland and with the Boundary Line of Big Thicket National Preserve South 60° 58′ 21″ East 165.00 feet, more or less, to the northwest right-of-way line of Stonetown Road;

Thence with the right-of-way line of said Stonetown Road and continuing with said Boundary Line as follows: South 29° 09′ 39″ West 60.00 feet, more or less; and South 60° 58′ 21″ East 1464.70 feet, more or less, to the Point of Beginning. Containing 20.44 acres of land, more or less.

Tract No. 176–23

All that certain tract or parcel of land lying and situate in the County of Jefferson, Texas, being 8.25 acres, more or less, out of the Wesley Dikes Survey, A–17, and the Daniel Easley, A–20, and being more particularly described as follows:

Beginning at a north corner of the lands of grantor, also being the intersection of a southeast right-of-way line of Best Road with the southwest line of the lands, now or formerly, of Annie L. Sheffield, said corner being South 07° 48′ 03″ East 657.44 feet, more or less, from the northwest corner of the Wesley Dikes Survey, A–17, and the northeast corner of the Daniel Easley Survey, A–20, said Point of Beginning having Texas Central Zone Grid Coordinates of North 241,336.12 and East 3,939,934.52;

Thence with the dividing line between the lands of grantor and the lands of said Annie L. Sheffield and with the Boundary Line of Big Thicket National Preserve as follows: South 60°31′10″ East 130.00 feet, more or less; and North 61°05′26″ East 363.39 feet, more or less, to a Government marker;

Thence leaving said Boundary Line and crossing the lands of grantor as follows: South 11°38′03″ and West 957.31 feet, more or less, to a Government marker; and South 72°58′55″ West 250.72 feet, more or less, in the northeast right-of-way line of Best Road;

Thence with right-of-way line of said Best Road and with said Boundary Line as follows: North 17°00′22″ West 608.31 feet, more or less, and North 29°27′52″ East 364.80 feet, more or less, to the Point of Beginning.

Containing 8.25 acres of land, more or less.

Tract No. 176–24

All that certain tract or parcel of land lying and situate in the County of Jefferson, Texas, being 4.32 acres, more or less, out of the Wesley Dikes Survey, A–17, and the Daniel Easley Survey, A–20, and being more particularly described as follows:

Beginning at the most southerly south corner of the lands of grantor in the northeast right-or-way line of Stonetown Road, said corner being South 01°43′19″ East 2570.97 feet, more or less, from the northeast corner of the Wesley Dikes Survey, A–17, and the northeast corner of the Daniel Easley Survey, A–20, said Point of Beginning having Texas Central Zone Grid Coordinates of North 239,417.66 and East 3,939,922.54.

Thence with the right-of-way line of said Stonetown Road and with the Boundary Line of the Big Thicket National Preserve North 60°31′10″ West 274.62 feet, more or less;

Thence with the southeast right-or-way line of Best Road and continuing with said Boundary Line North 29°27′52″ East 685.70 feet, more or less, to a Government marker;

Thence crossing the lands of grantor South 60°31′10″ East 274.62 feet, more or less, to a Government marker in the Southeast line of the lands of grantor; Thence with said southeast line and with said Boundary Line South 29°27′52″ West 685.70 feet, more or less, to the Point of Beginning.

Containing 4.32 acres of land, more or less.

Tract No. 176–25

All that certain tract or parcel of land lying and situate in the County of Jefferson, Texas, being 14.51 acres, more or less, out of the Wesley Dikes Survey, A–17, and the Daniel Easley Survey, A–20, and being more particularly described as follows:

Beginning at the most southerly west corner of the lands of grantor, also being the south corner of Block 27 of the Beaumont Irrigating Company's Subdivision, said corner being South 12°36′00″ West 2298.08 feet, more or less, from the northwest corner of the Wesley Dikes Survey, A–17, and the northeast corner of the Daniel Easley Survey, A–20, said Point of Beginning having Texas Central Zone Grid Co-ordinates of North 239,744.74 and East 3,939,343.97;

Thence with the dividing line between the lands of grantor and the lands the Beaumont Irrigating Company's Subdivision and with the Boundary Line of the Big Thicket National Preserve as follows: North 29°27′52″ East 660.00 feet, more or less; North 60°31′10″ West 660.00 feet, more or less; and North 29°27′52″ East 630.00 feet, more or less, to a point in the southwest right-of-way line of Best Road;

Thence leaving said dividing line and with the right-of-way line of said road and continuing with said Boundary Line as follows: South 60°12′25″ East 328.50 feet, more or less; South 17°00′22″ East 912.40 feet, more or less; and South 29°27′52″ West 660.00 feet, more or less; and

Thence leaving said right-of-way line and with the northeast right-of-way line of Stonetown Road and continuing with said Boundary Line North 60°31′10″ West 330.00 feet, more or less, to the Point of Beginning.

Containing 14.51 acres of land, more or less.

All bearings are based on Grid North.

Notice is hereby given that in accordance with the Act of October 11, 1974, the boundary of the Little Pine Island—Pine Island Bayou Corridor Unit of Big Thicket National Preserve is revised as described above, and as shown on Big Thicket National Preserve land acquisition status map, segment 176. This map is on file and available for inspection in the Office of the National Park Service, Department of the Interior; the Office of the Southwest Region, National Park Service; and the Office of the Superintendent, Big Thicket National Preserve.

Dated: December 8, 1992.

John E. Cook,

Regional Director, Southwest Region.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–564 (Final)]

Certain Stainless Steel Butt-Weld Pipe Fittings From Taiwan; Institution and Scheduling of a Final Antidumping Investigation

AGENCY: United States International Trade Commission.

ACTION: Institution and scheduling of a final antidumping investigation.

SUMMARY: The Commission hereby gives notice of the institution of final antidumping investigation No. 731–TA–564 (Final) under section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)) (the Act) to determine whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Taiwan of certain stainless steel butt-weld pipe fittings, whether finished or unfinished, under 14 inches inside diameter, provided for in subheading 7307.23.00 of the Harmonized Tariff Schedule of the United States.

For further information concerning the conduct of this investigation, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207).

EFFECTIVE DATE: December 17, 1992.

FOR FURTHER INFORMATION CONTACT: Brian Walters (202–205–3198), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000.

SUPPLEMENTARY INFORMATION:

Background

This investigation is being instituted as a result of an affirmative preliminary determination by the Department of Commerce that imports of certain stainless steel butt-weld pipe fittings from Taiwan are being sold in the United States at less than fair value within the meaning of section 733 of the Act (19 U.S.C. § 1673b). The investigation was requested in a petition filed on may 20, 1992, by Flowline Division, Markovitz Enterprises, Inc., New Castle, PA.

Participation in the Investigation and Public Service List

Persons wishing to participate in the investigation as parties must file an entry of appearance with the Secretary to the Commission not later than seven (7) days after publication of this notice in the **Federal Register**. Section 201.11 of the Commission's rules is hereby waived. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to this investigation upon the expiration of the period for filing entries of appearance.

Limited Disclosure of Business Proprietary Information (BPI) Under an Administrative Protective Order (APO) and BPI Service List

The Secretary will make BPI gathered in this final investigation available to authorized applicants under the APO issued in the investigation, provided that the application is made not later than seven (7) days after the publication of this notice in the **Federal Register**. Section 207.7(a) of the Commission's rules is hereby waived. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Staff Report

The prehearing staff report in this investigation will be placed in the nonpublic record on December 31, 1992, and a public version will be issued thereafter, pursuant to § 207.21 of the Commission's rules.

Hearing

The Commission will hold a hearing in connection with this investigation beginning at 9:30 a.m. on January 14, 1993, at the U.S. International Trade Commission Building. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission on or before January 5, 1993. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the hearing. All parties and nonparties desiring to appear at the hearing and make oral presentations should attend a prehearing conference to be held at 9:30 a.m. on January 8, 1993, at the U.S. International Trade Commission Building. Oral testimony and written materials to be submitted at the public hearing are governed by §§ 201.6(b)(2), 201.13(f), and 207.23(b) of the Commission's rules. Parties are strongly encouraged to submit as early in the

investigation as possible any requests to present a portion of their hearing testimony *in camera.*

Written Submissions

Each party is encouraged to submit a prehearing brief to the Commission. Prehearing briefs must conform with the provisions of § 207.22 of the Commission's rules; the deadline for filing is January 8, 1993. Parties may also file written testimony in connection with their presentation at the hearing, as provided in § 207.23(b) of the Commission's rules, and posthearing briefs, which must conform with the provisions of § 207.24 of the Commission's rules. The deadline for filing posthearing briefs is January 22, 1993; witness testimony must be filed no later than three (3) days before the hearing. In addition, any person who has not entered an appearance as a party to the investigation may submit a written statement of information pertinent to the subject of the investigation on or before January 22, 1993. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules.

In accordance with §§ 201.16(c) and 207.3 of the rules, each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: This investigation is being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 207.20 of the Commission's rules.

By order of the Commission.

Issued: December 18, 1992.

Paul R. Bardos,

Acting Secretary.

BILLING CODE 7020–02–M

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 32203]

ISS Rail, Inc.—Operation Exemption—Lawrence County, PA; Notice of Exemption

ISS Rail, Inc. (ISS), a noncarrier, has filed a notice of exemption to operate 1.9 miles of rail line located in the City of New Castle and the Township of Union, Lawrence County, PA. This line was abandoned by Consolidated Rail Corporation (Conrail) and sold to the Penn Power Company (PPC) on June 5, 1985. Subsequently, PPC, on September 19, 1991, sold the right-of-way to ISS. ISS, after its purchase, reinstalled track and on March 1, 1992, began private contract service to the Ellwood Quality Steel Corp. of Ellwood City, PA. On August 6, 1992, ISS obtained a Certificate of Public Convenience from the Pennsylvania Public Utility Commission and began intrastate common carrier operations. ISS can interchange with both CSX Transportation, Inc. and Conrail over the involved rail line.

To participate in the origination and termination of freight moving in interstate commerce, ISS seeks an exemption from the requirement under 49 U.S.C. 10901 for authorization to provide interstate rail freight service as a common carrier. ISS will commence interstate rail service, to all shippers on the line requesting service, upon publication of the involved exemption.

ISS states that it does not own or operate any other rail lines and that its revenues will not exceed those of a class III rail carrier.

Any comments must be filed with the Commission and served on: Richard R. Wilson, Vuono, Lavelle & Gray, 2310 Grant Building, Pittsburgh, PA 15219.

This notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio.* Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: December 15, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035–01–M

[Finance Docket No. 32187]

Missouri & Northern Arkansas Railroad Company, Inc.—Lease Acquisition and Operation Exemption—Missouri Pacific Railroad Company and Burlington Northern Railroad Company; Notice of Exemption

Missouri & Northern Arkansas Railroad Company, Inc. (MNA), a noncarrier, has filed a notice of exemption: (1) To acquire by lease or purchase and to operate seven rail lines of Missouri Pacific Railroad Company (MPRR) for a total distance of 491.27 miles in the States of Arkansas, Kansas and Missouri; and (2) to acquire incidental trackage rights over two rail lines of MPRR in the States of Arkansas and Missouri and two rail lines of Burlington Northern Railroad Company (BN) in the State of Missouri for a total distance of 60.33 miles. MNDA will become a class III rail carrier. The transaction was to be consummated on or after December 13, 1992.[1]

The seven rail lines involved in the acquisition by lease or purchase are described as follows:

(1) Lease from MP 643.13, near Pleasant Hill, MO, to MP 415.00, near Bergman, AR, a distance of 228.13 miles;

(2) Purchase from MP 415.00, near Bergman, AR, to MP 313.00, at Guion, AR, a distance of 102.00 miles;

(3) Lease from MP 313.00, at Guion, AR, to MP 259.05, at Diaz Jct., AR, a distance of 53.95 miles;

(4) Lease from MP 527.94, near Carthage, MO, to MP 544.66, near Joplin, MO, known as the Webb City Branch, a distance of 16.72 miles;

(5) Lease from MP 0.07, near Webb City, MO, to MP 6.43, near Atlas, MO, known as the Atlas Branch, a distance of 6.36 miles;

(6) Lease from MP 512.40, near Springfield, MO, to MP 506.59, near Wallis, MO, known as the Wallis Spur, a distance of 5.81 miles; and

(7) Lease from MP 340.50, near Griffith, KS, to MP 262.60, near North Clinton, MO, known as the Clinton Branch, a distance of 78.30 miles (which includes a 1.4-mile equation between MP 272.00 and MP 273.00).

The incidental trackage rights that MNA will acquire as part of the proposed transaction will be over the following lines:

(1) MPRR's line from MP 643.13, near Pleasant Hill, MO, to MP 276.80, at Neff Yard in Kansas City, MO, a distance of 27.83 miles;

(2) MPRR's line from MP 259.05, near Diaz Jct., AR, to MP 261.5, near Newport, AR, a distance of 2.45 miles;

(3) BN's line from MP 512.02 to MP 512.13 in Springfield, MO, a distance of .11 miles; and

(4) BN's line from Chaining Station 14187+07, near Aurora, MO, to Chaining Station 10637+09+2354 feet, near Springfield, MO, a distance of 29.94 miles.

MPRR currently has trackage rights over the BN lines and will assign its

[1] This proceeding is related Finance Docket No. 32188, wherein RailTex, Inc., the parent company of MNA has concurrently filed a notice of exemption for its continuance in control of MNA when MNA becomes a carrier upon consummation of the transaction described in this notice.

rights to MNA to operate over these BN lines.

All comments must be filed with the Commission and served on: Robert L. Calhoun, Sullivan & Worcester, suite 1000, 1025 Connecticut Avenue, NW., Washington, DC 20036.

This notice is filed under 49 CFR 1150.31. If the notice of exemption contains false or misleading information, the exemption is void *ab inito*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: December 15, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

[FR Doc. 30981 Filed 12–21–92; 8:45 am]

BILLING CODE 7035–01–M

[Finance Docket No. 32188]

Railtex, Inc.—Continuance in Control Exemption—Missouri & Northern Arkansas Railroad Company, Inc.; Exemption

RailTex, Inc. (RailTex) has filed a notice of exemption to continue to control Missouri & Northern Arkansas Railroad Company, Inc. (MNA) upon MNA's becoming a carrier. MNA has concurrently filed a notice of exemption pursuant to 49 CFR 1150.31: (1) To acquire by lease or purchase and to operate 491.27 miles of rail line from Missouri Pacific Railroad Company (MPRR) in the States of Arkansas, Kansas and Missouri; and (2) to acquire 60.33 miles of incidental trackage rights over MPRR lines in the States of Arkansas and Missouri and of Burlington Northern Railroad Company in the State of Missouri.[1] MNA expected the transaction to be consummated on or after December 13, 1992.

RailTex also controls 10 other class III railroads operating in 13 states as follows: The Chesapeake and Albermarle Railroad Company, Inc.; the North Carolina & Virginia Railroad Company, Inc.; the Mid-Michigan Railroad Company, Inc.; The Austin Railroad Company, Inc. (d/b/a Austin & Northwestern Railroad); the South Carolina Central Railroad Company, Inc.; the Dallas, Garland & Northeastern Railroad Company, Inc.; the San Diego & Imperial Valley Railroad; the New Orleans Lower Coast Railroad; the Michigan Shore Railroad, Inc.; and the Indiana Southern Railroad. RailTex states that: (1) None of these railroads connect with MNA; (2) the proposed transaction is not part of a series of anticipated transactions that would connect MNA with any railroad in the RailTex corporate family; and (3) no class I railroad is involved. The transaction therefore is exempt from the prior approval requirements of 49 U.S.C. 11343. See 49 CFR 1180.2(d)(2).

As a condition to the use of this exemption, any employees affected by the transaction will be protected by the conditions set forth in New York Dock Ry.—Control—Brooklyn Eastern Dist., 360 I.C.C. 60 (1979).

Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction. Pleadings must be filed with the Commission and served on: Robert L. Calhoun, Sullivan & Worcester, suite 1000, 1025 Connecticut Avenue, NW., Washington, DC 20036.

Decided: December 15, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035–01–M

[Docket No. AB–55 (Sub-No. 432X]

CSX Transportation, Inc.—Abandonment Exemption—Wake County, NC

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Commission exempts from the prior approval requirements of 49 U.S.C. 10903, *et seq.*, the abandonment by CSX Transportation, Inc., of 5.55 miles of its Aberdeen Subdivision, Florence Division, in Wake County, NC, between mileposts SDS–20.65 at Apex and SDS–26.2 near Holly Springs, subject to environmental, public use, and standard labor protective conditions. In addition, a notice of interim trail use has been issued for the line.

DATES: Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on January 21, 1993. Formal expressions of intent to file an offer[1] of financial assistance under 49 CFR 1152.27(c)(2) must be filed by January 4, 1993, petitions to stay must be filed by January 4, 1993, and petitions to reopen must be filed by January 11, 1993. Requests for a public use condition must be filed by January 11, 1993.

ADDRESSES: Send pleadings referring to Docket No. AB–55 (Sub-No 432X) to:

(1) Office of the Secretary, Case Control Branch; Interstate Commerce Commission; Washington, DC 20423.

(2) Petitioner's representative: Charles M. Rosenberger, CSX Transportation, Inc., 500 Water Street, Jacksonville, FL 32202.

ACTION: Notice of exemption.

SUMMARY: Pursuant to 49 U.S.C. 10505, the Commission exempts the Huron and Eastern Railway Company, Inc. (H&E), from the prior approval requirements of 49 U.S.C. 10903–10904 to permit H&E to abandon an approximately 4.6-mile line of railroad between milepost 2.33, west of Carsonville, MI, and milepost 6.9, at Sundusky, in Sanilac County, MI, subject to the employee protective conditions in Oregon Short Line R. Co.—Abandonment—Goshen, 360 I.C.C. 91 (1979), and the condition that H&E obtain a permit under the Michigan land/water interface statutes prior to salvaging bridges or culverts on the right-of-way or spreading ballast.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Cooperative Agreements for Mayors' Institute on City Design

AGENCY: National Endowment for the Arts.

ACTION: Notification of availability.

SUMMARY: The National Endowment for the Arts is requesting proposals leading to the award of two separate Cooperative Agreements to assist in planning, organizing, and implementing two three-day conferences to sensitize and educate mayors to be better patrons and decision-makers in matters of urban design. One award will be to a school of architecture located in a southern state (Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia), and one award will be to a school of architecture located in a midwestern state (Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin). Applicants must be a University with a graduate program school of architecture in urban design. funding is limited to $35,000 for each Institute. The initial period of the Cooperative Agreements will be one year with potential renewal for an additional two years.

Those interested in receiving the Solicitation package for the Midwestern Region Mayors' Institute should reference Program Solicitation PS 92–05 in their written request. Those interested in receiving the Solicitation package for the Southern Region Mayors' Institute should reference Program Solicitation PS 92–06 in their written request. Requests must be accompanied by two (2) self-addressed labels. Verbal requests for the Solicitations will not be honored.

DATES: Program Solicitations PS 92–05 and PS 92–06 are scheduled for release approximately January 7, 1993 with proposals due February 7, 1993.

ADDRESSES: Requests for the Solicitation should be addressed to the National Endowment for the Arts, Contracts Division, room 217, 1100 Pennsylvania Ave. NW., Washington, DC 20506.

William I. Hummel,

Director, Contracts and Procurement Division.

BILLING CODE 7537–01–M

Humanities Panel; Meetings

AGENCY: National Endowment for the Humanities.

ACTION: Notice of meetings.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, as amended), notice is hereby given that the following meetings of the Humanities Panel will be held at the Old Post Office, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: David C. Fisher, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, DC 20506; telephone 202/606–8322. Hearing-impaired individuals are advised that information on this matter may be obtained by contacting the Endowment's TDD terminal on 202/606–8282.

SUPPLEMENTARY INFORMATION: The proposed meetings are for the purpose of panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. Because the proposed meetings will consider information that is likely to disclose: (1) Trade secrets and commercial or financial information obtained from a person and privileged or confidential; or (2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee meetings, dated September 9, 1991, I have determined that these meetings will be closed to the public pursuant to subsections (c)(4), and (6) of section 552b of title 5, United State Code.

1. *Date:* January 11, 1993.
Time: 9 a.m. to 5 p.m.
Room: 315.
Program: This meeting will review Reference Materials applications in Literature and General Bibliography, submitted to the Division of Research Programs, for projects beginning after July 1, 1993.

2. *Date:* January 13, 1993.
Time: 9 a.m. to 5 p.m.
Room: 430.
Program: This meeting will review applications for a Special Opportunity in Archival Research, submitted to the Division of Research Programs, for projects beginning after February 1, 1993.

3. *Date:* January 14–15, 1993.
Time: 8:30 a.m. to 5 p.m.
Room: M–14.
Program: To review applications submitted to the Humanities Projects in Museums and Historical Organizations program, submitted to the Division of Research Programs, for projects beginning after April 1, 1993.

4. *Date:* January 15, 1993.
Time: 9 a.m. to 5 p.m.
Room: 315.
Program: This meeting will review Reference Materials applications in American Studies, submitted to the Division of Research Programs, for projects beginning after July 1, 1993.

5. *Date:* January 22, 1993.
Time: 9 a.m. to 5 p.m.
Room: 315.
Program: This meeting will review Reference Materials applications in Visual Arts, Architecture and Performing Arts, submitted by the Division of Research Programs, for projects beginning after July 1, 1993.

6. *Date:* January 25–26, 1993.
Time: 8:30 a.m. to 5 p.m.
Room: 415.
Program: This meeting will review applications for Preservation of Material Culture Collections, submitted to the Division of Preservation and Access, for projects beginning after June 1, 1993.

7. *Date:* January 25–26, 1993.
Time: 8:30 a.m. to 5 p.m.
Room: M–09.
Program: This meeting will review applications submitted to the Humanities Projects in Museums and Historical Organization, submitted to the Division of Public Programs, for projects beginning after July 1, 1993.

8. *Date:* January 26, 1993.
Time: 9 a.m. to 5 p.m.
Room: 315.
Program: This meeting will review Reference Materials applications in Ancient Studies, submitted to the Division of Public Programs, for projects beginning after July 1, 1992.

9. *Date:* January 28, 1993.
Time: 8:30 a.m. to 5 p.m.
Room: 415.
Program: This meeting will review applications in Documentation of Collections Projects, submitted to the Division of Presentation and Access, for projects beginning after June 1, 1993.

10. *Date:* January 28–29, 1993.
Time: 8:30 a.m. to 5 p.m.
Room: 730.
Program: This meeting will review applications submitted to the Humanities Projects in Museums and Historical Organizations program, submitted to the Division of Public Programs, for projects beginning after July 1, 1993.

11. *Date:* January 28, 1993.
Time: 9 a.m. to 5 p.m.
Room: 315.
Program: This meeting will review applications for projects in Humanities Studies of Science and Medicine in Interpretive Research, submitted to the Division of Research Programs, for projects beginning after July 1, 1993.

Date: January 29, 1993.
Time: 8:30 a.m. to 5 p.m.
Room: 415.
Program: This meeting will review applications for Preservation of Material Culture Collections, submitted to the Division of Preservation and Access, for projects beginning after June 1, 1993.

13. *Date:* January 29, 1993.
Time: 9 a.m. to 5 p.m.
Room: 315.
Program: This meeting will review Reference Materials applications in Modern History and the Social Sciences, submitted to the Division of Research Programs, for projects beginning after July 1, 1993.

David C. Fisher,

Advisory Committee, Management Officer.

BILLING CODE 7536–01–M

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget (OMB) Review

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of OMB review of information collection.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

1. *Type of submission, new, revision, or extension:* Revision.

2. *The title of the information collection:* Modification to NRC Enforcement Policy, 10 CFR part 2, Appendix C, Exercise of Discretion for an Operating Facility.

3. *The form number if applicable:* Not applicable.

4. *How often the collection is required:* On occasion.

5. *Who will be required or asked to report:* Nuclear Reactor Licensees.

6. *An estimate of the number of responses:* 36 annually.

7. *An estimate of the total number of hours required annually to complete the requirement or request:* 1,440 hours (40 hours per request).

8. *An indication of whether section 3504(h), Public Law 96–511 applies:* Applicable.

9. *Abstract:* The proposed change to Appendix C, 10 CFR part 2, modifies NRC's Enforcement Policy to more fully describe the circumstances in which the NRC may exercise enforcement discretion. This provision relates to circumstances which may arise when a licensee's compliance with a Technical Specification Limiting Condition for Operation or with other license conditions would involve an unnecessary plant transient or performance of testing, inspection, or system realignment that is inappropriate with the specific plant conditions, or unnecessary delays in plant startup without a corresponding health and safety benefit. A licensee seeking the exercise of enforcement discretion must provide a written justification, which documents the safety basis for the request and provides whatever other information the NRC staff deems necessary to decide whether or not to exercise discretion.

Copies of the submittals may be inspected or obtained for a fee from the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC 20555.

Comments and questions should be directed to the OMB reviewer: Ronald Minsk, Office of Information and Regulatory Affairs (3150–0136), NEOB–3019, Office of Management and Budget, Washington, DC 20503.

Comments can also be submitted by telephone at (202) 395–3084. The NRC Clearance Officer is Brenda Jo. Shelton, (301) 492–8132.

Dated at Bethesda, Maryland, this 11th day of December 1992.

For the Nuclear Regulatory Commission.

Gerald F. Cranford,

Designated Senior Official for Information Resources Management.

BILLING CODE 7590–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–31609; File No. SR–NASD–91–73]

Self-Regulatory Organizations; Proposed Rule Change by National Association of Securities Dealers, Inc. Relating to Failures to Comply with Arbitration Awards

December 16, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on November 19, 1992, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD.[1] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NASD is proposing to amend Article VI, Section 3 of the NASD By-Laws. New language is italicized; deleted language is in brackets.

[1] The NASD has amended the proposed rule change three times subsequent to its original filing on December 26, 1991. Amendment No. 1, submitted on May 6, 1992, provided the results of a vote of the NASD membership on the proposed rule change. The proposal was approved with 2,070 voting in favor, 204 opposed and 9 not voting, out of 2,283 ballots received. On July 2, 1992, the NASD filed Amendment No. 2 to the proposed rule change. Amendment No. 2 was submitted to add additional descriptive language to the filing. Amendment No. 3 was submitted on November 19, 1992 to conform the language of the filing to that of section 15A(h)(3) of the Act. As originally filed by the NASD, the proposal provided for the suspension or cancellation of membership or registration on a summary basis. Amendment No. 3 provides that such suspensions or cancellations will be in accordance with revocations proceedings provided under Article VI of the NASD's Code of Procedure. The substance of these amendments is included in this notice. Copies of all three amendments are available in the Commission's Public Reference Room.

Article VI of the NASD By-Laws Dues, Assessments and Other Charges

Suspension or Cancellation of Membership or Registration [for Non-Payment of Dues]

Sec. 3. The Corporation after fifteen (15) days notice in writing, may suspend or cancel the membership of any member or the registration of any person in arrears in the payment of any fees, dues, assessments or other charges, or for failure to furnish any information or reports requested pursuant to section 2 of this Article, *or for failure to comply with an award of arbitrators properly rendered pursuant to section 41 of the Code of Arbitration Procedure, where a timely motion to vacate or modify such award has not been made pursuant to applicable law or where such a motion has been denied.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in item IV below. The NASD has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The NASD is proposing to amend Article VI, section 3 of the NASD By-Laws to permit the NASD to suspend the membership or registration of a party that has failed to comply with a valid arbitration award, where the award is not the subject of a motion to vacate or modify the award or where such a motion has been denied.

The NASD is concerned regarding the significant number of referrals made to District Business Conduct Committees for failure to pay arbitration awards, and the impact such referrals have had on the Districts' complaint dockets. In order to address this problem, the NASD is proposing to extend its suspension and cancellation procedures (hereinafter referred to jointly as "revocation proceedings") to include situations in which members or registered persons fail to comply with arbitration awards.

Currently, the NASD's Code of Arbitration Procedure contains a Resolution of the Board of Governors

("Resolution") (paragraph 3744, page 3726 of the NASD Manual) which states that failure to pay an arbitration award properly rendered by any one of several arbitration forums may be deemed "conduct inconsistent with just and equitable principles of trade and a violation of Article III, section 1 of the Rules of Fair Practice" of the NASD. The Resolution contemplates the bringing of a disciplinary action against a member firm or associated person for failing to pay an arbitration award rendered by the NASD, or a self-regulatory organization which administers the Securities Industry Conference on Arbitration's Uniform Code ("Uniform Code"), or by the American Arbitration Association ("AAA").

The NASD's Arbitration Department has referred numerous cases to the NASD's District Business Conduct Committees for disciplinary action for failing to pay an arbitration award.[2] The NASD also routinely investigates and brings disciplinary actions for failing to pay arbitration awards whenever such violations are discovered, whether through referrals from other NASD departments, referrals from other self-regulatory organizations, through routine or non-routine investigations or through customer complaints.

In addition to enforcing arbitration awards rendered in NASD arbitrations, the intent of the Resolution was to permit the NASD to enforce awards rendered by other self-regulatory organizations that administer the Uniform Code, as well as to the AAA. The NASD regarded the broad scope of the resolution as necessary and appropriate if the NASD were to recommend arbitrations forums other than its own, such as AAA, as appropriate for resolution of disputes. The recommendation of alternative forums by securities industry self-regulatory organizations was encouraged by the SEC to alleviate the perception of unfairness in mandatory securities industry arbitration.

The NASD has determined, however, that bringing formal disciplinary actions for failure to pay an arbitration award rendered by the NASD's arbitration forum may not be the most efficient method of disposing of such matters. The proposal would allow the NASD, in addition to bringing a formal disciplinary action, to employ its revocation proceedings for a member's or associated person's failure to pay an arbitration award rendered by an NASD arbitration panel. Thus, with respect to arbitration awards rendered in the NASD's arbitration forum, and which are subject to the NASD's administrative control, the NASD will not be required to initiate a formal disciplinary action against a member or associated person for failing to pay an arbitration award.[3] As with formal disciplinary actions brought pursuant to the Resolution, such revocation proceedings are proposed to be available only where a timely motion to vacate or modify the arbitration award has not been failed.

The Resolution also provides that the failure to submit a dispute to arbitration as required by the NASD's Arbitration Code or failure to appear or to produce documents as directed pursuant to the NASD's Arbitration Code may be deemed "conduct inconsistent with just and equitable principles of trade" in violation of Article III, section 1 of the Rules of Fair Practice. These provisions also contemplate the bringing of a disciplinary action against a firm or associated person for failing to submit a claim to arbitration as required or for failing to appear or produce documents as required. The NASD's Arbitration Department will continue to evaluate cases for referral for disciplinary action where a member or associated person has failed to submit a claim to arbitration as required or where a member or associated person has failed to appear or produce documents as required. Finally, the NASD also will continue to evaluate cases for referral for disciplinary action where it is discovered that a member or associated person has failed to pay an arbitration award validly rendered by an arbitration forum other than the NASD or failure to pay NASD awards entered against it in a timely manner in accordance with section 41(h) of the Code.

The NASD believes that the proposed rule change is consistent with the provisions of section 15A(b)(6) of the Act. The proposed rule change is designed to encourage member firms and associated persons to pay duly rendered arbitration awards and to ease the burden on the District Business Conduct Committee's complaint docket. The payment of arbitration awards and the facilitation of the arbitration process, in general, will assist in the protection of investors and further the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Association does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if its finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filings will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by January 12, 1993.

[2] In 1991 the Arbitration Department referred 122 cases to the NASD's district offices for investigation of failure to pay an arbitration award rendered in the NASD's arbitration forum. In 1990 the Arbitration Department referred 82 cases for failure to pay arbitration awards.

[3] Revocation proceedings implemented under Article VI, Section 3 of the By-Laws or subject to review by a hearing panel upon written request of the aggrieved member or associated person. See Article VI or the NASD's Code of Procedure.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Jonathan G. Katz,

Secretary.

DEPARTMENT OF STATE

[Public Notice 1740]

U.S. Organizations for the International Radio Consultative Committee (CCIR) and International Telegraph and Telephone Committee (CCITT); Meeting

The Department of State announces that the U.S. Organizations for the International Radio Consultative Committee (CCIR National Committee) and International Telegraph and Telephone Consultative Committee (CCITT National Committee) will hold a joint open meeting, January 12, 1993 at the Department of State, 2201 C Street, NW., Washington, DC, in room 1105, from 9:30 a.m. to 12:30 p.m.

During the afternoon the two National Committees will hold separate meetings—the CCIR National Committee will meet in room 1207; at the same time, the CCITT National Committee will hold its open meeting in room 1105, beginning at 1:30 p.m.

The CCIR and CCITT are permanent organs of the International Telecommunication Union (ITU), a specialized agency of the United Nations, established by the International Telecommunication Convention.

The agenda for the meetings will consist of a briefing of the recently concluded ITU's Additional Plenipotentiary Conference, a review of the issues related to the January meetings of the CCIR Resolution 106 and CCITT Resolution 18 Groups, and the joint meeting between those two international groups scheduled for January 22 in Geneva.

Entrance to the Department of State is controlled but can be facilitated by making attendance arrangements in advance. Persons planning to attend the meeting should so advise this office at: (202) 647-0201, (fax (202) 647-7407) no later than two days before the meeting. Notification should include name, date of birth and Social Security number. All attendees must use the C Street entrance.

Dated: December 7, 1992.

Warren G. Richards,

Chairman, U.S. CCIR National Committee

Earl S. Barbely,

Chairman, U.S. CCITT National Committee.

[Public Notice 1739]

Overseas Schools Advisory Council; Meeting

The Overseas Schools Advisory Council, Department of State, will hold its Annual Meeting on Tuesday, January 26, 1993, at 9:30 a.m. in Conference Room 1105, Department of State Building, 2201 C Street, NW., Washington, DC. The meeting is open to the public.

The Overseas Schools Advisory Council works closely with the U.S. business community in improving those American-sponsored schools overseas which are assisted by the Department of State and which are attended by dependents of U.S. government families and children of employees of U.S. corporations and foundations abroad.

This meeting will deal with issues related to the work and the support provided by the Overseas Schools Advisory Council to the American-sponsored overseas schools.

Members of the general public may attend the meeting and join in the discussion, subject to the instructions of the Chairman. Admittance of public members will be limited to the seating available. Access to the State Department is controlled and individual building passes are required for each attendee. Entry will be facilitated if arrangements are made in advance of the meeting. Persons who plan to attend should so advise the office of Dr. Ernest N. Mannino, Department of State, telephone (703) 875-7800, prior to January 26. All attendees must use the C Street entrance to the building.

Dated: December 7, 1992.

Ernest N. Mannino,

Executive Secretary, Overseas Schools Advisory Council.

[Public Notice 1741]

Shipping Coordinating Committee, Subcommittee on Safety of Life at Sea, Working Group on Radiocommunications; Meetings

The Working Group on Radiocommunications of the Subcommittee on Safety of Life at Sea will conduct open meetings at 9:30 a.m on February 17, April 21, May 19, and June 16, 1993. These meetings will be held in the Department of Transportation Headquarters Building, 400 Seventh Street, SW., Washington, DC 20950.

The purpose of these meetings is to prepare for the 39th Session of the Internal Maritime Organization (IMO) Subcommittee on Radiocommunications which is scheduled for late 1993 at the IMO headquarters in London, England.

Agenda items include preparation for the 39th Session, primarily related to the implementation of the Global Maritime Distress and Safety System (GMDSS).

Members of the public may attend these meetings up to the seating capacity of the room.

For further information and meeting room number, contact Mr. Ronald J. Grandmaison, U.S. Coast Guard Headquarters (G-TTM), 2100 Second Street, SW., Washington, DC 20593-0001. Telephone: (202) 267-1389.

Dated: December 1, 1992.

Geoffrey Ogden,

Chairman, Shipping Coordinating Committee.

Office of the Secretary

[Public Notice No. 1742]

McAllen/Mission/Hidalgo, Texas, (Anzalduas International Crossings), Application for Bridge Permit

Notice is hereby given that the Department of State has received an application for a permit authorizing construction of a vehicle bridge and a railroad bridge across the Rio Grande River from McAllen/Mission/Hidalgo, Texas, to Reynosa, Tamaulipas, Mexico.

The Department's jurisdiction with respect to this application is based upon Executive Order 11423, dated August 16, 1968, and the International Bridge Act of 1972 (Pub. L. 92-434, 86 Stat. 731, 33 U.S.C. 535 approved September 26, 1972).

As required by E.O. 11423, the Department of State is circulating this application to concerned agencies for comment.

Interested persons may submit their views regarding the application in writing by January 21, 1993, to Mr. Irwin Rubenstein, Coordinator, U.S. Mexico Border Affairs, ARA/MEX, room 4258, U.S. Department of State, Washington, DC 20520.

The application and related documents made part of the record to be

considered by the Department of State in connection with this application are available for inspection in the Office of Mexican Affairs during normal business hours.

Any questions relating to this notice may be addressed to the Coordinator, U.S.-Mexico Border Affairs, at the above address or by telephone, No. (202) 647-9894.

Dated: December 14, 1992.

Irwin Rubenstein,

Coordinator, U.S.-Mexico Border Affairs, Office of Mexican Affairs.

BILLING CODE 4710-10-M

DEPARTMENT OF TRANSPORTATION

Order Adjusting International Cargo Rate Flexibility Level

Policy Statement PS-109, implemented by Regulation ER-1322 of the Civil Aeronautics Board and adopted by the Department, established geographic zones of cargo pricing flexibility within which certain cargo rate tariffs filed by carriers would be subject to suspension only in extraordinary circumstances.

The Standard Foreign Rate Level (SFRL) for a particular market is the rate in effect on April 1, 1982, adjusted for the cost experience of the carriers in the applicable ratemaking entity. The first adjustment was effective April 1, 1983. By Order 92-10-7, the Department established the currently effective SFRL adjustments.

In establishing the SFRL for the two-month period beginning December 1, 1992, we have projected non-fuel costs based on the year ended September 30, 1992 data, and have determined fuel prices on the basis of the latest available experienced monthly fuel cost levels as reported to the Department.

By Order 92-12-20 cargo rates may be adjusted by the following adjustment factors over the April 1, 1982, level:

Atlantic—1.2782

Western Hemisphere—1.1872

Pacific—1.5854

For further information contact: Keith A. Shangraw (202) 366-2439.

By the Department of Transportation: December 16, 1992.

Patrick V. Murphy,

Deputy Assistant Secretary for Policy and International Affairs.

[FR Doc. 92-31040 Filed 12-21-92; 8:45 am]

BILLING CODE 4910-62-M

[Docket 37554]

Order Adjusting the Standard Foreign Fare Level Index

The International Air Transportation Competition Act (IATCA) Public Law 96-192, requires that the Department, as successor to the Civil Aeronautics Board, establish a Standard Foreign Fare Level (SFFL) by adjusting the SFFL base periodically by percentage changes in actual operating costs per available seat-mile (ASM). Order 80-2-69 established the first interim SFFL, and Order 92-10-4 established the currently effective two-month SFFL applicable through November 30, 1992.

In establishing the SFFL for the two-month period beginning December 1, 1992, we have projected non-fuel costs based on the year ended September 30, 1992 data, and have determined fuel prices on the basis of the latest available experienced monthly fuel cost levels as reported to the Department.

By Order 92-12-19 fares may be increased by the following adjustment factors over the October 1979 level:

Atlantic—1.5633

Latin America—1.4406

Pacific—2.0465

Canada—1.4570

For further information contact: Keith A. Shangraw (202) 366-2439.

By the Department of Transportation: December 16, 1992.

Patrick V. Murphy,

Deputy Assistant Secretary for Policy and International Affairs.

BILLING CODE 4910-62-M

Federal Aviation Administration

Intent To Rule on Application To Impose and Use the Revenue From a Passenger Facility Charge (PFC) at Sioux Gateway Airport, Sioux City, IA

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The Federal Aviation Administration (FAA) proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Sioux Gateway Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) Pub. L. 101-508 and part 158 of the Federal Aviation Regulations (14 CFR part 158).

DATES: Comments must be received on or before January 21, 1993.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Federal Aviation Administration, Central Region, Airports Division, 601 E. 12th Street, Kansas City, MO. 64106.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Randall S. Curtis, Executive Director, Sioux Gateway Airport, at the folowing address: Sioux Gateway Airport Authority, Sioux Gateway Airport, 2403 Ogden Ave., Sioux City, IA 51110.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the Sioux Gateway Airport Authority under § 158.23 of part 158.

FOR FURTHER INFORMATION CONTACT: Ellie Anderson, PFC Coordinator, FAA, Central Region, Airports Division, 601 E. 12th Street, Kansas City, MO 64106, (816) 426-7425. The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Sioux Gateway Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101-508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

On December 8, 1992, the FAA determined that the application to impose and use the revenue from a PFC submitted by Sioux Gateway Airport Authority was substantially complete within the requirements of § 158.25 of part 158. The FAA will approve or disapprove the application, in whole or in part, no later than March 12, 1993.

The following is a brief overview of the application:

Level of the proposed PFC: $3.00.

Proposed charge effective date: May 1, 1993.

Proposed charge expiration date: May 1, 1994.

Total estimated PFC revenue: $200,824.

Brief description of proposed projects: Taxiway "C" Extension; Installation of Fencing and Purchase of Snow Removal Equipment; Security Access System Installation; Runway Sweeper Acquisition; Taxiway 'A" and "E" Rehabilitation.

Class or classes of air carriers which the public agency has requested not be required to collect PFCs: none.

Any person may inspect the application in person at the FAA office

listed above under "FOR FURTHER INFORMATION CONTACT".

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Sioux Gateway Airport, Sioux City, IA.

Issued in Kansas City, Missouri on December 8, 1992.

George A. Hendon,

Manager, Airports Division, Central Region.

BILLING CODE 4910-13-M

National Highway Traffic Safety Administration

[Docket No. 92-20; Notice 1]

Petition for Approval of Alternate Odometer Disclosure Requirements

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of preliminary determination.

SUMMARY: The odometer disclosure requirements set forth procedures (49 CFR 580.11) by which a State may petition for approval of alternate requirements to those in §§ 580.5 and 580.7 which identify the required elements of the disclosure statement. The State of Oregon has submitted a petition pursuant to 49 CFR 580.11 for approval of alternate disclosure requirements. On balance, NHTSA believes that the proposed system poses some threat to the integrity of the current system without sufficient benefit to outweigh that threat. Accordingly, NHTSA preliminarily denies Oregon's petition for approval of the proposed alternate disclosure requirements.

DATES: Comments are due no later than January 21, 1993.

ADDRESSES: Written comments should refer to the docket number of this notice and should be submitted to: Docket Section, room 5109, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590. (Docket hours are 9:30 a.m. to 4 p.m.)

FOR FURTHER INFORMATION CONTACT: Kathleen DeMeter, Office of the Chief Counsel, room 5219, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590 (202) 366-1834.

SUPPLEMENTARY INFORMATION:

Background

The Truth in Mileage Act of 1986 (Pub. L. 99-579), 15 U.S.C. 1981, *et seq.* (TIMA) requires each person transferring ownership of a motor vehicle to disclose the vehicle's mileage on the vehicle's title. The law directs the States to conform their titles and titling procedures to enable the titles to be used for odometer disclosure. The implementing regulations, 49 CFR part 580, set forth specific procedures and requirements which must be followed by States and those involved with commercial transactions.

The TIMA permits the administrative approval by NHTSA of alternate methods of odometer disclosure, provided those alternate methods are consistent with the purposes of the Act. The original final rule issued by NHTSA (53 FR 29464, August 5, 1988), set forth procedures (49 CFR 580.11) by which a State could petition for approval of alternate requirements to those in §§ 580.5 and 580.7 which identify the required elements of the disclosure statement.

The State of Oregon has submitted a petition pursuant to 49 CFR 580.11 for approval of alternate disclosure requirements.

Basis for the Petition

Oregon seeks approval for alternative procedures to those in 49 CFR 580.5(c) which require the titled owner of a vehicle to disclose the mileage on the title and not on a separate reassignment form. Oregon proposes to allow a titled owner to use a secure separate disclosure/reassignment document when the Motor Vehicle Division of the Oregon Department of Transportation (MVD) has possession of the title certificate because it has been submitted to perfect the security interest of the vehicle.

The Oregon petition states:

> In Oregon, perfecting a security interest in a vehicle is accomplished by applying for a title reflecting that interest. The title certificate must be surrendered to us * * *. It is not always possible * * * to meet all requirements for title within the 10 days allowed [to perfect a security interest] under federal bankruptcy law. In some cases, incomplete requests for title [where the odometer disclosure has not been completed] are submitted to us solely to perfect a security interest in a timely manner * * *. If a transaction is returned, perfection does not occur * * *.

The petition further states that "[u]nder current Oregon law, we cannot return a title certificate where there is a security interest holder, even though the seller and buyer have not completed the required odometer disclosure."

Accordingly, Oregon proposes to "adopt rules that would allow sellers and buyers (including persons in whose name the title was issued) to use a separate secure odometer disclosure/reassignment form when [the Oregon MVD has] and retain[s] possession of, the title certificate." Under the proposed alternative, the title certificate would be retained in division headquarters. When the completed secure odometer disclosure/reassignment form is received, it would be processed with the title certificate, and would become part of the title history of the vehicle.

NHTSA requested that Oregon provide a copy of applicable State laws and regulations and additional information supporting the petition. In an addendum to the petition, Oregon provides an example of how the alternative process would work. Party A (titled owner) sells a vehicle with the title. Party A fails to complete the required odometer disclosure on the title. The title is given to Party B (the buyer). Party B finances the purchase of the vehicle and surrenders the title to the lender. The lender submits the title to the MVD in order to receive a new title showing Party B as owner and lender as holder of a security interest in the vehicle. The title is submitted without the required odometer disclosure. The title is retained by the MVD, which sends a secure odometer disclosure/reassignment to Party B requesting the odometer disclosure be made on the form by party A and signed by both A and B. When the completed secure odometer disclosure/reassignment form is submitted back to MVD, it is matched with the title and the title application is processed.

Preliminary Determination

NHTSA has various substantive concerns regarding Oregon's proposal. NHTSA's central concern is that there does not appear to be sufficient justification for deviating from Congress' intent that odometer disclosures be made on the titles to vehicles and that separate disclosures be used as little as possible. Oregon provides no reason why, to follow the example set forth above, Party A cannot make the required disclosure. The example states merely that A does not make the disclosure. The remaining rationale behind the proposed alternative is that once A has failed to make the disclosure, B is allowed to avail himself of the alternate procedure to protect the security interest of B's financing lender.

This system appears to reward both A and B for being negligent—A for not making the disclosure and B for accepting a title without a proper disclosure. Moreover, since the seller's signature block is normally used for

both odometer disclosure and transfer of ownership of the vehicle, once A signs the title to accomplish the transfer of ownership, A has also, in effect, signed an incomplete, and therefore, false odometer disclosure statement.

In addition, NHTSA is concerned about the efficacy of the proposed system. If B could not get A to complete the title properly at the time of transfer of the title, why will B be any more successful in getting A to complete a separate form at some later date when A no longer has any stake in the process?

Oregon argues that its proposed system conforms to the intent of the Federal requirements because by the time the parties complete Oregon's proposed assignment form, the title will have been submitted to the State, which will issue a new title after the submission of the proposed separate form. Thus, any benefit to having the disclosure on the title, (i.e., protection and information for future buyers and access of buyer to title) will be reduced. The proposed procedure, it is further claimed, is consistent with Federal intent because the process will be controlled by MVD, and MVD's ability to detect odometer fraud will not be hampered.

NHTSA agrees that because of the immediate issuance of a new title, the proposed system would not have an adverse impact on the protection afforded to future buyers. NHTSA also respects MVD's commitment to control the forms and enforce the odometer laws. NHTSA disagrees, however, that there will be no effect on buyer access to title. In the example above, A could get B to give A a regular power of attorney to effect title transfer, in which case B might not see the title until the sale is complete and the title is signed, contrary to Congressional intent. Further, even if B does sign the title, a system that does nothing to discourage A from failing to provide the proper written mileage disclosure undermines Congressional intent that buyers receive written, accurate mileage information useful in the decision-making process on whether to purchase and how much to pay for a vehicle. For example, A could intentionally neglect to execute the written disclosure on the title because A has verbally misrepresented the mileage of the vehicle to B. When B contacts A to obtain a written disclosure on the proposed assignment form provided by MVD, A may still refuse to execute the disclosure because of the earlier verbal misrepresentation of the mileage. B would then have to convince A to negate the transfer and refund payment, and if unable to do so, would be forced to take legal action.

On balance, NHTSA believes that the proposed system introduces a potential threat to the integrity of the current system without a sufficient countervailing benefit. Rather than encouraging parties to obey the law while accommodating the lender's security interests, the proposed system permits parties to vehicle transactions to avoid the law with questionable justification, and without any adverse consequences. Accordingly, NHTSA preliminarily denies Oregon's petition for approval of alternate disclosure requirements.

Written Comments

Interested persons are invited to comment on this notice. It is requested, but not required, that ten copies be submitted.

All comments must be limited to 15 pages in length. Necessary attachments may be appended to those submissions without regard to the 15-page limit. (49 CFR 553.21.) This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

Written comments to the public docket must be received by January 21, 1993. All comments received before the close of business on the comment closing date will be considered and will be available for examination in the docket at the above address before and after that date. To the extent possible, comments received after the comment closing date will also be considered. However, action on the petition may proceed at any time after that date. Following the close of the comment period, NHTSA will publish a final determination on the petition responding to the comments. NHTSA will continue to file relevant material in the docket as it becomes available after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments should enclose, in the envelope with their comments, a self-addressed, stamped postcard. Upon receiving the comments, the docket supervisor will return the postcard by mail.

Copies of all comments will be placed in Docket 92–20, Notice 1 of the NHTSA Docket Section in room 5109, Nassif Building, 400 7th Street, SW., Washington, DC 20590.

Issued on: December 17, 1992.

Paul Jackson Rice,

Chief Counsel, National Highway Traffic Safety Administration.

BILLING CODE 4910-59-M

Announcing the Tenth Meeting of the Motor Vehicle Safety Research Advisory Committee

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Meeting announcement.

SUMMARY: This notice announces the tenth meeting of the Motor Vehicle Safety Research Advisory Committee (MVSRAC). The Committee was established in accordance with the provisions of the Federal Advisory Committee Act to obtain independent advice on motor vehicle safety research. At this meeting the Committee will discuss offset frontal research, biomechanics, harm analysis, and NHTSA's Plan for Intelligent Vehicle Highway Systems. A status report on the recent activities of the Crashworthiness and Crash Data Subcommittees will also be presented.

DATE AND TIME: The meeting is scheduled to begin at 10:30 a.m. on Friday, January 15, 1993, and conclude at 4 p.m. that afternoon.

ADDRESSES: The meeting will be held in room 6248 of the U.S. Department of Transportation Building, which is located at 400 Seventh Street SW., Washington, DC.

SUPPLEMENTARY INFORMATION: In May 1987, the Motor Vehicle Safety Research Advisory Committee was established. The purpose of the Committee is to provide an independent source of ideas for motor vehicle safety research. The MVSRAC will provide information, advice, and recommendations to NHTSA on matters relating to motor vehicle safety research, and provide a forum for the development, consideration and communication of motor vehicle safety research, as set forth in the MVSRAC Charter.

The meeting is open to the public, but attendance may be limited due to space availability. Participation by the public will be determined by the Committee Chairman.

A public reference file (Number 88–01) has been established to contain the products of the Committee and will be open to the public during the hours of 9:30 a.m. to 4 p.m. at the National Highway Traffic Safety Administration's Technical Reference Division in room 5108 at 400 Seventh Street SW.,

Washington, DC 20590, telephone: (202) 366–2768.

FOR FURTHER INFORMATION CONTACT: Mary Coyle, Office of Research and Development, 400 Seventh Street SW., room 6206, Washington, DC 20590, telephone: (202) 366–5926.

Issued on: December 16, 1992.

George L. Parker,

Chairman, Motor Vehicle Safety Research Advisory Committee.

BILLING CODE 4910–59–M

[Docket No. 92–52; Notice 1]

Tentative Determinations That Certain Nonconforming Vehicles Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Tentative determinations that certain nonconforming vehicles are eligible for importation.

SUMMARY: This notice requests comments on tentative determinations by the National Highway Traffic Safety Administration (NHTSA) that certain BMW, Mercedes-Benz, and Porsche passenger cars that were not originally manufactured to comply with the Federal motor vehicle safety standards are nevertheless eligible for importation into the United States because they

(1) Are substantially similar to motor vehicles which were originally manufactured to conform to the Federal standards and to be imported into and sold in the United States, and

(2) Are capable of being readily modified to conform to all applicable Federal motor vehicle safety standards.

DATES: The closing date for comments on these tentative determinations is January 21, 1993.

FOR FURTHER INFORMATION CONTACT: Ted Bayler, Office of Vehicle Safety Compliance, NHTSA (202–366–5306).

SUPPLEMENTARY INFORMATION:

Background

Under section 108(c)(3)(A)(i) of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 *et seq.*) (the Act), a motor vehicle that was not originally manufactured to conform to all applicable Federal motor vehicle safety standards shall be refused admission into the United States on and after January 31, 1990, unless NHTSA has determined, either pursuant to a petition or on its own initiative, that the motor vehicle is

> substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, certified under section 114 [of the Act], and of the same model year * * * as the model of the motor vehicle to be compared, and is capable of being readily modified to conform to all applicable Federal motor vehicle safety standards,

(section 108(c)(3)(A)(i)(I)) or that, "where there is no substantially similar United States motor vehicle," the agency has determined that

> the safety features of the vehicle comply with or are capable of being modified to comply with all applicable Federal motor vehicle safety standards based on destructive test data or such other evidence as the Secretary determines to be adequate * * *

(section 108(c)(3)(A)(i)(II)).

The phrases "substantially similar" and "capable of being readily modified" are not defined in Public Law 100–562, the statute that added the import eligibility requirements to the Act. In the absence of a statutory definition, NHTSA takes the position that a vehicle is "substantially similar" to one that was originally manufactured and certified for importation into and sale in the United States if there are no more than minor differences between the two vehicles in visual appearance and structural detail, aside from any differences attributable to the noncompliance of one vehicle with the Federal motor vehicle safety standards.

NHTSA regards a vehicle as "capable of being readily modified" if its components that are subject to the Federal motor vehicle safety standards may be easily replaced with parts intended as replacements for conforming parts on substantially similar certified vehicles. These include, but are not limited to, components such as tires (Standard No. 109), rims (Standard No. 110), wheel covers (Standard No. 211), glazing (Standard No. 205), reflecting surfaces (Standard No. 107), controls and displays (Standard No. 101), lighting devices (Standard No. 108), brake hoses (Standard No. 106) and brake fluid (Standard No. 116).

To address compliance with standards that apply to the vehicle itself, as opposed to any of its equipment items, NHTSA focuses on whether the modifications necessary for conformance are "readily" achievable. Information demonstrating that compliance can be achieved without major structural modifications or destructive component testing is relevant to this issue. An example of a major structural modification would be strengthening of the rear frame rails or rear body structure to achieve conformance with Standard No. 301 *Fuel System Integrity*. An example of a non-major structural modification would be installation of windshield retaining clips to achieve conformance with Standard No. 212 *Windshield Mounting*, or installation of reinforcing beams in doors to achieve conformance with Standard No. 214 *Side Door Strength*. In determining whether a vehicle is "capable of being readily modified," NHTSA finally presumes that a non-conforming vehicle that has a substantially similar U.S. certified counterpart will be more likely to incorporate structural features that are capable of being modified to conform than will a vehicle for which there is no substantially similar U.S. certified counterpart.

Over the years, the typical practice of manufacturers outside the United States who wish to sell passenger cars in the American market has been to offer versions of their home market products that they have re-engineered to conform to the Federal motor vehicle safety standards. To so-called "gray market" is comprised of foreign motor vehicles not originally manufactured to conform to the U.S. standards. In many instances, these vehicles are equipped with a body whose visual appearance, other than lighting equipment, bumpers, and rear view mirrors, is identical to that of U.S. certified vehicles, and share with those vehicles a large number of identical structural components.

In making a determination of eligibility for importation, NHTSA is required by section 108(c)(3)(C)(iii) of the Act to give due consideration to any test data or other information available to it. The primary information available to the agency consists of its own records pertaining to the importation of noncomplying motor vehicles under bond over the years, and data submitted by the importers of those vehicles to substantiate statements that they had been brought into compliance with all applicable Federal motor vehicle safety standards.

On November 13, 1990, NHTSA published a Notice of Final Determinations (55 FR 47418) identifying 172 separate models of nonconforming passenger cars as eligible for importation into the United States. Those determinations were based on the finding that each of the covered vehicles is substantially similar to a vehicle of the same model year that was originally manufactured for importation into and sale in the United States and that was certified under section 114 of the Act, and that each of the covered vehicles is capable of being readily modified to conform to all applicable Federal motor vehicle safety standards. Of the passenger cars for which final

determinations were made, 59 were BMW models, 83 were Mercedes-Benz models, and 19 were Porsche models. These accounted for all but 11 of the vehicles that were the subject of the first Final Determinations that NHTSA made upon its own initiative. A complete listing of these vehicles, by make, model, and model year, appears in an Annex to the Notice of Final Determinations at 55 FR 47421–22.

NHTSA continued to review manufacturers' records of vehicles certified for sale in this country and its enforcement files to identify vehicles for which a sufficient number of acceptable compliance statements had been submitted to permit a determination of import eligibility to be made. On November 30, 1991, the agency published a second Notice of Final Determinations (56 FR 58603), identifying an additional 95 models of passenger cars as eligible for importation into the United States. Of those passenger cars, 37 were BMW models, 47 were Mercedes-Benz models, and 3 were Porsche models, accounting for all but 8 of the vehicles that were the subject of those Final Determinations. A complete listing of these vehicles, by make, model, and model year, appears in Annex A to the Notice of Final Determinations at 56 FR 58604.

In addition to the final determinations of import eligibility that it made on its own initiative under section 108(c)(3)(C)(i)(II) of the Act, NHTSA has also made a number of final determinations under section 108(c)(3)(C)(i)(I), based on petitions submitted by importers of motor vehicles who have registered with the agency pursuant to 49 CFR part 592. Of the 17 such determinations that have been made to date, 6 have pertained to BMW vehicles, and 4 to Mercedes-Benz vehicles.

Based on the volume of import eligibility determinations that it has made with respect to BMW, Mercedes-Benz, and Porsche passenger cars, as well as its understanding that a U.S. certified counterpart exists for virtually every such vehicle manufactured for sale in other countries, NHTSA believes that justification exists for the agency to make a blanket determination that, with certain limited exceptions, all BMW, Mercedes-Benz, and Porsche passenger cars manufactured before September 1, 1989, are eligible for importation. September 1, 1989, was selected as the cutoff date because all passenger cars manufactured after that date must comply with the automatic restraint requirements of Standard No. 208 *Occupant Crash Protection*. NHTSA has denied several import eligibility petitions for passenger cars manufactured after September 1, 1989, because the importer has failed to submit adequate data to verify that the car is capable of being readily modified to conform to the standard's automatic restraint requirements. NHTSA also selected September 1, 1989, as the cutoff date because a decision as to whether a passenger car equipped with an air bag meets the automatic restraint requirements would impose an undue burden on U.S. customs inspectors.

As specified in the Annex to this notice, the blanket import eligibility determinations that NHTSA has tentatively made do not include Model ID 114 and 115 Mercedes-Benz vehicles with sales designations "long," "station wagon," or "ambulance," BMW vehicles in the M1 and Z1 series, and the Porsche 959. These vehicles have been excluded from the blanket determinations because they do not appear to have any substantially similar U.S. certified counterparts.

If these tentative determinations are ultimately made final, they have the potential for reducing the administrative burden and costs associated with NHTSA's processing of individual import eligibility petitions on the vehicles covered while eliminating the hardship faced by importers in awaiting decisions on those petitions. Additionally, these tentative determinations would promote efficiency by producing a comprehensive list of BMW, Mercedes-Benz, and Porsche passenger cars manufactured prior to September 1, 1989, that are eligible for importation, supplanting the need for importers to rely on **Federal Register** notices of final determination that would otherwise be issued on an individual basis as petitions for the covered vehicles are received and processed by NHTSA.

Tentative Determinations

Accordingly, on the basis of the foregoing, NHTSA hereby tentatively determines that each of the passenger cars listed in the Annex to this notice is substantially similar to a passenger car originally manufactured for importation into and sale in the United States, certified under section 114 of the National Traffic and Motor Vehicle Safety Act, and of the same model year, and is capable of being readily modified to conform to all applicable Federal motor vehicle safety standards.

Proposed Importation Code Numbers for Vehicles Covered by These Tentative Determinations

The importer of a vehicle admissible under any final determination must indicate on the Form HS–7 accompanying entry the appropriate importation code number indicating that the vehicle is eligible for entry. Proposed importation code numbers for the vehicles that are covered by these tentative determinations appear in the first column of the list in the Annex to this notice under the heading "Proposed VSA#." If these tentative determinations are ultimately made final, the import eligibility numbers that NHTSA has proposed would replace any individual numbers that NHTSA has assigned in final determinations that it has previously made on all covered BMW, Mercedes-Benz, and Porsche vehicles. The agency invites comments on this aspect of the proposal.

Comments

Section 108(c)(3)(C)(iii) requires NHTSA to provide a minimum period for public notice and comment on the determinations made on its own initiative consistent with ensuring expeditious, but full consideration and avoiding delay by any person. NHTSA believes that a minimum comment period of 30 days is appropriate for this purpose. Interested persons are invited to submit comments on the tentative determinations described above. It is requested, but not required, that five copies be submitted.

All comments received before the close of business on the closing date indicated below will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of NHTSA's final determination will be published in the **Federal Register** pursuant to the authority indicated below.

Comment closing date: January 21, 1993.

Authority: 15 U.S.C. 1397(c)(3)(A)(i)(I) and 1397(c)(3)(C)(iii); 49 CFR 593.8; delegation of authority at 49 CFR 1.50.

Issued on: December 15, 1992.

Marion C. Blakey,

Administrator.

ANNEX A.—PASSENGER CARS MANUFACTURED BEFORE SEPTEMBER 1, 1989, COVERED BY TENTATIVE DETERMINATIONS

Proposed VSA#	Make	Models covered
77	Mercedes-Benz.	All except Model ID 114 and 115 with sales designations "long," "station wagon," or "ambulance."

ANNEX A.—PASSENGER CARS MANUFACTURED BEFORE SEPTEMBER 1, 1989, COVERED BY TENTATIVE DETERMINATIONS—Continued

Proposed VSA#	Make	Models covered
78	BMW	All except the M1 and Z1 series.
79	Porsche	All except Model 959.

BILLING CODE 4910-59-M

DEPARTMENT OF THE TREASURY

Office of the Secretary

[Department Circular—Public Debt Series—No. 40-92]

Treasury Notes of December 31, 1994, Series AH-1994 (CUSIP No. 912827 H9 6)

Washington, December 16, 1992.

1. Invitation for Tenders

1.1 The Secretary of the Treasury, under the authority of chapter 31 of title 31, United States Code, invites tenders for United States securities, as described above and in the offering announcement, hereafter referred to as Notes. The Notes will be sold at auction, and bidding will be on a yield basis. Payment will be required at the price equivalent to the highest yield bid at which bids were accepted. The interest rate on the Notes and the price equivalent to the highest yield at which bids were accepted will be determined in the manner described below. Additional amounts of the Notes may be issued to Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the Notes may also be issued to Federal Reserve Banks as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The issue date and maturity date of the Notes are stated in the offering announcement. The Notes will accrue interest from the issue date. Interest will be payable on a semiannual basis as described in the offering announcement through the date that the principal becomes payable. The Notes will not be subject to call for redemption prior to maturity. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next business day.

2.2. The Notes will be issued only in oook-entry form in the minimum and multiple amounts stated in the offering announcement. They will not be issued in registered definitive or in bearer form.

2.3. The Department of the Treasury's general regulations governing United States securities, i.e., Department of the Treasury Circular No. 300, current revision (31 CFR part 306), as to the extent applicable to marketable securities issued in book entry from, and the regulations governing book-entry Treasury Bonds, Notes, and Bills, as adopted and published as a final rule to govern securities held in the TREASURY DIRECT Book-Entry Securities System in Department of the Treasury Circular, Public Debt Series, No. 2-86 (31 CFR part 357), apply to the Notes offered in this circular.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and the Bureau of the Public Debt, Washington, DC 20239-1500. The closing times for the receipt of noncompetitive and competitive tenders are specified in the offering announcement. Noncompetitive tenders will be considered timely if postmarked (U.S. Postal Service cancellation date) no later than the day prior to the auction and received no later than close of business on the issue day.

3.2. The par amount of Notes bid for must be stated on each tender. The minimum bid is stated in the offering announcement, and larger bids must be in multiples of that amount.

3.3. Competitive bids must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. A single bidder, as defined in Treasury's single bidder guidelines contained in Attachment A to this circular, may submit bids at more than one yield. However, at any one yield, the Treasury will not recognize any amount tendered by a single bidder in excess of 35 percent of the public offering amount. A competitive bid by a single bidder at any one yield in excess of 35 percent of the public offering will be reduced to that amount.

3.4. Noncompetitive tenders do not specify a yield. A single bidder should not submit a noncompetitive tender for more than $5,000,000. A noncompetitive bid by a single bidder in excess of $5,000,000 will be reduced to that amount. A bidder, whether bidding directly or through a depository institution or a government securities broker/dealer, may not submit a noncompetitive bid for its own account in the same auction in which it is submitting a competitive bid for its own account. A bidder may not submit a noncompetitive bid if the bidder holds a position, in the Notes being auctioned, in "when-issued" trading, or in futures or forward contracts. A noncompetitive bidder may not enter into any agreement to purchase or sell or otherwise dispose of the security being auctioned, nor may it commit to sell the security prior to the designated closing time for receipt of competitive bids.

3.5. The following institutions may submit tenders for accounts of customers: Depository institutions, as described in section 19(b)(1)(A), excluding those institutions described in subparagraph (vii), of the Federal Reserve Act (12 U.S.C. 461(b)(1)(A)); and government securities broker/dealers that are registered with the Securities and Exchange Commission or noticed as government securities broker/dealers pursuant to section 15C(a)(1) of the Securities Exchange Act of 1934. Others are permitted to submit tenders only for their own account. A submitter, if bidding competitively for customers, must include a customer list with the tender giving, for each customer, the name of the customer and the amount bid. A separate tender and customer list should be submitted for each competitive yield. For noncompetitive bids, the customer list must provide, for each customer, the name of the customer and the amount bid. For mailed tenders, the customer list must be submitted with the tender. For other than mailed tenders, the customer list should accompany the tender. If the customer list is not submitted with the tender, information for the list must be complete and available for review by the deadline for submission of noncompetitive tenders. The customer list should be received by the Federal Reserve Bank on auction day. All competitive and noncompetitive bids submitted on behalf of trust estates must provide, for each trust estate, the name or title of the trustee(s), a reference to the document creating the trust with the date of execution, and the employer identification number of the trust. Customer bids may not be aggregated on the customer list. The customer list must include customers and customers of those customers, where applicable.

3.6. A competitive single bidder must report its net long position if the total of all its bids for the security being offered and its net position in the security equals or exceeds $2 billion, with the position to be determined as of one half-hour prior to the closing time for the receipt of competitive tenders. A net long position includes positions, in the security being auctioned, in "when-issued" trading, and in futures and

forward contracts. Bidders who meet this reporting requirement and are customers of a depository institution or a government securities broker/dealer must report their positions through the institution submitting the bid on their behalf.

3.7. Tenders from bidders who are making payment by charge to a funds account at a Federal Reserve Bank and tenders from bidders who have an approved autocharge agreement on file at a Federal Reserve Bank will be received without deposit. In addition, tenders from States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; and Federal Reserve Banks will be received without deposit. Tenders from all others, including tenders submitted for Notes to be maintained on the book-entry records of the Department of the Treasury, must be accompanied by full payment for the amount of Notes applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.

3.8. After the deadline for receipt of competitive tenders, there will be a public announcement of the amounts of bids received and accepted, the highest yield accepted, and the interest rate on the notes. Subject to the reservations expressed in Section 4, noncompetitive bids will be accepted in full, and then competitive bids will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Bids at the highest yield at which bids were accepted will be prorated if necessary. All successful competitive bidders, regardless of the yields they each bid, will be awarded securities at the highest yield at which bids were accepted. After the determination is made as to which bids are accepted, an interest rate will generally be established, at a ⅛ of one percent increment, which produces a price equivalent to the highest yield at which bids were accepted and is closest to, but not above, par. That stated rate of interest will be paid on all of the Notes. Based on such interest rate, the price equivalent to the highest yield at which bids were accepted will be determined, and each noncompetitive bidder and each successful competitive bidder will be required to pay such price for their securities. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive bids received would absorb most or all of the public offering, competitive bids would be accepted in an amount determined by the Department to be sufficient to provide a fair determination of the highest yield for the securities being auctioned. Bids received from Federal Reserve Banks for their own account or for foreign and international monetary authorities will be accepted at the price equivalent to the highest yield at which bids were accepted.

3.9. No single bidder will be awarded securities in an amount exceeding 35 percent of the public offering. The determination of the maximum award to a single bidder will take into account the bidder's net long position, if the bidder has been obliged to report its position per the requirements outlined in Section 3.6.

3.10. Notice of awards will be provided by a Federal Reserve Bank or Branch or the Bureau of the Public Debt to bidders who have submitted accepted competitive bids, whether for their own account or for the account of customers. Those submitting non-competitive bids will be notified only if the bid is not accepted in full, or when the price at the highest yield at which bids were accepted is over par. No later than 12 noon local time on the day following the auction, the appropriate Federal Reserve Bank will notify each depository institution that has entered into an autocharge agreement with a bidder as to the amount to be charged to the institution's funds account at the Federal Reserve Bank on the issue date. Any customer that is awarded $500 million or more of securities must furnish, no later than 10 a.m. local time on the day following the auction, written confirmation of its bid to the Federal Reserve Bank or Branch where the bid was submitted. A depository institution or government securities broker/dealer submitting a bid for a customer is responsible for notifying its customer of this requirement if the customer is awarded $500 million or more of securities as a result of bids submitted by the depository institution or government securities broker/dealer.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all bids in whole or in part, to allot more or less than the amount of Notes specified in the offering announcement, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for the Notes allotted must be made timely at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on Notes allotted will be made by a charge to a funds account or pursuant to an approved autocharge agreement, as provided in Section 3.7. Settlement on Notes allotted to institutional investors and to others whose tenders are accompanied by a guarantee as provided in Section 3.7. must be made or completed on or before the issue date. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury notes or bonds maturing on or before the settlement date but which are not over-due as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors by the time stated in the offering announcement. When payment has been submitted with the tender and the purchase price of the Notes allotted is over par, settlement for the premium must be completed timely, as specified above. When payment has been submitted with the tender and the purchase price is under part, the discount will be remitted to the bidder.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the par amount of Notes allotted may, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered definitive securities tendered in payment for the Notes allotted and to be held in TREASURY DIRECT are not required to be assigned if the inscription on the registered definitive security is identical to the registration of the Note being purchased. In any such case, the tender form used to place the Notes allotted in TREASURY DIRECT must be completed to show all the information required thereon, or the TREASURY DIRECT account number previously obtained.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessary, to receive payment

for, and to issue, maintain, service, and make payment on the Notes.

6.2. The Secretary of the Treasury may at any time supplement or amend provisions of this circular if such supplements or amendments do not adversely affect existing rights of holders of the Notes. Public announcement of such changes will be promptly provided.

6.3. The Notes issued under this circular shall be obligations of the United States, and, therefore, the faith of the United States Government is pledged to pay, in legal tender, principal and interest on the Notes.

6.4. Attachment A and the offering announcement are incorporated as part of this circular.

Marcus W. Page,

Acting Fiscal Assistant Secretary.

Attachment A—Treasury's Single Bidder Guidelines for Noncompetitive Bidding in All Treasury Security Auctions

The investor categories listed below define what constitutes a single noncompetitive bidder.

(1) *Bank Holding Companies and Subsidiaries—*

A bank holding company (includes the company and/or one or more of its subsidiaries, whether or not organized as separate entities under applicable law).

(2) *Banks and Branches—*

A parent bank (includes the parent and/or one or more of its branches, whether or not organized as separate entities under applicable law).

(3) *Thrift Institutions and Branches—*

A thrift institution, such as a savings and loan association, credit union, savings banks, or other similar entity (includes the principal or parent office and/or one or more of its branches, whether or not organized as separate entities under applicable law).

(4) *Corporations and Subsidiaries—*

A corporation (includes the corporation and/or one or more of its majority-owned subsidiaries, i.e., any subsidiary more than 50 percent of whose stock is owned by the parent corporation or by any other of its majority-owned subsidiaries).

(5) *Families—*

A married person (includes his or her spouse, and any unmarried adult children, having a common address and/or household).

Note: A minor child, as defined by the law of domicile, is *not* permitted to submit tenders individually, or jointly with an adult bidder. (A minor's parent acting as natural guardian is *not* recognized as a separate bidder.)

(6) *Partnerships—*

Each partnership (includes a partnership or individual partner(s), acting together or separately, who own the majority or controlling interest in other partnerships, corporations, or associations).

(7) *Guardians, Custodians, or other Fiduciaries—*

A guardian, custodian, or similar fiduciary, identified by (a) the name or title of the fiduciary, (b) reference to the document, court order, or other authority under which the fiduciary is acting, and (c) the taxpayer identifying number assigned to the estate.

(8) *Trusts—*

A trust estate, which is identified by (a) the name or title of the trustee, (b) a reference to the document creating the trust, e.g., a trust indenture, with date of execution, or a will, (c) the IRS employer identification number (not social security account number).

(9) *Political Subdivisions—*

(a) A state government (any of the 50 states and the District of Columbia).

(b) A unit of local government (any county, city, municipality, or township, or other unit of general government, as defined by the Bureau of the Census for statistical purposes, and includes any trust, investment, or other funds thereof).

(c) A commonwealth, territory, or possession.

(10) *Mutual Funds—*

A mutual fund (includes all funds that comprise it, whether or not separately administered).

(11) *Money Market Funds—*

A money market fund (includes all funds that have a common management).

(12) *Investment Agents/Money Managers—*

An individual, firm, or association that undertakes to service, invest, and/or manage funds for others.

(13) *Pension Funds—*

A pension fund (includes all funds that comprise it, whether or not separately administered).

Notes: The definitions do not reflect all bidder situations. "Single bidder" is not necessarily synonymous with "single entity".

Questions concerning the guidelines should be directed to the Office of Financing, Bureau of the Public Debt, Washington, DC 20239 (telephone 202/219–3350).

Auction of 2-Year and 5-Year Notes Totaling $26,750 Million

The Treasury will auction $15,500 million of 2-year notes and $11,250 million of 5-year notes to refund $20,954 million of securities maturing December 31, 1992, and to raise about $5,800 million new cash. The $20,954 million of maturing securities are those held by the public, including $1,331 million currently held by Federal Reserve Banks as agents for foreign and international monetary authorities.

Both the 2-year and 5-year note auctions will be conducted in the single-price auction format. All competitive and noncompetitive awards will be at the highest yield of accepted competitive tenders.

The $26,750 million is being offered to the public, and any amounts tendered by Federal Reserve Banks as agents for foreign and international monetary authorities will be added to that amount.

In addition to the public holdings, Federal Reserve Banks, for their own accounts, hold $1,570 million of the maturing securities that may be refunded by issuing additional amounts of the new securities.

Details about each of the new securities are given in the attached highlights of the offerings and in the official offering circulars.

Attachment

HIGHLIGHTS OF TREASURY OFFERINGS TO THE PUBLIC OF 2-YEAR AND 5-YEAR NOTES TO BE ISSUED DECEMBER 31, 1992

[December 16, 1992]

Amount Offered to the Public	$15,500 million	$11,250 million.
Description of Security:		
Term and type of security	2-year notes	5-year notes.
Series and CUSIP designation	Series AH–1994 (CUSIP NO. 912827 H9 6)	Series U–1997 (CUSIP No. 912827 J2 9).
Maturity date	December 31, 1994	December 31, 1997.
Interest rate	To be determined based on the highest accepted bid	To be determined based on the highest accepted bid.
Investment yield	To be determined at auction	To be determined at auction.
Premium or discount	To be determined at auction	To be determined at auction.
Interest payment dates	June 30 and December 31	June 30 and December 31.
Minimum denomination available	$5,000	$1,000.
Terms of Sale:		
Method of sale	Yield auction	Yield auction.
Competitive tenders	Must be expressed as an annual yield, with two decimals, e.g., 7.10%.	Must be expressed as an annual yield, with two decimals, e.g., 7.10%.
Noncompetitive tenders	Accepted in full up to $5,000	Accepted in full up to $5,000.
Accrued interest payable by investor	None	None.
Key Dates:		
Receipt of tenders	Tuesday, December 22, 1992	Wednesday, December 23, 1992.

BILLING CODE 4810-40-M

[Department Circular—Public Debt Series—No. 41-92]

Treasury Notes of December 31, 1997, Series U-1997 (CUSIP No. 912827 J2 9)

Washington, December 16, 1992.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of chapter 31 of title 31, Unites States Code, invites tenders for United States securities, as described above and in the offering announcement, hereafter referred to as Notes. The Notes will be sold at auction, and bidding will be on a yield basis. Payment will be required at the price equivalent to the highest yield bid at which bids were accepted. The interest rate on the Notes and the price equivalent to the highest yield at which bids were accepted will be determined in the manner described below. Additional amounts of the Notes may be issued to Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the Notes may also be issued to Federal Reserve Banks as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The issue date and maturity date of the Notes are stated in the offering announcement. The Notes will accrue interest from the issue date. Interest will be payable on a semiannual basis as described in the offering announcement through the date that the principal becomes payable. The Notes will not be subject to call for redemption prior to maturity. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next business day.

2.2. The Notes will be issued only in book-entry form in the minimum and multiple amounts stated in the offering announcement. They will not be issued in registered definitive or in bearer form.

2.3. The Department of the Treasury's general regulations governing United States securities, i.e., Department of the Treasury Circular No. 300, current revision (31 CFR part 306), as to the extent applicable to marketable securities issued in book-entry form, and the regulations governing book-entry treasury Bonds, Notes, and Bills, as adopted and published as a final rule to govern securities held in the TREASURY DIRECT Book-Entry Securities System in Department of the Treasury Circular, Public Debt Series, No. 2-86 (31 CFR part 357), apply to the Notes offered in this circular.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, DC 20239-1500. The closing times for the receipt of noncompetitive and competitive tenders are specified in the offering announcement. Noncompetitive tenders will be considered timely if postmarked (U.S. Postal Service cancellation date) no later than the day prior to the auction and received no later than close of business on the issue day.

3.2. The par amount of Notes bid for must be stated on each tender. The minimum bid is stated in the offering announcement, and larger bids must be in multiples of that amount.

3.3. Competitive bids must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. A single bidder, as defined in Treasury's single bidder guidelines contained in Attachment A to this circular, may submit bids at more than one yield. However, at any one yield, the Treasury will not recognize any amount tendered by a single bidder in excess of 35 percent of the public offering amount. A competitive bid by a single bidder at any one yield in excess of 35 percent of the public offering will be reduced to that amount.

3.4. Noncompetitive tenders do not specify a yield. A single bidder should not submit a noncompetitive tender for more than $5,000,000. A noncompetitive bid by a single bidder in excess of $5,000,000 will be reduced to that amount. A bidder, whether bidding directly or through a depository institution or a government securities broker/dealer, may not submit a noncompetitive bid for its own account in the same auction in which it is submitting a competitive bid for its own account. A bidder may not submit a noncompetitive bid if the bidder holds a position, in the Notes being auctioned, in "when-issued" trading, or in futures or forward contracts. A noncompetitive bidder may not enter into any agreement to purchase or otherwise dispose of the security being auctioned, nor may it commit to sell the security prior to the designated closing time for receipt of competitive bids.

3.5. The following institutions may submit tenders for accounts of customers: Depository institutions, as described in section 19(b)(1)(A), excluding those institutions described in subparagraph (vii), of the Federal Reserve Act (12 U.S.C. 461(b)(1)(A)); and government securities broker/dealers that are registered with the Securities and Exchange Commission or noticed as government securities broker/dealers pursuant to section 15C(a)(1) of the Securities Exchange Act of 1934. Others are permitted to submit tenders only for their own account. A submitter, if bidding competitively for customers, must include a customer list with the tender giving, for each customer, the name of the customer and the amount bid. A separate tender and customer list should be submitted for each competitive yield. For noncompetitive bids, the customer list must provide, for each customer, the name of the customer and the amount bid. For mailed tenders, the customer list must be submitted with the tender. For other than mailed tenders, the customer list should accompany the tender. If the customer list is not submitted with the tender, information for the list must be complete and available for review by the deadline for submission of noncompetitive tenders. The customer list should be received by the Federal Reserve Bank on auction day. All competitive and noncompetitive bids submitted on behalf of trust estates must provide, for each trust estate, the name or title of the trustee(s), and reference to the document creating the trust with the date of execution, and the employer

identification number of the trust. Customer bids may not be aggregated on the customer list. The customer list must include customers and customers of those customers, where applicable.

3.6. A competitive single bidder must report its net long position if the total of all its bids for the security being offered and its net position in the security equals or exceeds $2 billion, with the position to be determined as of one half-hour prior to the closing time for the receipt of competitive tenders. A net long position includes positions, in the security being auctioned, in "when-issued" trading, and in futures and forward contracts. Bidders who meet this reporting requirement and are customers of a depository institution or a government securities broker/dealer must report their positions through the institution submitting the bid on their behalf.

3.7. Tenders from bidders who are making payment by charge to a funds account at a Federal Reserve Bank and tenders from bidders who have an approved autocharge agreement on file at a Federal Reserve Bank will be received without deposit. In addition, tenders from States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; and Federal Reserve Banks will be received without deposit. Tenders from all others, including tenders submitted for Notes to be maintained on the book-entry records of the Department of the Treasury, must be accompanied by full payment for the amount of Notes applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.

3.8. After the deadline for receipt of competitive tenders, there will be a public announcement of the amounts of bids received and accepted, the highest yield accepted, and the interest rate on the notes. Subject to the reservations expressed in Section 4, noncompetitive bids will be accepted in full, and then competitive bids will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Bids at the highest yield at which bids were accepted will be prorated if necessary. All successful competitive bidders, regardless of the yields they each bid, will be awarded securities at the highest yield at which bids were accepted. After the determination is made as to which bids are accepted, an interest rate will generally be established, at a ⅛ of one percent increment, which produces a price equivalent to the highest yield at which bids were accepted and is closest to, but not above, par. That stated rate of interest will be paid on all of the Notes. Based on such interest rate, the price equivalent to the highest yield at which bids were accepted will be determined, and each noncompetitive bidder and each successful competitive bidder will be required to pay such price for their securities. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive bids received would absorb most or all of the public offering, competitive bids would be accepted in an amount determined by the Department to be sufficient to provide a fair determination of the highest yield for the securities being auctioned. Bids received from Federal Reserve Banks for their own account or for foreign and international monetary authorities will be accepted at the price equivalent to the highest yield at which bids were accepted.

3.9. No single bidder will be awarded securities in an amount exceeding 35 percent of the public offering. The determination of the maximum award to a single bidder will take into account the bidder's net long position, if the bidder has been obliged to report its position per the requirements outlined in Section 3.6.

3.10. Notice of awards will be provided by a Federal Reserve Bank or Branch or the Bureau of the Public Debt to bidders who have submitted accepted competitive bids, whether for their own account of for the account of customers. Those submitting non-competitive bids will be notified only if the bid is not accepted in full, or when the price at the highest yield at which bids were accepted is over par. No later than 12:00 noon local time on the day following the auction, the appropriate Federal Reserve Bank will notify each depository institution that has entered into an autocharge agreement with a bidder as to the amount to be charged to the institution's funds account at the Federal Reserve Bank on the issue date. Any customer that is awarded $500 million or more of securities must furnish, no later than 10 a.m. local time on the day following the auction, written confirmation of its bid to the Federal Reserve Bank or Branch where the bid was submitted. A depository institution or government securities broker/dealer submitting a bid for a customer is responsible for notifying its customer of this requirement if the customer is awarded $500 million or more of securities as a result of bids submitted by the depository institution or government securities broker/dealer.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all bids in whole or in part, to allot more or less than the amount of Notes specified in the offering announcement, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this section is final.

5. Payment and Delivery

5.1. Settlement for the Notes allotted must be made timely at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on Notes allotted will be made by a charge to a funds account or pursuant to an approved autocharge agreement, as provided in Section 3.7. Settlement on Notes allotted to institutional investors and to others whose tenders are accompanied by a guarantee as provided in Section 3.7. must be made or completed on or before the issue date. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury notes or bonds maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors by the time stated in the offering announcement. When payment has been submitted with the tender and the purchase price of the Notes allotted is over par, settlement for the premium must be completed timely, as specified above. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the par amount of Notes allotted may, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered definitive securities tendered in payment for the Notes allotted and to be held in TREASURY DIRECT are not required to be assigned if the inscription on the registered definitive security is identical to the registration of the Note being purchased.

In any such case, the tender form used to place the Notes allotted in TREASURY DIRECT must be completed to show all the information required thereon, or the TREASURY DIRECT account number previously obtained.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessary, to receive payment for, and to issue, maintain, service, and make payment on the Notes.

6.2. The Secretary of the Treasury may at any time supplement or amend provisions of this circular if such supplements or amendments do not adversely affect existing rights of holders of the Notes. Public announcement of such changes will be promptly provided.

6.3. The Notes issued under this circular shall be obligations of the United States, and, therefore, the faith of the United States Government is pledged to pay, in legal tender, principal and interest on the Notes.

6.4. Attachment A and the offering announcement are incorporated as part of this circular.

Marcus W. Page,

Acting Fiscal Assistant Secretary.

Attachment A—Treasury's Single Bidder Guidelines for Noncompetitive Bidding in All Treasury Security Auctions

The investor categories listed below define what constitutes a single noncompetitive bidder.

(1) *Bank Holding Companies and Subsidiaries*—A bank holding company (includes the company and/or one or more of its subsidiaries, whether or not organized as separate entities under applicable law).

(2) *Banks and Branches*—A parent bank (includes the parent and/or one or more of its branches, whether or not organized as separate entities under applicable law).

(3) *Thrift Institutions and Branches*—A thrift institution, such as a savings and loan association, credit union, savings banks, or other similar entity (includes the principal or parent office and/or one or more of its branches, whether or not organized as separate entities under applicable law).

(4) *Corporations and Subsidiaries*—A corporation (includes the corporation and/or one or more of its majority-owned subsidiaries, i.e., any subsidiary more than 50 percent of whose stock is owned by the parent corporation or by any other of its majority-owned subsidiaries).

(5) *Families*—A married person (includes his or her spouse, and any unmarried adult children, having a common address and/or household).

Note: A minor child, as defined by the law of domicile, is *not* permitted to submit tenders individually, or jointly with an adult bidder. (A minor's parent acting as natural guardian is *not* recognized as a separate bidder.)

(6) *Partnerships*—Each partnership (includes a partnership or individual partner(s), acting together or separately, who own the majority or controlling interest in other partnerships, corporations, or associations).

(7) *Guardians, Custodians, or other Fiduciaries*—A guardian, custodian, or similar fiduciary, identified by (a) the name or title of the fiduciary, (b) reference to the document, court order, or other authority under which the fiduciary is acting, and (c) the taxpayer identifying number assigned to the estate.

(8) *Trusts*—A trust estate, which is identified by (a) the name or title of the trustee, (b) a reference to the document creating the trust, e.g., a trust indenture, with date of execution, or a will, (c) the IRS employer identification number (not social security account number).

(9) *Political Subdivisions*—(a) A state government (any of the 50 states and the District of Columbia).

(b) A unit of local government (any county, city, municipality, or township, or other unit of general government, as defined by the Bureau of the Census for statistical purposes, and includes any trust, investment, or other funds thereof).

(c) A commonwealth, territory, or possession.

(10) *Mutual Funds*—A mutual fund (includes all funds that comprise it, whether or not separately administered).

(11) *Money Market Funds*—A money market fund (includes all funds that have a common management).

(12) *Investment Agents/Money Managers*—An individual, firm, or association that undertakes to service, invest, and/or manage funds for others.

(13) *Pension Funds*—A pension fund (includes all funds that comprise it, whether or not separately administered).

Notes: The definitions do not reflect all bidder situations. "Single bidder" is not necessarily synonymous with "single entity".

Questions concerning the guidelines should be directed to the Office of Financing, Bureau of the Public Debt, Washington, DC 20239 (telephone 202/219–3350).

Auction of 2-Year and 5-Year Notes Totaling $26,750 Million

The Treasury will auction $15,500 million of 2-year notes and $11,250 million of 5-year notes to refund $20,954 million of securities maturing December 31, 1992, and to raise about $5,800 million new cash. The $20,954 million of maturing securities are those held by the public, including $1,331 million currently held by Federal Reserve Banks as agents for foreign and international monetary authorities.

Both the 2-year and 5-year note auctions will be conducted in the single-price auction format. All competitive and non-competitive awards will be at the highest yield of accepted competitive tenders.

The $26,750 million is being offered to the public, and any amounts tendered by Federal Reserve Banks as agents for foreign and international monetary authorities will be added to that amount.

In addition to the public holdings, Federal Reserve Banks, for their own accounts, hold $1,570 million of the maturing securities that may be refunded by issuing additional amounts of the new securities.

Details about each of the new securities are given in the attached highlights of the offerings and in the official offering circulars.

Attachment

HIGHLIGHTS OF TREASURY OFFERINGS TO THE PUBLIC OF 2-YEAR AND 5-YEAR NOTES TO BE ISSUED DECEMBER 31, 1992

[December 16, 1992]

Amount offered to the public	$15,500 million	$11,250 million.

DEPARTMENT OF VETERANS AFFAIRS

Information Collection Under OMB Review

AGENCY: Department of Veterans Affairs.

ACTION: Notice.

The Department of Veterans Affairs has submitted to OMB the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). This document lists the following information: (1) The title of the information collection, and the Department form number(s), if applicable; (2) a description of the need and its use; (3) who will be required or asked to respond; (4) an estimate of the total annual reporting hours, and recordkeeping burden, if applicable; (5) the estimated average burden hours per respondent; (6) the frequency of response; and (7) an estimated number of respondents.

ADDRESSES: Copies of the proposed information collections and supporting documents may be obtained from Janet G. Byers, Veterans Benefits Administration (20A5), Department of Veterans Affairs, 810 Vermont, NW., Washington, DC 20420 (202) 233-3021.

Comments and questions about the items on the list should be directed to VA's OMB Desk Officer, Joseph Lackey, NEOB, Room 3002, Washington, DC 20503, (202) 395-7316. Do not send requests for benefits to this address.

DATES: Comments on the information collection should be directed to the OMB Desk Officer within 30 days of this notice.

Dated: December 15, 1992.
By direction of the Secretary.

Frank E. Lalley,

Associate Deputy, Assistant Secretary for Information Resources Policies and Oversight.

New Collection

1. Application for Supplemental Service Disabled Veterans (RH) Life Insurance, VA Forms 29-0188, 29-0189, and 29-0190.

2. The forms are used by veterans to apply for Supplemental Service Disabled Veterans Insurance. The information is used to establish eligibility for coverage.

3. Individuals or households.

4. 3,333 hours.

5. 20 minutes.

6. On occasion.

7. 10,000 respondents.

Extension

1. Electrical Systems Inspection Report (Manufactured Home), VA Form 26-8731b.

2. The form is completed by inspectors to record findings for electrical systems of used manufactured homes proposed as security for guaranteed loans. The information is used to determine acceptability of units for VA financing.

3. Individuals or households; businesses or other for-profit; small businesses or organizations.

4. 240 hours.

5. 2 hours.

6. On occasion.

7. 120 respondents.

Extension

1. Court Appointed Fiduciary's Account, VA Form 27-4706c.

2. This form is used by VA Fiduciary and Field Examination Program to provide the court appointed fiduciary of a VA beneficiary an acceptable format for providing accountings to the appointing court. The information will be used to determine whether VA benefits have been properly managed.

3. Individuals or households; State or local governments; Federal agencies or employees; non-profit institutions.

4. 1,968 hours.

5. 30 minutes.

6. On occasion.

7. 3,936 respondents.

Extension

1. Financial Statement, VA Form 26-6807.

2. This form is used to determine the financial condition of original veteran obligors for release from personal liability arising from original guaranty of their home loans or the making of a direct loan; to determine a borrower's financial condition in connection with efforts to reinstate a seriously defaulted guaranteed, insured, or portfolio loan; and to determine the eligibility of homeowners for aid under the Homeowners Assistance Program.

3. 30,000 hours.

4. 45 minutes.

5. On occasion.

6. Individuals or households.

7. 40,000 respondents.

BILLING CODE 7590-01-M

UNITED STATES POSTAL SERVICE BOARD OF GOVERNORS

Notice of Vote to Close Meeting

By telephone vote on December 15, 1992, a majority of the members contacted and voting, the Board of Governors voted to close to public observation a meeting held in Washington, DC, to consider possible actions to take in Docket 91–1073 before the United States Court of Appeals for the District of Columbia Circuit.

The meeting was attended by the following persons: Governors Alvarado, Daniels, del Junco, Griesemer, Mackie, Pace, Setrakian and Winters; Postmaster General Runyon; Deputy Postmaster General Coughlin; Secretary for the Board Harris; and General Counsel Elcano.

The Board determined that prior public notice was not possible and pursuant to section 552b(c)(10) of title 5, United States Code, and section 7.3(j) of title 39, Code of Federal Regulations, the discussion of this matter was exempt from the open meeting requirement of the Government in the Sunshine Act [5 U.S.C. 552b(b)].

The Board further determined that the public interest did not require that the Board's discussion of the matter be open to the public.

In accordance with section 552b(f)(1) of title 5, United States Code, and section 7.6(a) of title 39, Code of Federal Regulations, the General Counsel of the United States Postal Service has certified that in her opinion the meeting may properly be closed to public observation, pursuant to section 552b(c)(10) of title 5, United States Code; and section 7.3(j) of title 39, Code of Federal Regulations.

Requests for information about the meeting should be addressed to the Secretary for the Board, David F Harris, at (202) 268–4800.

David F. Harris,

Secretary.

Part II

Environmental Protection Agency

40 CFR Part 131

Water Quality Standards; Establishment of Numeric Criteria for Priority Toxic Pollutants; States' Compliance; Final Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 131

[WH-FRL-4543-9]

Water Quality Standards; Establishment of Numeric Criteria for Priority Toxic Pollutants; States' Compliance

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This rule promulgates for 14 States, the chemical-specific, numeric criteria for priority toxic pollutants necessary to bring all States into compliance with the requirements of section 303(c)(2)(B) of the Clean Water Act (CWA). States determined by EPA to fully comply with section 303(c)(2)(B) requirements are not affected by this rule.

The rule addresses two situations. For a few States, EPA is promulgating a limited number of criteria which were previously identified as necessary in disapproval letters to such States, and which the State has failed to address. For other States, Federal criteria are necessary for all priority toxic pollutants for which EPA has issued section 304(a) water quality criteria guidance and that are not the subject of approved State criteria.

When these standards take effect, they will be the legally enforceable standards in the named States for all purposes and programs under the Clean Water Act, including planning, monitoring, NPDES permitting, enforcement and compliance.

EPA is also withdrawing today the human health criteria published in the 1980 Ambient Water Quality Criteria documents for: Beryllium, Cadmium, Chromium, Lead, Methyl Chloride, Selenium, Silver, and 1,1,1 Trichloroethane. A summary of the criteria recommendation and the notice of availability of each criteria document were published at 45 FR 79318, November 28, 1980.

EFFECTIVE DATE: This rule shall be effective February 5, 1993.

ADDRESSES: The public may inspect the administrative record for this rulemaking, including documentation supporting the aquatic life and human health criteria, and all public comments received on the proposed rule at the Environmental Protection Agency, Standards and Applied Science Division, Office of Science and Technology, room 919 East Tower, Waterside Mall, 401 M Street, SW., Washington, DC 20460 (Telephone: 202–260–1315) on weekdays during the Agency's normal business hours of 8 a.m. to 4:30 p.m. A reasonable fee will be charged for photocopies. Inquiries can be made by calling 202–260–1315.

FOR FURTHER INFORMATION CONTACT: David K. Sabock or R. Kent Ballentine, Telephone 202–260–1315.

SUPPLEMENTARY INFORMATION:

This preamble is organized according to the following outline:

A. Introduction and Overview
1. Introduction
2. Overview
B. Statutory and Regulatory Background
1. Pre-Water Quality Act Amendments of 1987 (Pub. L. 100–4)
2. The Water Quality Act Amendments of 1987 (Pub. L. 100–4)
a. Description of the New Requirements
b. EPA's Initial Implementing Actions for sections 303(c) and 304(l)
3. EPA's Program Guidance for section 303(c)(2)(B)
C. State Actions Pursuant to section 303(c)(2)(B)
D. Determining State Compliance with section 303(c)(2)(B)
1. EPA's Review of State Water Quality Standards for Toxics
2. Determining Current Compliance Status
E. Rationale and Approach For Developing the Final Rule

L. Paperwork Reduction Act

A. Introduction and Overview

1. Introduction

This section of the Preamble introduces the topics which are addressed subsequently and provides a brief overview of EPA's basis and rationale for promulgating Federal criteria for priority toxic pollutants. Section B of this Preamble presents a description of the evolution of the Federal Government's efforts to control toxic pollutants beginning with a discussion of the authorities in the Federal Water Pollution Control Act Amendments of 1972. Also described in some detail is the development of the water quality standards review and revision process which provides for establishing both narrative goals and enforceable numeric requirements for controlling toxic pollutants. This discussion includes the changes enacted in the 1987 Clean Water Act Amendments which are the basis for this rule. Section C summarizes State efforts since 1987 to comply with the requirements of section 303(c)(2)(B). Section D describes EPA's procedure for determining whether a State has fully complied with section 303(c)(2)(B). Section E sets out the rationale and approach for developing the final rule, including a discussion of EPA's legal basis. Section F describes the development of the criteria included in this rule. Section G summarizes the provisions of the final rule. (Section H is reserved.) Section I contains the response to major public comments received on the proposal. Sections J, K, and L address the requirements of Executive Order 12291, the Regulatory Flexibility Act, and the Paperwork Reduction Act, respectively. Section M provides a list of subjects covered in this rule.

A public hearing on the proposed rule was held on December 19, 1991, in Washington, DC. A total of 26 non-EPA people registered at the hearing. The public comment period closed on December 19, 1991. EPA received a total of 153 written comments on the proposed rule.

2. Overview

This rule, which establishes Federal criteria for certain priority toxic pollutants in a number of States, is important for several environmental, programmatic and legal reasons.

First, control of toxic pollutants in surface waters is an important priority to achieve the Clean Water Act's goals and objectives. The most recent National Water Quality Inventory indicates that one-third of monitored river miles, lake acres, and coastal waters have elevated levels of toxics. Forty-seven States and Territories have reported elevated levels of toxic pollutants in fish tissues. States have issued a total of 586 fishing advisories and 135 bans, attributed mostly to industrial discharges and land disposal.

The absence of State water quality standards for toxic pollutants undermines State and EPA toxic control efforts to address these problems. Without clearly established water quality goals, the effectiveness of many of EPA's water programs is jeopardized. Permitting, enforcement, coastal water quality improvement, fish tissue quality protection, certain nonpoint source controls, drinking water quality protection, and ecological protection all depend to a significant extent on complete and adequate water quality standards. Numeric criteria for toxics are essential to the process of controlling toxics because they allow States and EPA to evaluate the adequacy of existing and potential control measures to protect aquatic ecosystems and human health. Formally adopted standards are the legal basis for including water quality-based effluent limitations in NPDES permits to control toxic pollutant discharges. The critical importance of controlling toxic pollutants has been recognized by Congress and is reflected, in part, by the addition of section 303(c)(2)(B) to the Act. Congressional impatience with the pace of State toxics control programs is well documented in the legislative history of the 1987 CWA amendments. In order to protect human health, aquatic ecosystems, and successfully implement toxics controls, EPA believes that all actions which are available to the Agency must be taken to ensure that all necessary numeric criteria for priority toxic pollutants are established in a timely manner.

Second, as States and EPA continue the transition from an era of primarily technology-based controls to an era in which technology-based controls are integrated with water quality-based controls, it is important that EPA ensures timely compliance with CWA requirements. An active Federal role is essential to assist States in getting in place complete toxics criteria as part of their pollution control programs. While most States recognize the need for enforceable water quality standards for toxic pollutants, their recent adoption efforts have often been stymied by a variety of factors including limited resources, competing environmental priorities, and difficult scientific, policy and legal challenges. Most water quality criteria for toxic pollutants have been available since 1980. Section 303 of the CWA requires States to review, revise, and adopt updated water quality standards every three years as part of a continuing triennial review process. The water quality standards regulation has required State adoption of numeric criteria for toxic pollutants since 1983 (see 40 CFR 131.11). Despite the availability of scientific guidance documents and clear statutory and regulatory requirements, a preliminary assessment of the water quality standards for all States in February of 1990 showed that only six States had established fully acceptable criteria for toxic pollutants. This rate of toxics criteria adoption is contrary to the CWA requirements and is a reflection of the difficulties faced by States. In such circumstances, it is EPA's responsibility to exercise its CWA authorities to move forward the toxic control program in concert with the statutory scheme.

EPA's action will also help restore equity among the States. The CWA is designed to ensure all waters are sufficiently clean to protect public health and the environment. The CWA allows some flexibility and differences among States in their adopted and approved water quality standards, but it was not designed to reward inaction and inability to meet statutory requirements.

Although most States have made important progress toward satisfying CWA requirements, some have still failed to fully comply with section 303(c)(2)(B). The CWA authorizes EPA to promulgate standards where necessary to meet the requirements of the Act. Where States have not satisfied the CWA requirement to adopt water quality standards for toxic pollutants, which was reemphasized by Congress in 1987, it is imperative that EPA take action.

EPA's ability to oversee State standards-setting activities and to correct deficiencies in State water quality standards is critical to the effective implementation of section 303(c)(2)(B). This rule is a necessary and important component of EPA's implementation of section 303(c)(2)(B) as well as EPA's overall efforts to control toxic pollutants in surface waters.

On February 26, 1992, EPA's Deputy Administrator issued "Guidance on Risk Characterization for Risk Managers and Risk Assessors" which addresses a problem that affects public perception regarding the reliability of EPA's scientific assessments and related regulatory decisions. The guidance noted that "when risk information is presented to the * * * public, the results have been boiled down to a point estimate of risk * * * which do not fully convey the range of information considered and used in developing the assessment." The guidance lays out principles and implementation procedures to address risk assessments in future EPA presentations, reports and decision packages. The guidance specifically notes, "However, we do not expect risk assessment documents that are close to completion to be rewritten."

The proposal for this final rule was published in November, 1991, three months prior to the risk assessment guidance being issued. Since the Agency was striving to meet a mid-February statutory deadline for final publication, when the risk guidance was issued the rulemaking package was essentially complete. The specifics of the aquatic life and human health guidelines are discussed in the preamble and in the response to public comments. The actual methodology and criteria documents describe in detail the risk assessment process involved in deriving a water quality criteria and the water quality standards contained in this rule and the resulting risk characterization. The water quality criteria methodology and individual criteria documents are part of the record for this rule. Therefore, while all the specifics of the new risk characterization guidance were not followed in this preamble, the spirit of the guidance is reflected.

Moreover, EPA has initiated a review and update of these criteria methodologies. These updates will be conducted in conformance with the risk characterization guidance and include public involvement and review.

B. Statutory and Regulatory Background

1. Pre-Water Quality Act Amendments of 1987 (Pub. L. 100–4)

Section 303(c) of the 1972 Federal Water Pollution Control Act Amendments (FWPCA) (33 U.S.C. 1313(c)) estabiished the statutory basis for the current water quality standards program. It completed the transition from the previously established program of water quality standards for interstate waters to one requiring standards for all surface waters of the United States.

Although the major innovation of the 1972 FWPCA was technology-based controls, Congress maintained the concept of water quality standards both as a mechanism to establish goals for the Nation's waters and as a regulatory requirement when standardized technology controls for point source discharges and/or nonpoint source controls were inadequate. In recent years, these so-called water quality-based controls have received new emphasis by Congress and EPA in the continuing quest to enhance and maintain water quality to protect the public health and welfare.

Briefly stated, the key elements of section 303(c) are:

(a) A water quality standard is defined as the designated beneficial uses of a water segment and the water quality criteria necessary to support those uses;

(b) The minimum beneficial uses to be considered by States in establishing water quality standards are specified as public water supplies, propagation of fish and wildlife, recreation, agricultural uses, industrial uses and navigation;

(c) A requirement that State standards must protect public health or welfare, enhance the quality of water and serve the purposes of the Clean Water Act;

(d) A requirement that States must review their standards at least once each three year period using a process that includes public participation;

(e) The process for EPA review of State standards which may ultimately result in the promulgation of a superseding Federal rule in cases where a State's standards are not consistent with the applicable requirements of the CWA, or in situations where the Agency determines Federal standards are necessary to meet the requirements of the Act.

Another major innovation in the 1972 FWPCA was the establishment of the National Pollutant Discharge Elimination System (NPDES) which requires point source discharges to obtain a permit before legally discharging to the waters of the United States. In addition to the permit limits established on the basis of technology (e.g. effluent limitations guidelines), the Act requires discharges to meet instream water quality standards. (See section 301(b)(1)(C), 33 U.S.C. 1311(b)(1)(C)).

The water quality standards serve a dual function under the Clean Water Act regulatory scheme. Standards establish narrative and numeric definitions and quantification of the Act's goals and policies (see section 101, 33 U.S.C. 1251) which provide a basis for identifying impaired waters. Water quality standards also establish regulatory requirements which are translated into specific discharge requirements. In order to fulfill this critical function, adopted State criteria must contain sufficient parametric coverage to protect both human health and aquatic life.

In its initial efforts to control toxic pollutants, the FWPCA, pursuant to section 307, required EPA to designate a list of toxic pollutants and to establish toxic pollutant effluent standards based on a formal rulemaking record. Such rulemaking required formal hearings, including cross-examination of witnesses. EPA struggled with this unwieldy process and ultimately promulgated effluent standards for six toxic pollutants, pollutant families or mixtures. (See 40 CFR part 129.) Congress amended section 307 in the 1977 Clean Water Act Amendments by endorsing the Agency's alternative procedure of regulating toxic pollutants by use of effluent limitations guidelines, by amending the procedure for establishing toxic pollutant effluent standards to provide for more flexibility in the hearing process for establishing a record, and by directing the Agency to include sixty-five specific pollutants or classes of pollutants on the toxic pollutant list. EPA published the required list on January 31, 1978 (43 FR 4109). This toxic pollutant list was the basis on which EPA's efforts on criteria development for toxics was focused.

During planning efforts to develop effluent limitations guidelines and water quality criteria, the list of sixty-five toxic pollutants was judged too broad as some of the pollutants were, in fact, general families or classes of organic compounds consisting of many individual chemicals. EPA selected key chemicals of concern within the 65 families of pollutants and identified a more specific list of 129 priority toxic pollutants. Two volatile chemicals and one water unstable chemical were removed from the list (see 46 FR 2266, January 8, 1981; 46 FR 10723, February 4, 1981) so that at present there are 126 priority toxic pollutants. This list is published as appendix A to 40 CFR part 423.

Another critical section of the 1972 FWPCA was section 304(a) (33 U.S.C. 1314(a)). Section 304(a)(1) provides, in pertinent part, that EPA

> * * * shall develop and publish * * * criteria for water quality accurately reflecting the latest scientific knowledge (A) on the kind and extent of all identifiable effects on health and welfare including, but not limited to, plankton, fish, shellfish, wildlife, plant life, shorelines, beaches, esthetics, and recreation which may be expected from the presence of pollutants in any body of water, * * * and (C) on the effects of pollutants on biological community diversity, productivity, and stability, * * *

In order to avoid confusion, it must be recognized that the Clean Water Act uses the term "criteria" in two separate ways. In section 303(c), which is discussed above, the term is part of the definition of a water quality standard. That is, a water quality standard is comprised of designated uses and the criteria necessary to protect those uses. Thus, States are required to adopt regulations or statutes which contain legally achievable criteria. However, in section 304(a), the term criteria is used in a scientific sense and EPA develops recommendations which States consider in adopting regulatory criteria.

In response to this legislative mandate and an earlier similar statutory requirement, EPA and a predecessor agency have produced a series of scientific water quality criteria guidance documents. Early Federal efforts were Water Quality Criteria (1968 "Green Book") and Quality Criteria for Water (1976 "Red Book"). EPA also sponsored a contract effort with the National Academy of Science—National Academy of Engineering which resulted in Water Quality Criteria, 1972 (1973 "Blue Book"). These early efforts were premised on the use of literature reviews and the collective scientific judgment of Agency and advisory panels. However, when faced with the list of 65 toxic pollutants and the need to develop criteria for human health as well as aquatic life, the Agency determined that new procedures were necessary. Continued reliance solely on existing scientific literature was deemed inadequate, since for many pollutants essential information was not available. EPA scientists developed formal methodologies for establishing scientifically defensible criteria. These were subjected to review by the Agency's Science Advisory Board of outside experts and the public. This effort culminated on November 28, 1980, when the Agency published criteria development guidelines for aquatic life and for human health, along with criteria for 64 toxic pollutants. (See 45 FR 79318.) Since that initial publication, the aquatic life methodology was slightly amended (50 FR 30784, July 29, 1985) and additional criteria was proposed for public comment and finalized as Agency criteria guidance. EPA summarized the available criteria information in Quality Criteria for Water 1986 (1986 "Gold Book") which is updated from time-to-time. However, the individual criteria documents, as updated, are the official guidance documents.

EPA's criteria documents provide a comprehensive toxicological evaluation of each chemical. For toxic pollutants, the documents tabulate the relevant acute and chronic toxicity information for aquatic life and derive the criteria maximum concentrations (acute criteria) and criteria continuous concentrations (chronic criteria) which the Agency recommends to protect aquatic life resources. For human health criteria, the document provides the appropriate reference doses, and if appropriate, the carcinogenic slope factors, and derives recommend criteria. The details of this process are described more fully in a later part of this Preamble.

Programmatically, EPA's initial efforts were aimed at converting a program focused on interstate waters into one addressing all interstate and intrastate surface waters of the United States. Guidance was aimed at the inclusion of traditional water quality parameters to protect aquatic life (e.g., pH, temperature, dissolved oxygen and a narrative "free from toxicity" provision), recreation (e.g., bacteriological criteria) and general aesthetics (e.g., narrative "free from nuisance" provisions). EPA also required State adoption of an antidegradation policy to maintain existing high quality or ecologically unique waters as well as maintain improvements in water quality as they occur.

The initial water quality standards regulation was actually a part of EPA's water quality management regulations implementing section 303(e) (33 U.S.C. 1313(e)) of the Act. It was not comprehensive and did not address toxics or any other criteria specifically. Rather, it simply required States to adopt appropriate water quality criteria necessary to support designated uses. (See 40 CFR 130.17 as promulgated in 40 FR 55334, November 28, 1975).

After several years of effort and faced with increasing public and Congressional concerns about toxic pollutants, EPA realized that proceeding under section 307 of the Act would not comprehensively address in a timely manner the control of toxics through either toxic pollutant effluent standards or effluent limitations guidelines because these controls are only applicable to specific types of discharges. EPA sought a broader, more generally applicable mechanism and decided to vigorously pursue the alternative approach of EPA issuance of scientific water quality criteria documents which States could use to adopt enforceable water quality standards. These in turn could be used as the basis for establishing State and EPA permit discharge limits pursuant to section 301(b)(1)(C) which requires NPDES permits to contain

> * * * any more stringent limitation, including those necessary to meet water quality standards * * *, or required to implement any applicable water quality standard established pursuant to this Act.

Thus, the adoption by States of appropriate toxics criteria applicable to their surface waters, such as those recommended by EPA in its criteria documents, would be translated by regulatory agencies into point source permit limits. Through the use of water quality standards, all discharges of toxics are subject to permit limits and not just those discharged by particular industrial categories. In order to facilitate this process, the Agency amended the water quality standards regulation to explicitly address toxic criteria requirements in State standards. The culmination of this effort was the promulgation of the present water quality standards regulation on November 8, 1983 (40 CFR part 131, 48 FR 51400).

The current water quality standards regulation (40 CFR part 131) is much more comprehensive than its predecessor. The regulation addresses in detail both the beneficial use component and the criteria component of a water quality standard. Section 131.11 of the regulation requires States to review available information and,

> * * * to identify specific water bodies where toxic pollutants may be adversely affecting water quality or the attainment of the designated water use or where the levels of toxic pollutants are at a level to warrant concern and must adopt criteria for such toxic pollutants applicable to the water body sufficient to protect the designated use.

The regulation provided that either or both numeric and narrative criteria may be appropriately used in water quality standards.

EPA's water quality standards emphasis since the early 1980's reflected the increasing importance placed on controlling toxic pollutants. States were strongly encouraged to adopt criteria in their standards for the priority toxic pollutants, especially where EPA had published criteria guidance under section 304(a) of the Act.

Under the statutory scheme, during the 3-year triennial review period following EPA's 1980 publication of water quality criteria for the protection of human health and aquatic life, States should have reviewed those criteria and adopted standards for many priority toxic pollutants. In fact, State response to EPA's criteria publication and toxics initiative was disappointing. A few States adopted large numbers of numeric toxics criteria, although primarily for the protection of aquatic life. Most other States adopted few or no water quality criteria for priority toxic pollutants. Some relied on a narrative "free from toxicity" criterion, and so-called "action levels" for toxic pollutants or occasionally calculated site-specific criteria. Few States addressed the protection of human health by adopting numeric human health criteria.

In support of the November, 1983, water quality standards rulemaking, EPA issued program guidance entitled, Water Quality Standards Handbook (December 1983) simultaneously with the publication of the final rule. The foreword to that guidance noted EPA's two-fold water quality based approach to controlling toxics: chemical specific numeric criteria and biological testing in whole effluent or ambient waters to comply with narrative "no toxics in toxic amounts" standards. More detailed programmatic guidance on the application of biological testing was provided in the Technical Support Document for Water Quality Based Toxics Control (TSD) (EPA 440/4–85–032, September 1985). This document provided the needed information to convert chemical specific and biologically based criteria into water quality standards for ambient receiving waters and permit limits for discharges to those waters. The TSD focused on the use of bioassay testing of effluent (so-called whole effluent testing or WET methods) to develop effluent limitations within discharge permits. Such effluent limits were designed to implement the "free from toxicity" narrative standards in State water quality standards. The TSD also focused on water quality standards. Procedures and policy were presented for appropriate design flows for EPA's section 304(a) acute and chronic criteria. In 1991, EPA revised and expanded the TSD. (Technical Support Document for Water Quality-based Toxics Control, EPA 505/2–90–001, March 1991.) A Notice of Availability was published in the **Federal Register** on April 4, 1991 (56 FR 13827). All references in this Preamble are to the revised TSD.

The Water Quality Standards Handbook and the TSD are examples of EPA's efforts and assistance that were intended to help, encourage and support the States in adopting appropriate water quality standards for the protection of their waters against the deleterious effects of toxic pollutants. In some States, more and more numeric criteria for toxics were being adopted as well as more aggressive use of the "free from toxics" narratives in setting protective NPDES permit limits. However, by the time of Congressional consideration and action on the CWA reauthorization, most States had adopted few, if any, water quality standards for priority toxic pollutants.

State practices of developing case-by-case effluent limits using procedures that were not standardized in State regulations made it difficult to ascertain whether such procedures were consistently applied. The use of approaches to control toxicity that did not rely on the statewide adoption of numeric criteria for the priority toxic

pollutants generated frustration in Congress. Senator Robert T. Stafford, first chairman and then ranking minority member of the authorizing committee, noted during the Senate debate:

> An important problem in this regard is that few States have numeric ambient criteria for toxic pollutants. The lack of ambient criteria [for toxic pollutants] make it impossible to calculate additional discharge limitations for toxics * * *. It is vitally important that the water quality standards program operate in such a way that it supports the objectives of the Clean Water Act to restore and maintain the integrity of the Nation's Waters. (bracketed material added). A Legislative History of the Water Quality Act of 1987 (Pub. L. 100–4), Senate Print 100–144, USGPO, November 1988 at page 1324.

Other comments in the legislative history similarly note the Congressional perception that the States were failing to aggressively address toxics and that EPA was not using its oversight role to push the States to move more quickly and comprehensively. Thus Congress developed the water quality standards amendments to the Clean Water Act for reasons similar to those strongly stated during the Senate debate by a chief sponsor, Senator John H. Chafee,

> A cornerstone of the bill's new toxic pollution control requirements is the so called beyond-BAT program * * *. Adopting the beyond BAT provisions will assure that EPA continues to move forward rapidly on the program * * *. If we are going to repair the damage to those water bodies that have become highly degraded as a result of toxic substances, we are going to have to move forward expeditiously on this beyond-BAT program. The Nation cannot tolerate endless delays and negotiations between EPA and States on this program. Both entities must move aggressively in taking the necessary steps to make this program work within the time frame established by this Bill * * *. Ibid, at page 1309.

This Congressional impatience with the pace of State and EPA progress and an appreciation that the lack of State standards for toxics undermined the effectiveness of the entire CWA-based scheme, resulted in the 1987 adoption of stringent new water quality standard provisions in the Water Quality Act amendments.

2. The Water Quality Act Amendments of 1987 (Pub. L. 100–4)

a. Description of the New Requirements

The 1987 Amendments to the Clean Water Act added Section 303(c)(2)(B) which provides:

> Whenever a State reviews water quality standards pursuant to paragraph (1) of this subsection, or revises or adopts new standards pursuant to this paragraph, such State shall adopt criteria for all toxic pollutants listed pursuant to section 307(a)(1) of this Act for which criteria have been published under section 304(a), the discharge or presence of which in the affected waters could reasonably be expected to interfere with those designated uses adopted by the State, as necessary to support such designated uses. Such criteria shall be specific numerical criteria for such toxic pollutants. Where such numerical criteria are not available, whenever a State reviews water quality standards pursuant to paragraph (1), or revises or adopts new standards pursuant to this paragraph, such State shall adopt criteria based on biological monitoring or assessment methods consistent with information published pursuant to section 304(a)(8). Nothing in this section shall be construed to limit or delay the use of effluent limitations or other permit conditions based on or involving biological monitoring or assessment methods or previously adopted numerical criteria.

b. EPA's Initial Implementing Actions for Sections 303(c) and 304(l)

The addition of this new requirement to the existing water quality standards review and revision process of section 303(c) did not change the existing procedural or timing provisions. For example, section 303(c)(1) still requires that States review their water quality standards at least once each 3 year period and transmit the results to EPA for review. EPA's oversight and promulgation authorities and statutory schedules in section 303(c)(4) were likewise unchanged. Rather, the provision required the States to place heavy emphasis on adopting numeric chemical-specific criteria for toxic pollutants (i.e., rather than just narrative approaches) during the next triennial review cycle. As discussed in the previous section, Congress was frustrated that States were not using the numerous section 304(a) criteria that EPA had developed, and was continuing to develop, to assist States in controlling the discharge of priority toxic pollutants. Therefore, for the first time in the history of the Clean Water Act, Congress took the unusual action of explicitly mandating that States adopt numeric criteria for specific toxic pollutants.

In response to this new Congressional mandate, EPA redoubled its efforts to promote and assist State adoption of water quality standards for priority toxic pollutants. EPA's efforts included the development and issuance of guidance to the States on acceptable implementation procedures for several new sections of the Act, including sections 303(c)(2)(B) and 304(l).

The 1987 CWA Amendments added to, or amended, other CWA Sections related to toxics control. Section 304(l) (33 U.S.C. 1314(l)) was an important corollary amendment because it required States to take actions to identify waters adversely affected by toxic pollutants, particularly those waters entirely or substantially impaired by point sources. Section 304(l) entitled "Individual Control Strategies for Toxic Pollutants," requires in part, that States identify and list waterbodies where the designated uses specified in the applicable water quality standards cannot reasonably be expected to be achieved because of point source discharge of toxic pollutants. For each segment so identified, the State is required to develop individual control strategies to reduce the discharge of toxics from point sources so that in conjunction with existing controls on point and nonpoint sources, water quality standards will be attained. To assist the States in identifying waters under section 304(l), EPA's guidance listed a number of potential sources of available data for States to review. States generally assembled data for a broad spectrum of pollutants, including the priority toxic pollutants, which could be useful in complying with sections 304(l) and 303(c)(2)(B). In fact, between February 1988 and October 1988, EPA assembled pollutant candidate lists for section 304(l) which were then transmitted to each jurisdiction. Thus, each State had a preliminary list of pollutants that had been identified as present in, or discharged to, surface waters. Such lists were limited by the quantity and distribution of available effluent and ambient monitoring data for priority toxic pollutants. This listing exercise further emphasized the need for water quality standards for toxic pollutants. Lack of standards increased the difficulty of identifying impaired waters. On the positive side, the data gathered in support of the 304(l) activity proved helpful in identifying those pollutants most obviously in need of water quality standards.

EPA, in devising guidance for section 303(c)(2)(B), attempted to provide States the maximum flexibility that complied with the express statutory language but also with the overriding congressional objective: Prompt adoption and implementation of numeric toxics criteria. EPA believed that flexibility was important so that each State could comply with section 303(c)(2)(B) and to the extent possible, accommodate its existing water quality standards regulatory approach. The options EPA identified are described in the next Section of this Preamble. EPA's program guidance was issued in final form on December 12, 1988 but was not

substantially different from earlier drafts available for review by the States. The availability of the guidance was published in a Federal Register Notice on January 5, 1989 (54 FR 346).

3. EPA's Program Guidance for Section 303(c)(2)(B)

EPA's section 303(c)(2)(B) program guidance identified three options that could be used by a State to meet the requirement that the State adopt toxic pollutant criteria "* * * the discharge or presence of which in the affected waters could reasonably be expected to interfere with those designated uses adopted by the State, as necessary to support such designated uses."

Option 1. Adopt statewide numeric criteria in State Water Quality Standards for all section 307(a) toxic pollutants for which EPA has developed criteria guidance, regardless of whether the pollutants are known to be present.

This option is the most comprehensive approach to satisfy the statutory requirements because it would include all of the priority toxic pollutants for which EPA has prepared section 304(a) criteria guidance for either or both aquatic life protection and human health protection. In addition to a simple adoption of EPA's section 304(a) guidance as standards, a State must select a risk level for those toxic pollutants which are carcinogens (i.e., that cause, or may cause cancer in humans).

Many States found this Option attractive because it ensured comprehensive coverage of the priority toxic pollutants with scientifically defensible criteria without the need to conduct a resource-intensive evaluation of the particular segments and pollutants requiring criteria. This option would also not be more costly to dischargers than other options because permit limits would only be based on the regulation of the particular toxic pollutants in their discharges and not on the total listing in the water quality standards. Thus, actual permit limits should be the same under any of the options.

Option 2. Adopt chemical-specific numeric criteria for priority toxic pollutants that are the subject of EPA section 304(a) criteria guidance, where the State determines based on available information that the pollutants are present or discharged and can reasonably be expected to interfere with designated uses.

This option results in the adoption of numeric water quality standards for some subset of those pollutants for which EPA has issued section 304(a) criteria guidance based on a review of current information. To satisfy this Option, the guidance recommended that States use the data gathered during the section 304(l) water quality assessments as a starting point to identify those water segments that need water quality standards for priority toxic pollutants. That data would be supplemented by a State and public review of other data sources to ensure sufficient breadth of coverage to meet the statutory objective. Among the data available to be reviewed were: (1) Ambient water monitoring information, including those for the water column, sediment, and aquatic life (e.g., fish tissue data); (2) NPDES permit applications and permittee self-monitoring reports; (3) effluent guideline development documents, many of which contain priority toxic pollutant scans; (4) pesticide and herbicide application information and other records of pesticide or herbicide inventories; (5) public water supply source monitoring data noting pollutants with maximum contaminant levels (MCLs); and (6) any other relevant information on toxic pollutants collected by Federal, State, industry, agencies, academic groups, or scientific organizations. EPA also recommended that States selecting this option adopt a translator provision similar to that described in Option 3 but applicable to all chemicals causing toxicity, and not just priority toxic pollutants.

This Option 2 review resulted in a State proposing new or revised water quality standards and providing an opportunity for public review and comment on the pollutants, criteria, and water bodies included. Throughout this process, EPA's Regional Offices were available to assist States by providing additional guidance and technical assistance on applying EPA's recommended criteria to particular situations in the States.

Option 3. Adopt a procedure to be applied to a narrative water quality standard provision prohibiting toxicity in receiving waters. Such procedures would be used by the State in calculating derived numeric criteria which must be used for all purposes under section 303(c) of the CWA. At a minimum, such criteria need to be developed for section 307(a) toxic pollutants, as necessary to support designated uses, where these pollutants are discharged or present in the affected waters and could reasonably be expected to interfere with designated uses.

The combination of a narrative standard (e.g., "free from toxics in toxic amounts") and an approved translator mechanism as part of a State's water quality standards satisfies the requirements of section 303(c)(2)(B). As noted above, such a procedure is also a valuable supplement to either option 1 or 2. There are several regulatory and scientific requirements EPA's guidance specifies are essential to ensure acceptable scientific quality and full involvement of the public and EPA in this approach. Briefly stated these are:

- The procedure (i.e., narrative criterion and translator) must be used to calculate numeric water quality criteria;
- The State must demonstrate to EPA that the procedure results in numeric criteria that are sufficiently protective to meet the goals of the Act;
- The State must provide for full opportunity for public participation during the adoption of the procedure;
- The procedure must be formally adopted as a State rule and be mandatory in application; and
- The procedure must be submitted for review and approval by EPA as part of the State's water quality standards regulation.

The scientific elements of a translator are similar to EPA's 304(a) criteria methodologies when applied on a site-specific basis. For example, aquatic criteria are developed using a sufficient number and diversity of aquatic species representative of the biological assemblage of a particular water body. Human health criteria focus on determining appropriate exposure conditions (e.g. amount of aquatic life consumed per person per day) rather than underlying pollutant toxicity. The results of the procedures are scientifically defensible criteria that are protective for the site's particular conditions. EPA's review of translator procedures includes an evaluation of the scientific merit of the procedure using the section 304(a) methodology as a guide.

Ideally, States adopting option 3 translator procedures should prepare a preliminary list of criteria and specify the waters the criteria apply to at the time of adoption. Although under option 3 the State retains flexibility to derive new criteria without revising the adopted standards, establishing this preliminary list of derived criteria at the time of the triennial review will assist the public in determining the scope of the adopted standards, and help ensure that the State ultimately complies with the requirement to establish criteria for all pollutants that can "reasonably be expected" to interfere with uses. EPA believes that States selecting solely option 3 should prepare an analysis (similar to that required of option 2 States) at the time of the triennial review identifying pollutants needing criteria.

EPA's December 1988 guidance also addressed the timing issue for State compliance with section 303(c)(2)(B). The statutory directive was clear: All State standards triennial reviews initiated after passage of the Act must include a consideration of numeric toxic criteria.

The structure of section 303(c) is to require States to review their water quality standards at least once each three year period. Section 303(c)(2)(B) instructs States to include reviews for toxics criteria whenever they initiate a triennial review. EPA initially looked at February 4, 1990, the 3-year anniversary of the 1987 CWA amendments, as a convenient point to index State compliance. The April 1990 **Federal Register** Notice used this index point for the preliminary assessment. However, some States were very nearly completing their State administrative processes for ongoing reviews when the 1987 amendments were enacted and could not legally amend those proceedings to address additional toxics criteria. Therefore, in the interest of fairness, and to provide such States a full 3-year review period, EPA's FY 1990 Agency Operating Guidance provided that "By the end of the FY 88–90 triennium, States should have completed adoption of numeric criteria to meet the section 303(c)(2)(B) requirements." (p.48.) The FY 88–90 triennium ended on September 30, 1990.

Clean Water Act section 303(c) does not provide penalties for States that do not complete timely water quality standards reviews. In no previous case has the EPA Administrator found that State failure to complete a review within three years jeopardized the public health or welfare to such an extent that promulgation of Federal standards pursuant to section 303(c)(4)(B) was justified. The pre-1987 CWA never mandated State adoption of priority toxic pollutants or other specific criteria. EPA generally relied on its water quality standards regulation (40 CFR 131.11) and its criteria and program guidance to the States on appropriate parametric coverage in State water quality standards to encourage State adoption of water quality standards. However, since the 1987 statutory amendments, the programmatic environment has changed. Beyond the increased Congressional and public concern, about the relative importance of toxic pollutant controls, there is increased evidence of toxic pollution problems in our Nation's waters. In response, the Agency in this rulemaking is proceeding pursuant to section 303(c)(4)(B) and 40 CFR 131.22(b) to rectify a longstanding program deficiency.

The current regulation at 40 CFR Part 131 in conjunction with the statutory language provides a clear and unambiguous basis and process for today's Federal promulgation.

C. State Actions Pursuant to Section 303(c)(2)(B)

In recent years, there has been substantial progress by many States in the adoption, and EPA approval, of water quality standards for toxic pollutants. Virtually all States have at least proposed new toxics criteria for priority toxic pollutants since section 303(c)(2)(B) was added to the CWA in February of 1987. Unfortunately, not all such State proposals address, in a comprehensive manner, the requirements of section 303(c)(2)(B). For example, some States have proposed to adopt criteria to protect aquatic life, but not human health; other States have proposed human health criteria which do not address major human exposure pathways. In addition, in some cases final adoption of proposed State toxics criteria which would be approvable by EPA has been substantially delayed due to controversial and difficult issues associated with the toxics criteria adoption process. For purposes of today's rulemaking, it is EPA's judgment that 43 States completed actions which fully satisfy the requirements of section 303(c)(2)(B).

In sum, States have devoted substantial resources, and have made substantial progress, in adopting new or revised numeric criteria for priority pollutants. In so doing, they have addressed a number of significant and difficult issues. These efforts have generated extensive examination by dischargers, States, environmental groups and the public on all aspects of the CWA water quality criteria and related issues. It amounts to a multi-year consideration of the issues that are central to this proposed and final rulemaking.

D. Determining State Compliance With Section 303(c)(2)(B)

1. EPA's Review of State Water Quality Standards for Toxics

The EPA Administrator has delegated the responsibility and authority for review and approval or disapproval of all State water quality standards actions to the 10 EPA Regional Administrators (see 40 CFR 131.21). State section 303(c)(2)(B) actions are thus submitted to the appropriate EPA Regional Administrator for review and approval. This de-centralized EPA system for State water quality standards review and approval is guided by EPA Headquarters Office of Water, which issues national policies and guidance to the States and Regions such as the annual Office of Water Operating Guidance and various technical manuals.

For purposes of evaluating State compliance with CWA section 303(c)(2)(B), EPA relied on the statutory language, the existing water quality standards regulation, and section 303(c)(2)(B) national guidance to provide the basis for EPA review. In some cases, individual Regions also used Regional policies and procedures in reviewing State section 303(c)(2)(B) actions. The flexibility provided by the national guidance, coupled with subtle differences in Regional policies and procedures, contributed to some differences in the approaches taken by States to satisfy section 303(c)(2)(B) requirements.

As discussed previously, EPA's final guidance on compliance with section 303(c)(2)(B) was developed to provide States with the necessary flexibility to allow State standards revisions that would complement the State's existing water quality standards program and still comply with section 303(c)(2)(B). As guidance, it described the range of acceptable approaches and EPA's recommendations. Some innovative State approaches were expected as well as differences in terms of criteria coverage, stringency and application procedures.

Although the guidance provided for State flexibility, it was also consistent with existing water quality standards regulation requirements of 40 CFR 131.11 that explicitly require State criteria to be sufficient to protect designated uses. Such water quality criteria also must be based on sound scientific rationale and support the most sensitive use designated for a water body.

The most complicated EPA compliance determinations involve States that selected EPA Options 2 or 3. Since most States use EPA's section 304(a) criteria guidance, where States select Option 1, EPA normally is able to focus Agency efforts on verifying that all available EPA criteria are included, appropriate cancer risk levels are selected, and that sufficient application procedures are in place (e.g. laboratory analytical methods, mixing zones, flow condition, etc.).

However, for States using EPA's Option 2 or 3, substantially more EPA evaluation and judgment was required because the Agency must evaluate which priority pollutants and, in some

cases, segments or designated uses, require numeric criteria. Under these options, the State must adopt or derive numeric criteria for priority toxic pollutants for which EPA has section 304(a) criteria, "* * * the discharge or presence of which in the affected waters could reasonably be expected to interfere with those designated uses adopted by the State * * *." The necessary justification and the ultimate coverage and acceptability of a State's actions vary State-to-State because of differences in the adequacy of available monitoring information, local waterbody use designations, the effluent and nonpoint source controls in place, and different approaches to the scientific basis for criteria.

In submitting criteria for the protection of human health, States were not limited to a 1 in 1 million risk level (10^{-6}). EPA generally regulates pollutants treated as carcinogens in the range of 10^{-6} to 10^{-4} to protect average exposed individuals and more highly exposed populations. If a State selects a criterion that represents an upper bound risk level less protective than 1 in 100,000 (i.e., 10^{-5}), however, the State needed to have substantial support in the record for this level. This support focused on two distinct issues. First, the record must include documentation that the decision maker considered the public interest of the State in selecting the risk level, including documentation of public participation in the decision making process as required by the water quality standards regulation at 40 CFR 131.20(b). Second, the record must include an analysis showing that the risk level selected, when combined with other risk assessment variables, is a balanced and reasonable estimate of actual risk posed, based on the best and most representative information available. The importance of the estimated actual risk increases as the degree of conservatism in the selected risk level diminishes. EPA carefully evaluated all assumptions used by a State if the State chose to alter any one of the standard EPA assumption values.

Where States selected Option 3, EPA reviews must also include an evaluation of the scientific defensibility of the translator procedure. EPA must also verify that a requirement to apply the translator whenever toxics may reasonably be expected to interfere with designated uses (e.g., where such toxics exist or are discharged) is included in the State's water quality standards. Satisfactory application procedures must also be developed by States selecting Option 3.

In general, each EPA Region made compliance decisions based on whatever information was available at the time of the triennial review. For some States, information on the presence and discharge of priority toxic pollutants is extremely limited. Nevertheless, during the period of February 1988 to October 1990, to supplement State efforts, EPA assembled the available information and provided each State with various pollutant candidate lists in support of the section 304(l) and section 303(c)(2)(B) activities. These were based in part on computerized searches of existing Agency data bases.

Beginning in 1988, EPA provided States with candidate lists of priority toxic pollutants and water bodies in support of CWA Section 304(l) implementation. These lists were developed because States were required to evaluate existing and readily available water-related data in order to comply with Section 304(l). 40 CFR 130.10(d). A similar "strawman" analysis of priority pollutants potentially requiring adoption of numeric criteria under Section 303(c)(2)(B) was furnished to most States in September or October of 1990 for their use in on-going and subsequent triennial reviews. The primary differences between the "strawman" analysis and the section 304(l) candidate lists were that the "strawman" analysis: (1) Organized the results by chemical rather than by water body, (2) included data for certain STORET monitoring stations that were not used in constructing the candidate lists, (3) included data from the Toxics Release Inventory database, and (4) did not include a number of data sources used in preparing the candidate lists (e.g. those, such as fish kill information, that did not provide chemical specific information).

In its 1988 section 303(c)(2)(B) guidance, EPA urged States, at a minimum, to use the information gathered in support of section 304(l) requirements as a starting point for identifying which priority toxic pollutants require adoption of numeric criteria. EPA also encouraged States to consider the presence or potential construction of facilities that manufacture or use priority toxic pollutants as a strong indication of the need for toxics criteria. Similarly, EPA indicated to States that the presence of priority pollutants in ambient waters (including those in sediments or in aquatic life tissue) or in discharges from point or nonpoint sources also be considered as an indication that toxics criteria should be adopted. A limited amount of data on the effluent characteristics of NPDES discharges was readily available to States. States were also expected to take into account newer information as it became available, such as information in annual reports from the Toxic Chemical Release Inventory requirements of the Emergency Planning and Community Right-To-Know Act of 1986. (Title III, Pub. L. 99–499.)

In summary, EPA and the States had access to a variety of information gathered in support of section 304(l), section 303(c)(2)(B), and section 305(b) activities. For some States, as noted above, such information for priority toxic pollutants is extremely limited. In the final analysis, the Regional Administrator made a judgment on a duly submitted State standards triennial review based on the State's record and the Region's independent knowledge of the facts and circumstances surrounding the State's actions. These actions, taken in consultation with the Office of Water, determined which State actions were sufficiently consistent with the coverage contemplated in the statute to justify approval. These approval actions include allowable variations among State water quality standards. EPA approval indicates that, based on the record, the State water quality standards met the requirements of the Act.

2. Determining Current Compliance Status

The following summarizes the process generally followed by the Agency in assessing compliance with section 303(c)(2)(B).

A State was determined to be in full compliance with the requirements of section 303(c)(2)(B) if,

a. The State had submitted a water quality standards package for EPA review since enactment of the 1987 Clean Water Act amendments or was determined to be already in compliance, and,

b. The State adopted water quality standards are effective under State law and consistent with the CWA and EPA's implementing regulations (EPA's December 1988 guidance described three Options, any one, or a combination of which EPA suggested States could adopt for compliance with the CWA and EPA regulations), and

c. EPA has issued a formal approval determination to the State.

States meeting these criteria are not included in this final rulemaking.

States which adopted standards following Option 1 generally have been found to satisfy section 303(c)(2)(B). An exception exists for selected States which attempted to follow Option 1 by adopting all EPA section 304(a) criteria by reference. EPA has withheld

approval for one State which has adopted such a reference into their standards because the adopted standards did not specify application factors necessary to implement the criteria (e.g., a risk level for carcinogens). Other States have achieved full compliance following options 1, 2, 3, or some combination of these options.

As of the date of signature of today's rule, the Agency has determined that 43 States and Territories are in full compliance with the requirements of section 303(c)(2)(B). Compliance status for all States and Territories is set forth in Table 1.

TABLE 1.—ASSESSMENT OF STATE COMPLIANCE WITH CWA SECTION 303(C)(2)(B)

State	Is State in compliance with section 303(c)(2)(B)?
Alabama	Yes.
Alaska	No.
Arizona	Yes.
Arkansas	No.
California	No.
Colorado	Yes.
Connecticut	Yes.
Delaware	Yes.
Florida	No.
Georgia	Yes.
Hawaii	Yes.
Idaho	No.
Illinois	Yes.
Indiana	Yes.
Iowa	Yes.
Kansas	No.
Kentucky	Yes (1).
Louisiana	Yes.
Maine	Yes.
Maryland	Yes.
Massachusetts	Yes.
Michigan	No.
Minnesota	Yes.
Mississippi	Yes.
Missouri	Yes.
Montana	Yes.
Nebraska	Yes.
Nevada	No.
New Hampshire	Yes.
New Jersey	No.
New Mexico	Yes (2).
New York	Yes.
North Carolina	Yes.
North Dakota	Yes.
Ohio	Yes.
Oklahoma	Yes.
Oregon	Yes.
Pennsylvania	Yes.
Rhode Island	No.
South Carolina	Yes.
South Dakota	Yes.
Tennessee	Yes.
Texas	Yes.
Utah	Yes.
Vermont	No.
Virginia	Yes.
Washington	No.
West Virginia	Yes.
Wisconsin	Yes.
Wyoming	Yes.
American Samoa	Yes.
Commonwealth of the Northern Mariana Islands.	Yes.
District of Columbia	No.
Guam	Yes.
Puerto Rico	No.
Tr. Territories	Yes.
Virgin Islands	Yes.

Notes to Table 1

(1) At the initiation of this rulemaking, Kentucky was determined to be in compliance with the Act. On January 27, 1992, the Commonwealth of Kentucky deleted the water quality criteria for dioxin from the Kentucky water quality standards. Although EPA has not formally acted to disapprove Kentucky's action to delete the criteria, information is available which documents the need for dioxin criteria for the Commonwealth of Kentucky. Any potential EPA promulgation arising from a future EPA action to disapprove the deletion of the dioxin criteria for Kentucky will be through a rulemaking independent of today's rule.

(2) At the initiation of this rulemaking, New Mexico was determined to be in compliance with the Act. On October 8, 1991, New Mexico adopted revisions to its standards which affected compliance with acute toxicity criteria. On January 13, 1992, EPA disapproved the State's action, thus initiating the possibility of Federal promulgation should the State fail to adopt acceptable standards within 90 days from the EPA notice. Any potential EPA promulgation arising from this disapproval will be through a rulemaking independent of today's rule. EPA policy has been and continues to be that we prefer States and Territories to adopt their own standards consistent with the requirements of the Clean Water Act.

(3) EPA has become aware that several of the State water quality standards approved as complying with section 303(c)(2)(B) have been challenged in State courts for various reasons. Additional such challenges may occur in the future. In cases where such State rules are remanded or otherwise set aside, or intentionally withdrawn by the State for any reason, and the State does not pursue in good faith correcting such defects in a timely manner, it is EPA's intention to initiate appropriate rulemaking to put in place appropriate criteria for priority toxic pollutants to bring State water quality standards into compliance with the Clean Water Act.

E. Rationale and Approach for Developing the Final Rule

The addition of section 303(c)(2)(B) to the Clean Water Act was an unequivocal signal to the States that Congress wanted toxics criteria in the State's water quality standards. The legislative history notes that the "beyond BAT" program (i.e., controls necessary to comply with water quality standards that are more stringent than technology-based controls) was the cornerstone to the Act's toxic pollution control requirements.

The major innovation of the 1972 Clean Water Act Amendments was the concept of effluent limitation guidelines which were to be incorporated into NPDES permits. In many cases, this strategy has succeeded in halting the decline in the quality of the Nation's waters and, often, has provided improvements. However, the effluent limitation guidelines for industrial discharges and the similar technology-based secondary treatment requirements for municipal discharges are not capable, by themselves, of ensuring that the fishable-swimmable goals of the Clean Water Act will be met for all waters.

The basic mechanism to accomplish this in the Act is water quality standards. States are required to periodically review and revise these standards to achieve the goals of the Act. In the 1987 CWA amendments, Congress focused on addressing toxics in several sections of the Act, but special attention was placed on the section 303 water quality standards program requirements. Congress intended that the adoption of numeric criteria for toxics would result in direct improvements in water quality by forcing, where necessary, effluent limits more stringent than those resulting from technology-based effluent limitations guidelines.

As the legislative history demonstrates, Congress was dissatisfied with the piecemeal, slow progress being made by States in setting standards for toxics. Congress reacted by legislating new requirements and deadlines directing the States to establish toxics criteria for pollutants addressed in EPA section 304(a) criteria guidance, especially for those priority toxic pollutants that could reasonably be expected to interfere with designated uses. In today's action, EPA is exercising its authority under section 303(c)(4) to promulgate criteria where States have failed to act in a timely manner.

The previous section of this preamble explains EPA's approach to evaluating the adequacy of State actions in response to section 303(c)(2)(B). This section explains EPA's legal basis for issuing today's rule, and discusses EPA's general approach for developing the State-specific requirements in Section 131.36(d).

In addition to the Congressional directive and the legal basis for this action, there are a number of environmental and programmatic reasons why further delay in

establishing water quality standards for toxic pollutants is no longer acceptable.

Prompt control of toxic pollutants in surface waters is critical to the success of a number of Clean Water Act programs and objectives, including permitting, enforcement, fish tissue quality protection, coastal water quality improvement, sediment contamination control, certain nonpoint source controls, pollution prevention planning, and ecological protection. The decade long delay in State adoption of water quality standards for toxic pollutants has had a ripple effect throughout EPA's water programs. Without clearly established water quality goals, the effectiveness of many water programs is jeopardized. For too long, the absence of water quality standards has had a chilling effect on toxic control progress in many State and Federal programs.

Failure to take prompt action at this juncture would also undermine the continued viability of the current statutory scheme to establish standards. Excessive delay subverts the entire concept of the triennial review cycle which is intended to combine current scientific information with the results of previous environmental control programs to direct continuing progress in enhancing water quality.

Finally, another reason to proceed expeditiously is to bring closure to this long-term effort and allow State attention and resources to be directed towards important, new national program initiatives. Until standards for toxic pollutants are in place, neither EPA nor the States can fully focus on the emerging, ecologically-based water quality activities such as wetlands criteria, biological criteria and sediment criteria.

1. Legal Basis

Clean Water Act Section 303(c) specifies that adoption of water quality standards is primarily the responsibility of the States. However, Section 303(c) also describes a role for EPA of overseeing State actions to ensure compliance with CWA requirements. If the Agency's review of the State's standards finds flaws or omissions, then the Act authorizes EPA to initiate promulgation to correct the deficiencies (see section 303(c)(4)). The water quality standards promulgation authority has been used by EPA to issue final rules on nine separate occasions. These actions have addressed both insufficiently protective State criteria and/or designated uses and failure to adopt needed criteria. Thus, today's action is not unique, although it would affect more States and pollutants than previous actions taken by the Agency.

The Clean Water Act in section 303(c)(4) provides two bases for promulgation of Federal water quality standards. The first basis, in paragraph (A), applies when a State submits new or revised standards that EPA determines are not consistent with the applicable requirements of the Act. If, after EPA's disapproval, the State does not promptly amend its rules so as to be consistent with the Act, EPA must promulgate appropriate Federal water quality standards for that State. The second basis for EPA's action is paragraph (B), which provides that EPA shall promptly initiate promulgation "* * * in any case where the Administrator determines that a revised or new standard is necessary to meet the requirements of this Act." EPA is relying on both section 303(c)(4)(A) and section 303(c)(4)(B) as the legal basis for this rule.

Section 303(c)(4)(A) supports today's action for several States. These States have submitted criteria for some number of priority toxic pollutants and EPA has disapproved the State's adopted standards. The basis for EPA's disapproval generally has been the lack of sufficient criteria or particular criteria that were insufficiently stringent. In these cases, EPA has, by letter to the State, noted the deficiencies and specified the need for corrective action. Not having received an appropriate correction within the statutory time frame, EPA is today promulgating the needed criteria. The action in today's rule pursuant to section 303(c)(4)(A) may differ from those taken pursuant to section 303(c)(4)(B) by being limited to criteria for specific priority toxic pollutants, particular geographic areas, or particular designated uses.

Section 303(c)(4)(B) is the basis for EPA's requirements for most States. For these States, the Administrator has determined that promulgating criteria is necessary to bring the States into compliance with the requirements of the CWA. In these cases, EPA is promulgating, at a minimum, criteria for all priority toxic pollutants not addressed by approved State criteria. EPA is also promulgating criteria for priority toxic pollutants where any previously-approved State criteria do not reflect current science contained in revised criteria documents and other guidance sufficient to fully protect all designated uses or human exposure pathways, or where such previously-approved State criteria are not applicable to all appropriate designated uses. EPA's action pursuant to section 304(c)(4)(B) may include several situations.

In some cases, the State has failed to adopt and submit for approval any criteria for those priority toxic pollutants for which EPA has published criteria. This includes those States that have not submitted triennial reviews. In other cases, the State has adopted and EPA has approved criteria for either aquatic life or human health, but not both. In yet a third situation, States have submitted some criteria but not all necessary criteria. Lastly, one State has submitted criteria that do not apply to all appropriate geographic sections of the waters of the State.

The use of section 303(c)(4)(B) requires a determination by the Administrator "* * * that a revised or new standard is necessary to meet the requirements of * * *" the Act. The Administrator's determination could be supported in different ways.

One approach would be for EPA to undertake a time-consuming effort to research and marshall data to demonstrate the need for promulgation for each criteria for each stream segment or waterbody in each State. This would include evidence for each Section 307(a) priority toxic pollutant for which EPA has Section 304(a) criteria and that there is a "discharge or presence" which could reasonably "be expected to interfere with" the designated use. This approach would not only impose an enormous administrative burden, but would be contrary to the statutory scheme and the compelling Congressional directive for swift action reflected in the 1987 addition of section 303(c)(2)(B) to the Act.

An approach that is more reasonable and consistent with Congressional intent focuses on the State's failure to complete the timely review and adoption of the necessary standards required by section 303(c)(2)(B) despite information that priority toxic pollutants may interfere with designated uses of the State's waters. This approach is consistent with the fact that in enacting section 303(c)(2)(B) Congress expressed its determination of the necessity for prompt adoption and implementation of water quality standards for toxic pollutants. Therefore, a State's failure to meet this fundamental 303(c)(2)(B) requirement of adopting appropriate standards constitutes a failure "to meet the requirements of the Act." That failure to act can be a basis for the Administrator's determination under section 303(c)(4)(B) that new or revised criteria are necessary to ensure designated uses are adequately protected. Here, this determination is buttressed by the existence of evidence of the discharge or presence of priority toxic pollutants in

a State's waters for which the State has not adopted numeric water quality criteria. The Agency has compiled an impressive volume of information in the record for this rulemaking on the discharge or presence of toxic pollutants in State waters. This data supports the Administrator's determination pursuant to section 303(c)(4)(B). The record was available to the public for review during this rulemaking period and continues to be on file.

The Agency's choice to base the determination on the second approach is supported by both the explicit language of the statutory provision and by the legislative history. Congress added subsection 303(c)(2)(B) to section 303 with full knowledge of the existing requirements in section 303(c)(1) for triennial water quality standards review and submission to EPA and in section 303(c)(4)(B) for EPA promulgation. There was a clear expectation that these provisions be used in concert to overcome the programmatic delay that many legislators criticized and achieve the Congressional objective of the rapid availability of enforceable water quality standards for toxic pollutants. As quoted earlier, chief Senate sponsors, including Senators Stafford, Chaffee and others, wanted the provision to eliminate State and EPA delays and force aggressive action.

In normal circumstances, it might be argued that to exercise section 303(c)(4)(B) the Administrator might have the burden of marshalling conclusive evidence of "necessity" for Federally promulgated water quality standards. However, in adopting section 303(c)(2)(B), Congress made clear that the "normal" procedure had become inadequate. The specificity and deadline in section 303(c)(2)(B) were layered on top of a statutory scheme already designed to achieve the adoption of toxic water quality standards. Congressional action to adopt a partially redundant provision was driven by their impatience with the lack of State progress. The new provision was essentially a Congressional "determination" of the necessity for new or revised comprehensive toxic water quality standards by States. In deference to the principle of State primacy, Congress, by linking section 303(c)(2)(B) to the section 303(c)(1) three-year review period, gave States a last chance to correct this deficiency on their own. However, this Congressional indulgence does not alter the fact that section 303(c)(2)(B) changed the nature of the CWA State/EPA water quality standard relationship. The new provision and its legislative background indicate that the Administrator's determination to invoke his section 303(c)(4)(B) authority in this circumstance can be met by a generic finding of inaction on the part of a State and without the need to develop data for individual stream segments. Otherwise, the Agency could face a heavy data gathering burden of justifying the need for each Federal criterion and the process could stretch for years and never be realized. To interpret the combination of subsections (c)(2)(B) and (c)(4) as an effective bar to prompt achievement of statutory objectives would be a perverse conclusion and render section 303(c)(2)(B) essentially meaningless.

A second strong argument against requiring EPA to shoulder a heavy burden to exercise section 303(c)(4)(B) authority is that it would invert the traditional statutory scheme of EPA as national overseer and States as the entity with the greatest local expertise. The CWA provides States the flexibility to tailor water quality standards to local conditions and needs based upon their wealth of first-hand experience, knowledge and data. However, this allowance for flexibility is based on an assumption of reasoned and timely State action, not an abdication of State responsibility by failure to act. EPA does not possess the local expertise or resources necessary to successfully tailor State water quality standards. Therefore, the fact that the CWA allows States flexibility in standards development does not impose an inappropriate burden on EPA in the exercise of its oversight promulgation responsibilities. A broad Federal promulgation based on a showing of State inaction coupled with basic information on the discharge and presence of toxic pollutants meets the statutory objective of having criteria in places that are protective of public health and the environment. Without local expertise to help accurately narrow this list of pollutants and segments requiring criteria, there is no assurance of comparable protection. Nothing in the overall statutory water quality standards scheme anticipates EPA would develop this expertise in lieu of the States. EPA's lack of familiarity with local conditions argues strongly for a simple "determination" test to trigger section 303(c)(4)(B) promulgations. It also supports the concept of an across-the-board rulemaking for all priority toxic pollutants with section 304(a) criteria.

A final major reason supporting a simple determination to trigger 303(c)(4)(B) action is that comprehensive Federal promulgation imposes no undue or inappropriate burden on States or dischargers. It merely puts in place standards for toxic pollutants that are utilized in implementing Clean Water Act programs. Under this rulemaking, a State still retains the ability to adopt alternative water quality standards simply by completing its standards adoption process. Upon EPA approval of those standards, EPA will take actions to withdraw the Federally-promulgated criteria.

Federal promulgation of State water quality standards should be a course of last resort. It is symptomatic of something awry with the basic statutory scheme. Yet, when it is necessary to exercise this authority, as the compelling evidence suggests in this case, there should be no undue impediments to its use. Section 303(c)(4) is replete with deadlines and Congressional directives for the Administrator to act "promptly" in these cases. The statute indicates that the Administrator of EPA, is to "* * * promptly prepare and publish proposed regulations setting forth a revised or new water quality standard * * *" and "* * * shall promulgate any revised or new standard * * * not later than 90 days after he published such proposed standards, unless prior to such promulgation, such State has adopted a revised or new standard which the Administrator determines to be in accordance with the Act." The adoption of section 303(c)(2)(B) reinforced this emphasis on expeditious actions. EPA has demonstrated extensive deference to State primacy and a willingness to provide broad flexibility in their adoption of State standards for toxics. However, to fulfill its statutory obligation requires that EPA's deference and flexibility cannot be unlimited.

For the reasons just discussed, EPA does not believe it is necessary to support the criteria promulgated today on a pollutant specific, State-by-State, waterbody-by-waterbody basis. Nonetheless, over the course of the past several years in working with and assisting the States, the Agency has reviewed the readily-available data on the discharge and presence of priority toxic pollutants. While this data is not necessarily complete, it constitutes a substantial record to support a strong *prima facie* case for the need for numeric criteria for most priority toxic pollutants with section 304(a) criteria guidance in most States. In the absence of final State actions to adopt criteria pursuant to either Option 2 or 3 which meet the requirements for EPA approval, this evidence strongly supports EPA's decision to promulgate, pursuant to section 303(c)(4)(B), criteria

for all priority toxic pollutants not fully addressed by State criteria. The EPA data supporting this assertion is discussed more fully in the next section.

2. Approach for Developing the Final Rule

The State-specific requirements in § 131.36(d) were developed using one of two approaches. In the formal review of the adopted standards for certain States, EPA determined that specific numeric toxics criteria are lacking. For some, criteria were omitted from the State standards, even though in EPA's judgment, the pollutants can reasonably be expected to interfere with designated uses. In these cases where EPA specifically identified deficiencies in a State submission, this rule establishes Federal criteria for that limited number of priority toxic pollutants necessary to correct the deficiency.

For the balance of the States, EPA applies, to all appropriate State waters, the section 304(a) criteria for all priority toxic pollutants which are not the subject of approved State criteria. EPA also is promulgating Federal criteria for priority toxic pollutants where any previously-approved State criteria do not reflect current science contained in revised criteria documents and other guidance sufficient to fully protect all designated uses or human health exposure pathways, where such previously-approved State criteria do not protect against both acute and chronic aquatic life effects, or where such previously-approved State criteria are not applicable to all appropriate State designated uses.

Absent a State-by-State pollutant specific analysis to narrow the list, existing data sources strongly support a comprehensive rulemaking approach. Information in the rulemaking record from a number of sources indicates the discharge, potential discharge or presence of virtually all priority toxic pollutants in all States. The data available to EPA was assembled into a "strawman" analysis designed to identify priority toxic pollutants that potentially require the adoption of numeric criteria. Information on pollutants discharged or present was identified by accessing various national data sources:

—Final section 304(l) short lists identifying toxic pollutants likely to impair designated uses;
—Water column, fish tissue and sediment observations in the Storage Retrieval (STORET) data base (i.e., where the pollutant was *detected*);
—The National Pollutant Discharge Elimination System's (NPDES) Permit Compliance System data base to identify those pollutants limited in direct dischargers' permits;
—Pollutants included on Form 2(c) permit applications which have been submitted by wastewater dischargers;
—Information on discharges to surface waters or POTWs from the Toxics Release Inventory required by the Emergency Planning and Community Right-To-Know Act of 1986 (Title III, P.L. 99–499);
—Pollutants predicted to be in the effluent of NPDES dischargers based on industry-specific analyses conducted for the Clean Water Act effluent guideline program.

The extent of this data supports a conclusion that promulgation of Federal criteria for all priority toxic pollutants with section 304(a) criteria guidance documents is appropriate for those States that have not completed their standards adoption process. This conclusion is supported by several other factors.

First, many of the available data sources have limitations which argue against relying on them solely to identify all needed water quality criteria. For example, the section 304(l) short lists only identified water bodies where uses were impaired by point source discharges; State 304(l) long lists did not generally identify pollutants causing use impairment by nonpoint sources. Other available data sources (i.e., NPDES permit limits) have a similar narrow scope because of their particular purposes. Even the value of those data bases designed to identify ambient water problems is restricted by the availability of monitoring data. In many States, the quantity, spatial and temporal distribution, and pollutant coverage of monitoring data is severely limited. For example, the most recent Water Quality Inventory Report to Congress included an evaluation of use attainment for only one-third of all river miles and less than one-half of lake acres. Even for those waters where use attainment status was reported, many assessments were based on data which did not include the chemical-specific information necessary to identify the priority toxic pollutants which pose a threat to designated uses. After evaluating this data, EPA concluded that it most likely understates the adverse presence or discharge of priority toxic pollutants.

Further evidence justifying a broad promulgation rulemaking can be found in the State actions to date in their standards adoption process. While many have not come to completion, the initial steps have led many States to develop or propose rulemaking packages with extensive pollutant coverage. The nature of these preliminary State determinations argues for a Federal promulgation of all section 304(a) criteria pollutants to ensure adequate public health and environmental protection against priority toxic pollutant insults.

The detailed assumptions and approach followed by EPA in writing the § 131.36(d) requirements for all jurisdictions are described below. In the following discussions, EPA refers to these assumptions and approach as "rules."

(1) No criteria are promulgated for States which have been fully approved by EPA as complying with the section 303(c)(2)(B) requirements.

(2) For States which have not been fully approved, if EPA has not previously determined which specific pollutants criteria/waterbodies are lacking from a State's standards (i.e., as part of an approval/disapproval action only), all of the criteria in Columns B, C, and D of the § 131.36(b) matrix are promulgated for statewide application to all appropriate designated uses, except as provided for elsewhere in these rules. That is, EPA brought the State into compliance with section 303(c)(2)(B) via an approach which is comparable to option 1 of the December 1988 national guidance for section 303(c)(2)(B).

(3) If EPA has previously determined which specific pollutants/criteria/waterbodies are needed to comply with CWA section 303(c)(2)(B) (i.e., as part of an approval/disapproval action only), the criteria in § 131.36(b) are promulgated for only those specific pollutants/criteria/waterbodies (i.e., EPA brought the State into compliance via an approach which is comparable to option 2 of the December 1988 national guidance for section 303(c)(2)(B)).

(4) For aquatic life, except as provided for elsewhere in these rules, all waters with designated aquatic life uses providing even minimal support to aquatic life are included in the rule (i.e., fish survival, marginal aquatic life, etc.)

(5a) For human health, except as provided for elsewhere in these rules, all waters with designated uses providing for public water supply protection (and therefore a potential water consumption exposure route) or minimal aquatic life protection (and therefore a potential fish consumption exposure route) are included in the rule.

(5b) Where a State has determined the specific aquatic life segments which provide a fish consumption exposure route (i.e., fish or other aquatic life are being caught and consumed) and EPA approved this determination as part of

a standards approval/disapproval action, the rule includes the fish consumption (Column D2) criteria for only those aquatic life segments, except as provided for elsewhere in these rules. In making a determination that certain segments do not support a fish consumption exposure route, a State must have completed, and EPA approved, a use attainability analysis consistent with the provisions of 40 CFR 131.10(j). In the absence of such an approved State determination, EPA promulgated fish consumption criteria for all aquatic life segments.

(6) Uses/Classes other than those which support aquatic life or human health are not included in the rule (e.g., livestock watering, industrial water supply), unless they are defined in the State standards as also providing protection to aquatic life or human health (i.e., unless they are described as protecting multiple uses including aquatic life or human health). For example, if the State standards include a use such as industrial water supply, and in the narrative description of the use the State standards indicate that the use includes protection for resident aquatic life, then this use is included in this rule.

(7) For human health, the "water + fish" criteria in Column D1 of § 131.36(b) are promulgated for all waterbodies where public water supply and aquatic life uses are designated, except as provided for elsewhere in these rules (e.g., rule 9).

(8) If the State has public water supplies where aquatic life uses have not been designated, or public water supplies that have been determined not to provide a potential fish consumption exposure pathway, the "water + organisms only" criteria in Column D1 of § 131.36(b) are promulgated for such waterbodies, except as provided for elsewhere in these rules (e.g., rule 9).

(9) EPA is generally not promulgating criteria for priority toxic pollutants for which a State has adopted criteria and received EPA approval. The exceptions to this general rule are described in rules 10 and 11.

(10) For priority toxic pollutants where the State has adopted human health criteria and received EPA approval, but such criteria do not fully satisfy section 303(c)(2)(B) requirements, the rule includes human health criteria for such pollutants. For example, consider a case where a State has a water supply segment that poses an exposure risk to human health from both water and fish consumption. If the State has adopted, and received approval for, human health criteria based on water consumption only (e.g., Safe Drinking Water Act Maximum Contaminant Levels (MCLs)) which are less stringent than the "water + fish" criteria in Column D1 of § 131.36(b), the Column D1 criteria are promulgated for those water supply segments. The rationale for this is to ensure that both water and fish consumption exposure pathways are adequately addressed and human health is fully protected. If the State has adopted water consumption only criteria which are more stringent or equal to the Column D1 criteria, the "water + fish" criteria in Column D1 criteria are not promulgated.

(11) For priority toxic pollutants where the State has adopted aquatic life criteria and previous to the 1987 CWA Amendments received EPA approval, but such criteria do not fully satisfy section 303(c)(2)(B) requirements, the rule includes aquatic life criteria for such pollutants. For example, if the State has adopted not-to-be-exceeded aquatic life criteria which are less stringent than the 4-day average chronic aquatic life criteria in § 131.36(b) (i.e., in Columns B2 and C2), the acute and chronic aquatic life criteria in § 131.36(b) are promulgated for those pollutants. The rationale for this is that the State-adopted criteria do not protect resident aquatic life from both acute and chronic effects, and that Federal criteria are necessary to fully protect aquatic life designated uses. If the State has adopted not-to-be-exceeded aquatic life criteria which are more stringent or equal to the chronic aquatic life criteria in § 131.36(b), the acute and chronic aquatic life criteria in § 131.36(b) are not promulgated for those pollutants.

(12) Under certain conditions discussed in rules, 9, 10, and 11, criteria listed in § 131.36(b) are not promulgated for specific pollutants; however, EPA made such exceptions only for pollutants for which criteria have been adopted by the State and approved by EPA, where such criteria are currently effective under State law the appropriate EPA Region concluded that the State's criteria fully satisfy section 303(c)(2)(B) requirements.

3. Approach for States that Fully Comply Subsequent to Issuance of this Final Rule

As discussed in prior Sections of this Preamble, the water quality standards program has been established with an emphasis on State primacy. Although this rule was developed to Federally promulgate toxics criteria for States, EPA prefers that States maintain primacy, revise their own standards, and achieve full compliance. EPA is hopeful this rule will provide additional impetus for non-complying States to adopt the criteria for priority toxic pollutants necessary to comply with section 303(c)(2)(B).

Removal of a State from the rule will require another rulemaking by EPA according to the requirements of the Administrative Procedure Act (5 U.S.C. 551 *et seq.*). EPA will withdraw the Federal rule without a notice and comment rulemaking when the State adopts standards no less stringent than the Federal rule (i.e., standards which provide, at least, equivalent environmental and human health protection). For example, see 51 FR 11580, April 4, 1986, which finalized EPA's removal of a Federal rule for the State of Mississippi.

However, if a State adopts standards for toxics which are less stringent than the Federal rule but, in the Agency's judgment, fully meet the requirements of the Act, EPA will propose to withdraw the rule with a Notice of proposed rulemaking and provide for public participation. This procedure would be required for partial or complete removal of a State from this rulemaking. An exception to this requirement would be when a State adopts a human health criterion for a carcinogen at a 10^{-5} risk level where the Agency has promulgated at a 10^{-6} risk level. In such a case, the Agency believes it would be appropriate to withdraw the Federal criterion without notice and comment because the Agency has considered in this rule that criteria based on either 10^{-5} or 10^{-6} risk levels meet the requirements of the Act. A State covered by this final rule could adopt the necessary criteria using any of the three Options or combinations of those Options described in EPA's 1989 guidance.

EPA cautions States and the public that promulgation of this Federal rule removes most of the flexibility available to States for modifying their standards on a discharger-specific or stream-specific basis. For example, variances and site-specific criteria development are actions sometimes adopted by the States. These are optional policies under terms of the Federal water quality standards regulation. Except for the water-effect ratio for certain metals, EPA has not incorporated either optional policy, in general, in this rulemaking; that is, EPA has not generally authorized State modification of Federal water quality standards. Each of these types of modifications will, in general, require Federal rulemaking on a case-by-case basis to change the Federal rule. Because of the time consuming nature of reviewing such requests, limited Federal resources, and the need for the Agency to move into other priority programs

areas in establishing environmental controls, EPA alerts the States and the public that a prompt Agency response to requests for variances and site-specific modifications to the Federal criteria is unlikely. The best course of action, if such provisions are desired in a State, is for a State to adopt its own standards and take advantage, if it so chooses, of the flexibility offered by these optional provisions.

The Federal criteria published today are effective in 45 days. However, this action does not change existing applicable State and EPA provisions related to permit issuance or reissuance as they affect schedules of compliance. EPA and the States may continue issuing permits containing enforceable compliance schedules for these Federally established water quality standards if it is consistent with State policy.

F. Derivation of Criteria

1. Section 304(a) Criteria Process

Under the authority of CWA section 304(a), EPA has developed methodologies and specific criteria to protect aquatic life and human health. These methodologies are intended to provide protection for all surface water on a national basis. As described below, there are site-specific procedures for more precisely addressing site-specific conditions for an individual water body. However, the water quality criteria are scientifically sound and will achieve the statutory objective of protecting designated uses even in the absence of these modification procedures. Although the site-specific procedures may allow for more precise criteria for certain waterbodies, these procedures are infrequently used because the Section 304(a) criteria recommendations are designed to protect all waterbodies and have proven themselves to be appropriate. The methodologies have been subject to public review, as have the individual criteria documents. Additionally, the methodologies have been reviewed and approved by EPA's Science Advisory Board of external experts. Additional comments on the methodologies were taken as part of this action and have been considered and responded to in developing this final rule. In addition, these comments will be considered in the Agency's ongoing effort to propose revised methodologies for public review and comment in fiscal year 1993.

EPA incorporated by reference into the record of this rule the aquatic life methodology as described in "Appendix B—Guidelines for Deriving Water Quality Criteria for the Protection of Aquatic Life and Its Uses" (45 FR 79341, November 28, 1980) as amended by "Summary of Revisions to Guildlines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" (50 FR 30792, July 29, 1985).

Note: Throughout the remainder of this rule, this reference is described as the 1985 Guidelines. Any page number references are to the actual guidance document, not the notice of availability in the **Federal Register**. The actual guidelines document was available through the National Technical Information Service (PB85–227049), is in the record of this rulemaking, and is abstracted in Appendix A of Quality Criteria for Water, 1986.

EPA also incorporated by reference into the record of this rule the human health methodology as described in "Appendix C—Guidelines and Methodology Used in the Preparation of Health Effects Assessment Chapters of the Consent Decree Water Criteria Documents" (45 FR 79347, November 28, 1980).

Note: Throughout the remainder of this Preamble, this reference is described as the Human Health Guidelines or the 1980 Guidelines.

EPA also recommends that the following be reviewed: "Appendix D—Response to Comments on Guidelines for Deriving Water Quality Criteria for the Protection of Aquatic Life and Its Uses," (45 FR 79357, November 28, 1980); "Appendix E—Responses to Public Comments on the Human Health Effects Methodology for Deriving Ambient Water Quality Criteria" (45 FR 79368, November 28, 1980); and "Appendix B—Response to Comments on Guidelines for Deriving Numerical National Water quality Criteria for the Protection of Aquatic Organisms and Their Uses" (50 FR 30793, July 29, 1985). EPA also placed into the record the most current individual criteria documents for the priority toxic pollutants included in today's rule.

The primary focus of this rule is the inclusions of the water quality criteria for pollutant(s) in State standards as necessary to support water quality-based control programs. The Agency accepted comment on the criteria proposed for inclusion in this rule. However, Congress established a very ambitious schedule for the promulgation of the final criteria. The statutory deadline in section 303(c)(4) clearly indicates that Congress intended the Agency to move very expeditiously when Federal action is warranted.

The methodology used to develop the criteria and the criteria themselves (to the extent not updated through IRIS) have previously undergone scientific peer review and public review and comment, and have been revised as appropriate. For the most part, this review occurred before Congress amended the Act in 1987, to require the inclusion of numeric criteria for certain toxic pollutants in State standards. Congress acted with full knowledge of the EPA process for developing criteria and the Agency's recommendations under section 304(a). EPA believes it is consistent with Congressional intent to rely in large part on existing criteria rather than engage in a time-consuming reevaluation of the underlying basis for water quality criteria. Accordingly, the Agency stands by its prior decisions regarding its published methodology and criteria even after review of the comments received. It is the Agency's belief that this approach will best achieve the purpose of moving forward in promulgating criteria for States not in compliance with section 303(c)(2)(B) so that environmental controls intended by Congress can be put into place to protect public health and welfare and enhance water quality.

It should be noted that the Agency is initiating a review of the basic guidelines for developing criteria and that comments received during this rulemaking will be considered in that effort. Future revisions to the criteria guidelines will be reviewed by the Agency's Science Advisory Board and submitted to the public for review and comment following the same process that was used in issuing the existing methodological guidelines. Subsequent revisions of criteria documents and the issuance of any new criteria documents will also be subject to the public review.

2. Aquatic Life Criteria

Aquatic life criteria may be expressed in numeric or narrative forms. EPA's 1985 Guidelines describe an objective, internally consistent and appropriate way of deriving chemical-specific, numeric water quality criteria for the protection of the presence of, as well as the uses of, both fresh and marine water aquatic organisms.

An aquatic life criterion derived using EPA's section 304(a) method "might be thought of as an estimate of the highest concentration of a substance in water which does not present a significant risk to the aquatic organisms in the water and their uses." (45 FR 79341.) The term "their uses" refers to consumption by humans and wildlife (1985 Guidelines, page 48). EPA's guidelines are designed to derive criteria that protect aquatic communities by protecting most of the species and their uses most of the time, but not necessarily all of the species all of the time (1985 Guidelines, page 1). Aquatic communities can tolerate some

stress and occasional adverse effects on a few species so that total protection of all species all of the time is not necessary. EPA's 1985 Guidelines attempt to provide a reasonable and adequate amount of protection with only a small possibility of substantial overprotection or underprotection. As discussed in detail below, there are several individual factors which may make the criteria somewhat overprotective or underprotective. The approach EPA is using is believed to be as well balanced as possible, given the state of the science.

Numerical aquatic life criteria derived using EPA's 1985 Guidelines are expressed as short-term and long-term numbers, rather than one number, in order that the criteria more accurately reflect toxicological and practical realities. The combination of a criteria maximum concentration (CMC), a one-hour average acute limit, and a criteria continuous concentration (CCC), a four-day average concentration chronic limit, provide protection of aquatic life and its uses from acute and chronic toxicity to animals and plants, and from bioconcentration by aquatic organisms, without being as restrictive as a one-number criterion would have to be. (1985 Guidelines, pages 4–5.)

The two-number criteria are intended to identify average pollutant concentrations which will produce water quality generally suited to maintenance of aquatic life and their uses while restricting the duration of excursions over the average so that total exposures will not cause unacceptable adverse effects. Merely specifying an average value over a time period is insufficient unless the time period is short, because excursions higher than the average can kill or cause substantial damage in short periods.

A minimum data set of eight specified families is required for criteria development (details are given in the 1985 Guidelines, page 22). The eight specific families are intended to be representative of a wide spectrum of aquatic life. For this reason it is not necessary that the specific organisms tested be actually present in the water body. States may develop site-specific criteria using native species, provided that the broad spectrum represented by the eight families is maintained. All aquatic organisms and their common uses are meant to be considered, but not necessarily protected, if relevant data are available.

EPA's application of guidelines to develop the criteria matrix in the final rule is judged by the Agency to be applicable to all waters of the United States, and to all ecosystems (1985 Guidelines, page 4). There are waters and ecosystems where site-specific criteria could be developed, as discussed below, but it is up to States to identify those waters and develop the appropriate site-specific criteria.

Fresh water and salt water (including both estuarine and marine waters) have different chemical compositions, and freshwater and saltwater species rarely inhabit the same water simultaneously. To provide additional accuracy, criteria developed recently are developed for fresh water and for salt water.

Assumptions which may make the criteria underprotective include the fact that not all species are protected, the use of criteria on an individual basis, with no consideration of additive or synergistic effects, and the general lack of consideration of impacts on wildlife, due principally to a lack of data. Chemical toxicity is often related to certain receiving water characteristics, (pH, hardness, etc.) of a waterbody. Adoption of some criteria without consideration of these parameters could result in the criteria being overprotective.

3. Criteria for Human Health

EPA's section 304(a) human health guidelines attempt to provide criteria which minimize or specify the potential risk of adverse human effects due to substances in ambient water (45 FR 79347). EPA's section 304(a) criteria for human health are based on two types of biological endpoints: (1) Carcinogenicity and (2) systemic toxicity (i.e., all other adverse effects other than cancer). Thus, there are two procedures for assessing these health effects: one for carcinogens and one for non-carcinogens.

EPA's human health guidelines assume that carcinogenicity is a "non-threshold phenomenon," that is, there are no "safe" or "no-effect levels" because even extremely small doses are assumed to cause a finite increase in the incidence of the response (i.e., cancer). Therefore, EPA's water quality criteria for carcinogens are presented as pollutant concentrations corresponding to increases in the risk of developing cancer.

For pollutants that do not manifest any apparent carcinogenic effects in animal studies (i.e., systemic toxicants), EPA assumes that the pollutant has a threshold below which no effects will be observed. This assumption is based on the premise that a physiological mechanism exists within living organisms to avoid or overcome the adverse effects of the pollutant below the threshold concentration.

The human health risks of a substance cannot be determined with any degree of confidence unless dose-response relationships are quantified. Therefore, a dose-response assessment is required before a criterion can be calculated. The dose-response assessment determines the quantitative relationships between the amount of exposure to a substance and the onset of toxic injury or disease. Data for determining dose-response relationships are typically derived from animal studies, or less frequently, from epidemiological studies in exposed populations.

The dose-response information needed for carcinogens is an estimate of the carcinogenic potency of the compound. Carcinogenic potency is defined here as a general term for a chemical's human cancer-causing potential. This term is often used loosely to refer to the more specific carcinogenic or cancer slope factor which is defined as an estimate of carcinogenic potency derived from animal studies or epidemiological data of human exposure. It is based on extrapolation from test exposures of high dose levels over relatively short periods of time to more realistic low dose levels over a lifetime exposure period by use of linear extrapolation models. The cancer slope factor, q1*, is EPA's estimate of carcinogenic potency and is intended to be a conservative upper bound estimate (e.g. 95% upper bound confidence limit).

For non-carcinogens, EPA uses the reference dose (RfD) as the dose response parameter in calculating the criteria. The RfD was formerly referred to as an "Acceptable Daily Intake" or ADI. The RfD is useful as a reference point for gauging the potential effects of other doses. Doses that are less than the RfD are not likely to be associated with any health risks, and are therefore less likely to be of regulatory concern. As the frequency of exposures exceeding the RfD increases and as the size of the excess increases, the probability increases that adverse effects may be observed in a human population. Nonetheless, a clear conclusion cannot be categorically drawn that all doses below the RfD are "acceptable" and that all doses in excess of the RfD are "unacceptable." In extrapolating non-carcinogen animal test data to humans to derive an RfD, EPA divides a no-observed-effect dose observed in animal studies by an "uncertainty factor" which is based on profession judgment of toxicologists and typically ranges from 10 to 10,000.

For section 304(a) criteria development, EPA typically considers only exposures to a pollutant that occur through the ingestion of water and contaminated fish and shellfish. This is

the exposure default assumption although the human health guidelines provide for considering other sources where data are available (see 45 FR 79354). Thus the criteria are based on an assessment of risks related to the surface water exposure route only.

The assumed exposure pathways in calculating the criteria are the consumption of 2 liters per day at the criteria concentration and the consumption of 6.5 grams per day of fish/shellfish contaminated at a level equal to the criteria concentration but multiplied by a "bioconcentration factor." The use of fish consumption as an exposure factor requires the quantification of pollutant residues in the edible portions of the ingested species. Bioconcentration factors (BCFs) are used to related pollutant residues in aquatic organisms to the pollutant concentration in ambient waters. BCFs are quantified by various procedures depending on the lipid solubility of the pollutant. For lipid soluble pollutants, the average BCF is calculated from the weighted average percent lipids in the edible portions of fish/shellfish, which is about 3%; or it is calculated from theoretical considerations using the octanol/water partition coefficient. For non-lipid soluble compounds, the BCF is determined empirically. The assumed water consumption is taken from the National Academy of Sciences publication "Drinking Water and Health" (1977). (Referenced in Human Health Guidelines, 45 FR 79356). The 6.5 grams per day contaminated fish consumption value is equivalent to the average per-capita consumption rate of all (contaminated and non-contaminated) freshwater and estuarine fish for the U.S. population. (See Human Health Guidelines, 45 FR 79348.)

EPA also assumes in calculating water quality criteria that the exposed individual is an average adult with body weight of 70 kilograms. The issue of concern is dose per kilogram of body weight. EPA assumes 6.5 grams per day of contaminated fish consumption and 2 liters per day of contaminated drinking water consumption for a 70 kilogram person in calculating the criteria. Persons of smaller body weight are expected to ingest less contaminated fish and water, so the dose per kilogram of body weight is generally expected to be roughly comparable. There may be subpopulations within a State, such as subsistence fishermen, who as a result of greater exposure to a contaminant, are at greater risk than the hypothetical 70 kilogram person eating 6.5 grams per day of maximally contaminated fish and shellfish and drinking 2 liters per day of maximally contaminated drinking water.

For example, individuals that ingest ten times more of a pollutant than is assumed in derivation of the criteria at a 10^{-6} risk level will be protected to a 10^{-5} level, which EPA has historically considered to be adequately protective. There may, nevertheless, be circumstances where site-specific numeric criteria that are more stringent than the State-wide criteria are necessary to adequately protect highly exposed subpopulations. Although EPA intends to focus on promulgation of appropriate State-wide criteria that will reduce risks to all exposed individuals, including highly exposed subpopulations, site-specific criteria may be developed subsequently by EPA or the States where warranted to provide necessary additional protection. (See Human Health Guidelines, Issue 8, 45 FR 79369.)

For non-carcinogens, oral RfD assessments (hereinafter simply "RfDs") are developed based on pollutant concentrations that cause threshold effects. The RfD is an estimate (with uncertainty spanning perhaps an order of magnitude) of a daily exposure to the human population (including sensitive subgroups) that is likely to be without appreciable risk of deleterious effects during a lifetime. (See Human Health Guidelines, 45 FR 79348.)

Criteria are calculated for individual chemicals with no consideration of additive, synergistic or antagonistic effects in mixtures. If the conditions within a State differ from the assumptions EPA used within the constraints of the Federal rule, the States have the option to perform the analyses for their conditions.

EPA has a process to develop a scientific consensus on oral reference dose assessments and carcinogenicity assessments (hereinafter simply cancer slope factors or slope factors). Reference doses and slope factors are validated by two Agency work groups (i.e., one work group for each) which are composed of senior Agency scientists from all of the program offices and the Office of Research and Development. These work groups develop a consensus of Agency opinion for RfDs and slope factors which are then used throughout the Agency for consistent regulation and guidance development. EPA maintains an electronic data base which contains the official Agency consensus for oral RfD assessments and carcinogenicity assessments which is known as the Integrated Risk Information System (IRIS). It is available for use by the public on the National Institutes of Health's National Library of Medicine's TOXNET system, and through diskettes from the National Technical Information Service (NTIS). (NTIS access number is PB 90–591330).

For the criteria included in today's rule, EPA used the criteria recommendation from the appropriate Section 304(a) criteria document. (The availability of EPA's criteria documents has been announced in various **Federal Register** Notices. These documents are also placed in the record for today's rule.) However, if the Agency has changed any parameters in IRIS used in criteria derivation since issuance of the criteria guidance document, EPA recalculated the criteria recommendation with the latest information, invited comment on the updating procedure and the numbers that would be derived from it. (This information is included in the record.) Thus, there may be differences between the original criteria guidance document recommendation, and those in this rule, but this rule presents the Agency's most current section 304(a) criteria recommendation. The recalculated human health numbers are denoted by an "a" in the criteria matrix in subsection 131.36(b) of today's rule.

A difficult and controversial problem facing both the States and EPA in attempting to comply with the requirements of section 303(c)(2)(B) involved selecting a criterion for 2,3,7,8–TCDD (dioxin). EPA, the States, dischargers, environmental groups and the public at large have been involved in discussions concerning the ambient level of protection that is protective of public health. At issue during the State debates on selecting criterion for dioxin and in comments to this rulemaking are scientific questions specific to dioxin such as determining the carcinogenic potency of the pollutant and the extent to which the pollutant tends to accumulate in fish tissues. Other issues are raised that are more generic to EPA's human health criteria. Most of these issues relate, directly or indirectly, to concerns expressed by dischargers regarding the cost of complying with water quality-based effluent limits for dioxin.

In order to base its regulatory decisions on the best available science, EPA continuously updates its assessment of the risk from exposure to contaminants. On September 11, 1991, EPA's Office of Research and Development (ORD) began reassessing the scientific models and exposure scenarios used to predict the risks of biological effects from exposure to low levels of dioxin. This reassessment has the potential to alter the risk assessment for dioxin and accordingly the Agency's

regulatory decisions related to dioxin. At this time, EPA is unable to say with any certainty what the degree or directions of any changes in risk estimates might be. Moreover, the results of the assessment and any potential impact on the criteria limit will not be known for quite some time.

Considerable comment was received that the Agency not include dioxin in the rule pending the results of the dioxin reassessment. However, no additional data was submitted by the commenters that adds to the information available upon which to make a decision. Based on information currently available to the Agency and in the face of known uncertainties, the limit promulgated today is within the range of scientific defensibility.

A State may adopt a different limit subsequent to this rule, following the normal procedures for adopting or revising water quality standards (40 FR 131). The adoption by a State of a new or revised criterion for dioxin, whether more or less stringent than the existing section 304(a) guidance, will be accepted by the Agency based on the results of the Agency's reassessment without any further justification. Once a State adopts a new dioxin criterion, the permitting authority, either EPA or the State (if authorized to administer a permit program), may change the effluent limitation for dioxin in a permit subject to the antibacksliding requirements of sections 402(o) and 303(d)(4) of the CWA and the antidegradation policy of the State.

This final rule includes criteria for dioxin. This action encourages and supports the ongoing efforts of fourteen States actively considering adopting criteria for dioxin. Most of these States are relying on the same data used by EPA in deriving its criterion for dioxin. In addition, dioxin limits are included as appropriate in Individual Control Strategies (ICS's) developed under section 304(l), so there should be no immediate regulatory action that will be based upon the promulgation of Federal criteria.

Moreover, as discussed in more detail in Section J, Executive Order 12291, example 5, it is unlikely that the practical impact of including dioxin at the 0.013 ppq level in this rule will affect the need for treatment and thus, is unlikely to be the basis for any incremental costs for pulp and paper mills to reduce dioxin discharges.

4. Section 304(a) Human Health Criteria Excluded

Today's rule does not contain certain of the section 304(a) criteria for priority toxic pollutants because those criteria were not based on toxicity. The basis for these particular criteria are organoleptic effects (e.g., taste and odor) which would make water and edible aquatic life unpalatable but not toxic. Because the basis for this rule is to protect the public health and aquatic life from toxicity consistent with the language and intent in section 303(c)(2)(B), EPA is promulgating criteria only for those priority toxic pollutants whose criteria recommendations are based on toxicity. The Section 304(a) human health criteria based on organoleptic effects for copper, zinc, 2,4-dimethylphenol, and 3-methyl-4-chlorophenol are excluded for this reason.

5. Cancer Risk Level

EPA's section 304(a) criteria guidance documents for priority toxic pollutants that are based on carcinogenicity present concentrations for upper bound risk levels of 1 excess cancer per 100,000 people (10^{-5}), per 1,000,000 people (10^{-6}), and per 10,000,000 people (10^{-7}). However, the criteria documents do not recommend a particular risk level as EPA policy.

In the April, 1990, **Federal Register** notice of preliminary assessment of State compliance, EPA announced its intention to propose this rule with an incremental cancer risk level of one in a million (10^{-6}) for all priority toxic pollutants regulated as carcinogens (55 FR 14351). This risk level was in fact proposed in the November 19, 1991 **Federal Register** Notice of proposed rulemaking. However, EPA's Office of Water's guidance to the States has consistently reflected the Agency's policy of accepting cancer risk policies from the States in the range of 10^{-6} to 10^{-4} (see 45 FR 79323, November 28, 1980; Guidance for State Implementation of Water Quality Standards for CWA section 303(c)(2)(B), November 12, 1988 (54 FR 346); see also document described in footnote 3 of this preamble). EPA reviews individual State policies as part of its water quality standards oversight function and determines if States have appropriately consulted their citizenry and applied good science in adopting water quality criteria.

In the proposal, EPA not only sought public comment on its decision to propose criteria based on a 10^{-6} risk level, but also specifically solicited comment on an alternate risk level of 10^{-5}. EPA received extensive comments that the proposed application of the criteria at the 10^{-6} risk level was contrary to Agency policy, contradicted other risk levels accepted by EPA in States included in the proposal, oversteps EPA authority by failing to recognize that such a decision more properly should be a State decision, given their primary authority to establish water quality standards, and that EPA should not include a risk level in the final rule.

Upon consideration of these comments, EPA agrees that establishing a single risk level for all States departs from Agency policy in the standards program. The application of the human health criteria in today's rule, on a State-by-State basis, therefore, has been changed. In today's rule, the risk level for each State is based on the best information available to the Agency as to each State's policy or practice regarding what risk level is, or should be, used in regulating carcinogens in surface waters. In most cases the risk levels were based on a State-adopted or formally proposed risk level, or in the case of Idaho, Rhode Island, and Nevada on an expression of State policy preference. EPA is therefore promulgating criteria at either the 10^{-5} or 10^{-6} risk level, either of which is consistent with EPA policy and with the requirements of the Clean Water Act.

The Agency recognizes that it made some of its decisions regarding the appropriate risk level on limited data. However, in the time available to the Agency, we relied on the best available information. The Agency believes it is important to move forward with this rule based on available information. To ensure that the Agency has selected the appropriate risk level for each State, the Agency is providing a final opportunity for the Governor of each State (or other official with authority to determine risk levels with respect to water quality criteria) to inform EPA if they believe a different risk level should be selected for their State.

Today's regulation will become effective 45 days from publication in the **Federal Register**. However, if within 30 days of publication of this rule in the **Federal Register**, the Governor or other appropriate official determines that the final rule is not based on the correct State policy or practice with regard to risk levels, the Governor (or other appropriate official) may request the Administrator in writing to adopt a different risk level for the State.

Note: The Governor is not constrained to requesting the Administrator to adopt a single risk level for all carcinogenic compounds. It is also acceptable for a State to select more than one risk level. For example, New Jersey is proposing to adopt 10^{-6} for Class A and B carcinogens, and 10^{-5} for Class C carcinogens. In this rule, EPA is promulgating the two risk level concept for New Jersey. The Governor must explain the basis for the request to change the risk level.

If EPA determines, after receipt of such a letter from the Governor or other appropriate State official, the State's preference is consistent with EPA policy, as set out in this rulemaking, and the requirements of the Clean Water Act, EPA will amend the rule accordingly.

As noted above, in this rulemaking EPA is adopting risk levels that it believes best reflects the expressed preferences of the covered States (10^{-6} or 10^{-5} for all carcinogens). If there were, however, no clear expression of preference by a State, EPA also believes it is reasonable for States to adopt a risk level of 10^{-5} for many of the covered carcinogens and a more stringent risk level of 10^{-6} for those carcinogens with substantially higher bioconcentration factors. Recognizing the current limitations of the scientific data available for this rulemaking, EPA believes it would be reasonable to conclude that carcinogens that bioaccumulate, particularly given the exposure of fishermen to such carcinogens, may justify a more protective risk level of 10^{-6} for the average fish consumer, but for other carcinogens a less conservative level (10^{-5}) may be appropriate.

6. Applying EPA's Nationally Derived Criteria to State Waters

To assist States in modifying EPA's water quality criteria, the Agency has provided guidance on developing site specific-criteria for aquatic life and human health (see Chapter 4, Water Quality Standards Handbook, Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses, and the Guidelines and Methodology Used in the Preparation of Health Effect Assessment Chapters of the Consent Decree Water Criteria Documents). This guidance can be used by the appropriate regulatory authority to develop alternative criteria. Where such criteria are more stringent than the criteria promulgated today, Section 510 of the Clean Water Act (33 U.S.C. 1370) allows their implementation and enforcement in lieu of today's promulgated criteria.

EPA's experience with such site-specific criteria has verified that the national criteria are generally protective and appropriate for direct use by the States. (See Response to Comments on the 1985 Aquatic Life Guidelines, Comment 57, 50 FR 30796, July 29, 1985.)

7. Application of Metals Criteria

A substantial number of comments were received requesting Agency guidance on the implementation of metals criteria for aquatic life. In response, the Agency has prepared guidance on this issue, which is described in general terms below, and which is being applied to the metals criteria being promulgated today. Responses to individual comments may be found in section I, comments 19 to 53.

In selecting an approach for implementing the metals criteria, the principal issue is the correlation between metals that are measured and metals that are biologically available and toxic, as discussed more fully in EPA's Interim Guidance on Interpretation and Implementation of Aquatic Life Criteria for Metals, U.S. EPA, 1992, Office of Science and Technology, May 1992. (Notice of availability published at 57 FR 24041, June 5, 1992.

In order to assure that the metals criteria are appropriate for the chemical conditions under which they are applied, EPA is promulgating the criteria in terms of total recoverable metal and providing for adjustment of the criteria through application of the "water-effect ratio" procedure as described and recommended in the above Guidance document. This procedure was developed in the early 1980's, and was originally set forth, along with several case study applications, as the Indicator Species procedure in Chapter 4 of the Water Quality Standards Handbook (U.S. EPA 1983 at page 4–12). EPA notes that performing the testing to use site-specific water-effect ratios is optional on the part of the States.

In natural waters metals may exist in a variety of dissolved and particulate forms. The bioavailability and toxicity of metals depend strongly on the exact physical and chemical form of the metal. Generally, dissolved metal has greater toxicity than particulate metal, and for some metals, such as copper, certain dissolved forms have greater toxicity than other dissolved forms. Because the speciation among the various forms of a particular metal may vary from place to place, the same metal concentration may cause different toxicity from place to place.

With one exception (selenium), EPA's metals criteria for aquatic life protection are developed from laboratory toxicity data. Use of laboratory toxicity testing is usually much more cost-effective for obtaining data on (1) the toxicity of substances to a variety of species, and (2) the effect of various water quality characteristics on toxicity. (See 1980 Aquatic Life guidelines, comment 21, 45 FR 79360. See also responses to comments 17, 18, 19, 20.) The dilution water used in laboratory toxicity tests is ordinarily low in particulate matter (i.e. suspended solids), and low in organic matter compared to many ambient waters. As a result, laboratory toxicity tests are ordinarily more likely to overestimate the toxicity than underestimate the toxicity of metals in some ambient waters, particularly fresh waters.

Because of the complexity of metals speciation and its effect on toxicity, the relationship between measured concentrations and toxicity is not precise. Consequently, any method that could be recommended would not guarantee precise comparability between concentrations measured in the field and concentrations employed in the toxicity tests underlying the criteria.

For metals criteria derived from laboratory toxicity tests, the best approach is to use a biological method to compare bioavailability and toxicity in receiving waters versus laboratory test waters (the water-effect ratio) and to adjust the criteria values accordingly. This involves running toxicity tests for at least two species, each preferably from a different family, measuring acute (and possibly chronic) toxicity values for the pollutant using (a) the local receiving water, and (b) standard laboratory toxicity testing water, which is also the source of toxicity test dilution water. A water-effect ratio is the acute (or chronic) value in site water divided by the acute (or chronic) value in standard laboratory water. An acute value is an LC50 from a 48–96 hour test, as appropriate for the species. A chronic value is a concentration resulting from hypothesis testing or regression analysis of measurements of survival, growth, or reproduction in life cycle, partial life cycle, or early life stage tests on aquatic species.

Chemical approaches for defining and comparing bioavailable metal are subject to greater uncertainty than the above biological approach.

Chemical approaches, such as dissolved and total recoverable metals are easier to apply than biological approaches. One approach that EPA has approved in State standards is to measure metals in ambient waters in terms of dissolved metal, and to compare such measurements to criteria appropriate for dissolved metal. Since effluent limits, for both technical and legal (see NPDES permits regulation, 40 CFR 122.45) reasons, should be expressed in terms of total recoverable metal, it is necessary to translate between the dissolved and total recoverable concentrations. EPA has not incorporated the alternative of dissolved

metals criteria into this rule, because the use of the water-effect ratio accomplishes the same ends but is technically superior and subject to fewer uncertainties than implementation of the criteria as dissolved concentrations.

The simplest approach for ambient metals standards is the use of the total recoverable analytical method without a water-effect ratio adjustment. This is a reasonable, albeit environmentally conservative strategy, for applying EPA's aquatic life criteria. Where the toxicity testing necessary to develop an alternative water-effect ratio has not been performed, this rule will apply the total recoverable analytical method without a water-effect ratio adjustment. This occurs because EPA assigns the water-effect ratio a value of 1.0, subject to being rebutted by toxicity testing results.

Because of the comments received, and because of the desire to achieve the greatest possible degree of accuracy, EPA has chosen to apply the total recoverable metals criteria unadjusted for site-specific water chemistry, unless the State adjusts the criteria through the use of a water-effect ratio as provided for in this rule. Allowance for water-effect ratio adjustment also satisfies the concerns of comments requesting consideration of dissolved criteria.

The water-effect ratio approach compares bioavailability and toxicity of a specific pollutant in receiving waters and in laboratory test waters. It involves running toxicity tests for at least two species an appropriate number of times, as determined by the States, ordinarily on samples collected in at least two seasons (or more where large metal loadings are involved). As with other site-specific procedures, the basic analysis or testing may be performed by the State, a permittee, or any other interested party. Acute or chronic toxicity for the pollutant are measured using (a) the local receiving water where the criterion is being implemented, and (b) standard laboratory toxicity testing water, as the sources of toxicity test dilution water. The water-effect ratio is calculated as the acute or chronic value in site water divided by respective acute or chronic values in standard laboratory water. Ordinarily, the geometric mean water-effect ratio from the valid tests is used for calculation of the criterion, except where protection of sensitive species requires a more stringent value. Because the metal's toxicity in standard laboratory water is the basis for EPA's criterion, this comparison is used to adjust the national criterion to a site-specific value. Because the procedure is a biological measure of differences in water chemistry, the water-effect ratio, even when derived from acute tests, usually may be assumed to also apply to chronic criteria.

For criteria that do not vary with hardness, the criterion for a specific site equals the acute or chronic value tabulated in the rule (i.e., the matrix in 40 CFR 131.36(b)) multiplied by the site-specific water-effect ratio for that pollutant. The result may either reduce or increase the stringency of the criteria.

For criteria whose toxicity varies with hardness, the criterion for a specific site equals the criterion calculated at the design hardness (see 40 CFR 131.36(c)(4)), multiplied by the site-specific water-effect ratio.

The water-effect ratio is assigned a value of 1.0, unless scientifically defensible data clearly demonstrate that a value less than 1.0 is necessary or a value greater than 1.0 is sufficient to fully protect the designated uses of the water body from the toxic effects of the pollutant. Any data accepted for calculation of the water-effect ratio is to be generated through standard toxicity testing protocols (EPA recommends the methodology in Annual Book of ASTM Stds. 1991. Vol 11.04. ASTM. Philadelphia, PA.), using sampled ambient water representative of conditions in the affected water body, and using laboratory dilution water comparable to that used in toxicity tests underlying the criteria. The guidance documents cited at the beginning of this section provides more guidance on generating the information necessary to determine the correct value of the water-effect ratio. However, EPA intends within the next few months to provide additional guidance or performing the analyses necessary to develop scientifically defensible water-effect ratios for metals. As envisioned at this time, EPA will expand Chapter 4 in the Handbook to apply the appropriate procedures described there specifically to metals. EPA will look at the chemical characteristics of the laboratory water used in the toxicity tests included in the metals criteria data base, appropriate test organisms, analytical methods, safeguards against unintended metals contamination during toxicity testing, and appropriate data handling and statistics. While EPA believes the current guidance is adequate for application of the water-effect ratio, the additional guidance should help standardize procedures and make results more comparable and defensible.

The rule as promulgated is constructed as a rebuttable presumption. The water-effect ratio is assigned a value of 1.0 but provides that a State may assign a different value derived from suitable tests. As EPA has noted elsewhere, the actual decision as to the numeric value assigned to a water-effect ratio may be made during a State or EPA NPDES permit proceeding provided that adequate notice and opportunity for public participation is provided. It is the responsibility of the permit writing authority to determine whether to apply the water-effect ratio in an NPDES permit. However, EPA believes use of the ratio will lead to more appropriate permit limits. States may wish to allow permittees to fund State-administered studies necessary to develop the ratio for particular waterbodies.

EPA reviews State issued NPDES permits. To facilitate EPA consideration of a State-developed water-effect ratio, a State should specify in documentation supporting that action what decisions were made for critical parameters such as toxicity testing protocols used, frequency of testing, critical periods for sampling and testing, and analytical quality control and assurance. Each of the factors must be articulated in a record as a basis for a determination that the water-effect ratio is scientifically defensible.

The procedure applies only to aquatic life criteria derived from laboratory toxicity data. That is, it applies to the acute and chronic criteria (Columns B and C in 40 CFR 131.36(b)) for arsenic, cadmium, chromium, copper, lead, nickel, and zinc. It also applies to the acute criteria for mercury and silver, and the saltwater acute and chronic criteria for selenium. It does not apply to the chronic criteria for mercury, because they are residue based, or to the freshwater acute and chronic criteria for selenium, because they are field based.

The water-effect ratio is affected not only by speciation among the various dissolved and particulate forms, but also by additive, synergistic, and antagonistic effects of other materials in the affected site waters. As such, the water-effect ratio is a rather comprehensive measure of the effect of water chemistry on the toxicity of a pollutant. Because the procedure accounts for any reduction in bioavailability resulting from binding of the metal to particulate matter, all metals criteria have been appropriately expressed as total recoverable metal in this rule.

Where measured water-effect ratios are used in deriving NPDES permit limits, data from appropriate testing during the term of the permit should be accumulated so that the value of the water-effect ratio can be reevaluated each time the permit is reissued. Thus, were measured water-effect ratios are

involved, EPA recommends that NPDES permits establish monitoring requirements that include periodic determinations of water-effect ratios.

G. Description of the Final Rule and Changes From Proposal

1. Changes From Proposal

Several changes were made in the final rule from the proposal both as a result of Agency and State action with respect to the ongoing adoption of water quality standards by the States and because of the Agency's consideration of issues raised in specific public comments.

The States of Arizona, Colorado, Connecticut, Louisiana, New Hampshire, Virginia, the Commonwealth of the Northern Mariana Islands, and Hawaii are not included in the final rule as their standards were duly adopted and approved by EPA as fully meeting the requirements of section 303(c)(2)(B). Arizona's water quality standards were approved on March 2, 1992; Colorado's standards were approved by EPA on December 10, 1991; Connecticut on May 15, 1992; Louisiana on January 24, 1992; New Hampshire on June 25, 1992; Virginia on June 30, 1992; CNMI on January 13, 1992; and Hawaii on November 4, 1992. Copies of the approval letters are included in the record to this final rulemaking.

In addition, human health criteria adopted by the State of Arkansas were approved by EPA on January 24, 1992, and such criteria were removed from today's rule as it affects Arkansas. EPA is not promulgating and aquatic life criterion in Arkansas for arsenic because a review of monitoring data from 1985 to the present reveals no reason to conclude that arsenic will interfere with designated aquatic life uses. Additional details on EPA's action with respect to Arkansas may be found in Section I—Response to Public Comments, subsection 6.

Except for dioxin, criteria for the State of Florida for both human health and protection of aquatic life were approved by EPA on February 25, 1992. Florida is included in the rule only for the purposes of establishing a criterion for dioxin. More details on Florida's action are included in the Florida section of subsection 6 of the Response to Comments section of this preamble.

The criteria applicable to California have been revised to reflect a partial approval of the State's water quality standards on November 6, 1991. Additional comments with respect to California may be found in subsection 6 of Section I—Response to Public Comments.

The rule as it applies to the State of Washington was revised after discussion with the State as to EPA's interpretation of the uses designated by the State. The rule is now based on use categories rather than use classes. Additional details on this change may be found in subsection 6 of Section I—Response to Public Comments.

The rule as it applies to Alaska was modified to delete the assignment of criteria to a seafood processing use. This use falls under the standards program. However, because it applies to food preparation only, it is not appropriate to apply to it aquatic life or human health criteria. Additional aquatic life and human health criteria were added to several use classifications after discussions with the State clarified the State's use classifications. Additional details on this change may be found in subsection 6 of Section I—Response to Public Comments.

The rule as it applies to Idaho was modified to add additional criteria for the protection of primary contact recreation after discussions with the State concerning that use. Additional details may be found in subsection 6 of Section I—Response to Public Comments.

The rule as it applies to Kansas was changed by removing the promulgation of silver for sections (2) (A), (B), (C), and (6)(C) as the State has an EPA approved aquatic life criterion more stringent than the EPA criterion. The human health criterion for silver was removed because EPA has withdrawn its silver human health criterion.

The rule as it applies to New Jersey was revised to reflect comments received from the New Jersey Department of Environmental Protection and Energy to add waters classified as Pinelands and to extend coverage of the criteria to the mainstem Delaware River and Delaware Bay (zones 1C–6). Additional details on this change may be found in subsection 6 of Section I—Response to Public Comments.

Clarifications on several aspects of the rule with respect to implementation procedures are addressed in the response to public comments section of this preamble (section I).

Language was added in § 131.36(c)(4) dealing with the application of metals criteria as discussed in section F–7 of this preamble. We also added requirements to clarify how hardness should be handled in doing water-effect ratio determinations (see 131.36(c)(4)(iii), footnotes "e" and "m" to 131.36(b)).

The criteria for carcinogenic compounds included in this rule are applied at a risk level based on State preference as reflected by adopted or proposed standards, or in the case of Idaho, Nevada, and Rhode Island, on expression of State policy preference, rather than at an across-the-board 10^{-6} risk level as was proposed by the Agency. The rationale for this change is discussed in detail in section F–5 and there is additional discussion in the Response to Public Comment Section. The basis for EPA's selection of a risk level for an individual State is described in the following paragraphs:

Alaska: Risk Level: 10^{-5}

In July 1992, the State proposed human health water quality based on achieving a 10^{-5} risk level for two carcinogens: Dioxin and chloroform. Also, on November 16, 1992, the Commissioner of the Alaska Department of Environmental Conservation wrote the Director, Water Division, in EPA Region X, and indicated that ". . . I also had this matter reviewed by our Attorney General's Office, and hereby confirm the appropriateness of utilizing a 10^{-5} risk level for Alaska in the National Toxics Rule."

California: Risk Level: 10^{-6}

Standards adopted by the State contained in the Enclosed Bays and Estuaries Plan, and the Inland Surface Waters Plan, approved by EPA on November 6, 1991, and the Ocean Plan approved by EPA on June 28, 1990, contain a risk level of 10^{-6} for carcinogens. The total number of toxic pollutants differs in each plan but approximately 60–65 pollutants are covered.

District of Columbia: Risk Level: 10^{-6}

In 1985 the District adopted water quality criteria for human health, based solely on exposure through water consumption. The criteria were based on a 10^{-6} risk level. See D.C.M.R. title 21, chapter 1102.8(I).

Florida: Risk Level: 10^{-6}

The State adopted human health criteria for all toxic pollutants, except dioxin, and received EPA approval on February 25, 1992, at a risk level of 10^{-6}.

Idaho: Risk Level: 10^{-6}

On November 12, 1992, the Administrator of the Division of Environmental Quality, Idaho Department of Health and Welfare, indicated in a letter to the EPA Assistant Administrator for Water that while Idaho would be publishing proposed standards for public review and

comment in the next several months. . . . "Until we know what standard the public in Idaho prefers, we believe it is prudent to adopt the more protected standards of ten to the minus six."

EPA Region X is the permit issuing authority for the State and applies 10^{-6} for water quality based human health requirements. These permits have been certified by the State under section 401 as meeting water quality standards.

Kansas: Risk Level: 10^{-6}

The State completed a series of public hearings in August 1992 on proposed water quality standards revisions and is now processing public comments leading to the final, formal adoption hearing scheduled for January 1993. Formal adoption is scheduled for February 1993. The risk level in the current proposed standards is 10^{-6}. See proposed K.A.R. 28–16–28e(c)(4)(B).

Michigan: Risk Level: 10^{-5}

For several years Michigan has been controlling toxics through application of the Guidelines for Rule 57. These guidelines are applied at a 10^{-5} risk level. See R 323, 1057(2)(d).

Nevada: Risk Level: 10^{-5}

On November 3, 1992, EPA received a letter from the Administrator of the Division of Environmental Protection, Department of Conservation and Natural Resources, ". . . that the public health risk level that DEP would prefer to see in federal regulations is 10^{-5} (one in one hundred thousand), unless a state can provide substantial support in the record that a risk level of 10^{-4} (one in ten thousand) is appropriate and protective. This gives states the flexibility to use a more conservative 10^{-6} risk level if they see fit, but without requiring it when it is not necessary."

New Jersey: Risk Level: 10^{-6} For Class A and B Carcinogens, 10^{-5} For Class C Carcinogens

New Jersey, on October 20, 1992, solicited public comment on proposed surface water quality standards. The comment period is to close on December 18, 1992. The proposed human health criteria for carcinogens are established on a two-tiered system for risk levels. See proposed N.J.A.C. 7:9B–1,5(a)4. The State previously had indicated their intention to do this in a letter to EPA on December 19, 1991.

Puerto Rico: Risk Level: 10^{-5}

In 1990, the State proposed and held public hearings on criteria for human health using a 10^{-5} risk level. Subsequently, the proposed standards were revised. Just recently the State completed public hearings on the most recent revision to standards. The standards are under review by the Environmental Quality Board. The risk level remains at 10^{-5}.

Rhode Island: Risk Level: 10^{-5}

On November 2, 1992, the EPA Regional Administrator received a letter from the Director, Department of Environmental Management, that, along with the Department of Health, the State's "* * * policy choice on the promulgation of the human health criteria is for the adoption of a cancer risk level of 10^{-5}." The Director also indicated that "* * * future modifications of this risk level, whether it be to 10^{-4} or 10^{-6}, could be considered on a pollutant and subpopulation basis to produce a site specific risk assessment and protection of human health."

Vermont: Risk Level: 10^{-6}

On May 27, 1991, State submitted to EPA final water quality standards which reference the EPA section 304(a) criteria to be applied at a 10^{-6} risk level. However, the effective date of these standards is not until January 1, 1995. This delayed effective date was the reason Region I advised the State that the State did not comply with section 303(c)(2)(B).

Washington: Risk Level: 10^{-6}

During the summer of 1992, the State formally proposed and held public hearings on revisions to its water quality standards. The standards, scheduled for adoption in late November 1992, include a risk level of 10^{-6}.

On December 18, 1991, in its official comments on the proposed rule, the Department of Ecology urged EPA to promulgate human health criteria at 10^{-6}. Specifically, "The State of Washington supports adoption of a risk level of one in one million for carcinogens. If EPA decides to promulgate a risk level below one in one million, the rule should specifically address the issue of multiple contaminants so as to better control overall site risks."

The final phrase in § 131.36(c)(2) relating to the applicability of the rule was amended by deleting the text beginning "but only * * *" EPA received numerous comments that the Federal criteria should be implemented consistently with current State practices. EPA amended the language because the Agency had not intended to be inconsistent with the provisions of the water quality standards regulation (40 CFR 131.21(c)), which provides that a State water quality standard remains in effect even though disapproved by EPA, until the State revises it or EPA promulgates a rule that supersedes the State water quality standards.

Although not directly resulting in a change to the rule, this preamble clarifies, at the public's request, whether schedules of compliance were applicable to this rule. In Section E–3 EPA clarifies that schedules of compliance for these criteria are not provided for in these rules, but that such schedules of compliance are available in NPDES permits if authorized by State regulations. See *In the Matter of Star-Kist Caribe, Inc.*, NPDES Appeal No. 88–5, Before the Environmental Appeals Board, EPA. May 26, 1992.

Several deletions were made to the proposed human health criteria as a result of the Agency's review of data submitted in public comments and to reflect the pertinent impact of other relevant Agency actions. The revisions are as follows:

(1) Criteria for three pollutants included in the matrix of the proposed rule are not included in the final rule for (A) acenaphthylene, (B) benzo(ghi)perylene, and (C) phenanthrene. The criteria for these pollutants were removed because they are not recognized by the Agency as carcinogenic compounds nor do they have a reference dose that would allow the Agency to calculate a criterion level.

(2) Silver: The human health criteria for silver were deleted from this final rule because the criteria were developed based on a cosmetic effect impact and not a toxicity endpoint.

(3) Cadmium, Chromium, Selenium and Beryllium: As described below, the Agency has determined that the proposed criteria for these contaminants are no longer scientifically defensible and accordingly has withdrawn these criteria pending evaluation of relevant data regarding their toxicity. EPA notes that the criteria promulgated for aquatic life will provide adequate protection for human health in most instances.

(4) Methyl Chloride, Lead and 1,1,1, Trichloroethane: As described below, the Agency has determined that there is currently an insufficient basis for calculating human health criteria for these three contaminants. Accordingly, EPA has withdrawn the proposed criteria for these contaminants pending further analysis.

In addition to the above changes, the Agency is today withdrawing the human health criteria recommendations previously published in the 1980 Ambient Water Quality Criteria Documents for silver, cadmium, chromium, selenium, beryllium, lead,

methyl chloride, and 1,1,1, Trichloroethane. Summaries of the human health criteria were also published in Quality Criteria for Water, 1986. These summaries are also being officially withdrawn today.

EPA's final rule establishes a new § 131.36 in 40 CFR part 131 entitled, "Toxics Criteria for Those States Not Fully Complying with Clean Water Act, section 303(c)(2)(B)."

2. Scope

Subsection (a), entitled "Scope", clarifies that this Section is not a general promulgation of the section 304(a) criteria for priority toxic pollutants but is restricted to specific pollutants in specific States.

3. EPA Criteria for Priority Toxic Pollutants

As proposed, subsection (b) presents a matrix of the applicable EPA criteria for priority toxic pollutants. Section 303(c)(2)(B) of the Act addresses only pollutants listed as "toxic" pursuant to section 307(a) of the Act. As discussed earlier in this preamble, the section 307(a) list of toxics contains 65 compounds and families of compounds, which potentially include thousands of specific compounds. The Agency uses the list of 126 "priority toxic pollutants" for administrative purposes (see 40 CFR 131.36(b) herein). Reference in this rule to priority toxic pollutants, toxic pollutants, or toxics refers to the 126 priority toxic pollutants.

However, EPA has not developed both aquatic life and human health section 304(a) criteria for all of the 126 priority toxic pollutants. The matrix in paragraph (b) contains human health criteria in Column D for 91 priority toxic pollutants which are divided into criteria (Column 1) for water consumption (i.e., 2 liters per day) and aquatic life consumption (i.e., 6.5 grams per day of aquatic organisms), and Column 2 for aquatic life consumption only. The term aquatic life includes fish and shellfish such as shrimp, clams, oysters and mussels. The total number of priority toxic pollutants with criteria promulgated today differs from the total number of priority toxic pollutants with section 304(a) criteria because EPA has developed and is promulgating chromium criteria for two valence states with respect to aquatic life criteria. Thus, although chromium is a single priority toxic pollutant, there are two criteria for chromium for aquatic life. However, the human criterion is based on total chromium consistent with Agency policy. See pollutant 5 in § 131.36(b).

The matrix contains aquatic life criteria for 30 priority pollutants. These are divided into freshwater criteria (column B) and saltwater criteria (Column C). These columns are further divided into acute and chronic criteria. The aquatic life criteria are considered by EPA to be protective when applied under the conditions described in the section 304(a) criteria documents and in the "Technical Support Document for Water Quality-based Toxics Control." For example, waterbody uses should be protected if the criteria are not exceeded, on average, once every three year period. It should be noted that the criteria maximum concentrations (the acute criteria) are one-hour average concentrations and that the criteria continuous concentrations (the chronic criteria) are four-day averages. It should also be noted that for certain of the metals, the actual criteria are equations which are included as footnotes to the matrix. The toxicity of these metals are water hardness dependent and may be adjusted by determining appropriate water-effect ratios. The values shown in the table are based on a hardness expressed as calcium carbonate of 100 mg/l and a water-effect ratio of 1.0. Finally, the criterion for pentachlorophenol is pH dependent. The equation is the actual criterion and is included as a footnote. The value shown in the matrix is for a pH of 7.8 units.

Several of the freshwater aquatic life criteria are incorporated into the matrix in the format used in the 1980 criteria methodology which uses a final acute value instead of a continuous maximum concentration. This distinction is noted in footnote (g) to the table.

4. Applicability

Section 131.36(c) establishes the applicability of the criteria for each included State. It provides that the criteria promulgated for each State supersede and/or complement any State criteria for that toxic pollutant. EPA believes it has not superseded any State criteria for priority toxic pollutants unless the State-adopted criteria are disapproved or otherwise insufficient. The approach followed by the Agency in preparing § 131.36(d) is described in section E.2, and further rationale is provided in section E.3 of this preamble.

EPA's principal purpose today is to promulgate the toxics criteria necessary to comply with section 303(c)(2)(B). However, in order for such criteria to achieve their intended purpose the implementation scheme must be such that the final results protect the public health and welfare. In section F of this preamble a discussion focused on the factors in EPA's assessment of criteria for carcinogens. For example, fish consumption rates, bioaccumulation factors, and cancer potency slopes were discussed. When any one of these factors is changed, the others must also be evaluated so that, on balance, resulting criteria are adequately protective.

Once an appropriate criterion is selected for either aquatic life or human health protection, then appropriate conditions for calculating water quality-based effluent limits for that chemical must be established in order to maintain the intended stringency and achieve the necessary toxics control. EPA has included in this rule appropriate implementation factors necessary to maintain the level of protection intended. These factors are included in subsection (c).

For example, in order to do steady state waste load allocation analyses, most States have low flow values for streams and rivers which establish flow rates below which numeric criteria may be exceeded. These low flow values became design flows for sizing treatment plants and developing water quality-based effluent limits. Historically, these so-called "design" flows were selected for the purposes of waste load allocation analyses which focused on instream dissolved oxygen concentrations and protection of aquatic life. With the publication of the 1985 Technical Support Document for Water Quality Based Toxics Control (TSD), EPA introduced hydrologically and biologically based analyses for the protection of aquatic life and human health.[1] EPA recommended either of two methods for calculating acceptable low flows, the traditional hydrologic method developed by the U.S. Geological Survey and a biological based method developed by EPA. The results of either of these two methods may be used.

Some States have adopted specific low flow requirements for streams and rivers to protect designated uses against the effects of toxics. Generally these have followed the guidance in the TSD. However, EPA believes it is essential to include design flows for steady state analyses in today's rule so that, where

[1] These concepts have been expanded subsequently in guidance entitled "Technical Guidance Manual for Performing Wasteload Allocations, Book 6, Design Conditions," USEPA, Office of Water Regulations and Standards, Washington, DC. (1986). These new developments are included in Appendix D of the revised TSD. The discussion here is greatly simplified and is provided to support EPA's decision to promulgate baseline application values for instream flows and thereby maintain the intended stringency of the criteria for priority toxic pollutants.

States have not yet adopted such design flows, the criteria promulgated today would be implemented appropriately. The TSD also recommends the use of three dynamic models to perform wasteload allocations. Dynamic wasteload models do not generally use specific steady state design flows but accomplish the same effect by factoring in the probability of occurrence of stream flows based on the historical flow record. For simplicity, only steady state conditions will be discussed here. Clearly, if the criteria were implemented using inadequate design flows, the resulting toxics controls would not be fully effective, because the resulting ambient concentrations would exceed EPA's criteria.

In the case of aquatic life, more frequent violations than the once in 3 years assumed exceedences would result in diminished vitality of stream ecosystems characteristics by the loss of desired species such as sport fish. Numeric water quality criteria should apply at all flows that are equal to or greater than flows specified below. The low flow values are:

Aquatic Life
- acute criteria (CMC) 1 Q 10 or 1 B 3
- chronic criteria (CCC) 7 Q 10 or 4 B 3

Human Health
- non-carcinogens 30 Q 5
- carcinogens harmonic mean flow

Where:
- 1 Q 10 is the lowest one day flow with an average recurrence frequency of once in 10 years deteremined hydrologically;
- 1 B 3 is biologically based and indicates an allowable exceedence of once every 3 years. It is determined by EPA's computerized method (DFLOW model);
- 7 Q 10 is the lowest average 7 consecutive day low flow with an average recurrence frequency of once in 10 years determined hydrologically;
- 4 B 3 is biologically based and indicates an allowable exceedence for 4 consecutive days once every 3 years. It is determined by EPA's computerized method (DFLOW model);
- 30 Q 5 is the lowest average 30 consecutive day low flow with an average recurrence frequency of once in 5 years determined hydrologically; and
- the harmonic mean flow is a long term mean flow value calculated by dividing the number of daily flows analyzed by the sum of the reciprocals of those daily flows.

EPA is promulgating the harmonic mean flow to be applied with human health criteria for carcinogens. The concept of a harmonic mean is a standard statistical data analysis technique. EPA's model for human health effects assumes that such effects occur because of a long-term exposure to low concentration of a toxic pollutant. For example, two liters of water per day for seventy years. To estimate the concentrations of the toxic pollutant in those two liters per day by withdrawal from streams with a high daily variation in flow, EPA believes the harmonic mean flow is the correct statistic to use in computing such design flows rather than other averaging techniques.[2]

All waters, whether or not suitable for such hydrologic calculations but included in this rule (including lakes, estuaries, and marine waters), must attain the criteria promulgated today. Such attainment must occur at the end of the discharge pipe, unless the State has a mixing zone regulation. If the State has a mixing zone regulation, then the criteria would apply at the locations stated in that regulation. For example, the chronic criteria (CCC) must apply at the geographically defined boundary of the mixing zone. Discussion of and guidance on these factors are included in the revised TSD in chapter 4.

EPA is aware that the criteria promulgated today for some of the priority toxic pollutants are at concentrations less than EPA's current analytical detection limits. Analytical detection limits have never been an acceptable basis for setting standards since they are not related to actual environmental impacts. The environmental impact of a pollutant is based on a scientific determination, not a measuring technique which is subject to change. Setting the criteria at levels that reflect adequate protection tends to be a forcing mechanism to improve analytical detection methods. (See 1985 Guidelines, page 21.) As the methods improve, limits closer to the actual criteria necessary to protect aquatic life and human health became measurable. The Agency does not believe it is appropriate to promulgate criteria that are not sufficiently protective.

EPA does believe, however, that the use of analytical detection limits are appropriate for determining compliance with NPDES permit limits. This view of the role of detection limits was recently articulated in guidance for translating dioxin criteria into NPDES permit limits which is the principal method used for water quality standards enforcement.[3] This guidance presents a model for addressing toxic pollutants which have criteria recommendations less than current detection limits. This guidance is equally applicable to other priority toxic pollutants with criteria recommendations less than current detection limits. The guidance explains that standard analytical methods may be used for purposes of determining compliance with permit limits, but not for purposes of establishing water quality criteria or permit limits. Under the Clean Water Act analytical methods are appropriately used in connection with NPDES permit limit compliance determinations. Because of the function of water quality criteria, EPA has not considered the sensitivity of analytical methods in deriving the criteria promulgated today.

EPA has added provisions in paragraph (c)(3) to determine when fresh water or saltwater aquatic life criteria apply. In response to comments, this provision was expanded to incorporate a time parameter to better define the critical condition. The structure of the paragraph is to establish presumptively applicable rules and to allow for site-specific exceptions where the rules are not consistent with actual field conditions. Because a distinct separation generally does not exist between fresh water and marine water aquatic communities, EPA is establishing the following: (1) The fresh water criteria apply at salinities of 1 part per thousand and below at locations where this occurs 95% or more of the time; (2) marine water criteria apply at salinities of 10 parts per thousand and above at locations where this occurs 95% more of the time; and (3) at salinities between 1 and 10 parts per thousand the more stringent of the two apply unless EPA approves the application of the freshwater or saltwater criteria based on a biological assessment. The percentiles included here were selected to minimize the chance of overlap, that is, one site meeting both criteria. Determination of these percentiles can be done by any reasonable means such as interpolation between points with measured data or by the application of calibrated and verified mathematical models (or hydraulic models). It is not EPA's intent

[2] For a description of harmonic means see "Design Stream Flows Based on Harmonic Means," Lewis A. Rossman, J. of Hydraulics Engineering, Vol. 116, No. 7, July, 1990. This article is contained in the record for this proposal.

[3] Strategy for the Regulation of Discharges of PHDDs and PHDFs from Pulp and Paper Mills to Waters of the United States, memorandum from the Assistant Administrator for Water to the Regional Water Management Division Directors and NPDES State Directors, May 21, 1990.

to require actual data collection at particular locations.

In the brackish water transition zones of estuaries with varying salinities, there generally will be a mix of freshwater and saltwater species. Generally, therefore, it is reasonable for the more stringent of the freshwater or saltwater criteria to apply. In evaluating appropriate data supporting the alternative set of criteria, EPA will focus on the species composition as its preferred method.

This assignment of criteria for fresh, brackish and marine waters was developed in consultation with EPA's research laboratories at Duluth, Minnesota and Narragansett, Rhode Island. The Agency believes such an approach is consistent with field experience.

In paragraph (c)(4)(i) EPA included a limitation on the amount of hardness that EPA can allow to antagonize the toxicity of certain metals (see footnote (e) in the criteria matrix in paragraph (b) of the rule). The data base used for the Section 304(a) criteria documents for metals do not include data supporting the extrapolation of the hardness effects on metal toxicity beyond a range of hardness of 25 mg/l to 400 mg/l (expressed as calcium carbonate). Thus, the aquatic life values for the CMC (acute) and CCC (chronic) criteria for these metals in waters with a hardness less than 25 mg/l, must nevertheless use 25 mg/l when calculating the criteria; and in waters with a hardness greater than 400 mg/l, must nevertheless use 400 mg/l when calculating the criteria.

In paragraph (c)(4), subparagraphs (i) and (ii) are the same as proposed. Subparagraph (iii) was added to incorporate the water-effect ratio guidance described in Section F–7 of this preamble.

Subsection (d) lists the States for which rules are being promulgated. For each identified State, the designated water uses impacted (and in some cases the specific waters covered) and the criteria are identified. In all cases, the criteria are applied to use designations adopted by the States; EPA has not promulgated any new use classifications in this rule although the Agency has the authority to do so.

H. (Reserved)

I. Response to Public Comments

The Response to Public Comment Section is organized into several subsections, as follows:

1. Legal Authority
2. Science
3. Economics
4. Implementation
5. Timing and Process
6. State Issues

I. Legal Authority

1. *Comment:* Several comments were received that in various ways suggested that EPA exceeded its authority in proposing to establish Federal water quality standards for States because it was alleged standards are to be developed by the States. These comments tended to emphasize the primary role attributed to States under the Clean Water Act in establishing standards with some going so far as to indicate that States should have full and unrestrained authority to act. In this mode, a comment was offered that all the Clean Water Act requires is a good faith effort on the part of a State to meet the statutory requirement. A related comment suggested that EPA can promulgate standards only after specifically disapproving a State's standard. There were opposing views offered suggesting that EPA not only has the authority to act, it is obliged to act.

Response: The Clean Water Act assigns States the primary role in establishing water quality standards and EPA has continually supported that role before Congress in reauthorization hearings on the Clean Water Act. The Act, however, also defines a role for EPA in terms of reviewing and either approving or disapproving State-adopted standards and of promulgating Federal standards. Sections 303(c) (3) and (4) of the Act clearly indicate that Congress did not intend States to have full and unrestrained authority to set standards. EPA's action in developing this rulemaking is not to be taken as a change in EPA policy in dealing with the States. Our policy continues to be that we prefer States to adopt their own standards but we will use our promulgation authority when warranted. EPA believes that the need to control the discharge of toxic pollutants to protect human health and the environment, the establishment of the statutory requirement for addressing toxic pollutants, and the responsibility for EPA review of State water quality standards for consistency with the Clean Water Act coupled with the inclusion of a process for Federal promulgation in the Act strongly supports EPA's promulgation authority. Moreover, this elaborate process also makes clear that Congress intended that States do more than just evidence a good faith effort.

As described in detail in section E of this Preamble, the Clean Water Act authorizes and establishes a timetable for Federal promulgation action. Under the Clean Water Act, States must adopt water quality standards to protect public health and welfare and enhance the quality of water. Section 303(c)(4) of the Clean Water Act authorizes the Administrator of EPA to promulgate Federal standards applicable to a State when: (1) The State submits standards for EPA approval and EPA determines that the State standards fail to meet the requirements of the Act, or (2) in any case where the Administrator determines a new or revised standard is necessary to meet the requirements of the Act. EPA's implementing regulations also make clear that the Administrator may take action to promulgate either when a State fails to adopt changes specified in a disapproval or in any case where the Administrator determines a new or revised standard is necessary (40 CFR 131.22). Both these provisions are used to support this action. Although in fact EPA did notify the States in a **Federal Register** notice of April 19, 1990, and in a letter to the Administrator of the responsible State agency of each potentially affected State on April 9, 1990, the Administrator is not required in exercising the authority of section 303(c)(4) to specifically disapprove a State's standard when exercising the authority to promulgate Federal standards. Historically, in eight of the nine Federal promulgation actions completed, the Agency based its action on disapproval of State standards but in the ninth instance, a criterion for chloride in the Commonwealth of Kentucky, there was no disapproval involved (see 52 FR 9102, March 20, 1987).

2. *Comment:* Closely related to the above comments were others that asserted that EPA is empowered to promulgate Federal standards only on a State-by-State, waterbody-by-waterbody, pollutant-by-pollutant approach, and that Congress did not intend that national standards be developed. In the same vein, it was suggested that it would be easier for the public to respond if each State were proposed in a separate rule.

Response: Neither EPA nor the States are directed by either the statute or the implementing water quality standards regulation to establish standards in the manner suggested by the first comment. EPA's implementing regulation and policies certainly allow EPA to act in this way but it is not required to do so. Section 131.22(b) of the water quality standards regulation specifically indicates that the Administrator "* * * may propose and promulgate a regulation applicable to one or more states * * *."

We do not see this action as establishing national standards as it

expressly limits the application of the criteria in the final rule to the States named in the rule. (40 CFR 131.36(a))

As explained more fully in the preamble, water quality standards consist of designated beneficial uses of a State's waters and the criteria necessary to protect those uses. The comment urges a waterbody-by-waterbody approach. For purposes of this rulemaking, EPA is presuming that the States have adequately made such designated use determinations for its waters. EPA is merely adding criteria for priority toxic pollutants on a State-by-State basis sufficient to protect the State's designated uses. EPA believes its approach accomplishes the commenters objectives but in a more comprehensive manner. Moreover, EPA doesn't believe this approach is more burdensome on dischargers in affected States. Because permit limits are incorporated into NPDES permits only for constituents having a reasonable potential to exceed State water quality standards, a discharger does not receive a limit in its permit unless its discharge contains the pollutant. Thus, comprehensive criteria coverage in water quality standards does not translate into unnecessary permit limits.

EPA is unpersuaded that somehow it would have been easier or more efficient for the public to comment on twenty-two separate rules covering the same issues than to deal with the issues in a single rulemaking. It would most likely result in EPA receiving the same type comments on each separate rule which would do nothing other than increase the administrative burden to EPA and further delay getting water quality standards in place.

3. *Comment:* A comment was made that several proposals for reauthorizing the Clean Water Act considered by Congress in 1991 contemplated giving EPA authority to promulgate Federal standards thus indicating that EPA does not have such authority now.

Response: A response to a comment above describes EPA's current authority to act under terms of the Clean Water Act. The principal CWA reauthorization bills considered by Congress in 1991 would neither question nor limit this existing authority. Rather they would alter the water quality standards program as it now exists by providing specific deadlines for States to act in adopting standards based on recommendations published by EPA and then mandating Federal promulgation by a date certain. Rather than suggesting that EPA does not now have such authority, these proposals support EPA's view that Congress is becoming increasingly impatient with the slow pace at which States adopt new criteria recommendations issued by EPA under section 304(a) and is willing to consider supplementing EPA's current discretionary promulgation authority.

4. *Comment:* Several comments suggested that EPA's promulgation action should be limited to the waterbodies and pollutants reported on the section 304(l) lists or information contained in section 305(b) Water Quality Inventory Reports. The basic thrust of these comments were that such lists, prepared by the States, contain sufficient information necessary to identify all potential toxic problem areas within the State. Some of these commenters also suggested these limited sources were more accurate than the broader approach relied on in EPA's proposal.

Response: A detailed description of the approach the Agency followed in developing this final rule is included in section E–2 of this preamble. As indicated in that section, EPA used information from a variety of sources in determining which criteria to include in the rule for each State. The Agency did not rely on a single source, such as 304(l), 305(b), or any other set of information.

Each of the data sources suggested by the commenters are valuable tools which serve specific purposes under the Clean Water Act. However, as described in section E–2, each source has limitations either as to coverage of waterbodies or sources of pollution, extent of information included, or a narrow focus because of their particular purpose. Even when information from a variety of sources is used as described as the Agency's "strawman", there remain inherent weaknesses in the underlying data.

EPA believes there is a greater possibility of achieving the statutory purpose of protecting water uses by relying on a range of available data sources rather than selecting one or two narrow databases. EPA believes that by not directing the Agency to use the results of the other statutory sections the commenters identified, and by use of the "could reasonably be expected to interfere" language, Congress directed the Agency to be more inclusive rather than less inclusive in the applicable criteria coverage. Thus, EPA urged a low threshold for inclusion of priority toxic pollutants in the guidance transmitted to the States.

5. *Comment:* One commenter argued that EPA's strawman systematically overestimates the presence of priority toxic pollutants because of its use of industry wide default assumptions for particular SIC codes. The commenter further argues that comparisons between the number of toxics adopted in States who evaluated available data for toxics and established criteria based on that data to the results of the strawman predictions show that a substantially smaller number of pollutants resulted. The commenter urged that only section 304(l) short list pollutants should be used for this rule.

Response: EPA's strawman analysis was designed to use all of the Agency's data bases to develop candidate lists of toxics on a State specific basis. States were urged to use this information as a starting point in evaluating the need for particular priority toxic pollutants.

EPA intentionally designed the analysis to yield a list of suspected priority toxic pollutants that would not understate the potential presence of such pollutants. As noted in the preamble, State monitoring information, for example, as used in the section 305(b) water quality reports, is not comprehensive in either geographic or parametric coverage. That is the reason EPA used the industry profile data—to maximize the data base.

Thus, EPA was providing the States with a listing that identified potential toxics and where those were potentially located. The State was encouraged to verify the lists. EPA has not used the list to identify pollutants for States included in this rulemaking. Rather EPA has viewed the analysis as supporting its contention that priority toxics exist in State waters and therefore, a broad promulgation for priority toxic pollutants is justified.

In arguing for limiting the promulgation to the section 304(l) short list pollutants, the commenter failed to compare the criteria the example State adopted in its water quality standards versus the pollutants identified in its section 304(l) short list. The State used as an example placed substantially more criteria in their standards than in their section 304(l) short list. The reason for this disparity is because the threshold for inclusion in water quality standards is much lower than for inclusion in the section 304(l) short list.

6. *Comment:* EPA solicited comment concerning the acceptability of the review process used by EPA to determine compliance with the Act—this process is described in section D of this preamble. EPA received few public comments in response to this request, beyond the general comment that EPA exceeded its authority to promulgate Federal standards, an issue addressed earlier in this section. One view offered was that the review process used by the Agency makes it difficult to evaluate whether adequate consistency was

applied by the Regions in evaluating acceptability of State standards.

Response: Each State's water quality standards submission is different. They require case specific review for adequacy and consistency with environmental and human health requirements and statutory and regulatory provisions. The statute allows for State flexibility. Given these factors, EPA established broad guidance parameters and Regional Offices reviewed each submission for consistency. EPA Headquarters staff exercised oversight on this process to assure appropriate inter-Regional consistency. This process did not produce identical standards in each State but that is not required. All State standards that were approved were judged by EPA to meet the twin tests of protection of water body uses and scientific defensibility.

Both the criteria development and the standards programs are iterative programs and EPA expects to request States to continue to focus on adopting criteria for additional toxic pollutants and revising existing criteria in future triennial reviews which new information indicates is appropriate. In no sense should States or the regulated community assume that the task of addressing pollution from toxics is completed by what the States have adopted or EPA is promulgating in the way of criteria for toxic pollutants.

7. *Comment:* EPA did not propose criteria for inclusion in State standards when the criteria were based on organoleptic effects. The Agency specifically solicited comment on this issue. Most of the comments received indicated that EPA was correct in not including such criteria in the rule. There were several comments to the contrary indicating that such criteria should be included because the pollutants are on the section 307(a) list and EPA did issue a criteria recommendation for the pollutant under section 304(a). Therefore, they argue that the requirements of section 303(c)(2)(B) apply.

Response: In the final rule, EPA has not included criteria for pollutants where the section 304(a) criteria recommendation was based on organoleptic effects. Such effects cause taste and odor problems which may increase treatment costs in drinking water or the selection by the public of alternative but less protective sources of drinking water and may cause tainting of or off flavors in fish flesh and other edible aquatic life reducing their marketability and resource value. EPA is also aware that some States have adopted such criteria in their standards. Nonetheless, because section 303(c)(2)(B) focuses on toxicity of the priority toxic pollutants, EPA believes its rule should likewise focus on toxicity. The 304(a) criteria documents for these pollutants do not recommend a criteria based on toxicity and therefore such criteria are outside the intent of a rulemaking for section 303(c)(2)(B).

This decision notwithstanding, it should be noted that the criteria based on organoleptic effects still represent the Agency's best scientific recommendations at this time and are within the range of scientific acceptability for a State's use.

8. *Comment:* One commenter asserted that EPA's Option 3 (i.e. adoption of a narrative standard coupled with a translator mechanism to compute a derived numeric limit) of its December 1988 guidance on complying with the Act does not meet the legal requirements of section 303(c)(2)(B). It is argued that EPA should therefore disapprove all State water quality standards which rely solely on a narrative "free from" toxics water quality standard and a translator mechanism. A related comment is that this translator procedure may be appropriate as a supplement to adopting specific numeric criteria.

Response: The legality of Option 3 is not an issue in this rulemaking. We are not promulgating any water quality standards based on Option 3. Option 3 is only a potential issue in the subsequent approval of standards for those States which are not included in this rule.

Nevertheless, as noted in the December 1988 guidance, EPA believes the combination of a narrative standard along with a translator mechanism as a part of a State's water quality standards can satisfy the substantive requirements of the Clean Water Act. Such translators would need to be subject to all the State's legal and administrative requirements for adoption of standards plus review and either approval or disapproval by EPA, and result in the development of derived numeric criteria for specific section 307(a) toxic pollutants.

EPA's guidance presented several factors that EPA expected to be incorporated into a translator process in order to comply with the Act. In essence, EPA expected that the technical mechanism used would need to be equivalent to a criteria development protocol. That is, it would need to include an appropriate number of sensitive species using suitable testing and analytical methodologies. If established and applied correctly, EPA has indicated that it could meet the legal requirements of section 303(c)(2)(B). The central objective of section 303(c)(2)(B)—establishing chemical specific numeric limits—is achieved by this approach. There is no statutory bar to it and the Agency sees no reason not to continue to support this approach by States.

Ultimately, EPA believes all State toxic control programs will be strengthened by adoption of both chemical specific standards and a translator mechanism for those pollutants where water quality criteria have yet to be developed.

9. *Comment:* EPA invited comment on whether to promulgate a translator mechanism for the States in this final rule. A translator mechanism would enable the States to derive numeric limits for pollutants beyond those in this promulgation based on a State's general narrative criterion. The Agency received comments both supporting and opposing this approach.

Response: While a translator mechanism could be a valuable supplement to State standards to deal with toxics for which no section 304(a) criteria recommendation is available, it is not necessary for EPA to promulgate a translator at this time to meet the objectives of section 303(c)(2)(B). Today's promulgation of chemical specific criteria fulfills that obligation. For that reason a translator mechanism is not included in today's final action. However, EPA believes that such a mechanism should be available in all States. Therefore, in revisions to the basic water quality standards regulation, EPA may propose a requirement for a translator mechanism which would be applicable to all jurisdictions included in the standards program.

10. *Comment:* Comments were received that EPA is attempting to establish use classifications in this rule and that such action is a right belonging to a State.

Response: The use classifications to which Federal criteria are applied in this rule are the classifications established and defined by each State affected by the rule. EPA is not creating State use classifications nor assigning use classifications to any water bodies in this rule. In the few instances described in Section G of this preamble, appropriate adjustments to uses and criteria were made as necessary to accurately reflect State use classifications. Further, EPA believes the regulated community is fully aware of the uses adopted by a State and to which water bodies the uses apply. Specific revisions in the rule pertaining to State use classifications are discussed

in subsection 6 of the Response to Public Comments Section.
